INSTRUCTIONS FOR PREPARATION
OF EXHIBIT PB-10

The following instructions apply to all appropriations and funds:

Indicate in the heading the name of the submitting component, subject, date, and component submission control number. Leave "DoD Comptroller Serial No." blank.

Column (1): List the appropriation or fund and the Budget Subactivity Number. For the procurement appropriations, P-1 line items will be shown. For the RDT&E appropriations, program elements will be shown.

Columns (2), (3) and (4): List the TOA changes. If there are also changes in financing adjustments, show these separately and then show the change in budget authority. The military personnel amount to be used here will be the sum of the products of the workyears/\$ rates shown to the right, using the standard rate.

Column (5): List the military or civilian personnel categories affected by the change. *Military personnel change will be in end-strength (E/S) and civilian personnel change in full time equivalent (FTE).* Use the categories illustrated in Exhibit PB-4.

Columns (6), (7), (9), (10), (12) and (13): List the military end strength and workyear changes, by activity. *Likewise, list civilian FTE changes by activity.*

Columns (8), (11) and (14): Show the average salary at which these changes were priced.

If there are no personnel changes, Columns (5) through (14) will be left blank.

Show a total for increases and decreases.

The outyear impact of the additional budget submission will be included at the end of Exhibit PB-10. This will show the net change by appropriation budget subactivity number for each of the applicable outyears.

Narrative justification must also accompany Exhibit PB-10.

NARRATIVE JUSTIFICATION**

(Dollars in Thousands)

FY 19XX Pending Request

FY 19XX Proposed Amendment

FY 19XX Revised Request

Budget Activity: Other Missiles

Justification of proposed amendment.

AGM-69B SRAM. Deletes the \$xx,xxx,xxx FY 19XX requirement. Due to the recent evolution of the Air Launch Guise Missile (ALCM) as an effect weapon system and the continued ability to use the B-52 bomber well into the 1980's, the President directed the B-1 production be halted. With the decision to not deploy the B-1, the Air Force requirement for the SRAM-B which was to be used on the B-1 is no longer valid.

Air Launched Cruise Missile. The Air Launched Cruise Missile (ALCM) is an aerodynamic air-to-ground strategic missile propelled by a turbo-fan engine. It has a high degree of accuracy through the combination of inertial guidance and terrain correlation update. The missile is designed to be carried internally and/or externally on the B-52. The ALCM is to be employed from a stand-off position against a wide variety of preselected lightly or undefended ground hard targets. This budget amendment requests an additional \$xx,xxx,xxx to accelerate the ALCM Initial Operating Capability (IOC).

An advance copy of this DD Form has been sent to DFOISR, OASD(PA).</p>			
GUIDELINES			
I. SECURITY A. GENERAL. Review must be accomplished by officials competent to judge the security aspects of the subjects involved and to provide a consistent and defensible security position. B. MARKING 1. Use black lead pencil. 2. Enclose with brackets [] information to be deleted. 3. Make deletions as limited as possible, considering whether the total context may contain clues to the information deleted.		II EDITORIAL A. GENERAL. Edit to correct inaccuracies. B. MARKING. 1. Use black lead pencil. 2. Line through all words or figures for which substitute language or figures are entered. Do not use brackets. 3. Print or write all entries legibly. 4. Use standard proofreaders markings. 5. Do not change statements by committee members. Note inaccuracies in the margin.	
REMARKS			
FORWARDING CERTIFICATE			
TO: Director, Freedom of Information and Security Review, OASD (PA)			Date: _____
Portions of the attached transcript which require deletion in the interests of national security before publication have been rocketed. This action represents the considered judgement of this department/agency that the information so marked warrants the protection of security classification.

DD Form 2232 (\$\$\$) Budget Estimates Recording/Coding Instructions (\$\$\$)

1. Column 1, Budget Plan: Obligation Plan data for Direct and Reimbursable budget activities will be indicated by coding a 2 over the preprinted 1 in Column 1.
2. Columns 2 thru 14, budget Name/Code File: Enter the code exactly as it appears in the "Budget Account Title File Listing".
Columns 2 thru 5 will be the Appropriation (Treasury) Code.
Columns 6 thru 8 will be the DoD Component/Suffix Codes (Section 010506 of Volume 2A of the DoD Financial Management Regulation, DoD 7000.14-R). Values will be entered left justified.
Columns 9 thru 11 will be the Budget Activity Code. Column 9 will be blank for 2 digit Budget Activity Codes listed therein.
Columns 12 thru 14 will be the Budget Subactivity Code.
3. Column 15, Fiscal Year Program: For Procurement, RDT&E, Military Construction Family Housing, and those Operation and Maintenance accounts with multiple year availability, enter the last digit of the applicable fiscal year program.
4. Column 16, Supplementary Code: Enter a value only when the transaction is associated with a supplemental program. The following are valid supplemental codes:

 Q- Supplemental,
 P - Legislative proposal, not subject to PAYGO,
 L - Appropriation language to be transmitted later,
 S - Legislative proposal, subject to PAYGO,
 R - Rescission Proposal.
5. Columns 32 thru 70: Are used for recording submission estimates for PY, CY, BY1, and BY2.
Minus signs: When appropriate, will be coded to the left of the most significant digit.

NOTE: Entries in columns 32-70 for Obligation Plan, Expenditure Tail, Object Classification and Budget Plan for all Financing and Budget Authority lines will beat the level of the PB-2 & PB-2A Exhibits shown in Section 010702 of the Financial Management Regulation.

DD Form 2233 (\$\$\$) Decision Recording/Coding Instructions (\$\$\$)

1. Column 1, Budget Plan: Obligation Plan data for Direct and Reimbursable budget activities will be indicated by coding a 2 over the preprinted 1 in Column 1.

2. Columns 2 thru 14, Budget Name/Code File: Enter the code exactly as it appears in the "Budget Account Title File Listing."
 Columns 2 thru 5 will be the Appropriation (Treasury) Code.
 Columns 6 thru 8 will be the DoD Component/Suffix Codes (Section 010506 of Volume 2A of the DoD Financial Management Regulation DoD 7000.14-R).
 Columns 9 thru 11 will be the Budget Activity Code. Column 9 will be blank for 2 digit Budget Activity Codes listed therein.
 Columns 12 thru 14 will be the Budget Subactivity Code.

3. Column 15, Fiscal Year Program: for Procurement, RDT&E, Military Construction, Family Housing, and those Operation and Maintenance accounts with multiple year availability, enter the last digit of the applicable fiscal year program.

4. Column 16, Supplemental Code: enter a value only when the transaction is associated with a supplemental program. The following are valid supplemental codes:
 Q - Supplemental,
 P - Legislative proposal, not subject to PAYGO,
 L - Appropriation language to be transmitted later,
 S - Legislative proposal, subject to PAYGO,
 R - Rescission Proposal.

5. Columns 17 thru 22 (OSD Use): Decision Number is the number identifying Secretarial decisions.

<u>DCN No. Illust.</u>	<u>1 7</u>	<u>1 8</u>	<u>1 9</u>	<u>2 0</u>	<u>2 1</u>	<u>2 2</u>
DCN	0	0	1

DD Form 2235 Personnel Budget Submission Recording/Coding Instructions

1. Columns 2 thru 14, Budget Name/Code File: Enter the code exactly as it appears in the "Budget Account Title File Listing."
Columns 2 thru 5 will be the Appropriation (Treasury Code).
Columns 6 thru 8 will be the DoD Component/Suffix Codes (Section 010506 of the DoD Financial Management Regulation, DoD 7000.14-R) for *civilian full-time equivalents (FTEs)*. For military end strengths code the military component value in combination with the valid defense agency Suffix Code. Values will be entered left justified.
Column 9 will be blank.
Columns 10 and 11 will be "20".
Columns 12 thru 14 will be the Budget Subactivity Code.

2. Columns 15 and 16, Civilian FTE Personnel Category Codes are as follows:

01	Civ, US DH	03	Civ, Fgn DH	05	Civ, Fgn Ind
----	------------	----	-------------	----	--------------

3. Columns 15 and 16, Military End Strength Personnel Category Codes areas follows:

21	Off, A	23	Enl, A	25	Cadets, A
31	Off, N	33	Enl, N	35	Cadets, N
41	Off, MC	43	Enl, MC	55	Cadets, AF
51	Off, AF	53	Enl, AF		

4. Columns 15 and 16, Selected Reserve Personnel Category Codes are as follows:

61	Off, Trained in Units	71	Off, Training Pipeline
62	Enl, Trained in Units	72	Enl, Training Pipeline
63	Off, IMAs	81	Off, Full-time Active Duty
64	Enl, IMAs	82	Enl, Full-time Active Duty

These codes are valid for all Reserve appropriation accounts, and with the exception of 63 and 64, are also valid for all National Guard appropriation accounts.

5. Columns 32 thru 70: Are used for recording initial *FTE estimates for Civilian Personnel* and initial end strength estimates Military and Selected Reserve Personnel for PY, CY, BY1, and BY2. Entries will be coded right justified with leading spaces in these columns, for each amount.

Minus signs: When appropriate, will be coded to the left of the most significant digit.

DD Form 2236 Personnel Decision Recording/Coding Instructions

1. Columns 2 thru 14, Budget Name/Code File: Enter the code exactly as it appears in the "Budget Account Title File Listing".
Columns 2 thru 5 will be the Appropriation (Treasury) Code.
Columns 6 thru 8 will be the DoD Component/Suffix Codes (Section 010506 of the DoD Financial Management Regulation, DoD 7000.14-R) for *civilian full-time equivalent (FTE) personnel data*. For military end strengths, code the military component value in combination with the valid defense agency Suffix Code. Values will be entered left justified.
Column 9 will be blank.
Columns 10 and 11 will be "20".
Columns 12 thru 14 will be the Budget Subactivity Code.
2. Columns 15 and 16, Civilian FTE Personnel Category Codes are as follows:

01 Civ, US DH	03 Civ, Fgn DH	05 Civ, Fgn Ind
---------------	----------------	-----------------
3. Columns 15 and 16, Military End Strength Personnel Category Codes are as follows:

21 Off, A	23 Enl, A	25 Cadets, A
31 Off, N	33 Enl, N	35 Cadets, N
41 Off, MC	43 Enl, MC	55 Cadets, AF
51 Off, AF	53 Enl, AF	
4. Columns 15 and 16, Selected Reserve Personnel Category Codes are as follows:

61 Off, Trained in Units	71 Off, Training Pipeline
62 Enl, Trained in Units	72 Enl, Training Pipeline
63 Off, IMAs	81 Off, Full-time Active Duty
64 Enl, IMAs	82 Enl, Full-time Active Duty

These codes are valid for all Reserve appropriation accounts, and with the exception of 63 and 64, are also valid for all National Guard appropriation accounts.
5. Columns 17 thru 22 (OSD Use): Decision Number is the number identifying Secretarial decisions.

<u>DCN No. Illust.</u>	<u>17</u>	<u>18</u>	<u>19</u>	<u>20</u>	<u>21</u>	<u>22</u>

SD 463-2 Construction System Database Decision Recording Instructions

1. **Columns 1 thru 20: Treasury Code, Component Code, Suffix, Budget Activity Code, Location and Project ID.** - Code exactly as it appears in the Construction Nomenclature List.
2. **Column 21: Action Code** - This position is always coded "9".
3. **Columns 22 thru 23: Program Fiscal Year** - Enter the last two digits of the applicable fiscal year.
4. **Columns 24 thru 25: Reserved** - Leave these positions blank.
5. **Column 26: Cost Type** - Cost Type codes authorized for use are:

<u>Cost Type Code</u>	<u>Cost Type</u>
A	Program Cost (Adds to appropriation as well as authorization totals.)
M	Memo Non Add (Included in authorization totals but <u>not</u> included in appropriation totals.)

6. **Columns 27 thru 28: Action Document Code** - Enter one of the following codes:

01	Program Change Decision
02	Program Budget Decision
04	Program Decision Memorandum
16	Congressional Action

7. **Columns 29 thru 34: Document Decision Number** - Enter the decision number as follows: (The initial budget data must show the PBD wherein the resources for this project will be addressed, and position 32 must contain an "S".)

<u>PBD No. Illust.</u>	<u>Decision Number</u>					
	<u>29</u>	<u>30</u>	<u>31</u>	<u>32</u>	<u>33</u>	<u>34</u>
PBD	3	0	1			
PBD, Change (1st)	3	0	1	C		
PBD, Change (2nd)	3	0	1	C	2	
Other SecDef Decision	P	0	1			

8. **Columns 35 thru 40: Approval Date** - Enter the date of the document decision in the format - year month day, i.e. 860823. (For the initial budget submission, use the date of the Program decision Memorandum.)
9. **Columns 41 thru 48: Program Cost** - Enter the amount (total or delta to previous figure). in thousands of dollars, right justified. If the value to be entered is negative, enter a minus sign in the column to the immediate left of the dollar value (e.g. -4328).

Exhibit SD 462-2N Construction System Data Base

SD 463-2N Construction System Nomenclature recording Instructions

1. **Columns 1 thru 9:** Treasury Code, Component Code, Suffix, Budget Activity Code - *Enter as shown in DoD 7000.14-R, Volume 2A, Chapter 1, the DoD Financial Management Regulation.*
2. **Column 10 thru 11:** State and Country Code - *Enter the two character code as given in DoD 7000.14-R, Volume 2A, Chapter 1, the DoD Financial Management Regulation.*
3. **Columns 12 thru 14:** Installation Code - Enter a three digit (numeric only) code that will uniquely identify the installation within the state/country.
4. **Columns 15 thru 20:** Project Identification Number - Enter a six digit (numeric only) code that will uniquely identify a project for the installation.
5. **Column 21:** Action Code - Enter a one digit code as follows (see *DoD 7000.14-R, Volume 2A, Chapter 1, the DoD Financial Management Regulation*).
 - 1 - To identify the addition of a major command;
 - 2 - To identify a change to a major command title already on file;
 - 3 - To identify the addition of an installation title record;
 - 4 - To identify a change to an installation title already on file;
 - 5 - To identify changes to a project record already on file. (Complete columns 1-23 and one or more of the following to be changed: command, major FYDP program, facility category, special interest, authorization code, and/or project title.)
6. **Columns 22 thru 23:** Program Fiscal Year - Enter the last two digits of the applicable year.
7. **Columns 24 thru 25:** Major Command - Enter the two digit command code.
8. **Columns 26 thru 27:** Major FYDP Program - Enter the two digits of the applicable major FYDP program.
9. **Columns 35 thru 37:** Facility Category Code - Enter the appropriate three digit facility category code as prescribed in DoDI 4165.14.
10. **Column 38:** Special Interest - Leave blank or enter one of the following codes, as appropriate:
 - 1 - Energy Conservation
 - 2 - Air Pollution Abatement
 - 3 - Water Pollution Abatement
 - 4 - Noise Pollution Abatement
11. **Column 39:** Authorization - Enter an "X" if the project is subject to authorization. Enter a "P" if the project was authorized for Appropriation in prior year. Enter a "Y" if the project was authorized in prior year.
12. **Columns 40 thru 81:** Title - Enter the title of the major command, installation or project as appropriate.

CHAPTER 2

MILITARY PERSONNEL APPROPRIATIONS

0201 GENERAL

020101 Purpose

A. This Chapter prescribes the justification materials required for the Military Personnel appropriations for both the Active and the Reserve Forces to support the budget estimates submission and the presentation of the President's budget submission to the Congress.

B. The following appropriations and accounts are covered:

Section

020201

- Active Military Personnel, Army, Navy, Marine Corps, Air Force

020301

- Reserve Military Personnel
- Army, Navy, Marine Corps, Air Force
- National Guard Military Personnel, Army, Air Force

020401

- Military Personnel Retirement Requirements

020502

- Military Retirement Fund/Education Benefits Fund

C. Fund requirements for the Military Personnel appropriations will be presented using the budget and fiscal accounting classifications as set forth in sections 0202 and 0203. Budget estimates will be based upon approved military personnel/strength programs as contained in the exhibits required in this Chapter, and in accordance with such special instructions as may be issued by the Office of the Under Secretary of Defense Secretary of Defense (P&R) as part of the call for the services' military strength programs. **All exhibits will be on a gross basis; i.e., include both direct and reimbursable personnel.**

D. Commutation of Subsistence-in-kind Rates. For the September 15 submission, subsistence-in-kind average daily food allowances will be developed by using the Food Cost index to compute the August Basic Daily Food Allowance (BDFA). The rates should be increased by one-half of the FY 19CY military personnel non-pay price escalation to

determine the CY budget rates for subsistence-in-kind. Any costs that exceed the amount projected in the FY 19CY President's budget will be included in the estimates within current availability.

E. Budgeting for Inflation.

Anticipated inflation will be included in the September 15 estimates for clothing, subsistence-in-kind, the commercial portions of permanent change of station travel, and temporary lodging allowances overseas. To ensure adequate funding for variable housing allowances, anticipated housing cost inflation will be added. The inflation rates to be used will be based upon approved price escalation indices provided as an enclosure to the annual FY 19CY revised and FY 19BY1/BY2 Budget Estimates Guidance memorandum.

F. Military End Strength Guidance for the Budget Estimates Submission. The requirements for military manpower end strength for the Office of the Secretary of Defense, and the DoD Field Activities under the purview of the Washington Headquarters Service (WHS), will be developed and assigned by the Director for Administration and Management. WHS will provide the Services with end strength numbers for the WHS agencies approximately 45 days prior to the submission of the machine readable input to the Budget Review System (BRS) and will identify the data by fiscal year, military service, and officer/enlisted designation. The end strength provided by WHS represents controls that will be met by the Services in their machine readable BRS submission. The following organizations are currently subject to this guidance:

Office of the Secretary of Defense (OSD)
Washington Headquarters Services (WHS)
Defense Legal Services Agency (DLSA)
Office of Economic Adjustment (OEA)
American Forces information Service (AFIS)
Defense technology Security Administration (DTSA)
Defense Prisoner of War/Missing In Action Office (DPMO)

0202 ACTIVE MILITARY PERSONNEL
APPROPRIATIONS020201 General

A. The purpose of this section is to provide general information applicable to the Active Military Personnel appropriations including funding policies, classifications, and definitions unique to these accounts. Generic policies and requirements are addressed in Chapter 1. The Military Components should consult all of the other chapters for exhibit requirements that are not specifically addressed in this chapter including the special interest chapter.

B. This section provides the budget and fiscal accounting classifications for the military personnel appropriations for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of 10 U.S.C. 115. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification which shall be used on a uniform basis for the military personnel appropriations throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds for the Military Personnel appropriations.

020202 Uniform Budget and Fiscal Accounting
Classification

A. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in section 020202. Variations in the activity and subactivity classification and titles shall not be made, except that additional accounts consistent with this budget and accounting classification may be established in order to meet administration requirements of the various elements of the Military Departments. The scope of each account is described in Section 020202.

B. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and in the same

sequence as will be consistent with the fiscal codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

C. Chart of Accounts - The chart of accounts that follows represents a summary of the accounting and reporting structure under the Active Military Personnel appropriations. For purposes of presentation of budget estimates, however, as distinguished from monthly reporting, additional statistical breakdown will be required as shown in Section 020203.

Budget Activity (BA) and Budget Subactivity (BSA) *BA/BSA1 Pay and Allowances of Officers

- 1-A Basic Pay
- 1-B Retired Pay Accrual
- 1-C Incentive Pay for Hazardous Duty
- 1-D Special Pay
- 1-E Basic Allowance for Quarters
- 1-F Variable Housing Allowance
- 1-G Basic Allowance for Subsistence
- 1-H Station Allowances, Overseas
- 1-I Uniform Allowances
- 1-J Family Separation Allowances
- 1-K Separation Payments
- 1-L Social Security Tax - Employer's Contribution

2 Pay and Allowances of Enlisted Personnel

- 2-A Basic Pay
- 2-B Retired Pay Accrual
- 2-C Incentive Pay for Hazardous Duty
- 2-D Special Pay
- 2-E Special Duty Assignment Pay
- 2-F Reenlistment Bonus
- 2-G Enlistment Bonus
- 2-H Basic Allowance for Quarters
- 2-I Variable Housing Allowance
- 2-J Station Allowances, Overseas
- 2-K Clothing Allowances
- 2-L Family Separation Allowances
- 2-M Separation Payments
- 2-N Social Security Tax - Employer's Contribution

3 Pay and Allowances of Cadets and
Midshipmen

- 3-A Academy Cadets and Midshipmen

4 Subsistence of Enlisted Personnel

- 4-A Basic Allowance for Subsistence
- 4-B *Subsistence in Kind*

5 Permanent Change of Station Travel

- 5-A Accession Travel
- 5-B Training Travel
- 5-C Operational Travel Between Duty Stations (within CONUS and within Overseas)
- 5-D Rotational Travel to and from Overseas
- 5-E Separation Travel
- 5-F Travel of Organized Units

6 Other Military Personnel Costs

- 6-A Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners
- 6-B Interest on Uniformed Services Savings Deposits
- 6-C Death Gratuities
- 6-D Unemployment Benefits
- 6-E Survivor Benefits
- 6-F Education Benefits
- 6-G Adoption Expenses

a/ Proper coding will be assigned to each Military Department in accordance with fiscal codes for all appropriation activities.

D. Chart of Accounts Budget Activities and Subactivities Definitions/Descriptions are provided on the following pages.

E. Object Classification - The object classifications that follow the Chart of Accounts Budget Activities and Subactivities Definitions/Descriptions shall be the official classifications for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

BA/BSA

1. **Pay and Allowances of Officers** - For the pay and allowances authorized by law to be paid to officers, including commissioned and warrant of the Regular Forces and officers of the Reserve components on extended active duty

1-A. Basic Pay: For basic compensation of officers, including length of service increments, under provisions of 37 U.S.C. 201,203 and 205.

**1-B. Retired Pay
Accrual:** For the Department of Defense's Contribution to its Military Retirement Fund, under provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay. Retired pay accrual does not apply to academy cadets or midshipmen.

**1-C. Incentive Pay for Hazardous
Duty:**

For pay of officers for performance of hazardous duty required by competent authority under provisions of 37 U.S.C. 301, 301a, 301b and 301c. Includes:

- a. Duty as a crew member as determined by the Secretary concerned, invoking frequent and regular participation in aerial flight.
- b. Duty involving frequent and regular participation in aerial flights not as a crew member pursuant to paragraph a, above.
- c. For the frequent and regular performance of operational or proficiency flying duty required by orders.
- d. For the written agreement to remain on active duty in aviation service for at least one year in an aviation specialty designated as critical.
- e. Duty while attached under competent orders to a submarine, while serving as an operator or crew member of an operational submersible (including an undersea exploration or research vehicle), while undergoing training preliminary to assignment to a nuclear-powered submarine, while undergoing rehabilitation after assignment to a nuclear-powered submarine, or, in the case of a member qualified in submarines, while attached as a member of a submarine operational command staff whose duties require serving on a submarine during underway operations.
- f. Duty involving parachute jumping as an essential part of military duty.
- g. Duty involving the demolition of explosives as a primary duty, including training for such duty.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

- h. Duty inside a high or low pressure chamber.
- i. Duty as human acceleration or deceleration experimental subject.
- j. Duty as human test subject - thermal stress experiments.
- k. Duty involving frequent and regular participation in flight operations on the flight deck of an aircraft carrier or of a ship other than an aircraft carrier from which aircraft are launched.
- l. Duty involving service as an air weapons controller.
- m. Duty involving use of toxic fuel or waste.
- n. Duty invoking live/hazardous organisms.

1-D. Special Pay:

For special pay to officers on active duty as physicians, dentists, optometrists, veterinarians, nurses and psychologists under the provisions of 37 U.S.C. 302, 302a, 302b, 302c, 302d, 302e and 303; certain designated officers in positions of unusual responsibility which are of a critical nature to the service concerned under provisions of 37 U.S.C. 306; officers on duty subject to hostile fire or imminent danger under provisions of 37 U.S.C. 310; personal money allowance to certain Generals and Admirals under provisions of 37 U.S.C. 414; for diving duty pay under the provisions of 37 U.S.C. 304; for sea duty pay under the provisions of 37 U.S.C. 305a; for nuclear officer incentive pay under the provisions of 37 U.S.C. 312, 312b and 312c.; for engineering and scientific duty performed by officers under the provisions of 37 U.S.C. 315; and for foreign language proficiency under the provisions of 37 U.S.C. 316.

1-E. Basic Allowance for Quarters:

For quarters allowances payable to officers under the provisions of 37 U.S.C. 403.

1-F Variable Housing Allowance

For variable housing allowances payable to officers under the provisions of 37 U.S.C 403a.

1-G. Basic Allowance for Subsistence:

For subsistence allowances payable to officers under the provisions of 37 U.S.C. 402.

1-H. Station Allowances, Overseas:

For payment to officers outside the United States or in Hawaii or Alaska of per diem allowances based on cost of living and housing allowances for members stationed outside the United States as prescribed by Joint Federal Travel Regulations and authorized under the provisions of 37 U.S.C. 405.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

- 1-I. Uniform Allowances:** For payments to officers for purchase of required uniform under the provisions of 37 U.S.C. 415.
- 1-J. Family Separation Allowances:** For family separation allowances payable to officers under the provision of 37 U.S.C. 427.
- 1-K. Separation Payments:**
- a. For payments to officers for accumulated annual leave under the provisions of 37 U.S.C. 501.
 - b. For severance pay to officers, including elimination of severance pay to officers not eligible for retirement under any provision of law on the date of elimination by promotion list passover, under the provisions of 10 U.S.C. 1174; elimination severance pay for cause under the provisions of 10 U.S.C. 1181; disability severance pay under the provisions of 10 U.S.C. 1212.
 - c. For lump sum readjustment payments to Reserve officers under the provisions of 10 U.S.C. 680.
 - d. Voluntary Separation Incentive (VSI) - For payment of an annuity to officer and enlisted members voluntarily separating from active duty during the drawdown under the provisions of 10 U.S.C. 1175.
 - e. Special Separation Benefit (SSB) - For a lump sum payment to officer and enlisted members separating from active duty during the drawdown under the provisions of 10 U.S.C. 1174a.
 - f. Temporary Early Retirement Authority (TERA) - For payment of retired pay to selected active duty members who retire with between 15 and 20 years of service under the provisions of 10 U.S.C. 1293, 3911, 3914, 6323, 6330, 8911 and 8914. Authorized by Section 4403 of the FY 1993 National Defense Authorization Act (P.L. 102-484).
- 1-L. Social Security Tax Employer's Contribution:** For payment of tax of employer to Social Security Administration as provided by Federal Insurance Contributions Act (including wage credits).
- 2. Pay and Allowances of Enlisted Personnel** - For the pay and allowances authorized by law to be paid to enlisted personnel of the Regular forces and enlisted members of the Reserve components on extended active duty.
- 2-A. Basic Pay:** For basic compensation of enlisted personnel, including length of service increments, under the provisions of 37 U.S.C. 201, 203 and 205.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

2-B. Retired Pay

Accrual:

For the Department of Defense's Contribution to its Military Retirement Fund, under provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

2-C. Incentive Pay for Hazardous

Duty:

For pay of enlisted personnel for performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301 and 301C. Includes:

- a. Duty as a crew member as determined by the Secretary concerned, involving frequent and regular participation in aerial flight.
- b. Duty involving frequent and regular participation in aerial flights not as a crew member pursuant to paragraph a, above.
- c. Duty while attached under competent orders to a submarine, while serving as an operator or crew member of an operational submersible (including an undersea exploration or research vehicle), while undergoing training preliminary to assignment to a nuclear-powered submarine, while undergoing rehabilitation after assignment to a nuclear-powered submarine, or, in the case of a member qualified in submarines, while attached as a member of a submarine operational command staff whose duties require serving on a submarine during underway operations.
- d. Parachute jumping as an essential part of military duty.
- e. Duty involving the demolition of explosives as a primary duty, including training for such duty.
- f. Duty inside a high or low pressure chamber.
- g. Human acceleration or deceleration experimental subject.
- h. Duty as human test subject, thermal stress experiments.
- i. Duty involving frequent and regular participation in flight operations on the flight deck of an aircraft carrier or of a ship other than an aircraft carrier from which aircraft are launched.
- j. Duty involving use of toxic fuel or waste.
- k. Duty involving live/hazardous biological organisms.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

2-D. Special Pay:	For pay to enlisted personnel while on sea duty or duty outside the contiguous 48 States and the District of Columbia at places designated by the Secretary of Defense under the provisions of 37 U.S.C. 305 and 305a; for diving duty pay under the provisions of 37 U.S.C. 304; for duty subject to hostile fire or imminent danger under the provisions of 37 U.S.C. 310; for nuclear-trained and qualified, and for nuclear career accession and annual incentive bonuses under the provisions of 37 U.S.C. 312a; for qualified enlisted members extending duty at designated locations overseas under the provisions of 37 U.S.C. 314 and for foreign language proficiency under the provisions of 37 U.S.C. 316.
2-E. Special Duty Assignment Pay:	For pay to enlisted personnel for possessing special proficiency in a military skill, under the provisions of 37 U.S.C. 307.
2-F. Reenlistment Bonus:	For payment to enlisted personnel of a bonus for reenlistment, under the provisions of 37 U.S.C. 308.
2-G. Enlistment Bonus:	For payment to enlisted personnel of a bonus for enlistment (or extension) in a skill designated as critical, in accordance with the provisions of 37 U.S.C. 308a and 308f.
2-H. Basic Allowance for Quarters:	For quarters allowances payable to enlisted personnel under the provisions of 37 USC 403.
2-I. Variable Housing Allowance:	For quarters and variable housing allowances payable to enlisted personnel or to dependents under the provisions of 37 U.S.C. 403a.
2-J. Station Allowances, Overseas:	For payment to enlisted personnel outside the United States or in Hawaii or Alaska of per diem allowances based on cost of living and housing allowances for members stationed outside the United States as prescribed by Joint Federal Travel Regulations and authorized under the provisions of 37 U.S.C. 405.
2-K. Clothing Allowances:	For payment to enlisted personnel of cash allowance for purchase of prescribed clothing, for cost of clothing issued in kind, and for cash payment of maintenance allowances for clothing under the provisions of 37 U.S.C. 418. (Excludes replacement of clothing lost, damaged, or destroyed.)

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

2-L. Family Separation Allowances:

For family separation allowances payable to enlisted personnel under the provisions of 37 U.S.C. 427.

2-M. Separation Payments:

- a. For payments to enlisted personnel for accumulated unused annual leave under the provisions of 37 U.S.C. 501.
- b. For severance pay to enlisted personnel for disability under the provisions of 10 U.S.C. 1212.
- c. For authorized donations for discharge under certain conditions under the provisions of 10 U.S.C. 1048.
- d. Voluntary Separation Incentive (VSI) - For payment of an annuity to officer and enlisted members voluntarily separating from active duty during the drawdown under the provisions of 10 U.S.C. 1175.
- e. Special Separation Benefit (SSB) - For a lump sum payment to officer and enlisted members separating from active duty during the drawdown under the provisions of 10 U.S.C. 1174a.
- f. Temporary Early Retirement Authority (TERA) - For payment of retired pay to selected active duty members who retire with between 15 and 20 years of service under the provisions of 10 U.S.C. 1293, 3911, 3914, 6323, 6330, 8911 and 8914. Authorized by Section 4403 of the FY 1993 National Defense Authorization Act (P.L. 102-484).

2-N. Social Security Tax - Employer's Contribution:

For payment of tax on employer to Social Security Administration as provided by Federal Insurance Contributions Act (including wage credits).

3. Pay and Allowances of Cadets and Midshipmen - For the pay and allowances of cadets and midshipmen at the United States Military Academy, United States Naval Academy, and the United States Air Force Academy.

- a. For basic pay, commuted ration allowance, and employer's share of FICA tax for cadets appointed to the United States Military Academy, United States Naval Academy, and United States Air Force Academy, under the provisions of 37 U.S.C., 203 and 422.
- b. For payment of nuclear accession bonus under the provisions of 37 U.S.C. 312b.
- c. For the difference between the value of the commuted ration allowance and the cost of operational rations.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

4. **Subsistence of Enlisted Personnel** - For the payment of authorized basic allowances for subsistence to enlisted personnel and for the cost of procuring food and beverage supplies for issue as rations to enlisted personnel on extended active duty, including emergency and operational rations; also includes the payment of meals furnished under contract (when approved by competent authority) at commercial facilities where the payment of commuted rations would create an individual hardship and/or the costs for establishment of a Government mess facility are prohibitive or the contract feeding of enlisted personnel is determined to be more economical or advantageous.

**4-A. Basic Allowance for
Subsistence:**

For subsistence allowances payable to enlisted personnel under the provisions of 37 U.S.C. 402.

**4-B. Subsistence in
Kind:**

For cost of subsistence issued as rations to enlisted personnel, including emergency and operational rations, and for payment of meals furnished under contract by commercial facilities under the provisions of 10 U.S.C. 4561, 6081 and 9561.

5. **Permanent Change of Station Travel** - For expenses incident to permanent change of station travel of military personnel, individually or as part of organized units. PCS travel costs include mileage; monetary allowance in lieu of transportation; transportation by common carrier (rail, bus, air, or water, including Military Airlift Command and Military Sealift Command); per diem allowances, actual and necessary expenses and cost of subsistence while in a PCS travel status; issue of meal tickets in lieu of subsistence; temporary lodging expense; travel of dependents and transportation of baggage and household goods, port handling charges for personnel, their household goods, baggage and privately owned automobiles passing through CONUS MTMC terminals; payments of dislocation allowances; authorized transportation of dependents and personal and household effects of deceased military personnel; costs of contract packing, crating, handling and temporary storage of household goods; cost of nontemporary storage of household goods; cost of trailer allowances; travel incident to organizational movements on permanent change of station whether for training or non-training purposes; expenses incident to PCS movement of any military group traveling under one order from the same point of origin to the same destination; minor supplies and services incident to troop or organizational PCS movements; expenses and allowances incident to separation travel, discharge or release. Also included is all authorized Temporary Duty Travel directly related to and an integral part of PCS movement of individuals or organizational units. Excludes Temporary Duty Travel other than that directly related to and an integral part of PCS movements. All authorized PCS travel expenses provided for under this budget program account shall be charged to the same subprogram account cited in PCS travel order of the military member. The term "CONUS" (Continental United States) referred to herein applies to the United States Territory, "including the adjacent territorial waters located within the North American Continent between Canada and Mexico."

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

5-A. Accession Travel:

Officers.

Covers PCS movements of (1) officers appointed to a commissioned grade from civil life, military academies or ROTC/NROTC, Reserve and National Guard officers called or recalled to extended active duty from home or a point where orders were received to first permanent duty station or training school of twenty weeks or more duration and (2) officers or warrant officers appointed or recalled from enlisted status from station where they served as enlisted to new permanent duty station or training school of twenty weeks or more duration. (Includes officers appointed from enlisted status upon graduation from OCS, OTS, or basic flying training.) (Marine Corps basic military training for officers will be a part of an accession move; this is the only exception to the twenty-week rule.)

Enlisted.

Covers PCS movements of (1) enlistees, reenlistees, and prior service personnel from recruiting station or place of enlistment to first permanent duty station or training school of twenty weeks or more duration and (2) recalled enlisted reservists from home to first permanent duty station or training school of twenty weeks or more.

Cadets and Midshipmen.

Covers PCS movements of (1) individuals selected as academy cadets or midshipmen upon entry into the academies and (2) individuals who travel to the academies but fail to pass the entrance physical examinations and are required to return home.

5-B. Training Travel:

Officers.

Covers PCS movements of (1) officers and warrant officers from previous CONUS permanent duty station to formal service or civilian schools, including technical schools, flying training schools, factory training, and other approved courses of instruction of 20 weeks duration or more; and (2) officer and warrant officer school graduates and eliminates from school to their next permanent CONUS duty station. (Excludes academy graduates, OCS or OTC graduates, flying training graduates, ROTC graduates and others chargeable to Accession Travel.)

Enlisted.

Covers PCS movements of (1) enlisted personnel from previous CONUS permanent duty station to formal service or civilian schools, including technical schools, flying training schools, factory training, and other approved courses of instruction, of 20 weeks duration or more; (2) enlisted school graduates and eliminates from school to their next CONUS permanent duty station, and (3) enlisted personnel ordered to training leading to a commission if such training period is of 20 weeks duration or more.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

5-C. Operational Travel: Between Duty Stations (within CONUS and within Overseas):

Officers.

Covers PCS movements of (1) officers, and warrant officers to and from permanent duty stations located within the United States; (2) officers and warrant officers to and from permanent duty stations located within an overseas area when no transoceanic travel is involved; and (3) dependents, household goods, personal effects and privately owned vehicles of officers and warrant officers who are interned, missing, or captured when no transoceanic travel is involved.

Enlisted.

Covers PCS movements of (1) enlisted personnel to and from permanent duty stations located within the United States; (2) enlisted personnel to and from permanent duty stations located within an overseas area when no transoceanic travel is involved; and (3) dependents, household goods, personal effects and privately owned vehicles of enlisted personnel who are interned, missing, or captured when no transoceanic travel is involved.

5-D. Rotational Travel to and from Overseas:

Officers.

Covers PCS movements of (1) officers and warrant officers from permanent duty stations in CONUS, or training of 20 weeks or more duration, to permanent duty stations overseas; (2) officers and warrant officers from permanent duty stations overseas to permanent duty stations in CONUS, or training of 20 weeks or more duration; (3) officers and warrant officers from permanent duty stations in one overseas area to permanent duty stations in another overseas area when transoceanic travel is involved; and (4) dependents, household goods, personal effects and privately owned vehicles of officers and warrant officers who are interned, missing or captured when transoceanic travel is involved.

Enlisted.

Covers PCS movements of (1) enlisted personnel from permanent duty stations in CONUS, or training of 20 weeks or more duration, to permanent duty stations overseas; (2) enlisted personnel from permanent duty stations overseas to permanent duty stations in CONUS, or training of 20 weeks or more duration; (3) enlisted personnel from permanent duty stations in one overseas area to permanent duty stations in another overseas area when transoceanic travel is involved; and (4) dependents, household goods, personal effects, and privately owned vehicles of enlisted personnel who are interned, missing, or captured when transoceanic travel is involved.

5-E. Separation Travel:

Officers.

Covers PCS movements of (1) officers and warrant officers upon release or separation from the service from last permanent duty station to home of record or point of entry into service, or to home of selection when authorized by law; and (2) dependents, household goods, trailer allowances, and personal effects of officers and warrant officers who are deceased.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

Enlisted. Covers PCS movements of (1) enlisted personnel upon release or separation from the service from last permanent duty station to home of record or point of entry into service or to home of selection when authorized by law; and (2) dependents, household goods, trailer allowances, and personal effects of enlisted personnel who are deceased.

Cadets and Midshipmen.

Covers PCS movements of eliminated academy cadets/midshipmen to home of record or point of entry into service.

5-F. Travel of Organized Units:

Officers. Covers PCS movements of (1) officers and warrant officers directed to move as members of an organized unit movement; and (2) officer and warrant officer fillers and replacements directed to move as part of the unit move.

Enlisted. Covers PCS movements of (1) enlisted personnel directed to move as members of an organized unit movement; and (2) enlisted fillers and replacements directed to move as part of the unit move.

6. Other Military Personnel Costs - For costs incident to the apprehension of military deserters, absentees, and escaped prisoners; interest on uniformed services savings deposits; death gratuities; unemployment benefits; and survivor benefits.

6-A. Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners:

For the expenses of apprehension and delivery of military deserters, absentees, and escaped military prisoners, including the payment for travel of guards; payment of rewards or reimbursement of reasonable and actual expenses to persons or agencies apprehending and detaining or delivering absentees or deserters to military control.

**6-B. Interest on Uniformed Services Savings
Deposits:**

For the payment of interest at a rate not to exceed ten percent per annum on any sum of not less than \$5 deposited by members of the uniformed services under the provisions of 10 U.S.C. 1035. This program has been phased out for all members other than for those continued in a MIA status.

6-C. Death

Gratuities: For the payment of death gratuities to beneficiaries of military personnel under the provisions of 10 U.S.C. 1475-78.

**6-D. Unemployment
Benefits:**

For the payment of unemployment benefits to ex-service members who are discharged or released under honorable conditions under the provisions of 5 U.S.C. 8521.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

6-E. Survivor

Benefits:

For payment of funds for restored social security benefits to widows and orphans under the provisions of 10 U.S.C. 1450 and P.L. 98-94, Sec. 943.

6-F. Education

Benefits:

For payment to the DoD Education Benefits Fund, a trust fund, as prescribed by 10 U.S.C. 2006. This program is governed by 38 U.S.C., Chapter 30 and is budgeted on an accrual basis by the Department of Defense.

6-G Adoption

Expenses:

To provide reimbursement for qualifying adoption expenses under the provisions of P.L. 100-180, Sec 638 and P.L. 100-202 Sec 8111.

OBJECT CLASSIFICATION
ACTIVE MILITARY PERSONNEL APPROPRIATIONS

<u>Budget Subactivity</u>	<u>Object Class</u>
Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners: Rewards and Expenses	11.8
Travel of Guards	21.0
Basic Allowance for Quarters	11.7
Basic Allowance for Subsistence	11.7
Variable Housing Allowance	11.7
Basic Pay	11.7
Accrued Retirement Benefits	12.2
Death Gratuities	42.0
Enlistment Bonuses	12.2
Family Separation Allowances	12.2
Incentive Pay	11.7
Interest on Uniformed Services Savings Deposits	43.0
Permanent Change of Station, Travel:	
Dislocation Allowance	12.2
Non-temporary Storage	25.0
Port Handling Charges	25.0
Trailer Allowances	22.0
Transportation of Household Goods	22.0
Transportation of POVs	22.0
Travel of Military Members and Dependents	21.0
Temporary Lodging Expense	12.2
Monetary Allowance in Lieu of Transportation	21.0
Special Duty Assignment Pay	11.7
Reenlistment Bonuses	12.2
Separation Payments: Lump Sum Terminal Leave Payments	11.7
All Others	12.2
Survivor Benefits	13.0
Unemployment Compensation	13.0
Education Benefits	12.2
Social Security Tax-Employer's Contribution	12.2
Adoption Expenses	12.2
Special Pay: Medical, Dental, Nurse, Optometrists and Veterinarians Pay, Nuclear Officer Incentive Pay, Nuclear Accession Bonus, Aviation Retention Bonus, Scientific/Engineering Bonus, and Personal Money Allowances for General/Flag Officers	12.2
Special Pay: All Others	11.7
Station Allowances, Overseas	12.2
<i>Subsistence: In Kind</i>	11.7
Monetary Allowances	11.7
Uniform and Clothing Allowances: In Kind	26.0
Monetary Allowances	12.2

020203 Budget Presentation Structure Requirements

A. For purposes of preparing certain material for presentation and justification of budget estimates, the following budget activities will be used:

1. Pay and Allowances of Officers
2. Pay and Allowances of Enlisted
3. Pay and Allowances of Cadets and Midshipmen
4. Subsistence of Enlisted Personnel
5. Permanent Change of Station Travel
6. Other Military Personnel Costs

B. The following additional breakdown of each budget activity is required to be shown in the applicable justification exhibits:

BA/BSA

1. Pay and Allowances of Officers:

- a. Basic Pay
- b. Retired Pay Accrual
- c. Incentive Pay for Hazardous Duty
 - (1) Flying Duty
 - (a) Crew
 - (b) Noncrew
 - (c) Aviation Continuation Pay
 - (2) Submarine Duty
 - (3) Parachute Jumping
 - (4) Duty inside a high or low pressure chamber inside observer, human acceleration or deceleration, experimental subject and test subject in thermal stress experiments
 - (5) Demolition Duty
 - (6) Flight Deck Duty
 - (7) Air Weapons Controller Duty
 - (8) Duty Involving Toxic Fuel/Waste
 - (9) Duty Involving Live/Hazardous Biological Organisms
- d. Special Pay
 - (1) Medical Pay
 - (a) Variable Special Pay
 - (b) Additional Special Pay
 - (c) Board Certified Pay
 - (d) Medical Incentive Pay

- (e) Medical Officer Retention Bonus (or successor)
- (2) Dental Pay
 - (a) Variable Special Pay
 - (b) Additional Special Pay
 - (c) Board Certified Pay
- (3) Nurse Pay
 - (a) Accession Bonus
 - (b) Special Pay
- (4) Special Pay for Optometrists
- (5) Special Pay for Veterinarians
- (6) Personal Money Allowances - General/Flag Officers
- (7) Responsibility Pay
- (8) Diving Duty
 - (a) Basic Scuba
 - (b) Pararescue
- (9) Special Pay - Nuclear Officer Incentive Pay
- (10) Scientific/Engineering Bonus
- (11) Sea Duty Pay
 - (a) Career Sea Pay
 - (b) Premium Sea Pay
- (12) Foreign Language Proficiency Pay
- (13) Other Special Pay
- e. Basic Allowance for Quarters
 - (1) With Dependents
 - (2) Without Dependents
 - (3) Partial Allowance - Bachelor
 - (4) Substandard Housing
- f. Variable Housing Allowance
- g. Basic Allowance for Subsistence
- h. Station Allowances, Overseas
 - (1) Cost of Living
 - (2) Housing
 - (3) Temporary Lodging
- i. Uniform Allowances
 - (1) Initial
 - (2) Maintenance
 - (3) Supplementary
- j. Family Separation Allowances
 - (1) On permanent change of station with dependents not authorized, Government quarters not available.
 - (2) On permanent change of station with dependents not authorized.
 - (3) On board ship for more than 30 days.
 - (4) On temporary duty for more than 30 days with dependents not residing

- near temporary duty station.
 - k. Separation Payments
 - (1) Lump sum terminal leave payments.
 - (2) Lump sum readjustment payments.
 - (3) Lump sum payments to reservists
 - (4) Severance pay, failure of promotion.
 - (5) Severance pay, disability.
 - (6) Voluntary Separation Incentive (VSI)
 - (7) Special Separation Benefit (SSB)
 - (8) 15 Year Temporary Early Retirement Authority
 - l. Social Security Tax - Employer's Contribution
 - (1) Employers contribution of tax on basic pay
 - (2) Wage Credits
- 2. Pay and Allowances of Enlisted Personnel:
 - a. Basic Pay
 - b. Retired Pay Accrual
 - c. Incentive Pay for Hazardous Duty
 - (1) Flying Duty
 - (a) Crew
 - (b) Noncrew
 - (2) Submarine Duty
 - (3) Parachute Jumping
 - (4) Duty inside a high or low pressure chamber inside observer, human acceleration or deceleration, experimental subject and test subject in thermal stress experiments
 - (5) Demolition Duty
 - (6) Flight Deck Duty
 - d. Special Pay
 - (1) Diving Duty
 - (a) Basic Scuba
 - (b) Pararescue
 - (2) Sea Duty Pay
 - (a) Career Sea Pay
 - (b) Premium Sea Pay
 - (3) Duty at Certain Places
 - (4) Overseas Extension Pay
 - (5) Nuclear Accession Bonus
 - (6) Foreign Language Proficiency Pay
 - (7) Other Special Pay
 - e. Special Duty Assignment Pay
 - f. Reenlistment Bonus
 - g. Enlistment Bonus
 - h. Basic Allowance for Quarters
 - (1) With Dependents
 - (2) Without Dependents
 - (3) Partial Allowance - Bachelor
 - (4) Substandard Housing
 - i. Variable Housing Allowance
 - j. Station Allowances, Overseas
 - (1) Cost of Living
 - (2) Housing
 - (3) Temporary Lodging
 - k. Uniform Allowances
 - (1) Initial
 - (a) Military
 - (b) Civilian
 - (2) Maintenance Allowances
 - (a) Basic Allowance
 - (b) Standard Allowance
 - (c) Special Allowance
 - (3) Supplementary Allowances
 - l. Family Separation Allowances
 - (1) On permanent change of station with dependents not authorized, Government quarters not available.
 - (2) On permanent change of station with dependents not authorized.
 - (3) On board ship for more than 30 days.
 - (4) On temporary duty for more than 30 days with dependents not residing near temporary duty station.
 - m. Separation Payments
 - (1) Lump sum terminal leave payments.
 - (2) Severance pay, disability
 - (3) Authorized donations
 - (6) Voluntary Separation Incentive (VSI)
 - (7) Special Separation Benefit (SSB)
 - (8) 15 Year Temporary Early Retirement Authority
 - n. Social Security Tax - Employer's Contribution
 - (1) Employers contribution of tax on basic pay
 - (2) Wage Credits
- 3. Pay and Allowances of Cadets and Midshipmen:
 - Academy Cadets and Midshipmen
 - (1) Basic Pay

- (2) Subsistence - Commuted Ration
 - (3) Operational rations
 - (4) Social Security Tax - Employer's Contribution
 - (5) Nuclear Accession Bonus
4. Subsistence of Enlisted Personnel:
- a. Basic Allowance for Subsistence
 - (1) When Authorized to Mess Separately
 - (2) Leave Rations
 - (3) When Rations in Kind Not Available
 - (4) Augmentation of Commuted Ration Allowance for Meals Taken Separately
 - b. *Subsistence in Kind*
5. Permanent Change of Station Travel:
- a. Summary of Project Requirement Moves a/
 - b. Summary of Requirements by Types of Costs b/
 - c. Accession Travel c/
 - (1) Officers
 - (2) Enlisted
 - (3) Officer Candidates
 - d. Training Travel c/
 - (1) Officers
 - (2) Enlisted
 - e. Operational Travel Between Duty Station c/
 - (1) Officers
 - (2) Enlisted
 - f. Rotational Travel to and from Overseas c/
 - (1) Officers
 - (2) Enlisted
 - g. Separation Travel c/
 - (1) Officers
 - (2) Enlisted
 - (3) Officer Candidates
 - h. Travel of Organized Units c/
 - (1) Officers
 - (2) Enlisted
6. Other Military Personnel Costs:
- a. Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners
 - b. Interest on Uniformed Services Savings Deposits
 - c. Death Gratuities
 - (1) Officers
- (2) Enlisted
 - (3) Cadets and Midshipmen
- d. Unemployment Benefits
- e. Survivor Benefits
- f. Education Benefits
- (1) Four Year Obligation
 - (2) Three Year Obligation
 - (3) Two Year Obligation
 - (4) Two Years Active/Four Years Selected Reserve
- g. Adoption Expenses
- a/ For each type of move show the number of moves and the dollar amount for the PY, CY and BYs.
- b/ The "Summary of Requirements by Types of Costs" will show the number and amount of the following entries for the PY, CY and BYs:
- Travel of Military Members (include cadets and midshipmen)
- Mileage and Per Diem 1/
-
- MAC 2/
- Commercial Air 3/
- Travel of Dependents (family)
- Mileage 4/
- MAC 5/
- Commercial Air 6/
- Transportation of Household Goods
- M Tons - MSC
- S Tons - MAC
- Other Shipments
- Dislocation Allowance
- Trailer Allowance
- Transportation of POV's
- Port Handling Charges
- Contemporary storage
- Temporary Lodging Expense
- Total Obligations
- Less Reimbursements
- Total Direct Obligations

- 1/ Mileage and Per Diem - The costs of travel relating to use of privately owned vehicle or commercial modes other than air or sea. Includes per diem paid to the individual member. It excludes movement of mobile trailers even if the trailer is moved by the member. The unit of measurement is number of member moves.
- 2/ Military Airlift Command (MAC) - The costs of travel for movement of an individual member reimbursed to MAC. The unit of measurement is number of member moves.
- 3/ Commercial Air - The costs for movement of an individual member paid directly to a commercial company. (Excludes any costs paid to MAC.) The unit of measurement is number of member moves.
- 4/ Mileage - The costs of travel relating to the use of privately owned vehicles or commercial modes other than air or sea for the dependents of an individual member. Includes per diem paid to dependents. The unit of measurement is number of family moves.
- 5/ Military Airlift Command (MAC) - The costs of travel for movement of dependents reimbursed to MAC. The unit of measurement is number of dependents.
- 6/ Commercial Air - The costs for movement of dependents paid directly to a commercial company (excludes any costs paid to MAC). The unit of measurement is number of dependents.
- 7/ For each permanent change of station travel account, the following data will be shown, as applicable, for officers, enlisted and cadets:
- (1) Member Travel - Costs related to the movement of each member of a military service making a permanent change of station move.
 - (2) Dependent Travel - Costs related to the movement of dependents when authorized as part of a permanent change of station of a member of a military service. The number of dependent moves should reflect the number of families moved as a unit of measure.
- (3) Transportation of Household Goods - Costs related to movement of household goods as authorized by Joint Federal Travel Regulations including shipment of unaccompanied baggage.
- (a) Land Shipments, CONUS and Overseas - The costs of shipment of goods for the portion in CONUS and overseas of shipments other than ITGBL. The unit of measurement is member move.
 - (b) International Through Government Bill of Lading (ITGBL) - The costs of shipment from point of origin to destination on ITGBL. Includes both land and overwater portion of the movement. The unit of measurement is member move.
 - (c) Overseas - The costs of shipments, including unaccompanied and excess baggage, either reimbursed to the Military Sealift Command (MSC), Military Airlift Command (MAC), or paid directly to a commercial company.
- (4) Dislocation Allowance - The costs of dislocation allowance as authorized in the JTR. The unit of measurement is number of members paid.
- (5) Trailer Allowance - The costs of movement of mobile trailers whether moved by commercial contract or moved by the individual member. The unit of measurement is number of trailer moves.
- (6) Privately Owned Vehicles (POV) - The costs to the Government of transporting a POV to or from overseas.

- (a) Military Sealift Command (MSC) - The cost of shipping POVs reimbursed to MSC. The unit of measurement is number of POVs shipped. If number of POVs shipped is not available, use 11.2 measurement tons per vehicle to convert measurement tons to vehicles.
- (b) Port Handling (Military Traffic Management Command) - The cost of port processing of vehicles reimbursed to MTMC. The unit of measurement is number of POVs processed. If number of POVs processed is not available, use 11.2 measurement tons per vehicle to convert measurement tons to vehicles.
- (7) Port Handling Costs (HHGs) - The port handling costs for household goods and unaccompanied baggage reimbursed to MTMC. The unit of measure is measurement tons.
- (8) Nontemporary Storage - The costs to the government of placing goods in storage or moving them to another specified destination under the provisions of 37 U.S.C. 406 when a member entitled to a PCS move is ordered to a duty station to which the shipment of household goods is not authorized. No unit of measure will be shown for contemporary storage, only costs.
- (9) Temporary Lodging Expense (TLE) - The cost of reimbursing the member for expenses incurred as a result of a PCS move, not to exceed \$110 per day for up to four days under the provisions of 37 U.S.C. 404a (limited to two days within CONUS when member moves from CONUS to overseas). TLE requirements should reflect members paid as the unit of measure.

020204 Budget Estimates Submission

A. This section prescribes the justification materials required for the Military Personnel

appropriations to support budget estimates. Fund requirements for these appropriations will be presented using those budget and accounting classifications set forth in sections 020202 and 020203.

B. Exhibits in Support of Budget Estimates - The following justification exhibits will be prepared and submitted in support of budget estimates for the September 15 budget submission. These exhibits will be organized by Service military personnel account. Examples of the required exhibits are provided in Section 020602. The required justification material will be organized in a single unclassified volume with the unclassified data displayed in the sequence shown below:

Table of Contents

Section 1 - Summary of Requirements by Budget Program (PB-30A)

Section 2 - Introduction (The statement should provide the highlights of the budget submission and a general discussion of the relationship of the resources requested to the proposed military strength program. This should include a discussion of the military strength characteristics in terms of gains and losses and promotion and assignments policies. It also programmatic terms such as force structure and other matters of an overall nature as considered appropriate by the Service.)

Section 3 - Summary Tables (examples provided Section 020602)

- Personnel Summaries (PB-30B to PB-30J)
- Summary of Entitlements by Subactivity (PB-30J)
- Analysis of Appropriation Changes and Supplemental Requirements (PB-30K)
- Schedule of Increases and Decreases (PB-30Q)

Section 4 - Detail of Military Personnel Entitlements

Justification materials will be provided for each entitlement as prescribed in Sections

020202 and 020203 for each of the following six budget activities for military personnel:

1. Pay and Allowances of Officers
2. Pay and Allowances of Enlisted Personnel
3. Pay and Allowances of Cadets
4. Subsistence of Enlisted Personnel
5. Permanent Change of Station Travel
6. Other Military Personnel Costs

Each of the military personnel budget activities above will be introduced by a schedule of increases and decreases (PB-30P). See Section 020602. for format.

Section 5 - Special Analyses (examples provided in Section 020602)

- Schedule of Military Assigned Outside DoD (PB-30Q)
- Reimbursable Programs (PB-30R)

C. Justification material for each subactivity will contain a purpose and scope section as well as a justification of funds requested. The requirements for each entitlement under each military personnel category will be justified on a gross basis to include total obligations for both direct and reimbursable personnel. For each subactivity/entitlement, include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for, i.e., statutory, program enhancements, solving deficiencies, etc. Also provide a general explanation for each type of entitlement. The computation for each entitlement will display data for the prior year, current year, and both budget years.

D. The following exhibits will be provided in a separate backup justification book in support of the budget estimate. Examples of these exhibits are provided in Section 020602:

- | | |
|------|---|
| MP-1 | Reconciliation of Fund Changes with Previous Year |
| MP-2 | Dependents, Housing, and BAQ Estimates |
| MP-3 | Summary of Outyear Data |

MP-4 Military Personnel by Region and Country

MP-5 Active Duty Military Personnel Stationed Ashore By Regional Area

MP-6 Education Benefits - Additional Basic Benefits (Title 38 USC, Chapter 30).

MP-7 Aviation Retention Bonus

MP-9 Retired Pay Accrual Costs

MP-10 Summary of Military Personnel Separation Payments

E. Chapter 1, Section 010302, identifies copies required of the above.

F. A submission of machine-readable data, or "automated data", is required. It is conducted in conjunction with and in support of the OSD Budget Estimates Submission and the Winter President's Budget Submission for the four military personnel appropriations. All questions surrounding the submission of the automated data should be referred to:

*OUSDC(C), Directorate for Ops & Pers
Attn. MilPers Associate Director
1100 Defense, Pentagon, Room 3d868
Washington, DC 20301-1100
telephone (703)697-3101.*

1. The automated data shall be generated by the computer software provided. The data may be entered into the software manually or loaded from an external file. Directions for its use, as well as the information presented here, are included in the software.

2. When loading external data, it must conform to prescribed criteria.

a. The records must be in the following format.

Columns 1-1: Service Code (1-Army, 2-Navy, 3-Marines, 4-AF)

Columns 2-3: Fiscal Year (last two digits)

Columns 4-5: Budget Year (last two digits)

Columns 6-11: Identification Code (six digit code)

A. Justification books will be organized by Service military personnel account.

Columns 12-21: Average number, moves, or entitlements

B. Justification Book, other exhibit requirements, and submission of machine readable data in support of the congressional submission are as shown in Section 020204, Budget Estimate Submission.

Columns 22-36: Unit price showing price in dollars and cents including decimal point and minus sign, if appropriate.

b. Data entered will be right justified within the data field. Adjusting entries to convert total program dollars to direct program dollars should be entered with a negative sign immediately preceding the unit price.

c. In addition to the above:

- *Decimal points should appear where required.*
- *Negative entries should be identified with a minus sign adjacent to the left most digit.*
- *No commas in numbers over 999.*
- *Zero padding is unnecessary.*
- *Records that have all zero data fields are unnecessary.*

3. The submitted data must be either delivered on a standard, DOS-formatted diskette (3.5" or 5.25") or mailed electronically. If delivered on a diskette, the diskette must identify the office of origin and responsible personnel.

4. The software provides reports which duplicate the PB-30J exhibit, as well as other reports of the Military Personnel Justification Book. These reports must be reviewed, compared against the submitted justification book, and corrections and adjustments made before submitting the data. THE REPORTS GENERATED BY THE SOFTWARE MUST MATCH, AMOUNT FOR AMOUNT, THE REPORTS IN THE JUSTIFICATION BOOK.

5. Identification codes are provided In the software. Any new codes which are required will be assigned by the OUSD(C), Director for Operations & Personnel (Associate Director) upon request.

020205 Congressional Justification/Presentation

0203 RESERVE MILITARY PERSONNEL APPROPRIATIONS

020301 General

A. The purpose of this chapter is to provide general information applicable to the Reserve Military Personnel appropriations including funding policies, classifications, and definitions unique to these accounts. Generic policies and requirements are addressed in Chapter 1. The Military Components should consult all of the other chapters for exhibit requirements that are not specifically addressed in this chapter including the special interest chapter.

B. This section provides the budget and fiscal accounting classifications for the military personnel appropriations for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of 10 U.S.C. 115. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification which shall be used on a uniform basis for the reserve component personnel appropriations throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds for the Reserve and National Guard Personnel appropriations.

020302 Uniform Budget and Fiscal Accounting Classification

A. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in Section 020302. Variations in the budget program, activity and subactivity classification and titles shall not be made, except that additional accounts consistent with this budget and accounting classification may be established in order to meet administration requirements of the various elements of the Military Departments. The scope of each account is described in Section 020302.

B. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and in the same sequence as will be consistent with the fiscal codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

C. Chart of Accounts - .The chart of accounts represents a summary of the accounting and reporting structure under the Reserve Component Personnel appropriations. Obligations and disbursements for individual clothing and uniform gratuities, and for subsistence of enlisted personnel maybe allocated by activity on a statistical basis if not reported by the different types of training. Subactivities may be combined in reporting on the status of funds, providing subactivity is maintained for budget review and presentation purposes:

Budget Activity (BA) and Budget Subactivity (BSA)

Budget Activity and Subactivity

1. UNIT AND INDIVIDUAL TRAINING

1-A Training - Pay Group A

- 1-A-1 Basic pay, active duty for training, officers
- 1-A-2 Other pay and allowances, active duty for training, officers
- 1-A-3 Basic pay, active duty for training, enlisted
- 1-A-4 Other pay and allowances, active duty for training, enlisted
- 1-A-5 Basic pay, inactive duty training, officers
- 1-A-6 Basic pay, inactive duty training, enlisted
- 1-A-7 Individual clothing and uniform gratuities, officers
- 1-A-8 Individual clothing and uniform gratuities, enlisted
- 1-A-9 Subsistence of enlisted personnel
- 1-A-10 Travel, active duty for training, officers
- 1-A-11 Travel, active duty for training, enlisted
- 1-A-12 Retired pay accrual, officers and enlisted

1-B Training - Pay Group B

- 1-B-1 Basic pay, active duty for training, officers
- 1-B-2 Other pay and allowances, active duty for training, officers
- 1-B-3 Basic pay, active duty for training, enlisted
- 1-B-4 Other pay and allowances, active duty for training, enlisted
- 1-B-5 Basic pay, inactive duty training, officers
- 1-B-6 Basic pay, inactive duty training, enlisted
- 1-B-7 Individual clothing and uniform gratuities, officers
- 1-B-8 Individual clothing and uniform gratuities, enlisted
- 1-B-9 Subsistence of enlisted personnel
- 1-B-10 Travel, active duty for training, officers
- 1-B-11 Travel, active duty for training, enlisted
- 1-B-12 Retired pay accrual, officers and enlisted

1-F Training - Pay Group F

- 1-F-1 Basic pay, active duty for training, enlisted
- 1-F-2 Other pay and allowances, active duty for training, enlisted
- 1-F-3 Individual clothing and uniform gratuities, enlisted
- 1-F-4 Subsistence of enlisted personnel
- 1-F-5 Travel, active duty for training, enlisted
- 1-F-6 Retired pay accrual, enlisted

1-P Training - Pay Group P

- 1-P-1 Basic pay, inactive duty training, enlisted
- 1-P-2 Individual clothing and uniform gratuities, enlisted
- 1-P-3 Subsistence of enlisted personnel
- 1-P-4 Retired pay accrual, enlisted

2. OTHER TRAINING AND SUPPORT

2-E Mobilization Training

- 2-E-1 Basic pay, active duty for training, officers

- 2-E-2 Other pay and allowances, active duty for training, officers
- 2-E-3 Basic pay, active duty for training, enlisted
- 2-E-4 Other pay and allowances, active duty for training, enlisted
- 2-E-5 Individual clothing and uniform gratuities, officers
- 2-E-6 Individual clothing and uniform gratuities, enlisted
- 2-E-7 Subsistence of enlisted personnel
- 2-E-8 Travel, active duty for training, officers
- 2-E-9 Travel, active duty for training, enlisted
- 2-E-10 Retired pay accrual, officers and enlisted
- 2-E-11 Muster pay stipend, officers and enlisted

2-R School Training

- 2-R-1 Basic pay, active duty for training, officers
- 2-R-2 Other pay and allowances, active duty for training, officers
- 2-R-3 Basic pay, active duty for training, enlisted
- 2-R-4 Other pay and allowances, active duty for training, enlisted
- 2-R-5 Individual clothing and uniform gratuities, officers
- 2-R-6 Individual clothing and uniform gratuities, enlisted
- 2-R-7 Subsistence of enlisted personnel
- 2-R-8 Travel, active duty for training, officers
- 2-R-9 Travel, active duty for training, enlisted
- 2-R-10 Retired pay accrual, officers and enlisted

2-S Special Training

- 2-S-1 Basic pay, active duty for training, officers
- 2-S-2 Other pay and allowances, active duty for training, officers
- 2-S-3 Basic pay, active duty for training, enlisted
- 2-S-4 Other pay and allowances, active duty for training, enlisted
- 2-S-5 Individual clothing and uniform gratuities, officers

- 2-S-6 Individual clothing and uniform gratuities, enlisted
- 2-S-7 Subsistence of enlisted personnel
- 2-S-8 Travel, active duty for training, officers
- 2-S-9 Travel, active duty for training, enlisted
- 2-S-10 Retired pay accrual, officers and enlisted
- 2-T Administration and Support
 - 2-T-1 Basic pay of officers
 - 2-T-2 Other pay and allowances of officers
 - 2-T-3 Basic pay of enlisted
 - 2-T-4 Other pay and allowances of enlisted
 - 2-T-5 Subsistence of enlisted personnel
 - 2-T-6 Permanent change of station travel
 - 2-T-7 Death gratuities, officers
 - 2-T-8 Death gratuities, enlisted
 - 2-T-9 Disability and hospitalization benefits, officers
 - 2-T-10 Disability and hospitalization benefits, enlisted
 - 2-T-11 Reenlistment Bonus
 - 2-T-12 Enlistment Bonus
 - 2-T-13 Educational Assistance (Other than Montgomery G.I. Bill)
 - 2-T-14 Loan Repayment
 - 2-T-15 NROTC Nuclear Bonus
 - 2-T-16 Affiliation Bonus
 - 2-T-17 Individual Ready Reserve Enlistment/Reenlistment Bonus (PS)
 - 2-T-18 Individual Ready Reserve Enlistment Program Bonus (NPS)
 - 2-T-19 Health Professionals Stipend (SELRES)
 - 2-T-20 Health Professionals Stipend (IRR)
 - 2-T-21 Health Professionals Loan Repayment
 - 2-T-22 Retired Pay accrual, officers and enlisted
 - 2-T-23 Adoption Expenses
- 2-U Education Benefits
 - 2-U-1 Officer Personnel
 - 2-U-2 Enlisted Personnel
- 2-A Senior R.O.T.C.
 - 2-A-1 Subsistence allowance
 - 2-A-2 Uniforms -- issue in kind
 - 2-A-3 Uniforms -- commutation
 - 2-A-4 Pay and allowance (Summer training camp)
 - 2-A-5 Subsistence of reserve officer candidates
- 2-A-6 Travel of reserve officer candidates
- 2-B Scholarship R.O.T.C.
 - 2-B-1 Subsistence allowance
 - 2-B-2 Uniforms -- issue in kind
 - 2-B-3 Uniforms -- commutation
 - 2-B-4 Pay and allowances (Summer training camp)
 - 2-B-5 Subsistence of reserve officer candidates
 - 2-B-6 Travel of reserve officer candidates
- 2-C Platoon Leaders' Class or Reserve Officer Candidates
 - 2-C-1 Uniforms -- issue in kind
 - 2-C-2 Basic pay (Summer training camp)
 - 2-C-3 Other pay and allowances (Summer training camp)
 - 2-C-4 Subsistence of reserve officer candidates
 - 2-C-5 Travel of reserve officer candidates
 - 2-C-6 Retired pay accrual
- 2-D Branch Officer Basic Course
 - 2-D-1 Basic pay, active duty for training
 - 2-D-2 Other pay and allowances, active duty for training
 - 2-D-3 Uniform allowances
 - 2-D-4 Travel and per diem
 - 2-D-5 Retired pay accrual
- 2-I Armed Forces Health Professions Scholarship/Financial Assistance Program
 - 2-I-1 Stipend
 - 2-I-2 Individual clothing and uniform gratuities, officers
 - 2-I-3 Basic pay, active duty for training, officers
 - 2-I-4 Other pay and allowances, active duty for training, officers
 - 2-I-5 Travel, active duty for training, officers
 - 2-I-6 Retired pay accrual, officers
 - 2-I-7 Financial Assistance Grant
- 2-G Junior R.O.T.C.
 - 2-G-1 Uniforms -- issue in kind

2-H Chaplain Candidate Program

- 2-H-1 Basic pay, active duty for training
- 2-H-2 Other pay and allowances, active
duty for training
- 2-H-3 Uniform allowances
- 2-H-4 Travel
- 2-H-5 Retired pay accrual

D. Chart of Accounts Budget Activities and Subactivities Definitions/Descriptions are provided on the following pages.

E. Object Classification - The object classifications that follow the Chart of Accounts Budget Activities and Subactivities Definitions/Descriptions shall be the official classifications for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

A. Budget Program

There will be a separate budget program for each reserve component of the Department of Defense and for each military service having those programs listed in paragraph **513.3** as appropriate.

B. Budget Activities

The budget activities are established to present all of the military type costs associated with a particular type of training within unit and individual training or other training and support programs. The following descriptions are for the chart of accounts listed in paragraph 513.3.

1. Unit and Individual Training

Training, Pay Groups A, B, F and P. The Pay Group activities contained in paragraph 513.3 are for costs, including retired pay, accrual associated with the uniform training/pay categories within the National Guard and Reserve Personnel programs as defined in DoD Directive 1215.6, "Uniform Reserve Categories and Training and/or Retirement Categories Within the Reserve Components."

2. Other Training and Support

The activities within this program are defined as follows:

a. Mobilization Training

Costs, including retired pay accrual, associated with the professional development mobilization specialty training. Also included are costs associated with the allowance for annual muster duty as provided by 37 U.S.C. 433.

b. School Training

Include tours of paid active duty for training as students at regular, associate, refresher and technical courses of service schools, area schools, unit schools, officer candidate schools and other installations which provide training applicable to the individual's assignment. Retired pay accrual costs are included.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

c. Special Training

Include all authorized paid active duty for training, other than those covered by pay groups and school training. These include the staff and faculty for schools, special field, fleet and joint exercises, indoctrination training, promoting or policy boards, administrative support of training programs, and tours of not more than 45 days for failure to perform reserve training duty satisfactorily. Retired pay accrual costs are included.

d. Administration and Support

Include the costs, including retired pay accrual, of active duty military personnel authorized to be funded in the reserve component personnel appropriations, all death and disability gratuities for officer and enlisted reserve component personnel, reserve incentives and bonus programs.

e. Senior R.O.T.C.

All the military personnel-type costs associated with the Senior Reserve Officers' Training Corps (except the scholarship program) of an armed force, provided for in 10 U.S.C. 2101-2111. Retired pay accrual does not apply to R.O.T.C. personnel.

f. Scholarship R.O.T.C.

All the military personnel costs associated with the financial assistance program for specially selected members of the Senior R.O.T.C. program. This program is intended to offer regular commissions to cadets and midshipmen successfully completing the academic and military requirements of the four-year program. Authority for the program is contained in 10 U.S.C. 2107. Retired pay accrual does not apply to R.O.T.C. personnel.

g. Platoon Leaders' Class or Reserve Officer Candidates

All military personnel costs, including retired pay accrual, associated with the Marine Corps Reserve or the Naval Reserve. This activity also will include the military personnel costs of other similar types. All the of relatively small programs such as the Navy Officer Candidate WAVE College Junior program and the Marine Corps Woman Officers Candidates class.

h. Branch Officers Basic Course

Will include funds, to include retired pay accrual, for R.O.T.C. Officers Basic Course of the active components.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

i. Armed Forces Health Profession Scholarship and Financial Assistance Program

All the military personnel costs, including retired pay accrual, associated with the financial assistance program to obtain adequate numbers of officers for the active forces who are qualified in various health professions. Qualifications are that the candidate be a citizen of the United States, be accepted for or be enrolled in an accredited institution in a course of study designated for a health profession, and meet moral and physical qualifications for an officer. Such recipients are commissioned as a Second Lieutenant and remain in that grade for the duration of the scholarship program. Authority for the program is contained in 10 U.S.C., 2120-2127. In addition to the stipend, also provides for the annual grant authorized under 10 U.S.C. 2121.

j. Junior R.O.T.C.

All the military personnel costs associated with the Junior R.O.T.C. units at public and private secondary educational institutions provided for in 10 U.S.C. 2031.

k. Chaplain Candidate Program

Will include funds, including retired pay accrual, for the Chaplain Officer Basic Course of the active components.

l. Education Benefits (New G.I. Bill)

Will include funds for payment to the DoD Education Benefits Fund, a trust fund, as prescribed by 10 U.S.C. 2006. The program is governed by 10 U.S.C., Chapter 106 and is budgeted on an accrual basis. Also includes payments for vocational/technical training under the Reserve Compensation G.I. Bill as provided by 10 U.S.C. 2131.

C. Budget Subactivities

The budget subactivities are grouped to present all of the military personnel-type costs for the particular activity. Rather than repeat the same definitions for each activity, the descriptions of the subactivities are shown below by their various titles:

1. Pay and Allowances, Active Duty for Training Officers

For the pay and allowances of commissioned and warrant officers of the reserve components on active duty for training. These include:

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

a. Basic Pay

For basic compensation, including length of service increments, under the provision of 37 U.S.C. 201 and 203-205.

b. Retired Pay Accrual

For the Department of Defense contribution to its military retirement fund, under the provisions of 10 U.S.C 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

c. Incentive Pay for Hazardous Duty

For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301 and 301a.

d. Special Pay

For special pay to officers on duty as physicians, dentists or veterinarians under the provisions of 37 U.S.C. 302, 302b and 303.

e. Basic Allowance for Quarters and Variable Housing Allowance

Payable under the provisions of 37 U.S.C. 403 and 403a.

f. Family Separation Allowances

Payable under the provisions of 37 U.S.C. 427.

g. Basic Allowance for Subsistence

Payable under the provisions of 37 U.S.C. 402.

h. Separation Payments

Payments for accumulated annual leave under the provisions of 37 U.S.C. 501.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

i. Social Security (FICA Tax) -- Employers' Share

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

2. Pay and allowances, active duty for training, enlisted

For the pay and allowances of enlisted personnel of the reserve components on active duty for training. These include:

a. Basic Pay For basic compensation, including length of service increments, under the provision of 37 U.S.C. 203-205.

b. Retired Pay Accrual

For the Department of Defense contribution to its military retirement fund, under the provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

c. Incentive Pay for Hazardous Duty

For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301.

d. Special Pay

For pay while on sea and foreign duty and for diving duty pay under the provisions of 37 U.S.C. 304, 305 and 305a.

e. Basic Allowance For Quarters and Variable Housing Allowance

For quarters allowances payable to enlisted personnel or to dependents under the provisions of 37 U.S.C. 403 and 403a.

f. Family Separation Allowances

Payable under the provisions of 37 U.S.C. 427.

g. Separation Payments

For accumulated unused annual leave under the provisions of 37 U.S.C. 501.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

3. Pay, Inactive Duty Training, Officers

- a. Basic Pay For basic compensation, including length of service increments, under the provisions of 37 U.S.C. 201-203,205, and 206.

- b. Retired Pay Accrual

For the Department of Defense contribution to its military retirement fund, under the provisions of 10 U.S.C 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

- c. Incentive Pay for Hazardous Duty

For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301.

- d. Social Security (FICA Tax) -- Employers' Share

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

4. Pay, Inactive Duty Training, Enlisted

- a. Basic Pay For basic compensation, including length of service increments, under the provisions of 37 U.S.C. 203 and 206.

- b. Retired Pay Accrual

For the Department of Defense contribution to its military retirement fund, under the provisions of 10 U.S.C 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

- c. Incentive Pay for Hazardous Duty

For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301.

- d. Social Security (FICA Tax) -- Employers' Share

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

5. Individual clothing and Uniform Gratuities, Officers

Payments of allowances for the purchase of required uniforms under the provisions of 37 U.S.C. 415-417.

6. Individual Clothing and Uniform Gratuities, Enlisted

For the costs of uniform clothing authorized to be issued in kind to enlisted personnel under the provisions of 37 U.S.C. 418.

7. Subsistence of Enlisted Personnel

For the cost of subsistence issued as rations to enlisted personnel including emergency and operational rations under the provisions of 37 U.S.C. 402.

8. Travel, Active Duty Training, Officers, and Travel, Active Duty for Training, enlisted

For expenses incident to training travel of reserve component officer or enlisted member, individually or as an organized unit. Travel costs include mileage; per diem; transportation by common carrier (rail, bus, air, water, including Military Airlift Command and Military Sealift Command); actual and necessary expenses and costs of subsistence while in a travel status; issue of meal tickets; transportation of baggage; port handling charges; and expenses incident to movement of any military group traveling under one order from the same point of origin to the same destination.

9. Pay and Allowances of Officers, Enlisted and Permanent Change of Station Travel for Active/Guard and Reserve (AGR)

These subactivities are to provide for the AGR military personnel expenses financed from the reserve components personnel appropriations. The descriptions of these subactivities are identical to those shown for the activities with the same titles in Chapter 512.

10. Death Gratuities, Officers, and Death Gratuities, Enlisted

For the payment of death gratuities to beneficiaries of reserve component personnel under the provisions of 10 U.S.C. 1475-1480.

11. Disability and Hospitalization Benefits, Officers, and Disability and Hospitalization Benefits, Enlisted

For payment of disability and hospitalization benefits for reserve component personnel, except for costs covered by orders to active duty for training or inactive duty training under the provisions of 37 USC 204 and 206.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

12. Reserve Incentives

Provides reenlistment, enlistment, educational, loan repayment, NROTC Nuclear Officer Accession Bonus (NOAB), affiliation bonuses and health professions stipend to qualified individuals.

13. Other

D. Reserve Officer Candidates Program - The subactivities for this activity areas follows:

1. Subsistence Allowance

For the subsistence allowance of \$100 per month authorized by 37 U.S.C. 209.

2. Uniforms -- Issue in Kind, and Uniforms -- Commutation

For the costs of uniform clothing authorized by 10 U.S.C. 2109-2110.

3. Pay and Allowances (Summer Camp Training)

For the pay and allowances authorized by 37 U.S.C. 209.

4. Subsistence of Reserve Officer Candidates

For the cost of subsistence issued as rations to enlisted personnel including emergency and operational rations authorized by 10 U.S.C. 2109-2110.

5. Travel of Reserve Officer Candidates

For expenses incident to travel authorized by 10 U.S.C. 2109-2110.

E. Health Professions Scholarship Program - The subactivities for this activity areas follows:

1. Stipend

For the allowances of commissioned officers while attending school under the Armed Forces Health Professions Scholarship Program under the provisions of 10 USC 2120-2122. These include:

a. Stipend For the monthly allowance as authorized by 10 U.S.C. 2121.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

b. Social Security (FICA Tax) -- Employers' Share

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

2. Individual Clothing and Uniform Gratuities, Officers

Payments of allowances for the purchase of required uniforms under the provisions of 37 U.S.C. 415-417.

3. Pay and Allowances, Active Duty for Training, Officers

For the pay and allowances of commissioned officers of the reserve components on active duty for training.

4. Travel, Active Duty Training, Officers

For expenses incident to travel of reserve component officers.

**OBJECT CLASSIFICATION
RESERVE PERSONNEL APPROPRIATIONS**

In addition to the object classifications prescribed in Section 020202 the object classifications prescribed herein shall be the official classifications for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts:

Object Class

Disability and Hospitalization Benefits
(See the various components of this pay,
i.e. basic pay, BAQ, BAS, etc.)

Inactive Duty Pay (Exclusive of Incentive and Special Pays)	11.7
Reserve Incentives (Reenlistments, Enlistment, and Educational Bonuses)	12.2
Stipend (Health Professions Scholarship Program)	11.7
Financial Assistance Grant	41.0
Subsistence Allowance (ROTC, PLC, Etc.)	11.7
Uniform, Commutations	26.0
Education Benefits (Montgomery G.I. Bill)	12.2

020303 Budget Estimates Submission

A. This section prescribes the justification materials required for the Military Personnel appropriations to support budget estimates. Fund requirements for these appropriations will be presented using those budget and accounting classifications set forth in Section 020302.

B. Exhibits in Support of Budget Estimates - The following justification exhibits will be prepared and submitted in support of budget estimates for the September 15 budget submission. These exhibits will be organized by Service military personnel account. Examples of the required exhibits are provided in Section 020602 and 020603. The required justification material will be organized in a single unclassified volume with the unclassified data displayed in the sequence shown below:

Table of ContentsSection 1 - Summary of Requirements by Budget Program (PB-30A)

Section 2 - Introduction (The statement should provide the highlights of the budget submission and a general discussion of the relationship of the resources requested to the proposed military strength program. This should include a discussion of the military strength characteristics in terms of gains and losses, and promotion and assignment policies. It also should address strength changes in programmatic terms such as force structure and other matters of an overall nature as considered appropriate by the Service.)

Sections 3 - Summary Tables (examples provided Section 020602/3)

- Personnel Summaries (PB-30F to PB-30I)
- Summary of Entitlements by Subactivity (PB-30J)
- Analysis of Appropriation Changes and Supplemental Requirements (PB-30K)

- Summary of Basic Pay and Retired Pay Accrual Costs (Reserve Components Only) (PB-30L)
- Summary of Basic Allowance for Quarters (BAQ) and Variable Housing Allowance (VHA) Costs (Reserve Components Only) (PB-30M)
- Summary of Travel Costs (Reserve Components Only) (PB-30N)
- Schedule of Increases and Decreases (PB-30Q)

Section 4 - Detail of Reserve Personnel Entitlements

Justification materials will be provided in support of entitlements as prescribed in Chapter 513 for each of the following applicable reserve component activities:

Training - Pay Group A
 Training - Pay Group B
 Training - Pay Group F
 Training - Pay Group P
 Mobilization Training
 School Training
 Special Training
 Administration and Support
 - AGR/TAR Personnel
 - Death and disability gratuities
 - Reserve incentives and bonuses
 Education Benefits
 Senior ROTC
 Scholarship ROTC
 Platoon Leaders Class
 Branch Officers Basic Course
 Reserve Officer Candidates
 Health Professions Scholarship
 Junior ROTC
 Chaplain Candidate Program

Justification material for each activity will contain a purpose and scope section, a schedule of increases and decreases (PB-30P), as well as data in support of the funds requested. Generally, this data will include appropriate narrative comments relative to program/pricing as well as supporting computational data. For each subactivity/entitlement, include an explanation to justify the requested change. The explanation should be specific with regard to what

the increases will provide for, i.e., statutory change, program enhancements, solving deficiencies, etc. Also provide a general explanation for each type of entitlement. Data should be shown for the prior year, current year and budget years. School, Special and Mobilization Training data will be grouped by similar types of training and will be fully explained and justified. At the end of each section for School, Special and Mobilization Training provide a total that summarizes the training categories. Within the Administration and Support subactivity, subtotals are required for AGR/TAR personnel and for total incentives and bonuses. See Section 020603 for format.

Section 5 - Special Analyses (examples provided in Section 020602 and 020603)

- Reimbursable Programs (PB-30R)
- Reserve Officer Candidates (ROTC Enrollment) (PB-30S)
- Reserve Officer Candidates (ROTC Program) (PB-30T)
- Reserve Officer Candidates (PB-30U)
- Selective Reenlistment Bonuses (PB-30V)
- Full-Time Support Personnel (PB-30W)

C. Justification material for each subactivity will contain a purpose and scope section as well as a justification of funds requested. The requirements for each entitlement under each military personnel category will be justified on a gross basis to include total obligations for both direct and reimbursable personnel. For each subactivity/entitlement, include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for, i.e., statutory, program enhancements, solving deficiencies, etc. Also provide a general explanation for each type of entitlement. The computation for each entitlement will display data for the prior year, current year, and both budget years.

D. The following exhibits will be provided in a separate backup justification book in support of the budget estimate. Examples of these exhibits are provided in Section 020603:

MPR-1 Initial Active Duty for Training Program

MPR-2 Additional Training Assemblies

MPR-3 Reconciliation of Fund Changes with Prior Year

MPR-4 Education Benefits (Title 10 USC, Chapter 106)

MPR-5 Retired Pay Accrual Costs

MPR-6 Active/Guard Reserve (AGR)/TAR Costs

E. Chapter 1, Section 010302, identifies required copies of the above material.

020304 Congressional Justification/Presentation

A. Justification books will be organized by Service military personnel account.

B. Justification Book, and other exhibit requirements in support of the congressional submission are as shown in Section 020302, Budget Estimate Submission.

0204 DOD MILITARY PERSONNEL RETIREMENT REQUIREMENTS

020401 Purpose.

A. This Chapter prescribes the justification material required to support budget estimates for the DoD Military Retirement Fund.

B Fund requirements under this appropriation will provide for items of expense set forth in Section 020403. Budget estimates will be based on planned numbers and estimated rates.

020402 Submission Requirements

A. The budget exhibits for military retired personnel will show data for the prior year, current year, biennial year 1 and biennial year 2 under the DoD Military Retirement Fund.

B. Exhibits in Support of Budget Estimates. Exhibit RP-1 will be prepared and submitted in support of budget estimates. An example of this exhibit is provided in Appendix A. Be prepared to submit supplementary information insufficient detail to permit review of the computations resulting in the funds requested.

RP-1 Summary of Retired Military Personnel Strength and Obligations by Category

C. Exhibit RP-1 will be submitted on September 15 or as specified in the Annual Budget Call. An updated submission will be submitted no later than the first working day in November and will include actual data for the prior year.

D. Section 010302 identifies required copies of the above material.

020403 Uniform Budget and Fiscal Accounting Classifications

A. This Section prescribes the budget and fiscal accounting classifications for the Military Retirement Fund for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of 10 USC 1461-1467.

B. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification which shall be used on a uniform basis for military retired pay throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds under this Trust Fund as required by the DoD Accounting Manual, DoD 7220.9-M (FMR Volume 4 when published), and DoD Instruction 7720.20, "Status of Funds and Other Data for Retired Pay."

C. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in paragraph E below. Variations in the activity and subactivity classification and titles shall not be made except that additional accounts consistent with this budget and accounting classification may be established in order to meet administrative requirements of the various elements of the Military Departments. The scope of each account is described in later in this section.

D. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and in the same sequence as will be consistent with the fiscal codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

E. The chart of accounts represents a summary of the accounting and reporting structure under the Military Retirement Fund arranged in the order and in the detail for which reporting in accordance with DoD 7000.14R, Financial Management Regulation is required.

Budget Activity and Subactivity

1. Nondisability

1-A - Regular Officers

1-B - Regular Enlisted

1-C - Nonregular Officers

1-D - Nonregular Enlisted

2. Temporary Disability

2-A - Regular Officers

5-A - Old Plan (RSFPP)

5-B - New Plan (SBP)

5-C - Guaranteed Minimum
Income

5-D - DIC Supplemental
Payments

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

A. Budget Activities. The budget activities are established to present the retirement benefits associated with a particular type of retirement. The following descriptions are for the chart of accounts as listed above.

1. Nondisability retirements, under applicable statutes, are given on the following bases:

- a. Voluntarily on or after completion of the required length of service.
- b. Involuntarily because of attainment of statutory age or completion of the maximum length of service authorized by law for the several grades.
- c. Automatically upon completion of 30 years of combined active service and service in the Fleet Reserve.

2. Temporary Disability retirements, under Title IV of the Career Compensation Act of 1949 (10 USC 1201-1221), are given on the following basis:

Interim classification in cases where there is doubt as to the degree or permanence of disability. Persons on temporary disability rolls are given periodic physical examinations at least once every eighteen months and may be:

- a. Restored to active duty.
- b. Separated from the service with severance pay.
- c. Transferred to permanent disability retired list.
- d. Continued on temporary list for another eighteen-month period.

Final determination is required within five years of initial classification and temporary disability retirement.

3. Permanent Disability retirements, under Title IV of the Career Compensation Act of 1949 (10 USC 1201-1221), are given when:

- a. There is no doubt as to the degree or permanence of the disability at time of initial retirement.
- b. By periodic examination of temporary disability and Fleet Reserve rolls, it is determined that permanent disability exists.

4. Fleet Reserve status, under Title II of the Naval Reserve Act of 1938, as amended (10 USC 6330, 6331), is given on the following basis:

Enlisted personnel of the Navy and Marine Corps having twenty but less than thirty years' service maybe transferred to the inactive Fleet Reserve with retainer pay at rates prescribed by law. They remain in the Fleet Reserve until their status is changed by reason of:

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

- a. Completion of thirty years' service.
- b. Recall to active duty.
- c. Physical unfitness for further military service.
- d. Death.

5. Survivors' Benefits payments, under the old Retired Serviceman's Family Protection Plan, and the new Survivor Benefit Plan, are provided on the following basis:

a. Two of the benefits are contributory the old Serviceman's Family Protection Plan and the new Survivor Benefit Plan. (SBP) Under both of the contributory benefits, a member of the uniformed services may elect to receive a reduced amount of any retired pay that maybe awarded him in order to provide one or more annuities to his survivors, as specified by law. The basic options include the choice of annuities to provide for (1) surviving spouse, (2) surviving children, (3) surviving family, including both spouse and children, or (4) other persons with insurable interest (under the new plan only).

b. The other two benefits are noncontributory, both the Guaranteed Minimum Income and the Dependency and Indemnity Compensation (DIC) Supplemental Payments. The Guaranteed Minimum Income has a special provision benefiting women who are now widows of deceased members of the Uniformed Services who were receiving, or were entitled to receive, retired pay. The provision guarantees these widow's annual incomes will not fall below a certain amount. The DIC Supplemental Payments provide supplemental payments to widows of retirement-eligible members who die on active duty if DIC payments (by VA) are less than the maximum payments the widow would have received if the member had been retired. SBP payments covering the difference between the two will be paid.

B. Budget Subactivities. The budget subactivities are established to show the retirement benefits associated with a particular personnel classification. Subactivities for Regular Officers, Regular Enlisted, Nonregular Officers, and Nonregular Enlisted are used for Budget Activities 1, 2 and 3; Budget Activity 4 has only the two enlisted classifications; and Budget Activity 5 now has four subactivities showing survivors covered under (1) the Old Plan (RSFPP), (2) the New Plan (SBP), (3) Guaranteed Minimum Income (to current widows), and (4) DIC Supplemental Payments (to future widows).

0205 DOD MILITARY PERSONNEL - CIVIL
FUNCTIONS

020501 Purpose

This Section prescribes the justification material required for the Military Personnel civil function trust fund accounts.

020502 Military Retirement Fund/Education
Benefits Fund

A. Appropriate exhibits and schedules will be prepared by DoD(C) P/B, Operations Directorate unless specified otherwise in the annual Comptroller guidance memorandum.

B. Unless otherwise specified, exhibit requirements will only include the Program and Financing Schedule and a Status of Fund for the Military Retirement Fund and the Education Benefit Fund.

INSTRUCTIONS FOR COMPLETION OF EXHIBIT
ANALYSIS OF APPROPRIATION CHANGES AND SUPPLEMENTAL REQUIREMENTS

FY 19CY President's Budget - Show costs as included in the original FY 19CY President's Budget. The total of all such costs should equal the FY 19CY appropriation request.

Congressional Action - Show the delta(s) associated with final Congressional action on the FY 19CY appropriation request.

Internal Realignment/Reprogramming - Include those adjustments, exclusive of pay raise absorption, which are necessary to align the amounts shown in the appropriation column of this exhibit with the FY 19CY column of the FY 19BY President's Budget exclusive of pay raise and other price/program changes described below. To the extent that such adjustments result in an asset that is available for application against either the pay raise or program supplemental, such costs should be displayed as a negative total for this column.

Subtotal - Amounts shown in this column should exclude any costs associated with either the pay raise or other price/program changes described below; and should be equal to amounts as shown as internal realignments/reprogramings. This amount should also be equal to FY 19CY column of the FY 19BY1/BY2 President's Budget, less all pay raise and other price changes.

Pay Increase Costs - Show the full costs of the FY 19CY military pay raise. Total direct obligations should agree with the full costs of the pay raise. To the extent that realignments/reprogramming adjustments result in the availability of assets to be applied against the pay raise, such assets should be included on the line "Amounts Applied to Finance Increased Costs."

Other Price/Program Changes - Amounts shown in this column would include inflation and related cost increases, supplemental legislation not included in the "Appropriation" column, appropriation transfers, etc. To the extent realignments or reprogramming adjustments result in the availability of funds to offset these inflation costs, such amounts should be included on the line, "Amounts Applied to Finance Increased Costs."

FY 19CY Column of FY 19BY1/BY2 President's Budget - Show amounts as included in the FY 19CY President's Budget. These amounts should be equal to the sum of the amounts shown in the preceding three columns.

NOTE: An explanation should be provided for each adjustment in excess of one million dollars included in the column showing realignments and reprogramming. Such explanation should not be included as part of this exhibit, but rather should be submitted separately to the DoD(C) (P/B) Operations Directorate, Room 3D-868, Pentagon.

1/ Include full budget activity or subactivity title, e.g., Pay and Allowances of Officers, Pay and Allowances of Enlisted, Permanent Change of Station Travel, Pay Group A, Pay Group F, School Training, etc.

NOTE: This schedule will address principal pricing and program changes as well as other actions resulting in increases or decreases between the current year and the budget year funds in the applicable categories shown above. A separate schedule should be provided for each of the six military personnel budget activities and each subactivity of the Reserve Components. Each increase and decrease should be followed by a narrative statement explaining the change.

NOTE: A separate exhibit should be prepared showing increases and decreases from FY 19BY1 to FY 19BY2.

INSTRUCTIONS FOR COMPLETION OF EXHIBIT MP-2

1. Enter Army, Navy, Marine Corps, or Air Force, as applicable.
2. Enter the appropriate fiscal year. Data should be shown for PY, CY, BY1 and BY2.
3. Data should be provided for each officer and enlisted grade. Appropriate subtotals should be shown for officers and enlisted.
4. Exclude from "receiving BAQ" those personnel occupying inadequate quarters and receiving BAQ at the reduced rate.
5. Enter the total number of survivors of officer and enlisted personnel entitled to BAQ or family housing under the provisions of P.L. 99-227. Data should be provided in a separate memo entry for officer and enlisted personnel.
6. Enter the total number of personnel with dependents occupying adequate and inadequate quarters.
7. Enter the number of personnel with dependents occupying units of other Service or agencies.
8. Enter the number of personnel, military and civilian, occupying family housing units who are members of another Service or agency.
9. Enter the number of inactive family housing units.
10. Enter the number of unoccupied family housing units.
11. Enter the total number of owned, leased, and contracted units. This should be equal to the sum of (6) through (10) and agree with family housing data provided in support of the Family Housing account.

GRAND TOTAL

1/ Show average length of training for the budget years.

2/ Combine a IMAs into training category B. Components should reflect weighted average of drills performed by all IMAs under "No. of Drills" that support the funds request.

3/ Show average number of drills for the budget years.

NOTE: Data is required for direct and reimbursable funded end strength. **End strength data must agree with the end strength data submitted to support the Five Year Defense Plan (FYDP).** Averages are computed by doubling the end strengths of the first 11 months of the fiscal year, adding the last month strengths of the previous year and the year under consideration, and dividing the total by 24.

INSTRUCTIONS FOR COMPLETION OF EXHIBIT
ANALYSIS OF APPROPRIATION CHANGES AND SUPPLEMENTAL REQUIREMENTS

FY 19CY President's Budget - Show costs as included in the original FY 19CY President's Budget. The total of all such costs should equal the FY 19CY appropriation request.

Congressional Action - Show the delta(s) associated with final Congressional action on the FY 19CY appropriation request.

Internal Realignment/Rerprogramming - Include those adjustments, exclusive of pay raise absorption, which are necessary to align the amounts shown in the appropriation column of this exhibit with the FY 19CY column of the FY 19BY President's Budget exclusive of pay raise and other price/program changes described below. To the extent that such adjustments result in an asset that is available for application against either the pay raise or program supplemental, such costs should be displayed as a negative total for this column.

Subtotal - Amounts shown in this column should exclude any costs associated with either the pay raise or other price/program changes described below; and should be equal to amounts as shown as internal realignments/reprogramings. This amount should also be equal to FY 19CY column of the FY 19BY1/BY2 President's Budget, less all pay raise and other price changes.

Pay Increase Costs - Show the full costs of the FY 19CY military pay raise. Total direct obligations should agree with the full costs of the pay raise. To the extent that realignment/reprogramming adjustments result in the availability of assets to be applied against the pay raise, such assets should be included on the line "Amounts Applied to Finance Increased Costs."

Other Price/Program Changes - Amounts shown in this column would include inflation and related cost increases, supplemental legislation not included in the "Appropriation" column, appropriation transfers, etc. To the extent realignments or reprogramming adjustments result in the availability of funds to offset these inflation costs, such amounts should be included on the line, "Amounts Applied to Finance Increased Costs."

FY 19CY Column of FY 19BY1/BY2 President's Budget - Show amounts as included in the FY 19CY President's Budget. These amounts should be equal to the sum of the amounts shown in the preceding three columns.

NOTE: An explanation should be provided for each adjustment in excess of one million dollars included in the column showing realignments and reprogramming. Such explanation should not be included as part of this exhibit, but rather should be submitted separately to the DoD(C) (P/B) Operations Directorate, Room 3D-868, Pentagon.

Exhibit MPR-1 IADT Program and Prior Service Enlistments

Instructions for the Completion of Exhibit MPR-1

1. Separate exhibits should be prepared for the Prior Year, Current Year, Biennial Year 1, and Biennial Year 2.
2. Prior Year or Current Year Exhibits, as appropriate, should be footnoted to indicate the month through which actual data is shown.
3. If separate exhibits are prepared for male, female, CASP, etc. for any year, an additional exhibit which summarizes and combines the data from these separate exhibits will also be prepared for that year.
4. Accounting adjustments necessary to allow begin strength plus gains less losses to equal end strength for those months where actual data is shown should be included in the loss column(s). The exhibit should be footnoted to indicate that such an adjustment is included in the loss column and the amount of the adjustment for that fiscal year.
5. Monthly strengths shown for personnel "awaiting IADT" in a "P" status and "in IADT End of Month ("F" status) will agree with monthly strengths for Training Categories/Pay Groups "P" and "F", respectively, as shown in the Services' justification book.
6. Average number of trainees will be determined by dividing the average strength by the result of the average length of IADT in days divided by 360 days, i.e.:

Average Strength

Average Length of IADT in days
360 days

CHAPTER 3

OPERATION AND MAINTENANCE APPROPRIATIONS

0301 GENERAL

030101 Purpose

A. This chapter covers the budget formulation and congressional justification requirements for operation and maintenance appropriations.

B. The following appropriations and accounts are covered:

Section
030201

- Operation and Maintenance, Army,
Operation and Maintenance, Army Reserve
Operation and Maintenance, Army National Guard
Operation and Maintenance, Navy
Operation and Maintenance Navy Reserve
- Operation and Maintenance, Marine Corps
Operation and Maintenance, Marine Corps Reserve
- Operation and Maintenance, Air Force,
Operation and Maintenance, Air Force Reserve
Operation and Maintenance, Air National Guard
- Operation and Maintenance, Defense-Wide
- Office of the Inspector General
- Defense Health Program
- Former Soviet Union Threat Reduction
Summer Olympics

030202

United States Court of Military Appeals for the Armed Forces, Defense

030203.

- Civil Functions

030102 Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 3 covers Specific back-

up material requirements for the above accounts. The above appropriations/accounts should also submit applicable exhibits required in Chapter 19- Other special Analyses.

030103 Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapters 8,12, and 19 provide additional specific guidance with regard to the back-up material required in this section of the manual.

030104 References

Section 010210 provides policies and definitions concerning costs that are to be financed by the O&M appropriations as opposed to other appropriations in the R&D area. Section 010201 provides policies and definitions regarding the application of expenses and investment criteria for budgetary proposes

0302 BUDGET ESTIMATES SUBMISSION

030201 Operations Accounts

A. Purpose This Section prescribes justification materials required to support the budget estimates for the following operations accounts.

- Operation and Maintenance, Army, Army Reserve, and Army National Operation and Army National Guard.
- Operation and Maintenance, Navy and Navy Reserve
- Operation and Maintenance, Marine Corps and Marine Corps Reserve
- Operation and Maintenance, Air Force, Air Force Reserve; and Air National
- Operation and Maintenance, Defense-Wide
- Office of the Inspector General
- Defense Health Program

B. Submission Requirements All Operation and Maintenance appropriations are required to submit the back-up exhibits listed in the following table, if appropriate. Examples of these exhibits, along with instructions for their preparation, are provided in Section 0304.

OPERATIONS ACCOUNTS EXHIBITS

<u>Exhibit Number</u>	<u>Exhibit Title</u>	<u>Components Required to Submit</u>
O-1	O&M Funding by Budget Activity/Activity Group	All, Except Defense-Wide
OP-5	Program Budget Decision, Part 1	All
OP-5	Detail by Activity Group, Part 2	All

OP-31	Funding for Defense Business Operations Funded Depot Level Repairables (DLRs)	All
OP-32	Summary of Price and Program Changes	All
OP-33	Reconciliation of Increases and Decreases in End Strength in NATO European Countries	All
OP-34	Appropriated Fund Support for Morale, Welfare, and Recreation (MWR) Activities	All
OP-40	Ship Fuel Data and Operating Tempo Data	Navy
OP-41	Ship Operating Cost Data	Navy
OP-44	Military Assigned to Ship and Aircraft Squadrons	Navy
OP-50	Operations, Air Force - Program Element	Air Force
OP-52	Special Operations Forces	USSOCOM
OP-58	Operations, Air Force - Analysis of Air Force POL	Air Force
OP-71	Organizational Clothing and Equipment	Army Reserve/Guard
OP-73	Repair Parts	Army Reserve/Guard
OP-78	Three Year Force Data	Air Force
OP-80	Aircraft Repair/Modification and Engine Overhaul	Air Force

* Also required to be submitted by applicable RDT&E, Military Construction, Family Housing, Defense Business Operations Fund, etc. accounts.

C. Preparation of Material The following instructions pertain to the back-up material required by this Section.

1. The information will cover the prior year (PY), current year (CY), biennial year 1 (BY1) and biennial year 2 (BY2), unless otherwise indicated.

2. Operation and Maintenance data will be submitted in terms of obligations.

3. Additional data may be provided by expanding the prescribed formats and exhibits, or by cross-referencing to additional exhibits, where prescribed material is considered inadequate to justify requested programs or estimates. No prescribed material may be omitted unless inapplicable or unless the omission is specifically approved by the OUSD(C) P/B. The inapplicable stubs and column headings may be omitted but will not be redesignated when completing standard exhibits.

4. The purpose of the back-up exhibits is to describe the program and justify the estimates. If the data collection systems or management systems utilized provide for cost accounts or program units or workload indicators different from those specified in this section, components should request OUSD(C) P/B to change the provisions of this Manual.

5. The use of annex exhibits to reduce bulk is encouraged providing the required material is fully covered and presented in a logical manner. Machine printouts of required data will be accepted but should be designed to minimize bulk. Narrative data related to machine printouts should be assembled with the most appropriate page of the printout in a consistent manner.

D. OMB Circular No. A-11

The Components must submit any additional exhibits required by OMB Circular No. A-11. Consult OMB Circular No. A 11 for instructions pertaining to the completion of the required exhibits.

E. Real Property Maintenance and Minor Construction All components (i.e., Active Forces, Defense-Wide, National Guard and Reserve Forces) shall submit justification data and exhibits to support budget estimates for real

property maintenance and minor construction, in a separate bound attachment, as prescribed in Chapter 8. Two additional copies of this attachment will be delivered to: Director for Military Construction, OUSD(C) P/B, Room 3D840, Pentagon, on the same date as all other submissions required under this chapter. Examples of these exhibits, along with instructions for their preparation are provided in Chapter 8. Additionally ensure that the OP-5 (Part 2) attachment 5; Real Property Maintenance and Minor Construction in section 030402 of this manual is submitted to the Military Construction Office.

- OP-27 Real Property Maintenance Activities (Each O&M Appropriation)
- OP-27P Real Property Maintenance and Minor Construction Projects (All Appropriations - Projects Costing More than \$500,000)
- OP-27H Historic Building Costs (All Appropriations)
- OP-28 Summary of Major Repair Projects (Each O&M Appropriation)

F. Copies of back-up material in support of budget estimates will be submitted as identified in Section 010302. Two additional copies of the OP-5 exhibits for Information Security Programs will be delivered to Director for Military Construction, OUSD(C) P/B, Rm 3D840, Pentagon, on the same date as all other submissions required under this Chapter.

G. Automated Submissions

1. *Automated submissions are required for the following exhibits for both the OSD submission and the President's Budget:*

- OP-8 Civilian Personnel Costs
- OP-26 POL Consumption and Costs
- OP-32 Price and Program Growth

All questions about the automated submission should be referred to:

OUSD(C), Operations Directorate
Attn. O&M Production Assistant
1100 Defense, Pentagon, Room 3D868
Washington, D.C., 20301-1100
Telephone (703) 697-3101

2. The automated data should be generated by the computer software provided. If this cannot be done, alternative arrangements must be made beforehand. The data may be entered into the software manually or loaded from an external file. Directions for its use, as well as the information presented here, are included in the software.

3. When loading external data, it must conform to prescribed criteria. The precise format of the data varies between the exhibits. Specific information is provided in the software. For ASCII data files, the following general guidelines apply:

Negative entries should be identified with a minus sign adjacent to the left most digit.

Data entered will be right justified within the data field.

No commas in numbers over 999.

Zero padding is unnecessary.

Records that have all zero data fields are unnecessary.

4. The submitted data must be either delivered on a standard, DOS-formatted diskette (3.5" or 5.25") or mailed electronically. If delivered on a diskette, the diskette must identify the office of origin and responsible personnel.

5. The software provides reports which duplicate the related exhibits, as well as other reports. These reports must be reviewed, compared against the submitted exhibits, and corrections and adjustments made before submitting the data. THE REPORTS GENERATED BY THE SOFTWARE SHOULD MATCH THE SUBMITTED EXHIBITS. Any deviations must be approved in advance.

6. Identification codes are provided in the software. Any new codes which are required will be assigned by the Director for Operations, OUSD(C) upon request.

H. Non-Defense Business Operation Fund (non-Fund) Unit Cost Areas In addition, to the schedules provided above, non-Fund unit cost areas will submit the schedules required in Chapter 9.

030202 U.S. Court of Military Appeals for the Armed Forces, Defense

A. Purpose This Chapter prescribes budget justification backup requirements for the appropriation "Court of Military Appeals, Defense."

B. Submission Requirements

1. See Chapter 1 for general guidance concerning submission requirements. Submit separate exhibits for each of the following:

- Appropriation Language. Submit justification for proposed changes.
- Purpose and Scope. Describe the missions and functions of the Court of Military Appeals.
- Summary of Obligations by Object Classification.
- Summary of Personnel by Grades. Show the number of civilian positions in each grade, the number of statutory positions, total permanent positions, lapse, and workyears.
- Summary of Price and Program Changes.
- Explanation of Estimate. Explain changes in costs and provide a statement of case workload and opinions rendered.
- Also include applicable exhibits required by Section 030201.

2. Chapter 1 identifies copies of the above material required.

030203 Civil Functions-Operation and Maintenance

A. Purpose This Chapter prescribes budget justification backup requirements for the civil functions appropriations.

B. Cemeterial Expenses (Department of the Army)

1. See Chapter 1 for general guidance concerning submission requirements. Submit separate exhibits for each of the following. All data will be provided for the past, current, biennial year 1, and biennial year 2 fiscal years.

- Appropriation Language. Submit justification for proposed changes.
- Multiyear Financial Plans. Show budget authority and outlays by budget project and in total for the past, current, biennial year 1 and biennial year 2 fiscal years and for three subsequent fiscal years. Also show planned end-of-year employment (permanent positions and other positions) by budget project and in total for the same years.
- Analysis of Budget Authority and Outlays. Show BA and outlays by budget project and in total. Also show the difference between the biennial year 1 and the current year and the outlays in the biennial year 1 resulting from BA in the biennial year 1. Also show the difference between the biennial year 2 and the biennial year 1 and the outlays in the biennial year 2 resulting from BA in the biennial year 2.
- Program and Performance. Describe the major workload considerations and activity factors on which the estimates for each budget project have been based.
- Summary of Obligations by Object Classification.
- Statement Relating Past Year, Current Year, Biennial Year 1, and Biennial Year 2 Programs. List the increases and decreases necessary to reconcile the obligations incurred in each year with an analysis by budget project showing the obligations for each year and the related increases and decreases between each year.
- Project 0861 - Operation and Maintenance. Provide narrative justification and amounts for each project classification within the project. Separately identify year end

employment and workyears for supervisory, interment and maintenance categories.

- Project 0864 - Administration. Provide narrative justification and amounts for each object classification within the project. Separately identify year end employment and workyear for National Cemetery activities, headstone activities, and administrative services and staff planning.
- Project 0865 - Special Construction, Arlington National Cemetery

a. Provide amounts by each object classification within the project. Separately identify year end employment and workyears.

b. List and provide a narrative justification and amount for each planned construction or development project.

- Report of Motor Vehicle Data. Provide the following summary:

a. Fleet as of October 1.

b. Acquisitions:

- (1) New orders placed.
- (2) By forfeiture.
- (3) By transfer.

c. Number disposed of (deduct):

- (1) Disposals accomplished (carryover).
- (2) Disposals accomplished (newly scheduled).

d. Vehicles replaced (newly scheduled).

e. Active fleet, September 30 (a + b + c).

f. Vehicles unused on a term basis (add).

g. Total vehicles available full-time (e + f).

h. Obligations for vehicles

ordered.

Personnel Justification. Submit Exhibit OP-8, which is described in Section 030201 and an example of which is found in Section 0304

2. Chapter 1 identifies copies required of the above material.

C. Wildlife Conservation, Etc., Military Reservations

1. In addition to the Program and Financing Schedule and Personnel Summary, submit an Exhibit OP-5 prescribed in Section 030201 and provided in Section 0304.

2. Chapter 1 identifies copies required of the above material.

0303 CONGRESSIONAL JUSTIFICATION/PRESENTATION

030301 Purpose

This Section presents the justification book organization and the exhibit requirements for submission to Congress. Examples of budget exhibits can be found in Section 0304.

030302 Organization of Justification Books

A. Justification Books will be organized into separate books for each appropriation. (The only exceptions to organizing justification books into separate books for each appropriation are for the United States Court of Military Appeals for the Armed Forces, Office of the Inspector General, and the Environmental Restoration, Defense appropriations. These should be included in the same book as the Defense-Wide. The Defense Health Program (DHP) will be a separate justification book. The procurement and RDT&E DHP budget activities will follow the organization prescribed for the procurement and RDT&E appropriations in Chapters 4 and 5 respectively.

B. Justification books for the Active Component of each Military Service and the Defense-Wide should be organized into three volumes (in separate binders) as follows:

- "Justification of Estimates for Fiscal Years 19BY1 and 19BY2"
- "Data Book"
- "Real Property Maintenance and Minor Construction"

Reserve and National Guard components should combine the above volumes into one binder for each component.

C. Volume I - Justification of O&M Estimates Fiscal Years 19BY1 and 19BY2
Operation and Maintenance (O&M) Justification Books will be submitted on an operations basis to include active military force personnel strengths, Reserve and National Guard personnel on full-time active duty, and civilian personnel. (Related dollars financed from Military Personnel

appropriations, however, should not be included). The content and arrangement of exhibits for the operations accounts are indicated at the end of this section. Applicable exhibits for the reserve and guard component operations accounts will be consistent with the active operations accounts. Exhibit formats are provided in Section 0304. Separate volumes for active and reserve component operation appropriations will be submitted. Funds for NFIP or TIARA will be specifically identified. Justification classification will not exceed that required for other operations funds.

D. Volume II - Data Book The content and arrangement of exhibits for the operations accounts are included at the end of this section.

E. Volume III - Real Property Maintenance and Minor Construction Two Copies of the Operation and Maintenance Book-Volume III, including the Reserve and National Guard component exhibits, will be submitted for review and approval to the Directorate for Construction, D6D(C) P/B, Room 3D840, Pentagon. In addition, the OP-28, Summary of Major Repair Projects (Chapter 8) will be provided with the review copies of Volume III.

F. Additional Accompanying Exhibits
Although not to be included in Volume I, Volume II, or Volume III of the Justification Books, the exhibits at the end of this section are required to be submitted to the OUSD(C) P/B Directorate for Operations, Pentagon, Room 3D868, simultaneously with the submission of the other Budget Justification material. These exhibits are not to be included in Justification Books submitted to the Congress. Examples are provided in Section 0304 (O&M) or, Chapter 19. (Special Analyses).

H. O&M Overview The following Operation and Maintenance Overview exhibits are required for submission to the OUSD(C) P/B Directorate for Operations. Specific suspense dates will be furnished in the annual Budget Justification Call letter. The parent service is responsible for providing all required data including Reserve Component appropriations. Exhibit formats are provided in Section 0304. Narrative data must be included to explain price/program changes between all fiscal years displayed. Two copies of each exhibit are required and will identify the Component, exhibit number

and title, and name/telephone number of the point of contract. The exhibits will be consolidated at the Operation & Maintenance title level for printing and submission to the Congress. The Defense Agencies should provide as a minimum PBA 19, 20, 24, and address resource requirements in one or more of the major mission categories as appropriate.

etc.				
Total Operation and Maintenance,_____				

Exhibit O-1

Exhibit O-1 (Page 1 of 2)

Instructions for O-1

All O&M components except Defense Agencies must submit a hard copy O-1 for both the OSD/OMB and Congressional submissions. In addition, the O-1 must be submitted in automated format for the Congressional submission. This should be done in Excel or Lotus format, according to the instructions below:

Lotus Format:

- 3 1/2 inch high density disk with a blank O-1 in Excel or Lotus format will be provided to components to enter funding amounts by subactivity.
- Enter funding data in thousands of dollars.
- Subtotals will automatically calculate for Budget Activity and Appropriation; do not enter any subtotals.
- The existing numerical line item identifiers must be maintained for each subactivity. Only if a particular subactivity no longer applies for the current submission, should the line be deleted.
- New subactivities maybe entered by inserting a line with an additional line item identifier, following the existing line item sequence. Enter the title of the new subactivity in all capital letters. The funding entered for each new line will be included in the subtotals and totals.

INSTRUCTIONS FOR PREPARATION OF OP-5
(PART 1) BUDGET ACTIVITY SUMMARY AND
(PART 2) DETAIL BY ACTIVITY/SUB-ACTIVITY GROUP

1. The OP-5 is a multi-purpose summary document. It's main purpose is to reflect a summary of the resources for each Appropriation, Budget Activity, Activity Group, and Sub-Activity. For the OSD budget submission, a form OP-5 (Part 1) will be submitted for each Appropriation and Budget Activity. For the President's budget submission, an OP-5 (Part 1) should be prepared for each Budget Activity. An OP-5 (Part 2) will be submitted for each Sub-Activity Group for the OSD budget submission and at the Activity Group level for the President's budget. Base Support and Real Property Maintenance will be treated as separate Sub-Activities Groups. In addition, the Services will prepare, at the appropriation level, an OP-5 (Part 2), Section IV (Attachment 3) for Base Support, and an Attachment 5 for Real Property Maintenance. An OP-5 (Part 3) will be submitted for each Defense-Wide agency.

2. Each of the O&M appropriations listed below, will be supported by OP-5 Exhibits, (Part 1), (Part 2), and or (Part 3) as appropriate. (Specific Sub-Activities will be provided separately on an annual basis.)

Operations, Army, Army Reserve, and Army National Guard
Operations, Navy and Navy Reserve
Operations, Marine Corps and Marine Corps Reserve
Operations, Air Force, Air Force Reserve and Air National Guard
Operations, Defense-Wide
Defense Health Program
Former Soviet Union Threat Reduction
Office of the Inspector General
United States Court of Military Appeals for the Armed Forces, Defense
Wildlife Conservation, Etc., Military Reservations

3. The OP-5 (Part 2) provides essential information for justification of the OSD and President budget estimates. The Reconciliation of Increases and Decreases portions of Section III and Section V should identify what changes are occurring and explain both why the changes are occurring and why they are necessary. The narrative should discuss the relationship of performance criteria in Section IV to program objectives. The FY 19PY estimate column of the OSD submit should reflect actual data through the first three quarters plus a realistic projection for the remaining quarter.

4. Current year data for the "Reconciliation of Increases and Decreases" will be included in the OP-5 (Part 2) for both the President's budget submission and the OSD budget submission. Reconciliations will show all changes from the: FY 19CY estimate in the previous President's Budget submission to the current FY 19CY estimate, the current FY 19CY estimate to FY 19BY1 estimate, and from the FY 19BY1 estimate to the FY 19BY2 estimate.

5. Performance criteria are required on the OP-5 (Part 2), but maybe omitted on the OP-5 (Part 1). Performance criteria for Defense-Wide agencies will be included at the agency level. Performance criteria for some sub-activity groups are specified in the attachments to the OP-5.

Exhibit OP-5 Instructions

(page 1 of 2)

6. Personnel summaries are required at the Appropriation, Budget Activity, Activity Group, and Sub-Activity Group levels. Personnel summaries are also required for each Defense Agency.
7. For those Activity Groups with aircraft, a one line total of flying hours may be provided. If this option is selected, details by type/model must be included in the Data Book (Volume II).
8. Classified information will be eliminated from all O&M justification books except for Defense Agencies.
9. Defense-Wide agencies with Defense Support Activities (DSA) must clearly describe and justify the activities within the organization which supports them. Information will identify manpower and funding for each DSA.

BUDGET ACTIVITY: _____

- I. Description of Operations Financed:** Provide a narrative explanation of activities included.
- II. Force Structure Summary:** Provide force structure supported by the Budget Activity. For example, the number of bases, the number and types of schools, the ships and aircraft squadrons supported.
- III. Financial Summary O&M: \$ in Thousands):**

	FY 19PY <u>Actuals</u>	FY 19CY		Current <u>Estimate</u>	FY 19BY1 <u>Estimate</u>	FY 19BY2 <u>Estimate</u>

BUDGET ACTIVITY
Activity Group (Continued): _____

- D. **Reconciliation Increases and Decreases:** List separately major pricing and program changes from the FY 19CY President's budget request to the current FY 19CY estimate, from the current FY 19CY estimate to the FY 19BY1 estimate, and from the FY 19BY1 estimate to the FY 19BY2 estimate. When possible program changes should address adjustments to force structure, end strength, workyears, etc. Utilize the format for OP-5 (Attachment 1). Also see the general instructions for the OP-5 Exhibit.

IV. Performance Criteria and Evaluation Summary: Provide meaningful performance and workload data for each year FY 19PY, FY 19CY, FY 19BY1 and FY 19BY2 where appropriate. Performance criteria and evaluation summary data need not be provided at the Appropriation or Budget Activity levels, but should be provided for various Activity Groups where applicable. (See Attachments 2 through 7 for criteria required for Activity Groups.)

Exhibit OP-5 Part 2: Detail by Activity Group
(page 1 of 4)

BUDGET ACTIVITY _____

Activity Group (Continued): _____

D. Reconciliation Increases and Decreases: (See Attachment 1 for format and level of detail required) List separately major pricing and program changes from the FY 19CY President's budget request to the current FY 19CY estimate, from the current FY 19CY estimate to the FY 19BY1 estimate, and from the FY 19BY1 estimate to the FY 19BY2 estimate. When possible program changes should address adjustments to force structure, end strength, FTEs, etc. Such justification should clearly explain programmatic changes in resource levels including why increases are required or decreases occur. Additionally, the narrative justification should relate cost to performance criteria, workload and manpower data, as well as identify the impact if requested changes are not funded. Also see the general instructions for the OP 5 Exhibit.

IV. Performance Criteria and Evaluation Summary: Provide meaningful performance and workload data for each year FY 19PY, FY 19CY, FY 19BY1 and FY 19BY2 where appropriate. Performance criteria and evaluation summary data should be provided for various Activity Groups where applicable. (See Attachments 2 through 7 for criteria required for Activity Groups.) For depot maintenance show data as required by page 1 of the OP-30 exhibit. For other Activity Groups, display comparable/appropriate data.

9. FY 19CY Current Estimate
10. Price Growth should agree with price growth on the QP-32 exhibit.
11. Functional Program Transfers (See 6 above)
12. Program Increases (See 7 above)
13. Program Decreases (See 8 above)
14. FY 19BY1 Budget Request
15. Price Growth (See 5 above)
16. Functional Program Transfers (See 6 above)
17. Program Increases (See 7 above)

Reconciliation of Increase and Decreases (Continued)

18. Program Decreases (See 8 above)

19. FY 19 BY2 Budget Request

NOTE: If a particular category of increase or decrease does not apply leave it off the OP-5 (rather than include it on the OP-5 with a value of zero). Reprogramming actions included in the budget submission for the Current Year other than 1415-IR functional transfers should be shown separately. Except for this, categories of increases and/or decreases other than those shown above should not be used.

JCS Exercise Program - O&M Costs
(FY 19PY, FY 19CY, FY 19BY1 and 19BY2)

<u>Exercise Name & Location</u> ^{1/}	<u>Time Period of Exercise</u>	<u>Workload Measure</u> ^{2/}	<u>Cost (\$ Thousands)</u>		
			<u>Transportation</u>	<u>Other</u>	<u>Total</u> ^{3/}
<u>Directed Exercises</u>					
(List by exercise)	1/	Identify RDE initiatives.			
Total	2/	<p><u>Airlift:</u> Reflect C-130, C-141, or C-5 hours, as appropriate, for transportation costs. Separately identify C-130, C-141, or C-5 hour requirements, as appropriate for commercial augmentation effort. Indicate in footnote JCS Exercise rate used for pricing.</p> <p><u>Sealift:</u> Express work measurement tons (differentiate between break bulk and containers) to be transported via MSC; and MSC per diem ship days as applicable. In footnote indicate rates used for each.</p> <p><u>Land Transportation:</u> Express program values, in measurement tons to be transported overland. Indicate rates used in footnote.</p>			
<u>Coordinated Exercises</u>					
(List by exercise)		<u>Port Operations:</u>			
Total		<p><u>CONUS:</u> Express workload in terms of measurement tons to be transported through CONUS Ports. Indicate rates used in footnote.</p> <p><u>Overseas:</u> Express workload in terms of measurement tons to be transported through Overseas Ports. Indicate rates used in footnote.</p>			
<u>Total Directed and Coordinated Exercises</u>	3/	<p><u>For FY 19PY and FY 19CY:</u> Show by footnote both the amount appropriated for FY 19PY and the amount requested for the FY 19CY in The FY 19CY President's budget. For FY 19CY, explain the difference between the amount requested in the President's budget and the current estimate.</p> <p><u>For FY 19BY1 and FY 19BY2:</u> Briefly describe changes in the program from that of the previous year. To the extent specific exercises have not been approved at the time of the budget submission, estimate total program levels. Estimated amounts should be distributed between transportation and other costs, as applicable, and should be related to estimated workload. Explanations of changes in both costs and workload are required between the FY 19CY and FY 19BY1 and between the FY 19BY1 and FY 19BY2. This information should be provided in sufficient detail to justify the budget estimate.</p>

 - Number of Child Development Centers
 - Number of Family Child Care (FCC) Homes
 - Total Number of Children Receiving Care
 - Percent of Eligible Children Receiving Care
 - Number of Children on Waiting List
 - Total Military Child Population (Infant to 12 years)
 - Number of Youth Facilities
 - Youth Population Serviced (Grades 1 to 12)

ADDITIONAL INSTRUCTIONS

This schedule should exclude those funds supporting maintenance and repair of real property and minor construction

Additional performance criteria and workload indicators may be included for any of the above functional categories as applicable. Additional criteria/indicators are especially encouraged for “Other Base Services” and “Other Personnel Support” categories as they relate to more important or unique support functions.

Include direct Operation and Maintenance funds only (Exclude amounts funded from Military Personnel appropriations.)

For the OSD submission, this format should be followed in preparing an OP-5 Exhibits for Base Support.

Exhibit OP-5 Attachment 3: Base Operations Support

<u>FY 19PY</u> <u>Units (\$ in 000)</u>	<u>FY 19CY</u> <u>Units (\$ in 000)</u>	<u>FY 19BY1</u> <u>Units (\$ in 000)</u>	<u>FY 19BY2</u> <u>Units (\$ in 000)</u>

Agencies should list each applicable OP-32 line item number and title. Do not include the percentage of price growth.

Exhibit OP-5 Part 3: Defense Agencies

OPERATION AND MAINTENANCE, DEFENSEWIDE
Defense Agency/Activity Group (Continued):

D. Reconciliation: Increases and Decreases: (See Attachment 1 for format and level of detail required) List separately major pricing and program changes from the FY 19CY President's budget request to the current FY 19CY estimate, from the current FY 19CY estimate to the FY 19BY1 estimate, and from the FY 19BY1 estimate to the FY 19BY2 estimate. When possible, program changes should address adjustment to force structure, end strength, workyears, etc. Such justification should clearly explain programmatic changes in resource levels including why increases are required or decreases occur. Additionally, the narrative justification should relate cost to performance criteria, workload and manpower data, as well as identify the impact if requested changes are not funded. Also see the general instructions for the OP 5 Exhibit.

IV. Performance Criteria and Evaluation Summary: Provide meaningful performance and workload data for each year FY 19PY, FY 19CY, FY 19BY1 and FY 19BY2 where appropriate. Performance criteria and evaluation summary data should be provided for various Activity Groups where applicable. (See Attachments 2 through 7 for criteria required for Activity Groups.) For depot maintenance show data as required by page 1 of the OP-30 exhibit. For other Activity Groups, display comparable/appropriate data.

Data formerly shown for General Merit Pay will be reported in the General Schedule line.

*(Such as Mariners, Intergovernmental Personnel Act (IPA) individuals, etc.)

Display end strength, workyear, and funding data for disadvantaged employment. Data will be shown for all years (PY/CY/BY1/BY2).

Do not display FTP or benefit data for FNIH.

Voluntary separation incentives will be shown in OC-13.

Reimbursable data will be provided for end strength, workyears, and funding and will be shown by appropriation and by Component/Agency.

Provide reimbursable sources, by appropriation and try Component/Agency, on separate page

Exhibit OP-8 Civilian Personnel Costs

(page1 of 3)

CIVILIAN PERSONNEL COSTS

OP-8 Instructions

Separate OP-8 exhibits must be prepared for PY, CY, BY1, BY2 for each Military Department in total and for each appropriation/fund in which civilian personnel are funded.

Each Defense Agency, including those Defense Agencies that have only RDT&E funded civilian personnel, and the Court of Military Appeals must also provide a separate exhibit. If a Defense Agency has civilian personnel financed in more than one appropriation/fund then a total for the Defense Agency must be provided.

Rate data on the OP-8 should be shown parenthetically. To calculate the required rate data, use the formulas displayed on the OP-8 exhibit. Show the average salary for Basic Compensation, overall salary for Total Compensation, and workyear cost for Compensation and Benefits. Show the other rate data, as a percentage in decimals to five places, for total variables and benefits.

End strength on board as of September 30 vice end strength authorizations will be displayed for all beginning and ending end strengths. The beginning end strength must agree with previous FY's September 30 end strength.

In accordance with OMB Circular A-11, full-time equivalent (FTE) employment is the total number of hours (worked or to be worked) divided by the number of compensable hours applicable to each fiscal year. FTE is synonymous with workyear.

Data formerly reported for General Merit Pay category will be merged in the General Schedule line.

For Disadvantaged employment category, display end strength, workyear, and funding data for all years.

In accordance with the Federal Employees Part-time Career Employment Act of 1978 (Public Law 95-437), part-time permanent employees are counted on a full time equivalent basis, i.e., an individual working 30 hours a week becomes .75 of an end strength. There is no adjustment for other part-time or intermittent employees - these employees would be counted on an individual basis not on a fractional basis.

Consult either DoDI 7330.18 or the Office of Personnel Management's Federal Personnel Manual (FPM) for definitions of full-time employees with permanent appointments (FTP). FTP (Full-Time Permanent), according to OMB Circular A-11, is the number of full-time employees with permanent appointments that are on-board, or planned to be on-board, as of the end of each fiscal year. Such entries will exclude anticipated vacancies. Do not display FTP for Indirect Hire Foreign Nationals. Consult the DoDI or FPM to determine if your Foreign National Direct Hire employees are considered FTP employees.

Voluntary separation incentives must be reported in Benefits for Former Employees (Object Class 13).

Do not include overtime workyears in workyear totals. The workyears on the OP-8 are straight time workyears only. Overtime and holiday workyears are reported in OMB program and financing schedules (galleys).

Workyears (direct and reimbursable) in the OP-8 exhibits must agree with the workyears reported in the OMB galleys used for the printed budget. (See OMB Circular A-11.)

For the PY supporting the FY 19BY President's budget request, the end strength data must agree with the SF-113A, Monthly Report of Federal Civilian Employment, provided to OPM to report military functions employment levels as of September 30.

- Direct hire end strength data on the OP-8 must agree with data provided on the September 30th supplement to the SF-113A report. This supplement is entitled, Report of Part Time Permanent Employees on a Fractional Basis.
- Indirect hire end strength data must agree with the Indirect Hire supplement to the September 30th SF-113A report.
- The FTP end strength data must agree with data provided on line 30, Full-Time with Permanent Appointments, of the September 30th SF-113A.

Civilian Personnel Direct Funding (#7) will be total Civilian Personnel (#5) less reimbursable funding (#6). Provide end strength, workyear and funding reimbursable data for all of the columns. Appropriations/funds (e.g., Defense Business Operations Fund, etc.) that are not funded with budget authority show all of the data as reimbursable so that "0" will be displayed in every column on the "Civilian Personnel Direct Funding" (#7) line.

On a separate page, provide reimbursable sources by appropriation, and by Component/Agency.

Instructions for Preparation of the OP-8 Part 2 Reimbursable Pay

This is mandatory for the Military Departments and is optional for the Defense-Wide agencies. If a Service shows that civilian pay is to be reimbursed from a Defense-Wide agency that does not submit this form, then the agency coordination must be shown on this form. This is required only for the Budget Estimates Submission (BES).

Each appropriation account in both the current year and the budget year, for which civilian pay is reimbursed, must identify the following in thousand of dollars:

On line 1, total civilian pay*.

On line 2, total reimbursable pay*.

On line 3, the amount of line 2 that is reimbursed within the account.

On line 4, the amount by account of line 2 that is reimbursed from accounts within the Service or Defense-Wide agency. The sum of all accounts must equal the total intra service.

On line 5, the amount by account of line 2 that is reimbursed from other Services or Defense-Wide agency accounts. The sum of all accounts must equal the total inter service.

On line 6, the amount of line 2 that is reimbursed from all other sources. The sum from all Defense-Wide agencies must equal the total all other.

Online 7, the total civilian pay that is reimbursed to other Services or Defense-Wide agencies **.

Notes:

* Lines 1 and 2 **MUST** agree with the totals reported by the Service of Defense-wide agency on the OP8 and the sum of lines 3 through 6 of this must equal line 2.

** Any amounts identified on line 5 **MUST** appear on line 7 of the reimbursing Service or Defense-Wide agency submission of this exhibit.

EXHIBIT OP-9, (page 4 of 5)

INSTRUCTIONS

1. The intent of the OP-9 is to identify the factors that have an impact on changes in average salary and average FTE cost from fiscal year to fiscal year.
2. Prepare separately for each appropriation and Fund account for U.S. direct hire, classified and wage system, and Foreign National Direct Hire (FNDH). Complete amounts and rates for WS, etc., as in SES/GS column.
3. All end strength will be displayed as actual or planned to be on board as of September 30. Do not use end strength authorizations.
4. Cost, FTEs and end strengths should be consistent with those shown on OP-8, Analysis of Civilian Personnel Costs.
5. Show each classified pay raise in separate stub.
6. Data is to be reflected at appropriation or account.
7. The "Average Basic Annual Salary" for a FY is computed by dividing the "Basic Compensation" total by the number of straight time workyears.
8. The "Overall Average Annual Salary" for a FY is computed by dividing the "Total Compensation" (Object Class 11) by the number of straight time workyears.
9. The "Average FTE Cost" for a FY is computed by dividing "Total Compensation and Benefits" (Object Class 11 and 12) by the number of straight time FTEs.
10. The OP-9 will be prepared for both the Budget Submission and the Presidents Budget. However, for the latter the OP-9 will be submitted separately to OSD and will not be included in the congressional justification material.

Footnotes

- 1/ Reflect as % rate of basic compensation.
- 2/ Express as decimal to five places. Develop effective pay raise as ratio of No. applicable days to total compensable days in year times pay raise percentage. Identify computation in footnote.
- 3/ Show computation - derivation of rate.
- 4/ Provide an explanation if the rate is different from the previous fiscal year rate, e.g. changes in overtime rate, changes in health benefits, FERS, etc.

GRADS ENTERED ACADEMY				
PREP SCHOOL LOAD				
PREP SCHOOL GRADS ATTRIT AS FOURTH CLASSMEN				

NOTE: Carryover is to be calculated as of graduation (unless another time is specified uniformly for an academy).

“Graduation Load” is the sum of carryover for each class plus graduates.

“Autumn Load” is the sum of carryover for each class plus net new entrants at the beginning of the autumn term.

Reconcile and explain in footnotes differences between Autumn Load and “Cadet/Midshipman End Strength” reflected here and in the FYDP update.

“Prep School Load” is to be a forecast of average on board students on a “best estimate” basis (specify formula).

If this table is presented on an academic year basis, so state.

Instructions for Completion of Preceding

1. Enter Army, Navy, or Air Force, as applicable.
2. Enter the appropriate fiscal year (data should be shown for the Prior-1, Prior, Current, and Biennial Budget fiscal years).
3. Enter the average number (many year average) of officers, enlisted personnel, civilians, and combined total, respectively, assigned to ROTC units and ROTC command level staffs, respectively. ROTC command level staff should include all personnel up to the departmental level who are associated with the ROTC program but are not assigned to a ROTC unit.
4. Enter the total costs of pay and allowances/salary of military and civilian personnel, as applicable, plus any related O&M support costs. Pay and allowances/salaries will be determined through the use of standard rates for military and civilian personnel, respectively.
5. Enter the average staff and the average cost of the staff per unit. Average staff will be determined by dividing the applicable total staff (unit or command level) by the number of units shown in C (see paragraph 6, below). The average cost of staff per unit will be arrived at by dividing the applicable total costs for the unit and command level staffs, respectively, by the number of units shown in C.
6. Enter the applicable number of operating units.
7. Enter the total ROTC costs, other than those shown in A or B, included in the Service's O&M appropriation(s). (This should be equal to the sum of D.1.a and b discussed below in paragraphs 8 and 9.)
8. Show in parenthesis () the total applicable costs of ROTC scholarships (include only tuition, fees, books, and other related student expenses).
9. Show in parenthesis () the applicable O&M administrative costs, by categories shown, related to the ROTC program.

OP-14 (Part D)

10. Enter the total ROTC costs included in the Service's applicable reserve component appropriation. This should be equal to the sum of D.2.a, b, and c, as discussed in paragraphs. 11, 12, and 13 below.
11. Enter in parenthesis () the total costs relative to the monthly subsistence allowance paid to college freshmen and sophomores who are recipients of ROTC scholarships.
12. Enter in parenthesis () the aggregate sum included in the Service's applicable reserve component appropriation for ROTC Pay and Allowance (Summer Training), Subsistence of Reserve Officer Candidates (Summer Training), and Travel of Reserve Officer Candidates (Summer Training).
13. Enter in parenthesis () all costs of the ROTC program, other than those discussed in paragraphs. 11 and 12, above, included in the Service's reserve component appropriation.
14. Enter and detail by appropriation, and explain by footnote, any costs attributable to the ROTC program which have not been included in either A, B, or D (1 and 2).
15. Enter the total cost data shown in D.1, 2 and 3.
16. Enter in parenthesis () the number of candidates participating in and total costs of Flight Instruction Program and the Aviation Indoctrination Program, respectively, included in the above data.
17. Enter by the scholarship and non-scholarship programs, respectively, the average number of candidates participating in MS I, II, III, IV, and applicable totals, respectively. Leave dollar columns blank.
18. Enter the total costs of the ROTC program. Total costs should be equal to the aggregate sum of A, B, and D, above.

Exhibit OP-20A												
OP-20B												
OP-20C												

INSTRUCTIONS

Separate exhibits will be submitted for the active and the reserve flying hour programs. The OP-20 exhibit is supported by three schedules, each one of which is designed to display the principal elements affecting the development of requirements. All data are required for the prior year, current year, biennial year 1, and biennial year 2.

- Exhibit OP-20A relates to those requirements which are computed principally on the basis of numbers of tactical aircraft, crew ratios and the hours per crew required to maintain combat readiness.
- Exhibit OP-20B relates to those requirements which are computed principally on the basis of the production of trained pilots. In addition to Undergraduate Pilot Training requirements, this schedule should also include requirements to support CCTS, CRAW, and RTU's.
- Exhibit OP-20C covers all other fleet support requirement.

Include the flying hours actually flown or programmed to be flown in support of the drug interdiction program in the proper section of the flying hour report (i.e. tactical flying hours in support of the drug program are to be reflected in the tactical/ASW section of the OP-20). At the end of the OP-20 exhibit, include a memo entry reflecting the number of flying hours and the dollars by Type/Model/Series that are funded in the centralized drug account.

NARRATIVE JUSTIFICATION

A brief description to explain changes in programs between years and deviation between actual and program data. Particular emphasis should be placed upon actual data.

INSTRUCTIONS

Exhibit OP-20D is for Army use only. Exhibits OP-20, 20A, 20B, and 20C are not required for Army. A separate exhibit will be submitted for the Active Army, Army Reserve, and Army National Guard.

Provide for prior year, current year, biennial year 1, and biennial year 2.

Include the flying hours actually flown or programmed to be flown in support of the drug interdiction program in the proper section of the flying hour report (i.e. tactical flying hours in support of the drug program are to be reflected in the tactical section of the OP-20D). At the end of the OP-20D exhibit, include a memo entry reflecting the number of flying hours and the dollars by Type/Model/Series that are funded in the centralized drug account.

- Total prior year flying hour data is to be expanded to separately identify programmed (a/o the last Presidents Budget submit) and actual execution data.
- Expand the exhibit to include outyear data for the annual program only (not required by quarter).
- Exhibit has been modified to include CREW RATIOS, NUMBERS OF CREWS, HOURS PER CREW/MONTH, and REQUIRED vs. BUDGETED F/Hs.
- Data will be arrayed by BA/Program Element/WSC with a Total array identified for each Program Element and Budget Activity.
- The exhibit will identify O&M activities exclusive of Foreign Government Owned (FGO) and SON aircraft.
- FGO and MFP-10 data will be identified in separate arrays.
- A Grand Total section will aggregate the O&M, FGO, and SON information for each fiscal year by quarter.
- Separate sections (with the same data array) will also identify the AFR and ANG programs.
- This exhibit will be submitted for both the OSD submission and the President's budget submission.
- Include the flying hours actually flown or programmed to be flown in support of the drug interdiction program in the proper section of the flying hour report (i.e. tactical flying hours in support of the drug program are to be reflected in the tactical section of the OP-20E). At the end of the OP-20E exhibit, include a memo entry reflecting the number of flying hours and the dollars by Type/Model/Series that are funded in the centralized drug account.

Operations, _____

EMERGENCY AND EXTRAORDINARY EXPENSE LIMITATION

Scope: Covers all expenses subject to the Congressional limitation on “Emergency and Extraordinary Expenses”

Format: The format is identical to Exhibit OP-5, except that the following functions will be substituted for the common functional categories in Part B:

FY PF FY CY FY BY1 FY BY2

1. Cryptologic Intelligence
2. HUMINT
3. Counterintelligence and Investigative Activities
4. Scientific and Technical
5. Intelligence and Management Support
6. Mapping and Charting Activity
7. **Attaché** Activities
8. Tactical Intelligence
- a/ 9. Other Intelligence
- Subtotal, Intelligence Type
10. Representation Allowance
11. Criminal Investigations
- a/ 12. Other Non-Intelligence Activities

Total

The narrative justification in Part D will address each of the above functions separately, and address the variances from the approved program and justification for any variances over the PY and CY functional amounts.

Total of the functional line items in Part B should equal the Program Element aggregation in Part A.

- a/ “Other” categories should be specifically identified with their related purpose as a footnote. DoD Components are invited to provide additional appropriate standard categories in lieu of using “Other” category.

(Use the same sub categories for stub entries for “other” as contained on Page 1 of the OP-30 Exhibit)

Provide information for fiscal years FY 19PY, FY 19CY, FY 19BY1, & FY 19BY2.

Instructions

- A separate exhibit should be completed for each Operation and Maintenance appropriation.
- Include depot maintenance programs only (exclude from this exhibit Maintenance Support programs, second destination transportation amounts or depot maintenance amounts which are funded in appropriations other than Operation and Maintenance).
- Depot maintenance amounts should be consistent with amounts shown in applicable OP-5 Exhibits in each Service's/Component's budget justification book and agree with amounts provided in Exhibit PBA-5, Depot Maintenance, Chapter 3.
- Total executable depot maintenance requirements should equal the funded requirement plus the unfunded executable deferred requirement (including prior year unfunded executable deferred requirements). Unfunded Executable Deferred Requirements are only those requirements deferred due to funding constraints. Do not include requirements deferred because of operational commitments, lack of capability or other nonfunding constraints which are Unexecutable Unfunded Deferred Requirements identified separately on this Exhibit OP-30.
- Depot maintenance funded and unfunded deferred amounts for the FY 19PY, FY 19CY, FY 19BY1 and FY 19BY2 should also be included in the Workload and Performance Criteria section of applicable OP-5 Exhibits for those Activity Groups which include depot maintenance programs. (The Workload and Performance Criteria section of the OP-5 should utilize the OP-30 format.)
- Include amounts associated with that portion of Defense Business Operation Fund rates which are attributable to civilian pay raise amounts even though such amounts may not be funded within the appropriation total.
- Depot Level Repairable Maintenance will only include non-stock funded items.
- Include FY 19PY-1 data for the OSD budget submission only.
- Pages 1 through 3, and pages 6 and 7 of the OP-30 Exhibit should be submitted in support of the President's Budget.

INSTRUCTIONS FOR COMPLETION OF OP-32

- (1) Enter the applicable component, i.e., Army, Navy, Marine Corps Reserve, Air National Guard, etc.
- (2) Enter the fiscal year for which this exhibit is being prepared.

NOTE: A separate exhibit should be submitted for each O&M appropriation for the current year, for biennial year 1, and for biennial year 2. This exhibit should be prepared at the appropriation level for the President's Budget.

- (3) Enter the prior year (PY), current year (CY), biennial year 1 (BY1), or biennial year 2 (BY2), as applicable.
- (4) For the CY exhibit, amounts entered in this column should agree with the prior year actual costs as shown in the prior year column of the applicable budget submission. For the BY1 exhibit, these amounts should agree with the far right hand column of the CY exhibit. For the BY2 exhibit, these amounts should agree with the far right hand column of the BY1 exhibit.
- (5) The amount shown for each appropriate line (exclusive of line 991) in the Foreign Currency Rate Difference column will reflect the difference in the budgeted foreign currency exchange rates between the two years. For the prior and current years the budgeted foreign currency exchange rates are the exchange rates that have been approved for recording obligations during execution. If the current year execution rates have not yet been established by the Congress in time for the budget submission, the foreign currency exchange rates reflected in that fiscal year's President's budget request will be used. For the biennial years, the budgeted foreign currency exchange rates are the exchange rates reflected in the OUSD (C) budget call memorandum for the budget submission or in the PBD issued during the budget review in the formulation of the President's budget request. (Note: Variances from the budgeted rates will be reflected only on line 991. These variances do not enter into the calculation on any of the other lines.) The column total, including line 991, will reflect (1) for the PY to the CY: the difference between prior year actuals and the current year budgeted rates, (2) for the CY to the BY1: the difference between budgeted rates in each year, and (3) for the BY1 to the BY2: the difference between budgeted rates in each year. If transfers are approved for the current year, the column total will reflect (1) for the PY to the CY: the difference between PY actuals and CY anticipated expenditures and (2) for the CY to the BY1: the difference between the CY anticipated expenditures and the BY1 budgeted rates. No foreign currency rate difference will be shown for Defense Business Operations Fund Purchases, and Travel or Transportation for MAC, MSC or MTMC. Only in unusual circumstances should an amount for foreign currency rate difference be shown for other travel and/or transportation costs. (See end notes for further discussion of foreign currency entries.)

- (6) This column should show the rate (percent) of price growth for various items. The general price escalation indices prescribed by OSD (as provided by OMB) should be used for items 302, 307, 416-417, 507, 679, 725-771, 913-915, 920-925, 927-989, and 998. Other price growth rates may be used for these items when actual experience supports a rate of increase different from that prescribed For the OSD/OMB submit. In those instances, supporting documentation for the rate used should be provided. If the rate is approved during the budget review, the revised rate may be used in the President's budget. To the extent that a separate rate of increase is used for any portion of a line item, Equipment Maintenance by Contract for example, the applicable item should be subdivided into appropriate subcategories for each separate rate of increase used. The rate of price change for lines 401-402, 411-415, 502-506, 601-673, and 701-721 should agree with applicable rates approved by OSD. Applicable rates of price growth, as prescribed by OSD, or as estimated and justified, as appropriate, should be shown for all items where there is a price change. The rate of price growth included in the President's Budget will in all instances reflect the rate of increase approved during the OSD budget review.
- (7) The price growth column should show the amount of price growth for various items. **Where a percent increase by line item is shown in column 6, the amount included in column 7 will be the sum/difference of the previous fiscal year's program amount (column 4) and the foreign currency rate difference amount (column 5) times the percent shown in column 6.** The amount of the price growth will be consistent with the rate of change prescribed by OSD. The price increase for all items should be the additional/reduced funds, as a result of price changes, that would be required to accomplish the previous year's program at applicable fiscal year rates.
- (8) Enter the amount of program growth for each item. Program growth is to be priced in current year dollars for the current year exhibit, biennial year 1 dollars for the biennial year 1 exhibit, and biennial year 2 dollars for the biennial year 2 exhibit.
- (9) Enter the sum of (4), (5), (7) and (8) for each item.
- (10) Subtotals should be included in (4), (5), (7), (8) and (9) for Civilian Personnel, Travel, Defense Business Operations Fund Supplies and Materials Purchases, Defense Business Operations Fund Equipment Purchases, Other Defense Business operations Fund Purchases, Transportation, and Other Purchases, respectively, as applicable.
- (11) Program amounts for Civilian Personnel compensation should be consistent with amounts shown in both the object class distribution reflected in the Program and Financing Schedules for Object Classes 11, 12 and 13 (Direct Obligations only) and in the OP-8 Exhibit, Civilian Personnel Costs, Chapter 3 of the Budget Guidance Manual for the applicable fiscal year. Payments made to the Department of Labor for expenses associated with employee's disability compensation are included in Object Class 12. Change in the number of compensable days per fiscal year will be reflected as program growth not price growth. The annualization of the prior year's pricing changes (i.e., the previous fiscal year's pay raise), merit pay, bonuses, FERS participation, etc. will be reflected as changes in price growth.

- (12) Program amounts for travel should be consistent with amounts shown in Object Class 21 (including subclasses), for the applicable fiscal year.
- (13) Include only per diem travel costs as provided for in standard DoD definitions.
- (14) Include other (commercial) travel costs.
- (15) AMC, MSC, and MTMC costs displayed for items 303, 624, 653, and 701-721 should include all purchases from these transportation funds. These amounts should exclude all non-Defense Business Operations Fund purchases such as reimbursement to MTMC of non-Defense Business Operations Fund (overseas) port operations.
- (15a) Line 703 JCS Exercises includes only those services in support of JCS exercises and paid only by The Joint Staff (TJS).
- (16) The total of the program amounts for DFSC Fuel, Service Defense Business Operations Fund Fuel, and Locally Procured Fuel (Non-Fund) line items must agree with the amounts shown on the OP-26 Exhibit, POL Consumption and Costs, Chapter 3, DoD Budget Guidance Manual.
- (17) Include Object Class 26 supplies and materials purchased from each DoD Defense Business Operations Fund, including DLA.
- (18) Include Object Class 26 supplies and materials purchased from GSA.
- (19,20,21) These items have been intentionally left blank.
- (22) Include all equipment (including furniture) purchased from Defense Business Operations Fund, including DLA.
- (23) Include all equipment (including furniture) purchased from GSA.
- (24) Include amounts to be paid for motor vehicles leased from both commercial services and the General Services Administration (GSA) Interagency Fleet Management System (IFMS). These amounts are to be consistent with the estimates provided on the "Commercial Leases" and the "IFMS Leases from GSA lines of the Motor Vehicle Operations (PB-41) exhibit.

- (25) Includes centrally managed items procured by Defense Business Operations Fund from sources other than Defense Business Operations Fund or non-Defense Stock Funds.
- (26) Include purchases of MTMC services for non-Fund services such as overseas port terminal operations.
- (27) This item has been intentionally left blank.
- (28) This item has been intentionally left blank.
- (29) This item has been intentionally left blank.
- (30) Program amounts should be consistent with Fund purchases included in Object Class 25.3.
- (31) Biennial years' (BY1/BY2) program amounts should reflect stabilized rates as requested by the Service (OSD submission) or as approved by OSD (President's Budget), as applicable, to include the impact of biennial years' pay raises. Cost reimbursable purchases should be included on line 679. Separate elements of expense for each Defense Business Operations Fund activity group are shown on page 3. Include only those elements of expense for Defense Business Operations Fund activity groups from which purchases were made or are planned, as applicable.
- (32) This item has been intentionally left blank.
- (33) Includes the Aerospace Maintenance & Regeneration Center (AMARC).
- (34) Line 653, Airlift Services, Other AMC Purchases, includes Medical Evacuation Operations, Training, Search and Rescue, and other AMC costs not provided for in lines 303, 701, or 702.
- (35) Includes all Defense Business Operations Fund purchases made on a cost reimbursable (rather than stabilized rate) basis.
- (36, 37) These items have been intentionally left blank.
- (38) Includes contractual charges for transportation of things via commercial air, sea, or surface mode and payments for commercial port operations and other transportation services exclusive of payments to the DoD Defense Business Operations Fund.
- (39, 40, 41) These items have been intentionally left blank.
- (42) Program amounts should be consistent with direct obligation amounts shown in the OP-8 Exhibit, Civilian Personnel Costs, Chapter 232.
- (43) Charges for rental of space and related services assessed by GSA as SLUC charges. Program amounts will be consistent with the amount shown in Object Class 23.1.
- (44) Program amounts included for items 913-915 and 917 will be consistent with the amounts shown in Object Class 23.3.

- (45) Purchases from non-Defense Business Operations Fund sources heat, light, power, water, gas, electricity and other utility services, exclusive of transportation and communication services.
- (46) Purchases of communication services from non-Defense Business Operations Fund sources.
- (47) Payments for possession and use of land, structures, and equipment (other than transportation equipment) owned by another, except for SLUC charges assessed by GSA.
- (48) This item has been intentionally left blank.
- (49) Purchases from the U.S. Postal Service including postage (other than Parcel Post), rental of post office boxes, postage meter machines and mailing machines. Also includes payments made to the U.S. Postal Service for handling of officially franked mail (i.e., Indicia Mail).
- (50) Includes supplies and materials purchased from other than Defense and non-Defense Business Operations Funds.
- (51) Program amounts should be consistent with the amounts shown in Object Class 24.
- (52) Covers contractual equipment maintenance other than depot level maintenance (e.g., ADP equipment, office equipment, etc.)
- (53) Includes costs for repairs and maintenance to buildings, facilities, pavement, airfields and like items when done by contracts with the private sector.
- (54) Equipment purchased from the private sector, including equipment included in Federal Supply Group 71, Furniture. Program amounts should be consistent with amounts reported under Object Class 31.07.
- (55) This item has been intentionally left blank.
- (56) Covers overseas contractor operated installation costs when covered in a single contractual agreement or when service is provided by a single contractor (excludes separate contracts for specific, limited services such as contract ADP services).
- (57) Covers contracted service cost of Air Force Air Defense Systems (e.g., BMEWS, DEW Line, Spacetrack, Thule AFB base maintenance contracts, DSP) and Space Support programs.
- (58) Includes the cost of ship related repair and the performance of regularly scheduled ship overhauls at commercial shipyards.
- (59) Includes the cost to the Depot Maintenance Program to purchase aircraft maintenance from commercial sources.

- (60) Includes payments for all other non-Defense Business Operations Fund depot maintenance costs whether performed in-house or by contract which have not been reported under lines 928 or 929.
- (61) Program amounts should be consistent with Exhibit PB-15, (Advisory and Assistance Services), Chapter 19 of the DoD Budget Guidance Manual). The amounts reflected should agree with Object Class 25.1.
- (62) Program amounts should be consistent with the amounts shown in Object Class 41.
- (63) Charges for contractual services not otherwise reported elsewhere.
- (64) Amounts online 991 will reflect variances from budgeted rates, as prescribed by OUSD(C) guidance, which have actually occurred in the prior year or which have been approved (by DD-1415 or PBD) for the current year. There will be no amounts reflected on line 991 in the price and program growth columns. For the President's budget, the amount in the prior year column will be the realized variance on the 30 Sep DD Comp(M) 1506 report. Under no circumstances will there be an entry on line 991 in the biennial year. (For a further discussion, see Foreign Currency notes at the end of these instructions).
- (65) This item has been intentionally left blank.
- (66) Total program amounts, in (4) and (9), will be equal to the total direct program for prior year, current year, biennial year 1, and biennial year 2, as applicable.
- (67) Includes fuel purchased from sources other than Defense Business Operations Funds.
- (68) Includes amounts for items not otherwise reported elsewhere.

Foreign Currency Notes

A. The Total for Foreign Currency Rate Difference (Column 2) must reflect the difference between:

1. PY to CY: Prior year actuals and Current Year budgeted rates or anticipated expenditures in the Current Year if transfers have also been approved for the Current Year. (For the latter, individual line items in column 2 (except for line 991) will reflect the difference in budgeted rates and line 991 in column 2 will reflect the transfer amount.)
2. CY to BY1: Current Year budgeted rates or anticipated expenditures in the Current Year if transfers have also been approved for the Current Year, and Biennial year 1 budgeted rates.
3. BY1 to BY2: Change in budgeted exchange rates from Biennial year 1 to Biennial year 2.

B. Individual line items in Column 2 (except for line 991) must reflect the difference in program costs that are caused only by a difference in budgeted foreign currency exchange rates between fiscal years.

C. Line 991- Foreign Currency Variance

1. Prior Year (PY) to Current Year (CY)
 - a. PY column = Realized variance (DD Comp(M) 1506 Report 30 Sep).
Column 2 = Reverse the realized variance amount in the PY column.
CY column = zero
 - b. If transfers have been approved in the CY,
PY column = Realized variance (DD Comp(M) 1506 Report 30 Sep).
Column 2 = Reverse the realized variance amount in the PY column and add the transfer amount approved for the CY to determine the total.
CY column = the transfer amount approved for the CY.
2. Current Year (CY) to Biennial Year 1 (BY1)
 - a. If the budgeted rates change between the CY and the BY1 and transfers from the Foreign Currency Fluctuations, Defense (FCF,D) appropriation are not reflected in the budget, then the CY column, Column 2, and the BY1 column for line 991 are all zero.
 - b. If budgeted rates change between the CY and the BY1 and the FCF,D transfers have been reflected in the budget for the CY, then the CY column for line 991 will reflect the value of the transfers and Column 2 for line 991 will reflect the reversal of the transfers. The BY1 column for line 991 will be zero.

Memo Entry 1. Provide total military and civilian end strength (all categories) for PY, CY, BY1 and BY2.
2. Identify the foreign currency exchange rates and baselines by country for PY, CY, BY1 and BY2.

APPROPRIATED FUND SUPPORT FOR MORALE, WELFARE AND RECREATION ACTIVITIES (MWR)

1. In preparing the OP-34 exhibit, the Services/Defense Agencies should use the definitions contained in the DoD Directive, subject: Establishment, Management, Construction and Control of Non-Appropriated Fund Instrumentalities (NAFI's) and Operational Policy, Funding and Support of Morale, Welfare and Recreation (MWR) Activities.

2. Managerial operational functions and positions at an installation, major command or Service, that have direct program managerial and operational responsibility for individual MWR programs, that actively plan, organize, direct, coordinate, and control the operations of one or more MWR programs. These positions are identified and included on manning, staffing or personnel guides and documents. It includes direct control and supervision of the program(s), fiscal, logistical, and other management functions that are directly accomplished on a daily basis. Personally responsible for the success or failure of the program.

3. APF Common Support - That appropriated fund support, identified as direct APF support used in the management, administration and operation of more than one MWR program, however, that support or cost is not easily nor readily identifiable to a specific MWR program.

The total common support provided, however, is readily identifiable through various APF intra-agency or inter-agency fund transfer documents, personnel or manning authorization documents, common metering devices (electrical, pressure, mechanical, etc.), or through engineering, accounting, financial or statistical procedures, methods and standards.

Some examples of APF common support would include executive and upper management supervision that is functionally located above the operating program manager level and having responsibility for several MWR programs; an installation's civilian personnel functions; and central accounting office functions.

The OP-34 Exhibit should be submitted for the OSD/OMB budget submission each year. This exhibit should also be included in the congressional justification books each year.

Exhibit OP-71 Organizational Clothing and Equipment - Army Reserve Components

INSTRUCTIONS FOR COMPLETION OF OP-71

1. **Backlog Carried Over from Prior Year** - unfunded requirements at the end of the previous fiscal year.
2. **Backlog of Obsolete Equipment** - backlog associated with equipment no longer being issued to the Service. (e.g., if the Army Guard decided to replace steel helmets with kevlar helmets and has budgeted for the kevlar helmets as a force modernization initiative. The value for steel helmets included in the backlog would be reflected in this category.)
3. **Inflation** - backlog carried over from previous year less backlog associated with equipment no longer being issued to the Service times the OSD rate for "general purchases inflation-O&M" or the appropriate DoD Stock Fund rate, whichever is applicable.
4. **Adjusted Prior Year Backlog** - backlog carried over from previous year less backlog associated with equipment no longer being issued to the Service plus inflation (1-2+3).
5. **Workyear Change Adjustment**- change in OCE requirements resulting from increases or decreases in total workyear.
6. **Replacement of Previous Issues** - inventory purchased to replace equipment that is consumed during the year through normal wear and tear (including inventory losses).
7. **Force Modernization Initiatives** - OCE requirements related to equipment modernization. This might include such items as new cold weather clothes or chemical protective clothing.
8. **Other** - **only those requirements that do not fit the above categories.** This would include increases and decreases resulting from changes in authorized numbers of units or individual equipment authorizations.
9. **Annual Requirement** - the sum of the "end strength change adjustment," "replacement of previous issues," "force modernization initiatives," and "other." (5+6+7+8)
10. **Total Fund Required** - the "adjusted prior year backlog" plus the "annual requirement." (4+9)
11. **Funds Budgeted for OCE** - amount planned for OCE each year.
12. **Backlog, End of Year** - "total funding required" less "funds budgeted for OCE."

Exhibit OP-73 Repair Parts, Army Reserve Components

INSTRUCTIONS FOR COMPLETION OF OP-73

1. **Backlog carried forward from prior years** - unfunded requirements at the end of the previous fiscal year.
2. **Backlog of obsolete parts** - backlog of repair parts associated with equipment that is being retired from the Reserve Forces.
3. **Inflation** - backlog carried over from prior years less backlog associated with equipment being retired from the Reserve Forces times the OSD rate for "general purchases inflation--O&M" or the DoD Stock Fund, whichever is applicable.
4. **Adjusted prior year backlog** - backlog carried over from prior years less backlog associated with equipment being retired from the Reserve Forces plus inflation (1-2+3)
5. **Recurring requirements** - annual repair parts requirements to support equipment fielded in previous years.
 - a. **Annual consumption** - those parts consumed annually to support weapons systems fielded in previous years.
 - b. **Change in equipment inventories** - increases or decreases in annual consumption requirements necessary to reflect changes in equipment inventory levels (e.g., retirement of equipment).
 - c. **Change in stockage levels** - increases or decreases in requirements due to changes in the level of repair parts support required annually for a particular equipment.
6. **Nonrecurring requirements** - one time requirements associated with introduction of new equipment to the Reserve Force.
 - a. **Force modernization initiatives** - initial inventory of repair parts associated with fielding of force modernization systems.
 - b. **Introduction of other new equipment** - introduction of other equipment not previously provided to the Reserve Force.
7. **Total funding required** - adjusted prior year backlog plus recurring requirements and nonrecurring requirements.
8. **Funds budgeted for repair parts** - amount budgeted for repair parts each year.
9. **Backlog, end of year** - "total funding required" less "funds budgeted for repair parts".

Discussion Explain significant changes in price and program (force structure, end strength, etc.) from the current year to the biennial year 1 (BY1) and from BY1 to Biennial year 2 (BY2). Include a summary of functional transfers and funding realignments made between those years. Specifically identify by base, name and location, any change in the number of 'installations. This requirement applies to either a change between the current year and the prior year, between the current year and the BY1, or between the BY2 and BY1.

1/ This category includes only those BOS program elements normally ending in "96" and that portion of the Real Property Maintenance Activities (RPMA) program elements normally ending in "94" that are associated with utility operations and Other Engineering Support. This category specifically excludes those RPMA activities associated with Real Property Maintenance, both maintenance and repair of real property and minor construction.

Identify on the bottom of the exhibit a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

COMPONENT TITLE

Discussion of Program Data:

Instructions: In the following sections, each component preparer should insert **APPROPRIATE NARRATIVE EXPLANATIONS OF CHANGES BETWEEN BUDGET YEARS**. These changes should be discussed in terms of both content and program changes. In this regard, changes in funding levels should be discussed and quantified. The general types of program need not be described if they were properly covered in the preceding years consolidated write-up. However, if there are any new programs not covered in the preceding years narrative appropriate narrative should be provided. Your input should be provided for each of the captions shown below. These relate to the program data section.

Foreign National Separation Liability Accrual						
Benefits for Former Employees (O.C. 13)						
Total Civilian Personnel Costs						

Instructions: The numbers on this exhibit must agree with the numbers on the OP-8, Civilian Personnel Costs. (*Display disadvantaged employment data [workyears and funding] for the PY only, since Components are not to budget for disadvantage employment.) All appropriations/funds containing civilian personnel shall be displayed in this exhibit, with a total shown in the summary section. All end strength shown on this exhibit shall be full-time equivalent end strength. The parent Service will show all appropriations, including guard and Reserve and all other appropriations. Defense Agencies will display all appropriations including RDT&E and Industrial Funds. Defense Agencies that have only RDT&E funded civilian must also submit this Exhibit as well as an OP-8 exhibit to Room 3D868 for inclusion in the Defense Agencies Data Book.

DEPARTMENT OF (1)
ACTUAL/PROPOSED HOURLY REIMBURSEMENT RATES FOR DOD-OWNED HELICOPTERS
FY 19(2)

<u>Hourly Costs</u>							<u>Reimbursable Rates</u>		
<u>Type A/C</u>	<u>Fuel</u>	<u>DLR</u>	<u>Depot Maintenance</u>	<u>Other</u>	<u>Crew Salary</u>	<u>Depreciation</u>	<u>DoD Rate</u>	<u>Other Fed. Agency Rate</u>	<u>Public Rate</u>
(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)

Note: Submit this exhibit only for the President's Budget after DBOF rates have been established for the budget years. Submit the exhibit directly to DoD Office of the Comptroller, Director for Accounting Policy.

NARRATIVE JUSTIFICATION
(13)

INSTRUCTIONS

- (1) Insert Army, Navy or Air Force, as applicable.
- (2) Insert applicable fiscal year. Separate exhibits should be provided for the prior year, current year, and biennial year 1, and biennial year 2.
- (3) Separately list and provide data for each applicable type/model/series of helicopter in the Component's inventory.
- (4) Fuel costs should be equal to the corresponding amounts shown in the related OP-20 Exhibit series (OP-20D for Army, OP-20 for Navy, and OP-20E for Air Force). If for any reason, the OP-20 Exhibit series does not include an applicable Type/Model/Series of helicopter, fuel costs should be computed by dividing the total actual or budgeted cost of fuel for the fiscal year by the total number of actual or budgeted flying hours.
- (5) Depot-level reparable (DLR) costs should be equal to the corresponding amounts shown in the related OP-20 Exhibit series (OP-20D for Army, OP-20 for Navy, and OP-20E for Air Force). If for any reason, the OP-20 Exhibit series does not include an applicable Type/Model/Series of helicopter, DLR costs should be computed by dividing the total actual or budgeted DLR costs for the applicable fiscal year by the total number of actual or budgeted flying hours.
- (6) Include an hourly rate for Operation and Maintenance funded depot maintenance cost for airframes, engines, and components. This cost should be a fleet average for that Type/Model/Series, i.e. the amount of depot maintenance budgeted for each Type/Model/Series divided by the number of hours budgeted for that Type/Model/Series.
- (7) Other costs should equal corresponding other amounts shown in the related OP-20 Exhibit series (OP-20D for Army, OP-20 for Navy, and OP-20E for Air Force--for Air Force, this is equal to the General Support/Systems Support [GS+SS] column in Exhibit OP-20E). If for any reason, the OP-20 Exhibit series does not include an applicable Type/Model/Series of helicopter, other costs should be computed by adding all operating costs (other than fuel and DLRs) and dividing the total actual or budgeted other costs for the applicable fiscal year by the total number of actual or budgeted flying hours.
- (8) Crew salary amounts should be computed based on the number and grade of military personnel operating the helicopter. Crew salary costs should be computed by:

Exhibit OP-20H Reimbursement Rates for DoD-Owned Helicopters
 (page 1 of 2)

(a) Multiplying the number of crew members in each applicable military grade times the annual Military Standard Composite Rate for that grade plus any applicable special pays or allowances that normally apply to helicopter crew members.

(b) Dividing the result of (a) by 2080 (hours) to convert the annual rate to an hourly rate, by grade.

(c) Multiplying the results of (b) by a factor of 120 percent for officers and 132 percent for enlisted personnel (This calculation increases the hourly rate by 20 and 32 percent for fringe benefits for officers and enlisted personnel, respectively. These factors are composed of 14 percent for leave and holiday for both officers and enlisted, plus 6 percent for officers, and 18 percent for enlisted personnel, for other fringe benefits.)

(d) Adding the sum of the amounts arrived at in (c) for each grade.

The computation of crew salary amounts should be supported by a separate table attached to Exhibit OP-20H.

(9) Depreciation shall be computed by dividing the total capital costs of the helicopter by the helicopter's useful life (not to exceed 20 years). Total capital costs are the sum of

(a) The initial acquisition cost of the helicopter, plus

(b) The cost of modification and modernization efforts on the helicopter, less

(c) The estimated residual value of the helicopter at the expiration of its useful life.

In the absence of a known useful life, or capitalized modification and modernization amounts, depreciation should be computed by applying 5.5 percent to the initial acquisition cost. Exhibit

OP-20H should be footnoted for each model/type/series of helicopter when this approach (the use of 5.5 percent of acquisition cost) is used in lieu of actual depreciation.

(10) The DoD rate should be calculated by adding the sum of columns (4)--Fuel, (5)--DLRs, (6)--Dept Maintenance, and (7)--Other.

(11) The Other Federal Agency Rate should be calculated by adding the sum of columns (4)--Fuel, (5)--DLRs, (6) Depot Maintenance, (7)--Other, and (8)--Crew Salary.

(12) The Public Rate should be calculated by adding the sum of columns (4)--Fuel, (5)--DLRs, (6) Depot Maintenance, (7)--Other, (8)--Crew Salary, and (9)--Depreciation.

(13) A brief description should be provided to explain changes, of 10 percent or more, between previously budgeted and actual amounts for the prior fiscal year, deviations between previously budgeted and currently budgeted amounts for the current year, deviation between previously budgeted and currently budgeted amounts for biennial year 1 or biennial year 2, as well as previously unexplained deviations between fiscal years (prior year to current year, current year to biennial year 1, and biennial year 1 to biennial year 2).

FOREWORD

Volume 2 of the Department of Defense Financial Management Regulation is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures" which governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It identifies financial management requirements, systems, and functions for all appropriated, nonappropriated, working capital, revolving, and trust fund activities. In addition, it identifies statutory and regulatory financial reporting requirements.

This volume of the Regulation establishes procedures for DoD Components to use in budget presentation and formulation and applies to the Office of the Secretary of Defense, the Military Departments, the Joint Staff, the Unified Combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

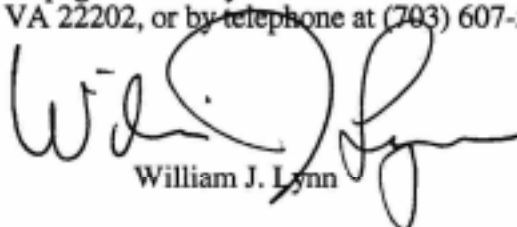

This update is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that the provisions of this Volume are adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives and/or regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements in this Regulation are exempt from licensing in accordance with paragraph E.4.f. of DoD 8910.1-M, "DoD Procedures for Management of Information Requirements," November 1986.

Forward recommended changes to this Volume of the Regulation through channels to the address below. Submit requests for deviations from or exceptions to specific standards, with justification, to:

Office of the Under Secretary of Defense (Comptroller)
Director for Plans and Systems
1100 Defense Pentagon
Washington, DC 20301-1100

All 15 volumes of the DoD Financial Management Regulation are available on the Internet at: <http://www.dtic.mil/comptroller/fmr>. Printed or CD-ROM copies of the regulation may be ordered through this Internet homepage or directly from the Defense Automated Printing Service, at 1401 S. Fern Street, Arlington, VA 22202, or by telephone at (703) 607-5212.

Table of Contents	iii
Summary of Changes	iv

Chapter detail Table of Contents are at the beginning of each chapter. Chapter page numbers are preceded by the number of the chapter (e.g., 9-2 and 19-50.)

SUMMARY OF VOLUME 2 CHANGES

Section Number	Changes
0101	All References to the Defense Business Operations Fund (DBOF) have been changed to the Defense Working Capital Funds (DWCF).
010108	Identifies revised location of security classification instructions for intelligence programs/activities.
010201	<p>Adds expense/investment criteria to determine financing for engineering efforts to satisfy deficiency.</p> <p>Adds expense/investment criteria to clarify funding policy for incidental material and conditional requirements identified during a modification.</p> <p>Defines service life extension programs that can be funded in Procurement and in O&M.</p> <p>Clarifies software funding policy.</p> <p>Deletes "with the exception of investment funded parts" to eliminate confusion.</p> <p>Updates the expense/investment dollar threshold.</p>
010202	<p>Expands discussion on the use of long lead material.</p> <p>Clarifies economic order quantity purchase requirements.</p>
010203	Clarifies multiyear procurement requirements for stable configuration, realistic cost estimates, present value analysis, support cost certification, cancellation ceilings, and economic order quantity purchase requirements.
010205	<p>Deletes section requiring Intrusion Detection Systems to be funded only in the Other Procurement appropriations or in the Capital Budget of the DWCF business area.</p> <p>Adds section regarding engineering change order funding.</p>
010205	Adds paragraph acknowledging engineering change order funding requirements.
010208	<p>Deletes requirement for acquisition pilot program documentation. Renumbers remaining sections.</p> <p>Clarifies funding policy for nondevelopmental item (NDI) procurement.</p> <p>Clarifies appropriation that can be used to procure NDI items.</p>
010209	Deletes paragraph regarding funding replenishment spares in procurement.
010210	Deletes statement that assets can be retained in the Special Defense Acquisition Fund.

Section Number	Changes
010212	<p>Updates Low Rate Initial Production (LRIP) reference and clarifies appropriations that can be used for LRIP.</p> <p>Adds sentence regarding lack of competition and prioritization if efforts are not properly categorized in RDT&E.</p> <p>Clarifies when it is appropriate to use procurement or O&M funding for product improvements (as long as no development or initial operational tests are required).</p> <p>Clarifies funding policy for low rate initial production assets.</p> <p>Adds paragraph for test article funding for space systems. Renumbers remaining paragraphs.</p>
010213	<p>Adds another method to fund RDT&E requirements.</p> <p>Adds paragraph acknowledging engineering change order funding requirements.</p>
010217	Clarifies the method for computing military personnel costs.
010218	<p>Policy allowing the recovery of Accumulated Operating Results over a 2-year period is added.</p> <p>Policy concerning recovery of unplanned losses in Depot Maintenance activity groups is explained.</p>
010219	<p>Revises capital budget thresholds.</p> <p>Upper limits for Minor Construction Project is increased to \$500,000.</p> <p>Upper Limit for minor construction projects intended solely to correct a deficiency that is life threatening, health threatening, or safety threatening is increased to \$1,000,000.</p> <p>Depreciation schedules are updated for changes in Software Development. New Depreciation schedules which comply with FASAB #6 are listed for use beginning in FY 2000.</p>
010223	<p>Procurement Glossary: Established as separate section.</p> <p>Adds and clarifies several definitions.</p>
010224	<p>RDT&E Glossary: Established as separate section.</p> <p>Adds definition for test article.</p>
010301	Modified to indicate that Capital budgets are to be submitted in landscape format.
010302	<p>Distribution addresses revised.</p> <p>Distribution copy requirements revised.</p> <p>Guidance to call budget receiving office prior to delivery added.</p>

Section Number	Changes
010401	Information Technology budget requirements revised and reviewing organization changed. Intelligence and C ³ program guidance referred to Chapters 16 and 17.
010403	Guidance on distribution of President's budget justification material significantly revised. Requirements for Internet sites <u>and</u> CD-ROM for President's budget justification material added. Distribution requirements changed for copy quantities. Internal DoD paper copy distribution essentially limited to classified budget documents. Unclassified will be placed on Internet sites. Guidance to call budget receiving office prior to delivery added.
010404	Security review procedures clarified.
010405	Processing procedures updated.
010406	Guidance on classified appeals added. Reference to individual oversight committees deleted. Appeals will be to conferees.
010501	Deletes FYDP from Budget Automation Requirements reporting. New Section 0107 established for the Automated Future Years Defense Program (FYDP).
010502	Procurement Annex renamed to Procurement Programs. Adds P-1R report and Procurement Cost Type codes "S" for Reserve Equipment (Memo Non-Add) and "T" for National Guard Equipment (Memo Non-Add).
010503	RDT&E Annex renamed to RDT&E Programs.
010505	Updates list of accounts which require an Obligation Plan as part of the budget estimate submission. Updates financing code stub entries for Budget Review System (BRS) Programming and Financing schedule and updates the table displaying relationship between OMB's Program and Financing (P&F) Schedule in OMB Circular A-11 and DoD's Budget Review System. Updates diagnostics for BRS error messages. Budget execution report SF 133 replaces the DD 1176. Adds Component/Suffix codes for NIMA, DTRTCA and DMEA. Changes DNA to DSWA, DIS to DSS and CPMS to DHRFA. Adds default object class Tx2551 – R&D Contracts for accounts 2040a, 1319n, 3600f and 0400d. General default object class has been changed to Tx26.01 – Supplies and Materials. Provides updated extracts from the "Budget Accounts Title File Listing."

Section Number	Changes
010506	Name Edit System (NES) Structure and Description, subparagraph O. – Object Class 25.2 has been restricted to no more than 15 percent of the total Object Class 25 resources.
010603	Updates appropriations and budget activities by functional title for military functions. Under the Heading Functional Title – Revolving and Management Funds, the William Langer Jewel Bearing Plant Fund, ADP Equipment Management Fund, Emergency Response Fund – Defense, and the Navy Management Fund are eliminated. The Army Conventional Ammunition Working Capital Fund is listed until closed.
0107	Automated Future Years Defense Program Database section added.
0108	Automated C ³ ISR Database section added.
0109	Renumbered from 0107.
010903	PB-39 appeal formats modified. Congressional Insert formats modified.
010904	Title changed for forms DD2235, DD2236 and DD2236-2 to include both End Strength and Full-Time Equivalent data. Instructions for SD Form 463 updated to include Cost Type codes “R” and “T” for Reserve and National Guard Equipment memo non-add entries.
020202	Adds new verbiage to reflect the consolidation of the Basic Allowance for Quarters (BAQ) and the Variable Housing Allowance (VHA) into the Basic Allowance for Housing (BAH). Also adjusts required exhibits to reflect the change.
020205	Adds guidance regarding the M-1 exhibit for Active Personnel appropriations.
020304	Adds guidance regarding the M-1 exhibit for Reserve Personnel appropriations.
0204	Deletes exhibit and requirement for submission for the Military Retirement Fund.
020602	Incorporates legislative proposals on Military Personnel summary exhibits. Includes Active Duty for Special Work on Milpers Summary exhibits. Adds new exhibit (PB-30F-1) on officer gains by month. Adds new exhibit (PB-30F-2) on enlisted accessions by month.
020603	Incorporates legislative proposals on Reserve Personnel summary exhibits.
030201	Incorporates new instructions for downloading the Comptroller computer software from the Internet website for submission of the automated exhibits and emphasizes review requirements for submission. Also updates appropriations and accounts required to submit automated data. Deletes section and requirement for non-DBOF (now Defense Working Capital Fund) unit cost

Section Number	Changes
	areas.
030302	<p>Corrects paragraph numbering by remarking “H” as “G” and adds narrative to reiterate that Components are responsible for cross checking data among the exhibits.</p> <p>Updates to Organization/Exhibit Requirements for Justification Books for following requirements: Vol I – adds O-1 and deletes PB-31C; Vol II – adds PB-15 and PB-28 and deletes PB-31R; Vol III – deletes OP-27H requirement in this volume. Requirement now in Vol. 11A.</p> <p>Updates Additional Accompanying Exhibits by deleting requirement for PB-28 (sic), Waste Minimization Capitalization Account which should have been PB-29.</p> <p>Adds requirement for all O&M Overview exhibits to reflect price and program changes.</p>
0304	<p>OP-5 Indicates that this exhibit is under revision. Additional guidance will be issued separately.</p> <p>OP-8 Updates to reflect changes in FTE reporting.</p> <p>OP-20H Removes exhibit from Chapter 3 and includes requirement in Chapter 11A.</p> <p>OP-24 Adds narrative, “Provide written explanation/justification for changes between fiscal years.”</p> <p>OP-30 Revises exhibit in its entirety.</p> <p>OP-32 Updates line items to reflect current expense categories.</p> <p>OP-34 Adds requirement to identify costs associated with Category D Commissary Support.</p> <p>OP-78 Revises exhibit in its entirety.</p> <p>OP-80 Replaces exhibit in its entirety.</p> <p>PBA Exhibits Adds requirement to include price and program changes and verify data on related exhibits.</p> <p>PBA-2 Adds new requirement and section on inventory.</p> <p>PBA-4 Adds requirement to identify costs and explanations at the subactivity group level.</p> <p>PBA-5 Adds requirements and section on description of operations financed.</p> <p>PBA-11 Adds requirement to include civilian end strength.</p> <p>PBA-12 Revises program data for consistency with guidance in Chapters 17 and 19.</p> <p>PBA-13 Clarifies section on First Destination Transportation major commodity.</p> <p>PBA-15 Adds new requirement and exhibit for Commissary Support.</p>

Section Number	Changes
	PBA-26 Adds requirement and section to identify total aircraft inventory.
	PB-31Q Adds requirement to include narrative explanation for changes in direct and indirect hires.
0403	Increases budget exhibit threshold from \$2 million to \$5 million.
0405	Reduces justification material requirements for programs with a funding value less than \$5 million (only the P-40 and P-40a exhibits are required.)
040502	<p>P-1 Deletes the unit cost column from the exhibit.</p> <p>P-3a Adds clarifying instructions for modifications.</p> <p>P-8a Reinstates P-8a, Analysis of Ship Cost Estimates - Major Equipment.</p> <p>P-11 Deletes requirement for P-11, Electronic Warfare (EW) Funding Summary.</p> <p>P-21b Deletes requirement for P-21b, Production Schedule by Facility (Ammunition.)</p> <p>P-26 Eliminates requirement for unneeded information.</p> <p>Multiyear Exhibits Adds clarifying instructions for multiyear programs.</p>
050403	Deletes the paragraphs regarding comparison reports and project listing and establishes the comparison report as an exhibit.
050404	Deletes requirement for electronic file submission to Defense Technical Information Center (DTIC). Requirement is accomplished through internet posting by Military Departments and by OUSD(Comptroller) for Defense-wide (Defense Agency, etc.) accounts.
0505	<p>R-2a Adds new exhibit for project information. Information requirements have not changed; however, the new exhibit clarifies previous information requirements.</p> <p>R-3 Modifies the exhibit to portray information in a different format and adds clarifying instructions.</p>
060201	<p>Threshold raised from \$300,000 to \$500,000 for unspecified minor construction that may be funded with O&M.</p> <p>Design status milestones added. Projects using parametric cost estimates should be considered zero percent designed.</p>
060202	<p>Scope of the Family Housing New Construction account increased to include design costs of contractors when performing a turnkey contract.</p> <p>NFIP Budget Subactivities added.</p>

Section Number	Changes
060301	<p>Deletes requirement to include Program and Financing schedules in Military Construction justification books.</p> <p>Requirement that all requested construction projects be at least 35 percent designed at the time of the budget estimate submission is deleted. However, requested projects that will not obtain the 35 percent design stage by January 1 must be identified to the OUSD(C) Military Construction Directorate.</p>
060302	<p>Deletes requirement to include Program and Financing schedules in family housing justification books.</p> <p>Updates number of family housing leases allowed and calculations of maximum lease costs.</p> <p>Adds the FY 1988 budgeted foreign currency exchange rates used in the calculation of maximum lease costs in foreign countries.</p> <p>Requires a PB-18 Exhibit be submitted with the Budget Estimate Submission for family housing O&M accounts participating in the Foreign Currency Fluctuations, Construction, Defense appropriation.</p>
060305	<p>Requirement for the NATO Security Investment Program to submit a list of all requirements, construction and procurement, associated with NATO expansion added.</p>
060306	<p>Budget estimate submission requirements for the Family Housing Improvement Fund added.</p>
060402	<p>Deletes requirement to include Program and Financing schedules and Object Classification schedules in justification books provided to Congress.</p>
060403	<p>Construction completion date added to DD Form 1391 Supplemental data.</p> <p>Requirement to provide an updated Military Construction/Family Housing Outyear Project Data exhibit added.</p> <p>Requirement added to DD Form 1391 Design Data to indicate whether an energy study and a life-cycle cost analysis was performed in support of the design of the proposed facility.</p>
060502	<p>Requirement to identify antiterrorism force protection/physical security measures on the DD Form 1391, Military Construction Project Data, added.</p> <p>Military Construction/Family Housing Outyear Project Data Exhibit revised.</p> <p>Exhibit FH-1, Tri-Service Family Housing Cost Model, revised.</p>
070302	<p>Revised Budget Estimate Submission guidance requires separate justification books for each Base Closure account vice each Base Closure Commission action.</p> <p>Requirement for a BRAC Cost and Saving Exhibit (BC-02) added.</p> <p>Requirement to update prior year estimated savings to reflect actual savings added.</p> <p>BRAC O&M Summary OP-5 Exhibit no longer required.</p>

Section Number	Changes
	OP-5 Attachment 1, Reconciliation of Increases and Decreases, no longer required.
	OP-32 Exhibit, Summary of Price and Program Changes, no longer required.
	BRAC ENV-1A/B exhibits requirement added to provide environmental progress and funding priority for BRAC sites.
070502	DD Form 1391 Military Construction Project Data - requirement to identify antiterrorism force protection/physical security measures on the added.
	BRAC ENV-1A/B Exhibits added to provide environmental progress and funding priority for BRAC sites.
	OP-5 Exhibit deleted.
080105	Real Property Maintenance, Defense account deleted – no longer applicable.
	Definition of Repair and Maintenance added.
080201	Threshold raised from \$300,000 to \$500,000 for unspecified minor construction that may be funded with O&M.
080202	OP-27H, Historic Buildings and Housing Costs, no longer required.
090102	The establishment of the Defense Working Capital Funds (DWCF) is noted.
090103	Provides a formula for calculating the appropriate cash level for a DWCF organization. Adds requirement for notification to Revolving Funds Directorate and the Congress when advance billing of customers is required.
	Adds depreciation schedules for fiscal year 2000 and beyond.
	Establishes a new threshold of \$1,000,000 and above for requirement to prepare an economic analysis to justify a Capital Investment Program (CIP) project. A cost analysis must be prepared for projects below \$1,000,000.
	Revises upper limits for minor construction projects.
	Changes requirements for preparation and submission of post investment analysis.
	Provides guidance for requesting carryover authority for CIP.
	Updates guidance for Unutilized and Underutilized Plant Capacity.
	Clarifies guidance for computing military personnel costs.
	Specifies the use of Percentage of Completion Method for Revenue Recognition starting in the year 2000 for all nonsupply activity groups.
	Specifies rules related to AOR loss recovery over a 2-year period.

Section Number	Changes
	Provides for the recovery of unplanned losses at Depot Maintenance Activities during the year of execution.
	Specifies prior approval of extraordinary write-offs.
090104	Provides option for developing rates at the activity level or product line level within an activity group.
090203	SM-5A Adds requirement for backup for President's Budget.
	SM-8 Deletes requirement for OSD/OMB submit. Still required for backup to President's Budget.
090204	SM-8 Deletes requirement for OSD/OMB submit. Still required for backup to President's Budget.
	Fund-7a Adds requirement for back up to President's Budget. Deletes requirement for inclusion in President's Budget.
090402	Fund-5a Requires breakout of individual amounts for DLSC, DAASC, and DRMS.
	Fund-1A Modifies exhibit to bring it in line with OP-32 format.
	Fund-3 Changes format to include Unit cost information.
	Fund-6 Exhibit deleted.
	Fund-7b Updated to reflect impact of revised AOR loss recovery.
	Fund-9a Updates capital investment threshold. Lists new category for Software Development. Provides guidance for dollar threshold reporting within categories.
	Fund 9b Updates reporting requirements.
	Fund-14 Updates exhibit to reflect adjustments to NOR and AOR. Also provides for a new category to display items recommended for exclusion from rate recovery.
	Fund-14A Adds exhibit for Supply Management Business Areas. Two Part Format.
	Fund-20 Updates exhibit to report workyears vice end-strength by grade.
	Fund-21 Updates exhibit to include revised reporting for Disadvantaged employment and other personnel programs previously excluded.
	Fund-28 Updates Format.
	Fund-29 Updates Format.
100101	Clarified status of the Conventional Ammunition Working Capital Fund.
100102	Deletes Navy Management Fund, Emergency Stock Fund, Department of the Navy Trust Revolving Fund, and Department of the Air Force Revolving Trust Fund.

Section Number	Changes
100202	Deletes Navy Management Fund, Emergency Stock Fund, Department of the Navy Trust Revolving Fund, and Department of the Air Force Revolving Trust Fund.
100402	Deleted exhibits related to the Army Conventional Ammunition Working Capital Fund. Exhibit CT-1 Revised formulas for calculations. Added line items for Unobligated balances at beginning and end of year. Exhibit SP-1 Modified format.
120402	Significantly revises exhibits to reflect creation of TRICARE Management Activity and the realignment of program elements into new budget activities.
130105	Revises and expands actions included under Installation Restoration Program. Revises section on Other Hazardous Waste.
130202	Adds narrative requirement for submission of the OP-32, Price and Program Growth, exhibit as instructed in Chapter 3.
130302	Changes submission requirements for ENV 30D-E from OUSD (Comptroller), Operations and Personnel, to DUSD (Environmental Security.)
130401	Revises to clarify format for environmental restoration submission.
130402	Renames and revises exhibits ENV-30A-E.
140202	Adds requirement for Counter-drug Enforcement, Policy, and Support (CDEP&S) to provide copies of procurement and RDT&E budget exhibits to OUSD(C) Operations and Personnel Directorate.
140302	Revises PB-43, PB-44, PB-45, and PB-47 exhibits in their entirety.
150402	Adds instructions concerning OP-53 and OP-53A.
160101	Replaces Defense Intelligence Program (DIP) with National Foreign Intelligence Program (NFIP). Adds Joint Military Intelligence Program (JMIP).
160104	Guidance on changing Intelligence program elements added.
160105	Definitions of NFIP, JMIP and TIARA added.
160202	Provides a more complete listing of the NFIP Components.
160203	JMIP submission requirements added.
160302	Replaces DIP with NFIP. Provides a more complete listing of NFIP Components.

Section Number	Changes
160304	Services and Defense Agencies required to provide an electronic file of Budget Line Items to maintain Automated Command, Control, Communications, Intelligence, Surveillance and Reconnaissance (C ³ ISR) database.
160402	Provides guidance on classified appeals to congressional action on NFIP, JMIP, and TIARA programs.
160502	Provides guidance on Automated C ³ ISR database.
160602	Updates crosswalk exhibit IP Form 1.
170101	Updates Information Systems Security Program to include the newly established Defense-wide Information Assurance Program and updates remaining references to same.
170103	Adds a paragraph regarding the composition of C ³ programs. Renumbers remaining section.
170201	Adds a paragraph regarding the composition of C ³ programs. Renumbers remaining section.
170305	Adds paragraph to define relationship of C ³ Congressional Justification Book with Military Department and Defense Agency Justification Material.
1704	Adds section on automated reporting requirements.
1801	Chapter 18 has been rewritten in its entirety. Significant changes are as follows: <ul style="list-style-type: none"> - Elimination of the requirement to submit an IT-43; IT-2, 3, 4, 5 formats. - The Executive Summary is renamed to the IT Overview, and contains expanded justification materials, as well as a simple audit trail of changes from last submission to current. (Similar to the O&M trails). Requires a crosswalk to other exhibits. - The IT-1 is updated to meet new OMB Circular A-11 requirements. - The Mission categorization reporting is accommodated by the IT/DII Reporting Categories. - IT/DII reporting levels eliminate the defunct CIM terminology, and reflects the DII Master Plan categories that align to DoD Missions and IT Backbone Activities. - Definitions reflect the Clinger-Cohen Act of 1996 terminology and requirements. - The IT-2 is eliminated. - The category Major is aligned with DoD 5000 terminology. - Major Initiatives must be reported on new IT(300b) Capital Investment Justification Exhibit. This exhibit incorporates some of the information requirements of OMB Circular A-11, Exhibit 40B, on financial systems. - PY, CY, BY1, BY2 data are required; BY2+1-3 are required on the IT 300b, and are optional on the other exhibits.

Section Number	Changes	
1902	Adds new section on Combating Terrorism.	
190301	Updates the list of activities that are designated as Major Range and Test Facility Bases.	
190402	Expands the types of programs for which an Exhibit T&E-1 must be submitted.	
190902	PB-14	Adds Functional Transfer exhibit.
	PB-15	Revises definitions for Advisory & Assistance Services and revises exhibit in its entirety.
	PB-16	Adds new exhibit to summarize legislative proposals.
	PB-17	Adds new exhibit for Employee Relocation Expenses.
	PB-18	Adds Singapore to country list.
	PB-19	Adds new exhibit for Contract Reporting by Appropriation
	PB-22	Revises exhibit to reflect changes of Management Headquarters Working Group.
	PB-25	Deleted section on Indirect Support.
	PB-28	Amplifies guidance for submission requirement.
	PB-28A	Adds new exhibit for Environmental Security Technology.
	PB-41	Adds requirement to submit the Congressional Justification/Presentation input by January 5 th of each year.
	PB-42	Indicates that this exhibit is under revision. Additional guidance will be issued separately. Renamed as Competition and Privatization.
	PB-50	Expands data requirements.
	PB-54	Adds new exhibit for Civilian Personnel Hiring Plan.
	PB-55	Adds new exhibit for International Military Headquarters.
191203	MRTFB-2a	Element of Expense Listing revised to include a FY PY-1 column.
	MRTFB-2d	Source of Direct Funds revised to include a FY PY-1 column.
191204	T&E-1	Revised to include FY PY-1, BY2+1, BY2+2, BY2+3 and BY2+4 columns.
	T&E-1	Revises guidance on Instructions for Exhibit T&E-1.

0301 GENERAL**030101 Purpose**

A. This Chapter covers the budget formulation and congressional justification requirements for operation and maintenance appropriations.

B. The following appropriations and accounts are covered:

Section

030201

- Operation and Maintenance, Army
- Operation and Maintenance, Army Reserve
- Operation and Maintenance, Army National Guard
- Operation and Maintenance, Navy
- Operation and Maintenance Navy Reserve
- Operation and Maintenance, Marine Corps
- Operation and Maintenance, Marine Corps Reserve
- Operation and Maintenance, Air Force
- Operation and Maintenance, Air Force Reserve
- Operation and Maintenance, Air National Guard
- Operation and Maintenance, Defense-Wide
- Office of the Inspector General
- Defense Health Program
- Former Soviet Union Threat Reduction
- Overseas Contingency Fund
- Overseas Humanitarian, Disaster, and Civic Aid
- Support of International Sporting Competition, Defense

030202

- United States Court of Military Appeals for the Armed Forces

030203

- Civil Functions

030102 Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 3 covers specific back-up material requirements for the above accounts. The Components should also consult all of the other chapters for exhibit requirements for the above appropriations/accounts that are not specifically addressed in this chapter including Chapter 19 - Other Special Analyses.

030103 Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapters 8 (Real Property Maintenance/Minor Construction), 12 (Defense Health Program), and 19 provide additional specific guidance with regard to the back-up material required in this section of the manual.

030104 References

Section 010212 provides policies and definitions concerning costs that are to be financed by the O&M appropriations as opposed to other appropriations in the Research, Development, Test and Evaluation (RDT&E) area. Section 010201 provides policies and definitions regarding the application of expenses and investment criteria for budgetary purposes.

0302 BUDGET ESTIMATES SUBMISSION**030201 Operations Accounts**

A. Purpose. This Section prescribes justification materials required to support the budget estimates for the following operations accounts.

- Operation and Maintenance, Army; Army Reserve; and Army National Guard
- Operation and Maintenance, Navy and Navy Reserve
- Operation and Maintenance, Marine Corps and Marine Corps Reserve
- Operation and Maintenance, Air Force; Air Force Reserve; and Air National Guard
- Operation and Maintenance, Defense-Wide
- Office of the Inspector General
- Defense Health Program
- Former Soviet Union Threat Reduction
- Support for International Sporting Competitions, Defense
- U.S. Court of Appeals for the Armed Forces

B. Submission Requirements. All Operation and Maintenance appropriations are required to submit the back-up exhibits listed in the following table, if appropriate. Examples of these exhibits, along with instructions for their preparation, are provided in Section 0304. The Components should also consult all of the other chapters for exhibit requirements which are not specifically addressed in this chapter including Chapter 19 - Other Special Analyses.

OPERATIONS ACCOUNTS EXHIBITS

Exhibit Number	Exhibit Title	Components Required to Submit
O-1	O&M Funding by Budget Activity/Activity Group/Subactivity Group	All, Except Defense-Wide
OP-5	Detail by Budget Activity, Part 1	All
OP-5	Detail by Activity Group/Subactivity Group, Part 2	All
OP-5	Detail by Defense Agencies, Part 3	Defense-Wide
OP-5	Attachment 1 - Reconciliation of Increases and Decreases	All
OP-5	Attachment 2 - JCS Exercise Program	All
OP-5	Attachment 3 - Base Operation Support	All
OP-5	Attachment 4 - Transportation Costs	All
OP-5	Attachment 5 - Real Property Maintenance (RPM) and Minor Construction (Chapter 8)	All
OP-5	Attachment 6 - Training	All
OP-8	Civilian Personnel Costs	*All
OP-8	Reimbursable Civilian Personnel Costs, Part 2	*All
OP-9	<i>Analysis of Changes in Full-Time Equivalent (FTE) Costs</i>	*All
OP-14	Individual Training Data (Parts A – F, Attachments 1 & 2)	All
OP-15,A,B	Department of Defense Overseas Dependents' Schools	OUSD(P&R)
OP-16	Department of Defense Section 6 Schools	OUSD(P&R)
OP-20	Analysis of Navy Flying Hour Program - Summary	Navy
OP-20A	Analysis of Navy Flying Hour Program - Tactical Aircraft	Navy
OP-20B	Analysis of Navy Flying Hour Program - Fleet Training	Navy
OP-20C	Analysis of Navy Flying Hour Program - Fleet Support	Navy
OP-20D	<i>Analysis of Army Flying Hour Program</i>	Army
OP-20E	<i>Analysis of Air Force Flying Hour Program</i>	Air Force
OP-24	<i>Emergency and Extraordinary Expense Limitation</i>	All
OP-26	POL Consumption and Costs	*All
OP-27	Real Property Maintenance (RPM) Activities (Chapter 8)	All
OP-27P	Real Property Maintenance and Minor Construction - Projects Costing More than \$500,000 (Chapter 8)	All
OP-28	Summary of Major Repair Projects (Chapter 8)	All
OP-30	<i>Depot Maintenance Program</i>	All
OP-31	Funding for Defense Working Capital Funded Depot Level Repairables (DLRs)	All
OP-32	<i>Summary of Price and Program Changes</i>	All
OP-33	Reconciliation of Average Strength/FTEs in NATO European Countries	All
OP-34	<i>Appropriated Fund Support for Morale, Welfare, and Recreation (MWR) Activities</i>	All
OP-40	Ship Fuel and Operating Tempo Data	Navy
OP-41	Ship Operating Cost Data	Navy
OP-44	Military Personnel Assigned to Ship and Aircraft Squadrons	Navy
OP-50	Operation and Maintenance, Air Force – Units by Program Element	Air Force
OP-58	Operations and Maintenance, Air Force – Analysis of Air Force POL	Air Force
OP-71	Organizational Clothing and Equipment – Army Reserve	Army Reserve/Guard
OP-73	Repair Parts – Army Reserve	Army Reserve/Guard
OP-78	<i>Force Structure Data</i>	Air Force
OP-80	<i>Aircraft Repair/Modification and Engine Overhaul</i>	Air Force

* Also required to be submitted by applicable RDT&E, Military Construction, Family Housing, Defense Working Capital Fund, etc. accounts.

C. Preparation of Material. The following instructions pertain to the back-up material required by this Section.

1. The information will cover the prior year (PY), current year (CY), biennial budget year 1 (BY1), and biennial budget year 2 (BY2), unless otherwise indicated.

2. Operation and Maintenance data will be submitted in terms of obligations.

3. Additional data may be provided by expanding the prescribed formats and exhibits, or by cross-referencing to additional exhibits, where prescribed material is considered inadequate to justify requested programs or estimates. No prescribed material may be omitted unless inapplicable or unless the omission is specifically approved by the OUSD(C) P/B. The inapplicable stubs and column headings may be omitted but will not be redesignated when completing standard exhibits.

4. The purpose of the back-up exhibits is to describe the program and justify the estimates. If the data collection systems or management systems utilized provide for cost accounts or program units or workload indicators different from those specified in this section, Components should request OUSD(C) P/B to change the provisions of this regulation.

5. The use of annex exhibits to reduce bulk is encouraged providing the required material is fully covered and presented in a logical manner. Machine printouts of required data will be accepted but should be designed to minimize bulk. Narrative data related to machine printouts should be assembled with the most appropriate page of the printout in a consistent manner.

D. OMB Circular No. A-11.

The Components must submit any additional exhibits required by OMB Circular No. A-11. Consult OMB Circular No. A-11 for instructions pertaining to the completion of the required exhibits.

E. Real Property Maintenance and Minor Construction.

All Components (i.e., Active Forces, Defense-Wide, National Guard and Reserve Forces) shall submit justification data and exhibits to support budget estimates for real property maintenance and minor construction, in a separate bound attachment, as prescribed in Chapter 8. Two additional copies of this attachment will be delivered to: Director for Military Construction, OUSD(C) P/B, Room 3D840, Pentagon, on the same date as all other submissions required under this chapter. Examples of these exhibits, along with instructions for their preparation, are provided in Chapter 8. Additionally, each Component must ensure that the OP-5 (Part 2) attachment 5 (Real Property Maintenance and Minor Construction) in Section 030402 of this regulation is submitted to the Military Construction Directorate (Room 3D840).

- OP-27 Real Property Maintenance Activities (Each O&M Appropriation)
- OP-27P Real Property Maintenance and Minor Construction Projects (All Appropriations – Projects Costing More than \$500,000)
- OP-28 Summary of Major Repair Projects (Each O&M Appropriation)

F. Copies of back-up material in support of budget estimates will be submitted as identified in Section 010302. Two additional copies of the OP-5 exhibits for Information Security Programs will be delivered to Director for Military Construction, OUSD(C) P/B, Rm 3D840, Pentagon, on the same date as all other submissions required under this Chapter.

G. Automated Submissions.

1. Automated submissions are required for the following exhibits for both the OSD/OMB Budget Estimate Submission and the President's budget request:

- OP-8 Civilian Personnel Costs

OP-26 POL Consumption and Costs
OP-32 Price and Program Growth

All questions about the automated submission should be referred to:

OUSD(C), Operations and Personnel Directorate
Attn. O&M Production Assistant
1100 Defense, Pentagon, Room 3D868
Washington, D.C., 20301-1100
Telephone (703) 697-3101, Ext 18

2. In addition to the appropriations and accounts listed in Section 030201, an OP-32, Price and Program Growth, Exhibit for both the OSD/OMB submission and the President's budget request will be submitted for the following appropriations and accounts:

- Environmental Restoration, Army
- Environmental Restoration, Navy
- Environmental Restoration, Air Force
- Environmental Restoration, Defense
- Environmental Restoration, Formerly Used Sites
- Defense Against Weapons of Mass Destruction
- Emergency Response Fund, Defense
- OPPLAN 34 A-35 P.O.W.
- Overseas Contingency Operations Transfer Fund, Defense
- Special Olympics World Games
- Quality of Life Enhancements, Defense

3. The automated data should be generated by the *Comptroller* computer software provided by *downloading it from the Internet Website*. If this cannot be done, alternative arrangements must be made beforehand. The data may be entered into the software manually or *imported* from an external file. Directions for its use, as well as the information presented here, are included in the software.

4. When *importing* external data, it must conform to prescribed criteria. The precise format of the data varies between the exhibits. Specific information is provided in the software. For ASCII data files, the following general guidelines apply:

Negative entries should be identified with a minus sign adjacent to the left most digit.

Data entered will be right justified within the data field.

No commas in numbers over 999.

Zero padding is unnecessary.

Records that have all zero data fields are unnecessary.

5. The submitted data must be either delivered on a standard, DOS-formatted diskette (3.5" or 5.25") or mailed electronically. If delivered on a diskette, the diskette must identify the office of origin and the name and telephone number for who is capable of answering questions about the automated submission.

6. The software provides reports, which duplicate the related exhibits, as well as other reports. *The responsible personnel must review and compare the automated data against the submitted official paper copy exhibits and make corrections and adjustments prior to submitting the data to the Comptroller POC.* THE REPORTS GENERATED BY THE SOFTWARE MUST MATCH THE SUBMITTED OFFICIAL PAPER COPY

SUBMISSION EXHIBITS. Any deviations must be approved in advance. *Data with deviations that is submitted without prior approval will be returned to the responsible personnel to be corrected and resubmitted.*

7. Identification codes are provided in the software. Any new codes, which are required, will be assigned by the Director for Operations and Personnel, OUSD(C) upon request.

030202 U.S. Court of Military Appeals for the Armed Forces

A. Purpose. This Chapter prescribes budget justification backup requirements for the appropriation “United States Court of Appeals for the Armed Forces.”

B. Submission Requirements.

1. See Chapter 1 for general guidance concerning submission requirements. Submit separate exhibits for each of the following:

- Appropriation Language. Submit justification for proposed changes.
- Purpose and Scope. Describe the missions and functions of the Court of Military Appeals.
- Summary of Obligations by Object Classification.
- Summary of Personnel by Grades. Show the number of civilian positions in each grade, the number of statutory positions, total permanent positions, lapse, and workyears.
- Summary of Price and Program Changes.
- Explanation of Estimate. Explain changes in costs and provide a statement of case workload and opinions rendered.
- Also include applicable exhibits required by Section 030201 and any of the other chapters of this regulation including Chapter 19 – Other Special Analyses.

2. Chapter 1 identifies copies of the above material required.

030203 Civil Functions-Operation and Maintenance

A. Purpose. This Chapter prescribes budget justification backup requirements for the civil functions appropriations.

B. Cemeterial Expenses (Department of the Army).

1. See Chapter 1 for general guidance concerning submission requirements. Submit separate exhibits for each of the following. All data will be provided for the past, current, biennial budget year 1, and biennial budget year 2 fiscal years.

- Appropriation Language. Submit justification for proposed changes.
- Multiyear Financial Plans. Show budget authority and outlays by budget project and in total for the past, current, biennial budget year 1, and biennial budget year 2 fiscal years and for four subsequent fiscal years. Also show planned end-of-year employment (permanent positions and other positions) by budget project and in total for the same years.

- Analysis of Budget Authority (BA) and Outlays. Show BA and outlays by budget project and in total. Also show the difference between the biennial budget year 1 and the current year and the outlays in the biennial budget year 1 resulting from BA in the biennial budget year 1. Also show the difference between the biennial budget year 2 and the biennial budget year 1 and the outlays in the biennial budget year 2 resulting from BA in the biennial budget year 2.

- Program and Performance. Describe the major workload considerations and activity factors on which the estimates for each budget project have been based.

- Summary of Obligations by Object Classification.

- Statement Relating Past Year, Current Year, Biennial Budget Year 1, and Biennial Budget Year 2 Programs. List the increases and decreases necessary to reconcile the obligations incurred in each year with an analysis by budget project showing the obligations for each year and the related increases and decreases between each year.

- Project 0861 - Operation and Maintenance. Provide narrative justification and amounts for each project classification within the project. Separately identify yearend employment and workyears for supervisory, interment and maintenance categories.

- Project 0864 - Administration. Provide narrative justification and amounts for each object classification within the project. Separately identify year end employment and workyear for National Cemetery activities, headstone activities, and administrative services and staff planning.

- Project 0865 - Special Construction, Arlington National Cemetery.

a. Provide amounts by each object classification within the project. Separately identify yearend employment and workyears.

b. List and provide a narrative justification and amount for each planned construction or development project.

- Report of Motor Vehicle Data. Provide the following summary:

a. Fleet as of October 1.

b. Acquisitions:

- (1) New orders placed
- (2) By forfeiture
- (3) By transfer

c. Number disposed of (deduct):

- (1) Disposals accomplished (carryover)
- (2) Disposals accomplished (newly scheduled)

d. Vehicles replaced (newly scheduled).

e. Active fleet, September 30 (a + b + c).

f. Vehicles unused on a term basis (add).

g. Total vehicles available full-time (e + f).

h. Obligations for vehicles ordered.

- Personnel Justification. Submit Exhibit OP-8, which is described in Section 030201 and an example of which is found in Section 0304

2. Chapter 1 identifies copies required of the above material.

C. Wildlife Conservation, Etc., Military Reservations.

1. In addition to the Program and Financing Schedule and Personnel Summary, submit an Exhibit OP-5 prescribed in Section 030201 and an example of which is provided in Section 0304.

2. Chapter 1 identifies copies required of the above material.

0303 CONGRESSIONAL JUSTIFICATION/PRESENTATION**030301 Purpose**

This Section presents the justification book organization and the exhibit requirements for submission to Congress. Examples of budget exhibits can be found in Section 0304.

030302 Organization of Justification Books

A. Justification Books will be organized into separate books for each appropriation. (The only exceptions to organizing justification books into separate books for each appropriation are for the United States Court of Military Appeals for the Armed Forces, Office of the Inspector General, and the Environmental Restoration appropriations. These should be included in the same book as the Defense-Wide. The Defense Health Program (DHP) will be a separate justification book. The procurement and RDT&E DHP budget activities will follow the organization prescribed for the procurement and RDT&E appropriations in Chapters 4 and 5, respectively.

B. Justification books for the Active Component of each Military Service and the Defense-Wide should be organized into three volumes (in separate books) as follows:

- “Justification of Estimates for Fiscal Years BY1 and BY2”
- “Data Book”
- “Real Property Maintenance and Minor Construction”

Reserve and National Guard Components should combine the above volumes into one book for each Component.

C. Volume I - Justification of O&M Estimates for Fiscal Years BY1 and BY2. The Operation and Maintenance (O&M) Justification Books will be submitted on an operations basis to include active military force personnel strengths, Reserve and National Guard personnel on full-time active duty, and civilian personnel. (Related dollars financed from the Military Personnel appropriations, however, should not be included). The content and arrangement of exhibits for the operations accounts are indicated at the end of this section. Applicable exhibits for the Reserve and Guard Component operations accounts will be consistent with the active operations accounts. Exhibit formats are provided in Section 0304. Separate volumes for active and reserve component operation appropriations will be submitted. Funds for the National Foreign Intelligence Program (NFIP), Tactical Intelligence Related Activities (TIARA), or Joint Military Intelligence Program (JMIP) will be specifically identified. Justification classification will not exceed that required for other operations funds.

D. Volume II - Data Book. The content and arrangement of exhibits for the operations accounts are included at the end of this section.

E. Volume III - Real Property Maintenance and Minor Construction. Two copies of the Operation and Maintenance Book - Volume III, including the Reserve and National Guard Component exhibits, will be submitted for review and approval to the Directorate for Construction, OUSD(C) P/B, Room 3D840, Pentagon. In addition, the OP-28, Summary of Major Repair Projects (Chapter 8) will be provided with the review copies of Volume III.

F. Additional Accompanying Exhibits. Although not to be included in Volume I, Volume II, or Volume III of the Justification Books, the exhibits at the end of this section are required to be submitted to the OUSD(C) P/B Directorate for Operations and Personnel, Pentagon, Room 3D868, simultaneously with the submission of the other budget justification material. These exhibits are not to be included in Justification Books submitted to the Congress. Examples are provided in Section 0304 (O&M) or Chapter 19 (Other Special Analyses).

G. O&M Overview. The Operation and Maintenance Overview exhibits (PBA-xx) are required for submission to the OUSD(C) P/B Directorate for Operations and Personnel (Pentagon, Room 3D868). Specific suspense dates will be furnished in the annual budget justification call memorandum supporting the President's budget request. The parent service is responsible for providing all required data including Reserve Component appropriations.

Exhibit formats are provided in Section 0304. Each exhibit must provide narrative data to explain price and program changes between all fiscal years displayed. *In addition, Components are responsible for cross checking data among the exhibits to ensure data provided is consistent among all PBA exhibits and all other exhibits supporting the President's budget request.*

Two copies of each exhibit are required and will identify the Component, exhibit number and title, *date prepared*, and name/telephone number of the responsible point of contact for the exhibit. The exhibits will be consolidated at the Operation & Maintenance title level for printing and submission to the Congress. The Defense Agencies should provide as a minimum PBA *exhibits* 19 and 20, and address resource requirements in one or more of the major mission categories as appropriate.

Exhibit O-1
(Page 1 of 2)

Instructions for O-1

All O&M Components except Defense Agencies must submit a hard copy O-1 for both the OSD/OMB and congressional submissions. In addition, the O-1 must be submitted in automated format for the congressional submission. This should be done in Excel or Lotus format, according to the instructions below:

Lotus Format:

- 3 1/2 inch high density disk with a blank O-1 in Excel or Lotus format will be provided to Components to enter funding amounts by subactivity.
- Enter funding data in thousands of dollars.
- Subtotals will automatically calculate for Budget Activity and Appropriation; do not enter any subtotals.
- The existing numerical line item identifiers must be maintained for each subactivity. Only if a particular subactivity no longer applies for the current submission should the line be deleted.
- New subactivities may be entered by inserting a line with an additional line item identifier, following the existing line item sequence. Enter the title of the new subactivity in all capital letters. The funding entered for each new line will be included in the subtotals and totals.

INSTRUCTIONS FOR PREPARATION OF OP-5

THIS EXHIBIT IS UNDER REVISION. ADDITIONAL GUIDANCE WILL BE ISSUED SEPARATELY.

Exhibit OP-8 Civilian Personnel Costs
(Page 2 of 7)

CIVILIAN PERSONNEL COSTS

OP-8 Instructions

Separate OP-8 exhibits must be prepared for PY, CY, BY1, BY2 for each Military Department in total and for each appropriation/fund in which civilian personnel are funded. Each Defense Agency, including those Defense Agencies that have only RDT&E funded civilian personnel, and the Court of Military Appeals must also provide a separate exhibit. If a Defense Agency has civilian personnel financed in more than one appropriation/fund then a total for the Defense Agency must be provided.

Rate data on the OP-8 should be shown parenthetically. To calculate the required rate data, use the formulas displayed on the OP-8 exhibit. Show the average salary for Basic Compensation, overall salary for Total Compensation, and workyear cost for Compensation and Benefits. Show the other rate data, as a percentage in decimals to five places, for total variables and benefits.

End strength onboard as of September 30 vice end strength authorizations will be displayed for all beginning and ending end strengths. The beginning end strength must agree with previous FY's September 30 end strength.

In accordance with OMB Circular A-11, full-time equivalent (FTE) employment is the total number of hours (worked or to be worked) divided by the number of compensable hours applicable to each fiscal year. FTE is synonymous with workyear.

Data formerly reported for General Merit Pay category will be merged in the General Schedule line.

In accordance with the Federal Employees Part-time Career Employment Act of 1978 (Public Law 95-437), part-time permanent employees are counted on a full time equivalent basis, i.e., an individual working 30 hours a week becomes .75 of an end strength. There is no adjustment for other part-time or intermittent employees - these employees would be counted on an individual basis not on a fractional basis.

Consult either DoDI 7330.18 or the Office of Personnel Management's Federal Personnel Manual (FPM) for definitions of full-time employees with permanent appointments (FTP). FTP (Full-Time Permanent), according to OMB Circular A-11, is the number of full-time employees with permanent appointments that are on-board, or planned to be on-board, as of the end of each fiscal year. Such entries will exclude anticipated vacancies. Do not display FTP for Indirect Hire Foreign Nationals. Consult the DoDI or FPM to determine if your Foreign National Direct Hire employees are considered FTP employees.

Voluntary separation incentives must be reported in Benefits for Former Employees (Object Class 13).

Do not include overtime workyears in *FTE* totals. The *FTEs* on the OP-8 are straight time workyears only.

FTEs (direct and reimbursable) in the OP-8 exhibits must agree with the *FTEs* reported in the OMB galley used for the printed budget. (OMB Circular A-11.)

Exhibit OP-8 Civilian Personnel Costs
(Page 3 of 7)

CIVILIAN PERSONNEL COSTS

OP-8 Instructions

(continued)

For the PY supporting the FY BY President's budget request, the end strength data must agree with the SF-113A, Monthly Report of Federal Civilian Employment, provided to OPM to report military functions employment levels as of September 30.

- Direct hire end strength data on the OP-8 must agree with data provided on the September 30th supplement to the SF-113A report. This supplement is entitled, Report of Part-Time Permanent Employees on a Fractional Basis.
- Indirect hire end strength data must agree with the Indirect Hire supplement to the September 30th SF-113A report.
- The FTP end strength data must agree with data provided on line 30, Full-Time with Permanent Appointments, of the September 30th SF-113A.

Civilian Personnel Direct Funding (#7) will be total Civilian Personnel (#5) less reimbursable funding (#6). Provide end strength, workyear and funding reimbursable data for all of the columns. Appropriations/funds (e.g., Defense Working Capital Fund, etc.) that are not funded with budget authority show all of the data as reimbursable so that "0" will be displayed in every column on the "Civilian Personnel Direct Funding" (#7) line.

On a separate page, provide reimbursable sources by appropriation, and by Component/Agency.

An automated submission for the OP-8 Exhibit is also required. See section 030201 for both the OSD/OMB budget submission and the FY BY1/BY2 President's budget request.

Department of Defense Education Activity (DoDEA) will submit separate OP-8 exhibits for: Department of Defense Dependents Schools (DoDDS) and DoD Domestic Dependent Elementary and secondary Schools (DDESS), in addition to consolidated OP-8 exhibits for the total DoDEA program. For the required automated submission, DoDEA is only required to submit the consolidated OP-8 exhibit, not individual exhibits for DoDDS and DDESS.

Reimbursable Civilian Personnel Costs, Part 2

Instructions for Preparation of the OP-8 Part 2 Reimbursable Pay

This is mandatory for the Military Departments and the Defense Agencies. If a Service shows that civilian pay is to be reimbursed from a Defense Agency that does not submit this form, then the agency coordination must be shown on this form. This is required only for the Budget Estimates Submission (BES).

Each appropriation account in the prior year, current year, biennial budget year (BY1), and biennial budget year (BY2) for which civilian pay is reimbursed, must identify the following in thousand of dollars:

On line 1, total civilian pay *.

On line 2, total reimbursable pay *.

On line 3, the amount of line 2 that is reimbursed within the account.

On line 4, the amount by account of line 2 that is reimbursed from accounts within the Service or Defense Agency. The sum of all accounts must equal the total intra service.

On line 5, the amount by account of line 2 that is reimbursed from other Services or Defense Agency accounts. The sum of all accounts must equal the total inter service.

On line 6, the amount of line 2 that is reimbursed from all other sources. The sum from all Defense Agencies must equal the total all other.

On line 7, the total civilian pay that is reimbursed to other Services or Defense Agencies **.

Notes:

* Lines 1 and 2 **MUST** agree with the totals reported by the Service of Defense Agency on the OP-8 and the sum of lines 3 through 6 of this must equal line 2.

** Any amounts identified on line 5 **MUST** appear on line 7 of the reimbursing Service or Defense Agency submission of this exhibit.

Reimbursable Civilian Personnel Costs, Part 2

SAMPLE

Fiscal Year: FY 1999

Appropriation Account: Operation & Maintenance, Army

A. SUMMARY OF CIVILIAN PAY:

1. Total Civilian Pay	7,599,374
2. Reimbursable Civilian Pay	2,086,470

B. REIMBURSABLE CIVILIAN PAY DISTRIBUTION BY SOURCE:

3. INTRA ACCOUNT	1,500,000	
4. INTRA SERVICE		286,470
4a. O&M, Army Reserve	136,470	
4b. O&M, Army Guard	50,000	
4c. RDT&E, Army	50,000	
4d. Mil Con, Army	50,000	
5. INTER SERVICE		200,000
5a. Defense Health Program (DHP)	50,000	
5b. RDT&E, Navy	50,000

(Page 4 of 5)

ANALYSIS OF CHANGES IN *FULL-TIME EQUIVALENT (FTE)* COST
INSTRUCTIONS

1. The intent of the OP-9 is to identify the factors that have an impact on changes in average salary and average FTE cost from fiscal year to fiscal year.
2. Prepare separately for each appropriation and Fund account for U.S. direct hire, classified and wage system, and Foreign National Direct Hire (FNDH). Complete amounts and rates for WS, etc., as in SES/GS column.
3. All end strength will be displayed as actual or planned to be onboard as of September 30. Do not use end strength authorizations.
4. Cost, FTEs, and end strength should be consistent with those shown on OP-8, Analysis of Civilian Personnel Costs.
5. Show each classified pay raise in separate stub.
6. Data is to be reflected at appropriation or account.
7. The “Average Basic Annual Salary” for a FY is computed by dividing the “Basic Compensation” total by the number of straight time workyears.
8. The “Overall Average Annual Salary” for a FY is computed by dividing the “Total Compensation” (Object Class 11) by the number of straight time workyears.
9. The “Average FTE Cost” for a FY is computed by dividing “Total Compensation and Benefits” (Object Class 11 and 12) by the number of straight time FTEs.
10. The OP-9 will be prepared for both the Budget Submission and the President’s budget. However, for the latter the OP-9 will be submitted separately to OSD and will not be included in the congressional justification material.

Footnotes

- 1/ Reflect as % rate of basic compensation.
- 2/ Express as decimal to five places. Develop effective pay raise as ratio of No. applicable days to total compensable days in year times pay raise percentage. Identify computation in footnote.
- 3/ Show computation - derivation of rate.
- 4/ Provide an explanation if the rate is different from the previous fiscal year rate, e.g. changes in overtime rate, changes in health benefits, FERS, etc.

NOTE: Carryover is to be calculated as of graduation (unless another time is specified uniformly for an academy).
 "Graduation Load" is the sum of carryover for each class plus graduates.
 "Autumn Load" is the sum of carryover for each class plus net new entrants at the beginning of the autumn term.
 Reconcile and explain in footnotes differences between Autumn Load and "Cadet/Midshipman End Strength" reflected here and in the FYDP update.
 "Prep School Load" is to be a forecast of average onboard students on a "best estimate" basis (specify formula).
 If this table is presented on an academic year basis, so state.

Instructions for Completion of Preceding

1. Enter Army, Navy, or Air Force, as applicable.
2. Enter the appropriate fiscal year (data should be shown for the Prior, Current, and Biennial (BY1 and BY2) Budget fiscal years).
3. Enter the average number (many year average) of officers, enlisted personnel, civilians, and combined total, respectively, assigned to ROTC units and ROTC command level staffs, respectively. ROTC command level staff should include all personnel up to the departmental level who are associated with the ROTC program but are not assigned to a ROTC unit.
4. Enter the total costs of pay and allowances/salary of military and civilian personnel, as applicable, plus any related O&M support costs. Pay and allowances/salaries will be determined through the use of standard rates for military and civilian personnel, respectively.
5. Enter the average staff and the average cost of the staff per unit. Average staff will be determined by dividing the applicable total staff (unit or command level) by the number of units shown in C (see paragraph 6, below). The average cost of staff per unit will be arrived at by dividing the applicable total costs for the unit and command level staffs, respectively, by the number of units shown in C.
6. Enter the applicable number of operating units.
7. Enter the total ROTC costs, other than those shown in A or B, included in the Service's O&M appropriation(s). (This should be equal to the sum of D.1.a and b discussed below in paragraphs 8 and 9.)
8. Show in parenthesis () the total applicable costs of ROTC scholarships (include only tuition, fees, books, and other related student expenses).
9. Show in parenthesis () the applicable O&M administrative costs, by categories shown, related to the ROTC program.

INDIVIDUAL TRAINING DATA FOR FY __ BUDGET (SERVICE)

PART D: ROTC PROGRAM DATA (PE 847230)
(Continued)

10. Enter the total ROTC costs included in the Service's applicable Reserve Component appropriations. This should be equal to the sum of D.2.a, b, and c, as discussed in paragraphs. 11, 12, and 13 below.
11. Enter in parenthesis () the total costs relative to the monthly subsistence allowance paid to college freshmen and sophomores who are recipients of ROTC scholarships.
12. Enter in parenthesis () the aggregate sum included in the Service's applicable Reserve Component appropriations for ROTC Pay and Allowance (Summer Training), Subsistence of Reserve Officer Candidates (Summer Training), and Travel of Reserve Officer Candidates (Summer Training).
13. Enter in parenthesis () all costs of the ROTC program, other than those discussed in paragraphs. 11 and 12, above, included in the Service's Reserve Component appropriations.
14. Enter and detail by appropriation, and explain by footnote, any costs attributable to the ROTC program which have not been included in either A, B, or D (1 and 2).
15. Enter the total cost data shown in D.1, 2, and 3.
16. Enter in parenthesis () the number of candidates participating in and total costs of Flight Instruction Program and the Aviation Indoctrination Program, respectively, included in the above data.
17. Enter by the scholarship and non-scholarship programs, respectively, the average number of candidates participating in MS I, II, III, IV, and applicable totals, respectively. Leave dollar columns blank.
18. Enter the total costs of the ROTC program. Total costs should be equal to the aggregate sum of A, B, and D, above.

INDIVIDUAL TRAINING DATA FOR FY __ BUDGET (SERVICE)

PART E: JUNIOR ROTC PROGRAM DATA (PE 897210)

(1) JUNIOR ROTC (HIGH SCHOOL) PROGRAM

	<u>FY PY</u>	<u>FY CY</u>	<u>FY BY1</u>	<u>FY BY2</u>
A. <u>Average Enrollment</u>				
Freshman		(3)		
Sophomore				
Junior

C. <u>Total Program Cost</u>		(5)		
D. <u>Average Cost/Unit</u>		(6)		

Instructions for Completion of Preceding

1. Enter Army, Navy, Marine Corps, or Air Force, as applicable.
2. Enter the appropriate fiscal year (data should be shown for the Prior-1, Prior, Current, and Budget years).
3. Enter the average enrollment during the year by year (of high school) and in total.
4. Enter the number of JROTC units.
5. Enter by appropriation, and in the total, the costs to DoD of the JROTC program.
6. Enter the average costs per JROTC unit. (Total costs in 5 divided by units in 4.)

	OP-20C										

INSTRUCTIONS

Separate exhibits will be submitted for the active and the reserve flying hour programs. The OP-20 exhibit is supported by three schedules, each one of which is designed to display the principal elements affecting the development of requirements. All data are required for the prior year, current year, biennial budget year 1 (BY1), and biennial budget year 2 (BY2).

- (a) Exhibit OP-20A relates to those requirements which are computed principally on the basis of numbers of tactical aircraft, crew ratios and the hours per crew required to maintain combat readiness.
- (b) Exhibit OP-20B relates to those requirements which are computed principally on the basis of the production of trained pilots. In addition to Undergraduate Pilot Training requirements, this schedule should also include requirements to support CCTS, CRAW, and RTU's.
- (c) Exhibit OP-20C covers all other fleet support requirement.

Include the flying hours actually flown or programmed to be flown in support of the drug interdiction program in the proper section of the flying hour report (i.e. tactical flying hours in support of the drug program are to be reflected in the tactical/ASW section of the OP-20). At the end of the OP-20 exhibit, include a memo entry reflecting the number of flying hours and the dollars by Type/Model/Series that are funded in the centralized drug account.

Prior Year -1 is to reflect actual execution data and should include the crew ratio, no. of crews, hours per crew per month as well as the hours actually flown and the actual cost per hour.

Total prior year flying hour data is to be expanded to separately identify programmed (a/o the last Presidents budget submit) and actual execution data.

Expand the exhibit to include outyear data for the annual program only (not required by quarter).

Include CREW RATIOS, NUMBERS OF CREWS, HOURS PER CREW/MONTH, and REQUIRED vs. BUDGETED F/Hs.

Data will be arrayed by BA/Program Element/WSC with a Total array identified for each Program Element and Budget Activity.

The exhibit will identify O&M activities exclusive of Foreign Government Owned (FGO) and Special Operations Forces (SOF) aircraft.

FGO and MFP-10 data will be identified in separate arrays.

A Grand Total section will aggregate the O&M, FGO, and SOF information for each fiscal year by quarter.

Separate sections (with the same data array) will also identify the AFR and ANG programs.

This exhibit will be submitted for both the OSD submission and the President's budget submission.

Include the flying hours actually flown or programmed to be flown in support of the drug interdiction program in the proper section of the flying hour report (i.e. tactical flying hours in support of the drug program are to be reflected in the tactical section of the OP-20E). At the end of the OP-20E exhibit, include a memo entry reflecting the number of flying hours and the dollars by Type/Model/Series that are funded in the centralized drug account.

FY PY, FY CY, FY BY1, & FY BY2.)

- 1/ Describe the reason the requirement is unexecutable (plant capacity, operational commitment, or “other.”) “Other” must specifically identify constraint.
- 2/ Identify where work would be performed if funding were available: Organic - in house or Private – contracted out
- 3/ Total of unexecutable unfunded and executable unfunded requirements.

Exhibit OP-30 Depot Maintenance Summary
(Page 10 of 12)

DEPOT MAINTENANCE PROGRAM

Instructions and Definitions

A separate exhibit should be completed for *the following* Operation and Maintenance appropriations: *Army, Navy, Marine Corps, Air Force, Defense-wide (SOCOM), Army Reserve, Navy Reserve, Marine Corps Reserve, Air Force Reserve, Army National Guard, and Air National Guard.*

Include depot maintenance programs only. In accordance with 10 USC 2460, *depot maintenance and repair is defined as material maintenance or repair requiring the overhaul, upgrade, or rebuilding of parts, assemblies, or subassemblies, and the testing and reclamation of equipment as necessary. Depot maintenance includes the installation of parts for the purpose of safety modifications, all aspects of software maintenance, and interim contractor support or contractor logistics support. Depot maintenance may include the installation of modifications (when done concurrent with other depot maintenance task) all aspects of software maintenance and the depot maintenance portion of interim contractor support (ICS) and contractor logistics support (CLS). Depot maintenance does not include procurement of major modifications or upgrades of weapon systems that are designed to improve program performance, the procurement of parts for safety modification, or the nuclear refueling of an aircraft carrier. Do not include maintenance support programs, second destination transportation amounts, or depot maintenance funded in appropriations other than Operation and Maintenance in this exhibit.*

Depot maintenance amounts *displayed in this exhibit* should be consistent with amounts shown in applicable OP-5 Exhibits in each Component's budget justification book and agree with amounts provided in Exhibit PBA-5, Depot Maintenance, Chapter 3.

All O&M depot maintenance requirements are to be displayed in one of the following categories:

- 1. Funded requirements – depot maintenance requirements for which funds are assigned.*
- 2. Unfunded executable requirements – depot maintenance requirements that are deferred due only to funding constraints.*
- 3. Unexecutable requirements – depot maintenance requirements that cannot be accomplished for reasons other than funding constraints to include operational commitments and lack of capacity. Unexecutable requirements are to be explained on page three of this exhibit.*

Total O&M depot maintenance requirement is the sum of the three categories listed above. Total executable requirement is the sum of the funded and the unfunded executable depot maintenance requirements.

Depot maintenance funded and *unfunded executable requirements* for the FY PY, FY CY, FY 20 BY1 and FY 20 BY2 should also be included in the Workload and Performance Criteria section of applicable OP-5 Exhibits for those Activity Groups which include depot maintenance programs. (The Workload and Performance Criteria section of the OP-5 should utilize the OP-30 format.)

Exhibit OP-30 Depot Maintenance Summary
(Page 11 of 12)

DEPOT MAINTENANCE PROGRAM

Instructions and Definitions (continued)

For the following reporting categories/subcategories only weapon system depot maintenance should be reported (i.e., requirements specifically for work on the end item that is the weapon system). Do not include work on related equipment, assemblies or subassemblies (such requirements should be reflected in the appropriate “other” category).

- Aircraft
- Combat vehicle
- Ships
- Missiles
- Ammunition
- Other

Depot Level Reparable Maintenance will only include non-stock funded items.

Include FY PY-1 data for the OSD budget submission only.

For the President’s budget submission, only submit pages 1 through 3 and pages 6 and 7 of the OP-30 Exhibit.

* These lines should include only Defense Working Capital Fund purchases made at stabilized rates. Cost reimbursable purchases should be included in line 679.

Exhibit OP-32 Summary of Price and Program Change
(Page 3 of 8)

INSTRUCTIONS FOR COMPLETION OF OP-32

- (1) Enter the applicable component, i.e., Army, Navy, Marine Corps Reserve, Air National Guard, etc.
- (2) Enter the fiscal year for which this exhibit is being prepared.

NOTE: A separate exhibit should be submitted for each O&M appropriation for the current year, for biennial budget year 1, and for biennial budget year 2. This exhibit should be prepared at the appropriation level for the President's budget.

- (3) Enter the prior year (PY), current year (CY), biennial budget year 1 (BY1), or biennial budget year 2 (BY2), as applicable.
- (4) For the CY exhibit, amounts entered in this column should agree with the prior year actual costs as shown in the prior year column of the applicable budget submission. For the BY1 exhibit, these amounts should agree with the far right hand column of the CY exhibit. For the BY2 exhibit, these amounts should agree with the far right hand column of the BY1 exhibit.
- (5) The amount shown for each appropriate line (exclusive of line 991) in the Foreign Currency Rate Difference column will reflect the difference in the budgeted foreign currency exchange rates between the two years. For the prior and current years, the budgeted foreign currency exchange rates are the exchange rates that have been approved for recording obligations during execution. If the current year execution rates have not yet been established by the Congress in time for the budget submission, the foreign currency exchange rates reflected in that fiscal year's President's budget request will be used. For the biennial budget years, the budgeted foreign currency exchange rates are the exchange rates reflected in the OUSD (C) budget call memorandum for the budget submission or in the PBD issued during the budget review in the formulation of the President's budget request. (Note: Variances from the budgeted rates will be reflected only on line 991. These variances do not enter into the calculation on any of the other lines.) The column total, including line 991, will reflect (1) for the PY to the CY: the difference between prior year actuals and the current year budgeted rates, (2) for the CY to the BY1: the difference between budgeted rates in each year, and (3) for the BY1 to the BY2: the difference between budgeted rates in each year. If transfers are approved for the current year, the column total will reflect (1) for the PY to the CY: the difference between PY actuals and CY anticipated expenditures and (2) for the CY to the BY1: the difference between the CY anticipated expenditures and the BY1 budgeted rates. No foreign currency rate difference will be shown for Defense Working Capital Fund Purchases and Travel or Transportation for MAC, MSC or MTMC. Only in unusual circumstances should an amount for foreign currency rate difference be shown for other travel and/or transportation costs. (See end notes for further discussion of foreign currency entries.)
- (6) This column should show the rate (percent) of price growth for various items. The general price escalation indices prescribed by OSD (as provided by OMB) should be used for items 416, 417, 507, 679, 725, 771, 913-915, 920-925, 927-989, and 998. Other price growth rates may be used for these items when actual experience supports a rate of increase different from that prescribed For the OSD/OMB submit. In those instances, supporting documentation for the rate used should be provided. If the rate is approved during the budget review, the revised rate may be used in the President's budget. To the extent that a separate rate of increase is used for any portion of a line item, Equipment Maintenance by Contract for example, the applicable item should be subdivided into appropriate subcategories for each separate rate of increase used. The rate of price change for lines 401, 402, 411-415, 502-506, 601-673, and 701-721 should agree with applicable rates approved by OSD. Applicable rates of price growth, as prescribed by OSD, or as estimated and justified, as appropriate, should be shown for all items where there is a price change. The rate of price growth included in the President's budget will in all instances reflect the rate of increase approved during the OSD budget review.

Exhibit OP-32 Summary of Price and Program Change
(Page 4 of 8)

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

- (7) The price growth column should show the amount of price growth for various items. **Where a percent increase by line item is shown in column 6, the amount included in column 7 will be the sum/difference of the previous fiscal year's program amount (column 4) and the foreign currency rate difference amount (column 5) times the percent shown in column 6.** The amount of the price growth will be consistent with the rate of change prescribed by OSD. The price increase for all items should be the additional/reduced funds, as a result of price changes, that would be required to accomplish the previous year's program at applicable fiscal year rates.
- (8) Enter the amount of program growth for each item. Program growth is to be priced in current year dollars for the current year exhibit, biennial budget year 1 dollars for the biennial budget year 1 exhibit, and biennial budget year 2 dollars for the biennial budget year 2 exhibit.
- (9) Enter the sum of (4), (5), (7) and (8) for each item.
- (10) Subtotals should be included in (4), (5), (7), (8) and (9) for Civilian Personnel, Travel, Defense Working Capital Fund Supplies and Materials Purchases, Defense Working Capital Fund Equipment Purchases, Other Defense Working Capital Fund Purchases, Transportation, and Other Purchases, as applicable.
- (11) Program amounts for Civilian Personnel compensation should be consistent with amounts shown in both the object class distribution reflected in the Program and Financing Schedules for Object Classes 11, 12 and 13 (Direct Obligations only) and in the OP-8 Exhibit, Civilian Personnel Costs, Chapter 3 of the Financial Management Regulation for the applicable fiscal year. Payments made to the Department of Labor for expenses associated with employee's disability compensation are included in Object Class 12. Change in the number of compensable days per fiscal year will be reflected as program growth not price growth. The annualization of the prior year's pricing changes (i.e., the previous fiscal year's pay raise), merit pay, bonuses, FERS participation, etc. will be reflected as changes in price growth.
- (12) Program amounts for travel should be consistent with amounts shown in Object Class 21 (including subclasses), for the applicable fiscal year.
- (13) AMC, MSC, and MTMC costs displayed for items 624, 653, 701, 702, 703, 711, 721, 725, and 771 should include all purchases from these transportation funds. These amounts should exclude all non-Defense Working Capital Fund purchases such as reimbursement to MTMC of non-Defense Working Capital Fund (overseas) port operations.
- (14) Line 703 JCS Exercises includes only those services in support of JCS exercises and paid only by The Joint Staff (TJS).
- (15) The total of the program amounts for DFSC Fuel, Defense Working Capital Fund Fuel, and Locally Procured Fuel (Non-Fund) line items must agree with the amounts shown on the OP-26 Exhibit, POL Consumption and Costs, Chapter 3, Financial Management Regulation.
- (16) Include Object Class 26 supplies and materials purchased from each DoD Defense Working Capital Fund, including DLA.
- (17) Include Object Class 26 supplies and materials purchased from GSA.
- (18) Include all equipment (including furniture) purchased from Defense Working Capital Fund, including DLA.
- (19) Include all equipment (including furniture) purchased from GSA.

Exhibit OP-32 Summary of Price and Program Change

(Page 5 of 8)

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

- (20) Include amounts to be paid for motor vehicles leased from both commercial services and the General Services Administration (GSA) Interagency Fleet Management System (IFMS). These amounts are to be consistent with the estimates provided on the "Commercial Leases" and the "IFMS Leases from GSA" lines of the Motor Vehicle Operations (PB-41) exhibit.
- (21) Includes centrally managed items procured by Defense Working Capital Fund from sources other than Defense Working Capital Fund or non-Defense Stock Funds.
- (22) Include purchases of MTMC services for non-Fund services such as overseas port terminal operations.
- (23) Program amounts should be consistent with Fund purchases included in Object Class 25.3.
- (24) Biennial budget years' (BY1/BY2) program amounts should reflect stabilized rates as requested by the Service (OSD submission) or as approved by OSD (President's Budget), as applicable, to include the impact of biennial budget years' pay raises. Cost reimbursable purchases should be included on line 679. Separate elements of expense for each Defense Working Capital Fund activity group are shown on page 3. Include only those elements of expense for Defense Working Capital Fund activity groups from which purchases were made or are planned, as applicable.
- (25) Includes the Aerospace Maintenance & Regeneration Center (AMARC).
- (26) Line 653, Airlift Services, Other AMC Purchases, includes Medical Evacuation Operations, Training, Search and Rescue, and other AMC costs not provided for in lines 701, or 702.
- (27) Includes all Defense Working Capital Fund purchases made on a cost reimbursable (rather than stabilized rate) basis.
- (28) Includes contractual charges for transportation of things via commercial air, sea, or surface mode and payments for commercial port operations and other transportation services exclusive of payments to the Defense Working Capital Fund.
- (29) Program amounts should be consistent with direct obligation amounts shown in the OP-8 Exhibit, Civilian Personnel Costs, Chapter 3.
- (30) Charges for rental of space and related services assessed by GSA as SLUC charges. Program amounts will be consistent with the amount shown in Object Class 23.1.
- (31) Program amounts included for items 913-915 and 917 will be consistent with the amounts shown in Object Class 23.3.
- (32) Purchases from non-Defense Working Capital Fund sources heat, light, power, water, gas, electricity and other utility services, exclusive of transportation and communication services.
- (33) Purchases of communication services from non-Defense Working Capital Fund sources.
- (34) Payments for possession and use of land, structures, and equipment (other than transportation equipment) owned by another, except for SLUC charges assessed by GSA.

Exhibit OP-32 Summary of Price and Program Change

(Page 6 of 8)

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

- (35) Purchases from the U.S. Postal Service including postage (other than Parcel Post), rental of post office boxes, postage meter machines and mailing machines. Also includes payments made to the U.S. Postal Service for handling of officially franked mail (i.e., Indicia Mail).
- (36) Includes supplies and materials purchased from other than Defense and non-Defense Working Capital Fund.
- (37) Program amounts should be consistent with the amounts shown in Object Class 24.
- (38) Covers contractual equipment maintenance other than depot level (e.g., ADP/office equipment, etc.)
- (39) Includes costs for repairs and maintenance to buildings, facilities, pavement, airfields and like items when done by contracts with the private sector.
- (40) Equipment purchased from the private sector, including equipment included in Federal Supply Group 71, Furniture. Program amounts should be consistent with amounts reported under Object Class 31.07.
- (41) Covers overseas contractor operated installation costs when covered in a single contractual agreement or when service is provided by a single contractor (excludes separate contracts for specific, limited services such as contract ADP services).
- (42) Covers contracted service cost of Air Force Air Defense Systems (e.g., BMEWS, DEW Line, Spacetrack, Thule AFB base maintenance contracts, DSP) and Space Support programs.
- (43) Includes the cost of ship related repair and the performance of regularly scheduled ship overhauls at commercial shipyards.
- (44) Includes the cost to Depot Maintenance to purchase aircraft maintenance from commercial sources.
- (45) Includes payments for all other non-Defense Working Capital Fund depot maintenance costs whether performed in-house or by contract which have not been reported under lines 928 or 929.
- (46) Program amounts should be consistent with Exhibit PB-15, (Advisory and Assistance Services), Chapter 19 of the Financial Management Regulation). The amounts reflected should agree with Object Class 25.1.
- (47) Program amounts should be consistent with the amounts shown in Object Class 41.
- (48) Charges for contractual services not otherwise reported elsewhere.
- (49) Amounts on line 991 will reflect variances from budgeted rates, as prescribed by OUSD(C) guidance, which have actually occurred in the prior year or which have been approved (by DD-1415 or PBD) for the current year. There will be no amounts reflected on line 991 in the price and program growth columns. For the President's budget, the amount in the prior year column will be the realized variance on the 30 Sep DD Comp(M) 1506 report. Under no circumstances will there be an entry on line 991 in the biennial budget year. (For a further discussion, see Foreign Currency notes at the end of these instructions).
- (50) Total program amounts, in (4) and (9), will be equal to the total direct program for prior year, current year, biennial budget year 1, and biennial budget year 2, as applicable.
- (51) Includes fuel purchased from sources other than the Defense Working Capital Fund.
- (52) Includes amounts for items not otherwise reported elsewhere.

Exhibit OP-32 Summary of Price and Program Change
(Page 7 of 8)

Foreign Currency Notes

- A. The Total for Foreign Currency Rate Difference (Column 2) must reflect the difference between:
1. PY to CY: Prior year actuals and current year budgeted rates or anticipated expenditures in the current year if transfers have also been approved for the Current Year. (For the latter, individual line items in column 2 (except for line 991) will reflect the difference in budgeted rates and line 991 in column 2 will reflect the transfer amount.)
 2. CY to BY1: Current year budgeted rates or anticipated expenditures in the current year if transfers have also been approved for the current year, and biennial budget year 1 budgeted rates.
 3. BY1 to BY2: Change in budgeted exchange rates from biennial budget year 1 to biennial budget year 2.
- B. Individual line items in Column 2 (except for line 991) must reflect the difference in program costs that are caused only by a difference in budgeted foreign currency exchange rates between fiscal years.
- C. Line 991 - Foreign Currency Variance
1. Prior Year (PY) to Current Year (CY)
 - a. PY column = Realized variance (DD Comp(M) 1506 Report 30 Sep).
Column 2 = Reverse the realized variance amount in the PY column.
CY column = zero
 - b. If transfers have been approved in the CY,
PY column = Realized variance (DD Comp(M) 1506 Report 30 Sep).
Column 2 = Reverse the realized variance amount in the PY column and add the transfer amount approved for the CY to determine the total.
CY column = the transfer amount approved for the CY.
 2. Current Year (CY) to Biennial Budget Year 1 (BY1)
 - a. If the budgeted rates change between the CY and the BY1 and transfers from the Foreign Currency Fluctuations, Defense (FCF,D) appropriation are not reflected in the budget, then the CY column, Column 2 , and the BY1 column for line 991 are all zero.
 - b. If budgeted rates change between the CY and the BY1 and the FCF,D transfers have been reflected in the budget for the CY, then the CY column for line 991 will reflect the value of the transfers and Column 2 for line 991 will reflect the reversal of the transfers. The BY1 column for line 991 will be zero.

APPROPRIATED FUND SUPPORT FOR MORALE, WELFARE AND RECREATION ACTIVITIES (MWR)

(Dollars in Thousands)

INSTRUCTIONS:

1. In preparing the OP-34 exhibit, the Services/Defense Agencies should use the program definitions contained in the DoD Directive 1015.10, subject: Programs for Military Morale, Welfare, and Recreation (MWR), DoDI 1015.12, subject: Lodging Program Resource Management; and DoDD 1015.8, subject: DoD Civilian Employee Morale, Welfare, and Recreation (MWR) and Supporting Nonappropriated Fund Instrumentalities (NAFIs).

2. *APF support should include both direct and indirect APF support provided to MWR activities and should include the cost categories reported on the Appropriated and Nonappropriated Fund Expense Summary required by DoDI 7000.12. Direct costs include those costs that can be directly attributable to the activity and include civilian and military pay and benefits, travel, training, supplies and equipment, contracts, and Family Child Care subsidy. Indirect costs include costs that are attributed to more than one activity and include rents, utilities, communications, minor construction, repair and maintenance, contracts, engineering support, etc.*

3. APF Common Support - That appropriated fund support, identified as APF support used in the management, administration and operation of more than one MWR program, however, that support or cost is not easily nor readily identifiable to a specific MWR program.

Some examples of APF common support would include: *managerial operational functions and positions at an installation, major command or Service, executive and upper management supervision that is functionally located above the operating program manager level and having responsibility for several MWR programs; an installation's civilian personnel functions; and central accounting office functions.*

4. The OP-34 Exhibits should be submitted for the OSD/OMB budget submission each year. The OP-34 exhibit should also be included in the congressional justification books each year.

1/ Identify applicable Reserve Component. Separate OP-71 exhibits required for Army National Guard and Army Reserve Components.

Exhibit OP-71 Organizational Clothing and Equipment - Army Reserve Components
(Page 1 of 2)

INSTRUCTIONS FOR COMPLETION OF OP-71

1. **Backlog Carried Over from Prior Year** - unfunded requirements at the end of the previous fiscal year.
2. **Backlog of Obsolete Equipment** - backlog associated with equipment no longer being issued to the Service. (e.g., if the Army Guard decided to replace steel helmets with kevlar helmets and has budgeted for the kevlar helmets as a force modernization initiative. The value for steel helmets included in the backlog would be reflected in this category.)
3. **Inflation** - backlog carried over from previous year less backlog associated with equipment no longer being issued to the Service times the OSD rate for “general purchases inflation-O&M” or the appropriate Defense Working Capital Fund rate, whichever is applicable.
4. **Adjusted Prior Year Backlog** - backlog carried over from previous year less backlog associated with equipment no longer being issued to the Service plus inflation (1-2+3).
5. **Average Strength Change Adjustment**- change in OCE requirements resulting from increases or decreases in total workyears.
6. **Replacement of Previous Issues** - inventory purchased to replace equipment that is consumed during the year through normal wear and tear (including inventory losses).
7. **Force Modernization Initiatives** - OCE requirements related to equipment modernization. This might include such items as new cold weather clothes or chemical protective clothing.
8. **Other - only those requirements that do not fit the above categories.** This would include increases and decreases resulting from changes in authorized numbers of units or individual equipment authorizations.
9. **Annual Requirement** - the sum of the “end strength change adjustment,” “replacement of previous issues,” “force modernization initiatives,” and “other.” (5+6+7+8)
10. **Total Fund Required** - the “adjusted prior year backlog” plus the “annual requirement.” (4+9)
11. **Funds Budgeted for OCE** - amount planned for OCE each year.
12. **Backlog, End of Year** – “total funding required” less “funds budgeted” for OCE.

9. Backlog, end of year								

Exhibit OP-73 Repair Parts, Army Reserve Components
(Page 1 of 2)

INSTRUCTIONS FOR COMPLETION OF OP-73

1. **Backlog carried forward from prior years** - unfunded requirements at the end of the previous fiscal year.
2. **Backlog of obsolete parts** - backlog of repair parts associated with equipment that is being retired from the Reserve Forces.
3. **Inflation** - backlog carried over from prior years less backlog associated with equipment being retired from the Reserve Forces times the OSD rate for “general purchases inflation--O&M” or the Defense Working Capital Fund, whichever is applicable.
4. **Adjusted prior year backlog** - backlog carried over from prior years less backlog associated with equipment being retired from the Reserve Forces plus inflation (1-2+3)
5. **Recurring requirements** - annual repair parts requirements to support equipment fielded in previous years.
 - a. **Annual consumption** - those parts consumed annually to support weapons systems fielded in previous years.
 - b. **Change in equipment inventories** - increases or decreases in annual consumption requirements necessary to reflect changes in equipment inventory levels (e.g., retirement of equipment).
 - c. **Change in stockage levels** - increases or decreases in requirements due to changes in the level of repair parts support required annually for a particular equipment.
6. **Nonrecurring requirements** - one time requirements associated with introduction of new equipment to the Reserve Force.
 - a. **Force modernization initiatives** - initial inventory of repair parts associated with fielding of force modernization systems.
 - b. **Introduction of other new equipment** - introduction of other equipment not previously provided to the Reserve Force.
7. **Total funding required** - adjusted prior year backlog plus recurring requirements and nonrecurring requirements.
8. **Funds budgeted for repair parts** - amount budgeted for repair parts each year.
9. **Backlog, end of year** - “total funding required” less “funds budgeted for repair parts”.

INSTRUCTIONS

Report force structure for each model/design/series (MDS) aircraft within each program element. Also identify the command to which the equipment is assigned and the purpose code for the equipment. The force structure should be reported at end of year for the prior year and the outyears and at the end of each quarter for the current year and the budget years (BY1 and BY2). Totals should be provided for MDS and each PE.

Separate exhibits are required for Active Air Force, Air Force Reserve, and Air National Guard.

Instructions

Reflect program data under “Description of Operations Financed” and “Program Data” sections.

Narrative Explanation of Changes: Provide a succinct narrative explanation of total resource changes (for \$ provide in nearest tenth of a million) between the Current Year and Biennial Budget Year 1 and between Biennial Budget Year 1 and Biennial Budget Year 2 by relating it to program changes (force structure, end strength, etc.) for the period. Also, identify any applicable major pricing changes between years. Explanation of price and program changes should be provided separately for the Active Fleet as well as the Reserve Fleet.

Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5 exhibits. Data entered on this exhibit must match the corresponding data entered on the Reserve Components (PBA-11), Appropriation Highlights (PBA-19), Key Activity Indicators (PBA-21), and Special Operations Forces (PBA-26) Exhibits. In addition, the data contained in the O&M Overview should match the data reported in other budget justification material such as the OP-5 (performance criteria), Ship Fuel Data and OPTEMPO Data (OP-40), Ship Operating Cost Data (OP-4), Funding for Depot Level Reparables (OP-31), and Special Operations Forces (OP-52).

Identify on the bottom of the exhibit *the preparation date and* a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

Narrative Explanation of Changes: (Provide a succinct narrative explanation of total resource changes reflected in the budget (for \$ provide in nearest tenths of millions). *Separately identify major transfers among appropriations, budget activities, activity groups, and subactivity groups. Explain changes in price and program from the current estimate (CY) to the BY1 and from FY BY1 to FY BY2 as appropriate. The narrative should agree with the explanation of changes and functional transfers shown in the (OP-5). Data entered on this exhibit must match the corresponding data entered on the Reserve Components (PBA-11), Appropriation Highlights (PBA-19), Key Activity Indicators (PBA-21), and Special Operations Forces (PBA-26) Exhibits. In addition, the data contained in the O&M Overview should match the data reported in other budget justification material such as the performance criteria of the Detail by Budget Activity and Activity Group (OP-5), Analysis of Flying Hour Program (OP-20), Funding for Depot Level Repairables (OP-31), and Special Operations Forces (OP-52). Identify on the bottom of the exhibit the preparation date and a point of contact (with telephone number) who is knowledgeable about the content of the data reflected on the exhibit.*

Operation and Maintenance	SEPARATELY IDENTIFY EACH O&M APPROPRIATION
Total	

Description of Operations Financed: This exhibit will provide manpower, payroll, and cost data directly related to the management headquarters mission. Data will be displayed for all organizations listed in the DoD Directive 5100.73, "Department of Defense Management Headquarters Activities." Additionally, this exhibit will separately identify the manpower and costs data by Combatant and Non-Combatant Management Headquarters Activities. Resources for international military headquarters are not to be reported in this exhibit; these costs are to be reported on the PB-55. A narrative explanation is required for all increases and decreases. Non-labor costs that are not directly related to the management headquarters mission such as pentagon renovation should not be reported in this exhibit. Components should footnote the items that are excluded. Organizations will be displayed according to the following categorization of Management Headquarters Activities.

PROGRAM DATA

Footnotes/Additional Guidance:

1/ Show the total number of ships (at the end of the fiscal year) for this category and the total amount of per diem payments made to the National Defense Sealift Fund (NDSF) or the U.S. Transportation Command. The Defense Logistics Agency (DLA) should report the cost of afloat prepositioned tankers used by the Defense Fuel Supply Center.

2/ Show the number of planned exercises and the total amount budgeted. Do not include JCS funded exercises in the Service submissions. JCS exercises and funding will be reported as Defense-Wide.

3/ Show Service-funded costs not included as part of the per diem payment to the NDSF but which are directly related to the sealift program. This would include enhancements and modifications to on-board systems.

Identify on the bottom of the exhibit *the preparation date* and a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

CHAPTER 4

PROCUREMENT APPROPRIATIONS**0401 GENERAL****040101 Purpose**

This chapter provides instructions applicable to budget formulation and congressional justification for procurement and production activities.

040102 Submission Requirements.

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 4 covers specific back-up material requirements for procurement accounts. The procurement accounts should also submit applicable exhibits required by other chapters in the FMR.

040103 Major Defense Acquisition Programs

Major Defense Acquisition Program (MDAP) Automated Submission. In order to provide consolidated funding information on DoD's major acquisition programs, automated data submissions are required to provide the approved funding level for each MDAP. These programs include all Acquisition Category (ACAT) ID, ACAT IC, and Pre-MDAP designated programs. For joint programs, the lead service/agency is to coordinate the reporting effort, but each Service and Defense Agency involved in the program is responsible for reporting the portion of the program that it funds. In an annual memorandum (usually published in mid-summer), the USD(A&T) will identify the MDAPs required for submission. Specific data format instructions are also included in Section 040502. These are similar to the automated submissions currently required by the Program Objective Memorandum (POM) Preparation Instructions (PPI) for the POM submission. The required automated submissions should be on a 3 1/2 inch floppy, high or double density disks and delivered directly to OUSD(A&T), Room 1E474 (POC: Mr. Steve Dratter, telephone (703) 697-8020). The submission should agree with data submitted to the OUSD(Comptroller) for the FYDP and associated annexes. The final submission must agree with the supporting justification material submitted to the Congress.

040104 Guard and Reserve Procurement

Exhibit P-1R, Procurement Program - Reserve Components. A separate P-1R exhibit showing quantities and costs of procurement items planned for the National Guard and Reserve will be prepared with the budget estimate submission and with the President's budget submission. The P-1R exhibit is a subset of the Exhibit P-1, Procurement Program. The format is contained in Section 040502. Each Service will provide exhibits in spreadsheet format in both a hard copy and on a 3 1/2 inch floppy disk. The information submitted in the budget estimate submission will be reviewed in conjunction with the procurement appropriation reviews. OUSD(C) will consolidate the information into a single P-1R exhibit for the President's budget.

040105 Subsystem Budget Estimates

Any platform that includes funding for subsystems that are designated as Defense Acquisition Executive Summary (DAES) or Selected Acquisition Reporting (SAR) programs must identify the specific subsystem funding by fiscal year and by subsystem on the P-5 exhibits.

040106 References

Chapter 1, Section 0102, provides policies and definitions concerning costs that are to be financed by the procurement appropriations.

0403 BUDGET ESTIMATE SUBMISSION

A. This Section provides guidance for the preparation of material to support the budget estimate submission and President's budget request. Information contained in the budget requests should be unclassified. Where classified information is required in order to explain the program, the classified material will be provided under separate cover and appropriately marked.

B. Each backup book will include an Exhibit P-1, Procurement Program, specific exhibits for those items covered by the backup book, and a listing of acronyms and definitions in the front of each back-up book to preclude spelling the acronyms on each exhibit page.

C. All applicable budget exhibits will be prepared for those programs with a funding value of \$5 million or greater. For programs with a funding value less than \$5 million, only the P-40 and P-40a exhibits are required.

D. All Exhibits P-20, Requirements Study, *can* be submitted in a separate backup book. The P-20 exhibits can also be consolidated by appropriation or as a single back-up book by each Service. If consolidated by Service, however, increase the number of copies provided to OUSD(C) P/B Investment by the number of appropriations included in the backup book.

E. Exhibits will display the actual fiscal years (i.e., PYs, FY 1997, FY 1998, FY 1999, FY 2000, FY 2001, FY 2002, FY 2003, and FY 2004.) rather than the template entries (i.e., PYs, PY, CY, BY1, BY2, BY2+1, BY2+2, BY2+3, and BY2+4).

F. If an amended budget is submitted, identify the revised budget exhibits accordingly.

G. All pages will be annotated with the applicable P-1 line item number and page number within the line item (Item 1-1 of 5, 1-2 of 5, 2-1 of 1, 3-1 of 20, etc.) at the bottom center or bottom right of each exhibit page. Be consistent for all pages of the backup book.

H. The exhibits will be aggregated in the following order for each P-1 line item, as applicable to that line item and submitted in P-1 line item order.

Arrangement of Exhibits - General

P-1	Procurement Program
P-1C	Procurement Program - Comparison Report
P-40	Budget Item Justification
P-40a	Budget Item Just for Aggregated Items
MYP 1-4	Multiyear Procurement Analysis
P-10	Advance Procurement Analysis
P-5	Cost Analysis
P-5a	Procurement History and Planning
P-21	Production Schedule
P-23	Time Phased Requirements Schedule
P-23a	Installations Data
P-36	Depot Level Ship Maintenance Schedule (OPN only)
P-25	Production Support and Industrial Facilities Cost Analysis
P-17	Layaway and/or Distribution
P-18	Initial and Replenishment Spares Requirements
P-32	Procurement Purchases from DWCF
P-45	Summary of Reimbursables
P-20	Requirements Study

Arrangement of Exhibits for Modifications

P-1	Procurement Program
P-1M	Modification Summary
P-40	Budget Item Justification
MYP 1-4	Multiyear Procurement Analysis
P-3a	Individual Modification Program
P-40a	Budget Item Just for Aggregated Items
P-32	Procurement Purchases from DWCF

Arrangement for Ship Procurement Accounts

P-1	Procurement Program
P-1C	Procurement Program - Comparison Report
P-40	Budget Item Justification
MYP 1-4	Multiyear Procurement Analysis
P-10	Advance Procurement Analysis
P-5	Cost Analysis
P-5b	Analysis of Cost Estimate-Basic/Escalation
P-27	Ship Production Schedule
P-8a	Analysis of Ship Cost Estimates - Major Equipment
P-29	Outfitting Costs
P-30	Post Delivery Estimates
P-35	Major Ship Component Fact Sheet
P-45	Summary of Reimbursables
P-32	Procurement Purchases from DWCF

Arrangement for Ammunition Accounts

P-1	Procurement Program
P-1C	Procurement Program - Comparison Report
P-40	Budget Item Justification
P-40a	Budget Item Just for Aggregated Items
P-5	Cost Analysis
P-5a	Procurement History and Planning
P-21	Production Schedule
P-21a	Production Schedule, All types
MYP 1-4	Multiyear Procurement Analysis
P-25	Production Support and Industrial Facilities Cost Analysis
P-17	Layaway and/or Distribution
P-26	Maintenance of Inactive Facilities
P-22	Ammunition Inventory
P-18	Initial and Replenishment Spares Requirements
P-32	Procurement Purchases from DWCF
P-45	Summary of Reimbursables
P-20	Requirements Study

For ammunition "Items Under \$5 Million" P-1 line items, only the P-40 and P-40a, showing both quantity and funding for each item, will be included in the backup book. Even though individual P-21 exhibits are not required for these items, their deliveries should be included in the Exhibit P-21a.

Chemical Agents and Munitions Destruction

The Chemical Agents and Munitions Destruction, Defense appropriation contains multiple types of funds (RDT&E, procurement, and O&M) in separate budget activities. While the RDT&E and O&M efforts may be incrementally funded, the procurement program must comply with the full funding policy. The Army is to provide the justification book in accordance with the following.

Table of Contents
Appropriation Language
Program and Financing
Object Classification
Appropriation Justification
Part I Purpose and Scope
Part II Justification of Funds Required
Part III Program Description and Milestone Chart

Budget Activity 1: Research and Development

Part I Purpose and Scope
Part II Justification of Funds Required
Part III Financial Summary
RDT&E RDT&E Exhibits (See Chapter 5)

Budget Activity 2: Procurement

Part I Purpose and Scope
Part II Justification of Funds Required
Part III Financial Summary
P-40 Budget Item Justification
P-5 Cost Analysis
P-5a Procurement History & Planning

Budget Activity 3: Operation and Maintenance

Part I Purpose and Scope
Part II Justification of Funds Required
Part III Financial Summary
OP-5 (Pt 1) Decision Unit/Budget Activity Summary (See Chapter 3)
OP-5 (Pt 2) Activity Group Detail, Including a Reconciliation of Increases and Decreases (See Chapter 3)
OP-32 Summary of Price and Program Changes (See Chapter 3)

C. Preparation of Material. Formats and examples of the exhibits are contained in Section 0404. Except for the items listed below, instructions are included either on the exhibit or following the exhibit.

1. Repricing Report. One copy of the “Ship Cost Adjustment Report” must be submitted by 1 July. The report must include the following information:

a. A comparison of the previously approved SCA position to the recommended SCA position, by ship type (end cost/subhead) by P-5 category. In addition to individual program adjustments, this comparison should be summarized by total TOA adjustments in each fiscal year.

b. The SCA position by ship type by P-5 category with associated accounting data, i.e., gross obligations and expenditures.

c. A listing of all transfers, both below threshold and those requiring congressional approval (DD 1415s) for the current and expired years.

- d. All adjustments within a cost growth or escalation line by ship program.
 - e. Latest delivery date information and percentage of physical completion of all undelivered ships.
 - f. Amount of required extended obligation authority for the expiring program year by line item and the associated Obligation Work Limiting Date by ship hull.
 - g. A list of all major shore spares and characteristic changes, and associated costs, included in the SCA.
 - h. A report on basic construction costs estimated at completion (EAC) by individual contract for all ships still within the SCN envelope. This report should compare the current contract status to the Navy's SCA projection as well as the contractor's estimate. This report should be submitted on July 1 and quarterly thereafter.
2. A 4-column ship list and Derivation of Cost Growth/Escalation exhibit will be provided with each budget submission.
3. For each ship basic construction award during the current program period, contract award information referred to as the "Stevens Report" must be submitted to OSD at the same time the report is forwarded to Congress.

0404 CONGRESSIONAL JUSTIFICATION/PRESENTATION**040401 Purpose**

This Section presents the backup book organization and the exhibit requirements for submission to Congress. Examples of budget exhibits can be found in Section 040502. See Chapter 1, Section 0104 for specific printing requirements.

040402 Organization of Justification Books

Justification material will be organized into a Committee Staff Procurement Backup Book. Section 010403 provides a detailed distribution schedule for the procurement backup books. A separate congressional committee backup book will be prepared for the President's budget request for each procurement appropriation. These books should be assembled with the following:

Committee Staff Procurement Backup Book
FY 19BY1/BY2 Budget Request
_____Appropriation

Section 1 - Summary Material

Table of Contents

P-1 listing (P-1 Exhibits will be prepared using the OUSD(C) automated system with input from the Services and Defense Agencies)

Section 2 - Budget Appendix Extract Language

Section 3 - Comparison of Program Requirements and Financing. This section will include the following 4 schedules as illustrated in Exhibit PB-32B, Comparison of FY 19CY Program Requirements (Section 0405).

- Comparison of FY 19CY Program Requirements as reflected in FY 19CY Budget with FY 19CY Program Requirements as shown in FY 19BY Budget.
- Comparison of FY 19CY Financing as reflected in FY 19CY Budget with FY 19CY Financing as shown in FY 19BY Budget.
- Comparison of FY 19PY Program Requirements as reflected in FY 19CY Budget with FY 19PY Program Requirements as shown in FY 19BY Budget.
- Comparison of FY 19PY Financing as reflected in FY 19CY Budget with FY 19PY Financing as shown in FY 19BY Budget.

Section 4 - Status of Completion of Prior Year Shipbuilding Program (if applicable). Provide a list of uncompleted ships as of Dec 31, 19PY. The first column should segregate the uncompleted ships by prior years, past years, and current year. The second and subsequent columns should identify the fiscal year in which the ships are to be completed.

Section 5 - P-1 Line Item Detail. Except for specific changes addressed below, these books will contain the budget exhibits as specified in Section 040502, for all procurement line items for which a budget request of \$5 million or greater is reflected in either of the two biennial budget years on the P-1 exhibit. For programs with a funding value less than \$5 million, only the P-40 and P-40a exhibits are required. For current and past year programs, exhibits will be prepared for programs with a dollar value of \$5 million or more in either year. The exhibits will be aggregated in the following order for each P-1 line item, as applicable to that line item and submitted in P-1 line item order.

Arrangement of Exhibits - General

PB-32B	Comparison of FY 19CY Program Requirements
P-1	Procurement Program
P-40	Budget Item Justification

Section 6 - Military Construction. This section will be prepared for military construction projects (DD Form 1391) funded in the procurement appropriations.

040403 Classification

The budget justification material should be unclassified. All classified material should be submitted separately.

040404 Comparison Reports

A. Each Component will provide 3 copies of a computer run that compares the current President's budget submission to the previous President's budget submission and identifies the changes for each Procurement appropriation by P-1 line item and for those items that are aggregated in a P-1 line item (such as "Items Less than \$5.0 Million). The report should also identify appropriation and budget activity totals for each fiscal year for the PY through BY2+4 timeframe. The totals for the appropriation and budget activities should also compare the current President's budget submission to the previous President's budget and provide the applicable changes. The comparison reports should be provided directly to OUSD(C), Director for Investment, Room 4B915, when the Component has finalized the current President's budget submission but no later than when the justification material receives final approval from the OUSD(C) for submission to the Congress. This report will not be included in the justification material provided to the Congress.

0405 PROCUREMENT APPROPRIATION SUBMISSION FORMATS**040501 Purpose.**

A. The formats provided on the following pages reflect guidance presented in previous sections of this chapter.

B. Budget exhibits contained in this section will be prepared for all procurement line items for which a budget request of \$5 million or greater is reflected in either of the two biennial budget years on the P-1 exhibit. For programs with a funding value less than \$5 million, only the P-40 and P-40a exhibits are required.

C. Service-generated and Defense Agency-generated exhibits can be used in lieu of the following exhibits as long as they include all the information required by the following exhibits.

D. All formats will be prepared on 8 1/2 inch by 11 inch paper in landscape format.

E. Except for paragraph C above and unless modified in a submission budget call, these exhibits should be adhered to.

Instructions
Exhibit P-1, Procurement Program
Exhibit P-1C, Procurement Program - Comparison
Exhibit P-1M, Procurement Program - Modification Summary
Exhibit P-1R, Procurement Program - Reserve Components

I. General

A. A summary by budget project/activity will be prepared for each appropriation, showing the amount for each project/activity and the total program for each appropriation. The detail of the consolidated line items in this entry should be available upon request. There should be no consolidation into a "Less than \$5.0 million" line item for any line item requiring specific quantity authorization and for any Code B item.

B. Unless otherwise prescribed for a specific commodity area, only procurement line items with funding of \$5.0 million or more will be listed individually. An item should be separately listed if funding of more than \$5.0 million is included in any past or current year. Items less than \$5.0 million should be consolidated into a single line item entry, "Items less than \$5.0 million," under each budget activity.

C. Advance Procurement. Advance procurement should be debited and credited according to the leadtimes of the advance procurement. For instance, if FY 1996 and FY 1997 advance procurement funds are required for an FY 1998 procurement, the FY 1996 AP funds would be debited in FY 1996, the FY 1997 AP funds would be debited in FY 1997, and the total of the FY 1996 and FY 1997 AP funds would be credited in FY 1998.

Advance Procurement

FY TOA	<u>FY 1996</u>	<u>FY 1997</u>	<u>FY 1998</u>	<u>FY 1999</u>	<u>FY 2000</u>
FY 1996 for FY 1998 (memo)	0.4				
FY 1997 for FY 1998 (memo)		0.4			
FY 1997 for FY 1999 (memo)		0.4			
FY 1998 (memo)			-0.8		
FY 1998 for FY 1999 (memo)			0.4		
FY 1998 for FY 2000 (memo)			0.4		
FY 1999 (memo)				-0.8	
FY 1999 for FY 2000 (memo)				0.4	
FY 1999 for FY 2001 (memo)				0.4	

D. List each aircraft and missile type and model separately, for both new procurement and modifications. Each ship type, Outfitting, Post Delivery, Cost Growth, Escalation, Service Craft, and Landing Craft will be listed as separate line items.

E. Include initial and replenishment spares financed in procurement appropriations in a single line item. Indicate the amounts included for initial and replenishment spares separately as subentries. For this purpose, all spare aircraft engines shall be considered initial spares.

F. All line items will be double spaced.

G. Costs will be expressed in millions of dollars using one decimal place, i.e.:

(\$ in millions)

15.6

(Exhibit P-1, page 4 of 6)

Exhibit P-1 Instructions (Continued)

H. List the following Support Equipment and Facilities as separate line items:

- Common Ground Equipment
- Industrial Facilities
- War Consumables
- Other Production Charges
- Classified Projects
- Production Base Support
- Space Programs (list separately)
- Astronautics

I. Specific instructions.

Appropriation. Include the title and number of the appropriation, i.e., 2034A, Procurement of Ammunition, Army.

Budget Activity. Include the number and title of the budget activity, i.e., Budget Activity 04, Spare and Repair Parts.

Column 1: Include the P-1 line item number.

Column 2: Item Nomenclature. Identify the name of the program.

Column 3: Identification Code. The letter "A" or "B" will be entered in this column. Line items will be appropriately coded according to the status of the item at the time the exhibit is prepared as follows:

Code "A". Line items of material that have been approved for Service use. The term "approved for service use" means that:

Army. The item has been "type-classified as adopted type" (Standard) and excludes Limited Production type that is included in the development category.

Navy. The item has been approved for full rate production.

Air Force. The item has been approved for full rate production.

USSOCOM. The system is effective, suitable, safe, and logistically supportable. Release for Special Operations Forces is in conjunction with Milestone III production decision.

Code "B". Line items or material that have not been approved for Service use.

Columns 4-11: Self-explanatory.

(Exhibit P-1, page 5 of 6)

Exhibit P-1 Instructions (Continued)

Exhibit P-1C, Procurement Program - Comparison Report

In addition to the instructions for the P-1, the P-1C Comparison Report will provide a comparison between the last President's budget request and the budget estimate submission (BES) for the BES and between the last President's budget (PB) request and the current PB request for the PB. The comparison should be performed at the lowest level (by Procurement line item) and should include quantities. The report should also identify appropriation and budget activity totals for each fiscal year for the PY through BY2+4 timeframe. This report will not be included in the justification material provided to the Congress.

Exhibit P-1C, Procurement Program - Comparison Report

Exhibit P-1M, Procurement Program - Modification Summary

This exhibit will be prepared for all years reflected on the sample P-1M exhibit and will represent a summary by weapon system of all individual modifications that are requested for that weapon system.

Show the total procurement cost in millions using at least one decimal place for each individual modification and total cost for that weapon system or family of models of that weapon system. For example, all models of the F-4 aircraft would be included in the F-4 line (e.g. RF-4B, F-4B, F-4E, F-4G, etc., and all models of the AIM-7 missile would be included in the AIM-7 line (e.g. AIM-7E, AIM-7F, AIM-7M, etc.). Total modification cost will include only those costs budgeted in the individual P-1 line item, including installation costs.

Exhibit P-1R, Procurement Program - Reserve Components

In addition to the instructions for the P-1, Procurement Program, the P-1R line item entries will be exactly the same line item entries as the P-1. The Exhibit P-1R line items will include 2 sub-line items. One is for the National Guard and one is for the Reserve. Subtotal of the two lines is not required, but the total for the Reserve Components cannot exceed the amount of funding included in the P-1 line item. All procurement line items having funding for National Guard and Reserve requirements, including advance procurement, ammunition, and spares and repair parts, will be included in the P-1R exhibit.

P-1 Shopping List - Item No 20-4 of 4

Exhibit P-3a, Individual Modification
(Exhibit P-3a, page 2 of 4)

Instructions - Exhibit P-3a, Individual Modification

This exhibit will be submitted for all individual modification programs whose costs are greater than \$5.0 million in budget year 1 or budget year 2. Because congressional approval must be obtained for new start programs costing more than \$10 million, a P-3a must be submitted for specific approval even though individual yearly costs are less than \$5 million if the total cost of the modification is \$10.0 million or more. Use as many pages as necessary.

For Other Procurement appropriations, when only a simple modification kit is being procured and installation is being performed at the organizational level, there is no need to submit an Exhibit P-3a as long as the P-5 and P-21 include the necessary information.

The sample exhibit displays additional line items for equipment and group A installation kits. Tailor line item entries to the modification content. Use additional lines when quantities for these components differ from the quantity of end items being procured or when a unit cost comparison between years cannot be performed.

Model. Enter the model and series designation (i.e. A-10, AGM-86, F/A-18, etc.).

Classification. Enter the modification classification or type, i.e., safety, reliability, added capability, etc., as applicable.

Modification No. And Title: Identify the modification number and title.

Description/Justification: Provide a description of what additional capability is added to the system by this modification, and why the modification is necessary (i.e., to increase reliability, maintainability, or mission capability). If the modification is related to reliability and maintainability, indicate the current Mean-Time Between Failure (MTBF) rate of the system, what MTBF will be specified in the development/production contract, and the estimated annual savings. *Identify all engineering change proposals included in the modification and provide a brief description of each and how they relate to the particular overall effort. Identify the operational requirement document (ORD) that validates the modification. Identify the quantity of aircraft in the inventory and the quantity that will receive the modification, as identified in the ORD. For example, the total objective for a radar modification might be 75 units at an estimated unit cost of \$300,000 each or total cost of \$23.5 million. Twenty units have been procured in prior years, 10 units are included in the budget year leaving 45 units to be procured in subsequent years. Identify when a different number of Group A and Group B kits are being procured (the ORD should also include this information). Identify the applicable quantity of National Guard and Reserve end items. Do not use abbreviations or acronyms of a highly technical nature. Spell the acronyms the first time and abbreviate thereafter.*

Development Status/Major Development Milestones: Provide status of engineering effort testing and data package availability as of the budget submission date. Provide significant accomplished and planned milestone dates such as Preliminary Design Review (PDR), Critical Design Review (CDR), completion of Contractor Test and Evaluation (CTE), completion of Development Test and Evaluation (DTE), completion of Initial Operational Test and Evaluation (IOT&E), etc.

Financial Plan:

Note: Prior year column includes all funding from beginning of program through the Past Year -2 (PY-2). Quantities and costs should be provided for all applicable line items. PY-1, PY, and CY are the fiscal years currently available for obligation.

(Exhibit P-3a, page 3 of 4)

Exhibit P-3a Instructions (Continued)

RDT&E: Enter programmed RDT&E resources by fiscal year. These resources should be consistent with the Program Element Summary Data Sheets for RDT&E programs.

Procurement: *Categories of cost shall be tailored to the individual system consistent with the program's approved work breakdown structure (WBS) elements or modification content. Sample categories are shown on the draft exhibit. Use as many line items as necessary to show this data. Enter the recurring and nonrecurring cost of the installation kits. Installation kits (Group A kits) are the provisions (cables, brackets, interface devices) necessary to prepare the system to accept the new equipment. Enter the recurring and nonrecurring cost of the equipment (Group B kits) to be installed (radar, ECM, engine etc.). If different quantities of kits are being procured for various engineering change proposals within a modification (or operational system improvement program), list the ECP A kit and ECP B kit as separate line item entries (i.e., a line item for the A kit and a line item for the B kit). Do not use an asterisk to indicate that the quantity cannot be shown because a mix of end items with different procurement quantities is being procured. This precludes the need for an addendum and presents all cost information together. Exhibits should reflect all costs and quantities from prior year (PY) through to complete (TC) because modifications procure a finite quantity.*

Installation. The installation costs should be portrayed in the year of actual installation so that the total cost of the installation is portrayed for each year's procurement of end items. Procurement quantities and installation quantities reflected in the procurement detail should equal the quantity displayed in the installation schedule.

Method Of Implementation: Indicate how installation will be accomplished (Contractor, Depot field team, Depot modification line, etc.).

Contract Date: Enter the actual/estimated contract date (month/year, not quarter) for the item with the longest leadtime.

Production Delivery Date: Enter the actual/estimated production delivery dates (month/year, not quarter) for the initial item of installed equipment for the current year, budget year 1 (BY1), and BY2.

Installation Schedule: For all years of the program, show system inductions and modification completions by quarter. An installation schedule is required for all programs requiring installation funds, i.e., if the modification is being installed organically and no installation funds are required, then no schedule is required. The schedule will include completed inductions for total prior years, as well as planned inductions for all uninstalled equipment for CY, BY1, BY2, BY2+1, BY2+2, BY2+3, and BY2+4, To Complete and Total Program. Input and output must equal each other, as well as equal the total quantity of kits procured. Input and output refer to the start and end date of the modification into the aircraft (or end item). This information is required to determine when kits need to be procured. The input and output date is used as a barometer to determine the feasibility of the schedule (and thus, the procurement profile). For ongoing programs, identify the separate program using alpha or alpha-numeric suffixes to the current modification number. Include separate installation schedules for those items that have more than one method of implementation.

The P-3a should be readable after reproducing in a reduction mode. Use more than one page when necessary.

Delete all references and funding for those ECPs that were completed in prior years and for which no current or future year funding is required.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

P-1 Shopping List - Item No 20-6 of 10

Exhibit P-5, Cost Analysis
(Exhibit P-5, page 2 of 8)

Instructions - Exhibit P-5, Cost Analysis

Purpose. The purpose of this exhibit is to provide detailed cost information in support of Exhibit P-1 line items consistent with the appropriate work breakdown structure (WBS) elements for the program. It is essential that this exhibit be complete and accurate, as it is the most important exhibit in the backup book. Requirement exhibits and production schedules are related to the entries on this exhibit and it is used as the framework for line item review. The budget estimate submission will include P-5 exhibits containing information for all fiscal years (FYs) from prior years (PYs) through to complete years for all major (Acquisition Category (ACAT) 1) programs and through BY2 (as a minimum) for all other programs. The President's budget request backup justification books will include P-5 exhibits containing information for the FYs through BY2 for all programs including ACAT 1 programs. However, a P-5 exhibit (or an AF Form 1537) containing information for all FYs from PYs through to complete years for all ACAT 1 programs will be provided separately to OUSD(C) P/B, Room 4B915.

General. This exhibit will be prepared for all procurement programs for which funding is requested in the P-1. If two or more Services procure the same system, the P-5 exhibit cost elements should be as identical as possible except for Service unique requirements. *A P-5 is not required for those programs that use a P-40a to display items included in an aggregated line item or if an Exhibit P-3a Modification Summary, has been prepared for a line item.* If two or more Services procure the same system, the P-5 exhibit cost elements should be as identical as possible except for Service-unique requirements.

Entries:

Heading. Insert Appropriation, Budget Activity, and identification code (as identified on the P-1) in the appropriate block. Insert the Exhibit P-1 line item title and add after the title the subhead number for the line item in parenthesis.

Elements of Cost. Categories of cost shall be tailored to the individual system consistent with the program's approved work breakdown structure (WBS) elements. Standard categories are to be used for similar type systems; i.e. aircraft, ships, missiles, tanks, satellites, ammunition, etc.

Production support services. Use generic entries such as Production Engineering, Engineering Services, Quality Assurance, Acceptance Testing, Product Improvement, etc. Include the name of the performing activity (for example, Production Support - NOP Indian Head, or Material Handling - Iowa AAP) only when needed to further clarify the generic categories.

Quantity/Total Cost entries. The quantity related to any cost element will be stated in units (not thousands). Only those entries where quantitative measurement is applicable should have entries in the quantity column. For example, the term "1 set" should not be used for publications, entries, documentation, etc. If the item is not subject to quantitative measurement, leave the column blank. The total cost for a cost element entry will be shown in millions, using 3 decimal places, i.e., 1.225. Cost columns will be totaled.

Advance Procurement Funding. Add (debit) the advance procurement funding in each fiscal year and subtract the advance procurement funding (credit) from the fiscal year the advance procurement supports. Ensure the credit is against the correct fiscal year (check leadtimes). Generally, Advance Procurement debits and credits will net to zero in the "total costs" column.

Initial Spares. Add initial spares funding to the net weapon system/end item cost.

Unit Cost. *The unit cost should be displayed for each flyaway cost element on the P-5. This should be a manual entry, not computed. Otherwise, there could be lost budget authority if a reviewer (OSD, GAO, or congressional staff) asks to see the unit cost for a particular item from the contract. The last entry line, or overall weapon system unit cost, for each FY is the procurement unit cost.*

(Exhibit P-5, page 3 of 8)

Exhibit P-5 Instructions (Continued)

Aircraft Cost Element Categories.

Airframes/Contractor Furnished Equipment (CFE): Enter estimate for recurring airframe cost, airframe contractor furnished equipment, and engineering changes.

Engine/Accessories: Enter total engine cost including accessories. As part of stub entry, enter quantity of engines per aircraft and indicate model designation including all “dash” designators (example: Engines (4) 53-L-13). Engine unit cost column will reflect the cost of one engine.

Avionics: Separately identify CFE and GFE avionics equipment.

Armament: Enter costs for all armament.

Software: Software costs are to be separately identified.

Other Government Furnished Equipment (GFE): Enter costs for all Other GFE.

Engineering Change Orders (ECOs) - Flyaway: Include cost of anticipated, but unknown ECOs and value engineering changes for all installed aircraft components (CFE or GFE). ECOs should be funded commensurate with the level of risk in the program.

Nonrecurring Costs: Enter total nonrecurring costs associated with production of the flyaway article. Identify and separately display funds budgeted for production tooling in the nonrecurring cost category.

Other Costs: Use as many line items as necessary to identify elements and associated costs.

Airframe Peculiar Ground Support Equipment (PGSE): Enter cost of peculiar airframe ground support equipment.

Engine PGSE: Enter cost of peculiar engine ground support equipment.

Peculiar Training Equipment: Enter cost of all peculiar training equipment.

Publications/Technical Data: Enter cost of all CFE/GFE publications and technical data.

ECOs - All Support Items. Enter cost of ECOs anticipated but unknown for all support and training equipment.

Other: Use as many line items as necessary (example: aerial cameras, or jammer transmitter sets, receiver sets or sensor sets for special mission aircraft). These items are not necessarily procured on a one-for-one basis with aircraft.

Missile Cost Analysis

A missile P-5 exhibit will be submitted by all Services for each missile/drone type and model. If more than one model or configuration is procured in the same P-1 line item, then individual P-5 exhibits will be prepared for each model or configuration and a summary P-5 exhibit will also be prepared for the P-1 line item. Weapon systems that are composed of fire units or launchers that are procured in the same P-1 line item as the missile will provide

(Exhibit P-5, page 4 of 8)

Exhibit P-5 Instructions (Continued)

separate cost identification for each vehicle of the fire unit or launching system (launcher, launch control center, radar set, vehicle, etc.). The cost categories on the P-5 exhibit represent a number of elements and the list should be tailored as appropriate to adequately depict the missile system cost. The flexibility exists to revise the elements to depict unique system characteristics, but a comparable cost detail to that shown in the P-5 exhibit format should be maintained.

Missile P-5 Cost Element Categories

Missile Hardware - Recurring

- Airframe
- Propulsion (By stage, where applicable)
- Target Detection Device
- Guidance & Control
- Warhead
- Fuze
- Safe & Arm
- Engineering Change Orders
(Value Engineering)
- Government Costs
 - Integration & Assembly (Labs, etc.)
 - Acceptance Test Program
- Other (Specify)
- Subtotal Missile Hardware

Nonrecurring and Ancillary Equipment

- Tooling and Test Equipment
- Missile Ancillary Hardware
(Containers, etc.)
- Total Missile Flyaway

Command and Launch Hardware

- Launcher
- Launch Control Center
- Radar Set
- Platform/Track Vehicle
- Engineering Change Orders
- Other (Specify)
- Subtotal Command and Launch Equipment

Support Costs

- Peculiar Support Equipment (Specify, e.g., test, handling, etc.)
- Special Handling Equipment
- Training Equipment
- Publications/Technical Data
- Engineering Change Orders
- Other (Specify)
- Subtotal Support

(Exhibit P-5, page 5 of 8)

Exhibit P-5 Instructions (Continued)

Missile P-5 Cost Element Categories (Continued)

Gross P-1 End Cost
Less: Prior Year Adv. Procurement (Breakout by Prior FY of funding)
Net P-1 Full Funding Cost (Must equal FY amount displayed on the P-40 exhibit)
Plus Current Year Advance Procurement.
Other Non-P-1 Weapon System Costs
Initial Spares

Ship Cost Element Categories

Include the following format for every year from construction inception for which there are undelivered ships through the end of the FYDP:

Plan Costs
Basic Construction/Conversion
Change Orders
Electronics
Propulsion Equipment
HM&E
Other Cost
Ordnance
Escalation
Project Manager's Growth
Total Ship Estimate
Less: Advance Procurement FY (specify by individual fiscal year)
Net P-1 Line Item
Ship/Unit Cost

Space System Cost Analysis.

A P-5 exhibit is required for each space weapon system employing a launch vehicle or satellite.

Satellite Cost Element Categories

Launch Vehicle:

Airframe/Integ & Assembly
Stage I
Stage II
Stage III
Stage IV
Guidance and Control
Other (specify)
Nonrecurring (specify)

Stage Vehicle:

Airframe/Integ & Assembly
Propulsion
Guidance and Control
Other (specify)
Nonrecurring (specify)

(Exhibit P-5, page 6 of 8)

Exhibit P-5 Instructions (Continued)

Satellite Cost Element Categories (Continued)

Space Vehicle:

- Integration & Assembly
- Spacecraft
- Payload
- Reentry Vehicle
- Other (specify)
- Nonrecurring (specify)

Satellite P-5 Cost Element Categories (continued)

- Engineering Change Orders (ECO)
- In-House Production Support
- Total Flyaway Cost

Ground Support Equipment:

- Support Equipment
- Installation and Checkout
- Nonrecurring (specify)
- Engineering Change Orders
- Other (specify)
- Total Ground Support Equipment

Support:

- Training
- Publications/Tech. Data
- Operational/Site Activation
- Computer Software
- Other (specify)
- Total Support

- Total Systems Cost
- Less Advance Procurement, Prior Year
- Net P-1 Line Item Cost

Other Procurement Cost Analysis.

A. Unique entries will vary depending on the nature of the procurement item. Most line items require more than one procurement action to complete the program. If only one contract is involved, the line item is composed of several separate cost elements such as the end item itself, publications, engineering services, production support, etc. Each of these elements (called "building blocks" for simplicity) carries its own dollar value. The sum of the building block values equals the line item value. In general, entries on this form should be structured in the same way that procurement has been accomplished (or is planned) and/or the way that the cost estimate for the line item was derived. For new programs, it is not always possible to predict exactly how procurement will be accomplished but the cost estimate for the line item is built up through price out of separate cost elements that are known to be required.

B. Care should be taken to ensure that the building block title accurately describes the effort. Frequently, attempts are made to use the same building block entry for more than one year when the program effort in the following year is not exactly the same. For example, Model A of particular equipment is procured in one year and an improved Model B version planned for the following year. Separate stub entries should be used to avoid comparisons of unlike items.

(Exhibit P-5, page 7 of 8)

Exhibit P-5 Instructions (Continued)

Ammunition Procurement Cost Analysis.

A. For items to be procured through the Single Manager for Conventional Ammunition (SMCA), the P-5 will be used to display the program cost breakdown. The Service is responsible for justifying and defending its budget request for ammunition even if the item has transitioned to the SMCA for procurement. The production support section should depict the cost of production support materials and services that are included in the P-1 line item. When the developing Service retains configuration management responsibility for a SMCA-procured item, the developing Service will formulate the production engineering cost estimate, but all other estimates will be formulated by the SMCA.

B. *The Army's P-Form exhibit formats included in the Army's Program Budget Documentor (PBD OC) will be utilized for all Services' ammunition procurements for items procured through the SMCA.*

C. *Quantities will be displayed in each unless the item is being procured in millions (the quantities will then be displayed in thousands). Dollars will be displayed in millions, using 3 decimal places, i.e., 1.225. Normal rounding methodology will be utilized.*

D. *The hardware section should include the full cost of hardware incorporated into the round or item that is included in the P-1 item line. The hardware section entries should be tailored to match the major components of the ammunition item and should reflect the acquisition strategy. If two or more services procure the same ammunition/ordnance round, the P5 exhibit should be as identical as possible except for Service-unique requirements. If the round is to be procured using a component breakout strategy, the entries should include, as applicable, the following: load-assemble-pack, major metal parts, fuzes, explosives, propellants and shipping containers. Any small-dollar value components that are non-significant/non-problem can be rolled up into an Other, Miscellaneous line (the dollar amount of this line will not exceed 20 percent of the program value). Where an all-up round is to be delivered under a systems contract, the cost of the all-up round may be displayed as a single entry.*

E. *The production support section should depict the cost of production support materials and services that are included in the P-1 line item. The following standard entries should be used as applicable: production engineering, quality assurance, proof and acceptance testing, interim transportation and industrial stock support. Any other categories (i.e., special testing) should be added as required and identified accordingly. When configuration management responsibility is retained by the Navy or Air Force as developing Service, the production engineering cost estimate will be formulated by the developing Service, but all other estimates will be formulated by the SMCA.*

F. *The nonrecurring cost section should depict the cost of such items as first article testing, product improvement, value engineering, tooling and test equipment, procurement technical data package updates, start-up/layaway costs and/or other special requirements identified accordingly. In the event that applying government-furnished material or components can reduce the cost of the round, the negative entry will be shown in this section.*

G. *Each section's subtotal should be displayed at the end of the subentries listing.*

H. *The total P-1 line item is equal to the sum of subtotal cost of hardware, procurement support and nonrecurring less the GFM applications. This entry must agree with the P-1 value for the ammunition item.*

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

P-1 Shopping List - Item No 20-8 of 10

Exhibit P-5a, Procurement History and Planning
(Exhibit P-5a, page 2 of 4)

Instructions - Exhibit P-5a, Procurement History & Planning

1. Purpose. This exhibit provides detailed information on the P-5 entries regarding all prior years having contracts with undelivered assets, current year (CY), budget year 1 (BY1), and BY2. Contract information is used to compare cost estimates between fiscal years by comparing unit costs on previous contracts. For example, if an item was awarded in FY 1997 using FY 1995 funding, is the FY 1998 cost based on an FY 1995 cost inflated 3 years, or to an FY 1997 cost inflated one year? The contract information is used to determine if there has been a problem awarding the contract early or late in the fiscal year and if it occurred as planned. The contract information also is used to identify potential current year assets and to answer congressional inquiries.
2. Submission. Exhibit P-5a will be submitted for all P-5 elements of cost (building block) entries involving quantities in the current or budget years. Information for past years, CYs, and BYs will be updated for each succeeding submission.
3. Entries.

Cost Elements (Building Blocks)/Fiscal Year. The cost element/building block title is to be taken from the Exhibit P-5 Cost Analysis for items meeting the criteria of paragraph 2 above. For each cost element, provide information for the PY, CY, BY1 and BY2. The first fiscal year line will provide information on the last buy prior to the current year (if the item was procured in a fiscal year that is no longer available for obligation, identify the fiscal year for which the item was last procured. Update current and prior years entries to show actual contractor and contract award dates. For the budget years, use best estimates.

If Advance Procurement funding is part of the program, then provide contract data for each subsequent year to support the leadtime of the advance procurement. For example, if advance procurement is required 2 years in advance of BY2, then provide contract data through BY2+2.

Quantity and Unit Cost. Insert actual quantity procured and actual unit cost for last actual line entry. For the CY, BY1 and BY2 lines, insert actual or estimated unit costs. The quantities and unit costs should agree with entries on the Exhibit P-5 Cost Analysis exhibit, except for the ammunition items that are fixed standard priced. For these ammunition items, the entries should be the actual unit costs that were negotiated and/or estimated. This update is necessary for the initial starting point for computing future fixed standard prices. Provide an explanation in the remarks block for all items for which the actual unit costs vary significantly with the forecasted unit costs.

Procurement Contracting Office (PCO) Location. Identify the organization that will award the contract. Also identify the organization preparing the purchase request, if different.

Contractor. For each fiscal year, insert actual contractor name, and facility or plant location (city and state). For the current year, insert contractor name if item is to be sole source or if procurement has been accomplished; otherwise insert "Unknown". For budget year(s), insert contractor name if sole source; otherwise use "Unknown". Identify the city/state location of the contractor plant.

(Exhibit P-5a, page 3 of 4)

Exhibit P-5a Instructions (Continued)

Contract Method/Type. The following codes will be used to identify the "Contract Method/Type":

Contract Method

SS	-	Sole Source
C	-	Competitive
MIPR	-	Military Interdepartmental Purchase Request (use only if MIPR obligates funding)
PO	-	Project Order
WR	-	Work Request
Allot	-	Allotment
Reqn	-	Requisition
Other	-	Explain by footnote

Contract Type

FP	-	Fixed Price
CPIF	-	Cost Plus Incentive Fee
CPAF	-	Cost Plus Award Fee
FPI	-	Fixed Price Incentive
Option	-	Option to prior year contract
Other	-	Explain by footnote

Follow the pattern of the "Contractor" block in displaying actual and estimated contract method and type. "Option" refers to an existing contract that contains an option clause for future procurement. Identify whether the option is priced (already negotiated) or unpriced.

Award Date. For the last actual buy, provide the date that the contract was awarded. For the current year, provide the actual or estimated date. Provide estimated contract award dates for BY1 and BY2. If the contract is a multiyear contract or a contract with options, identify the date that the option will be exercised.

Date of First Delivery. Same basis as Award Date.

Technical Data Package Available Now. Answer "yes" or "no" for the current year and budget years. No entry is required for prior year or BY2. The answer is to be provided as of the time the exhibit is prepared. The term "specifications" refers to full competitive specifications (or their equivalent in the case of a sole source contract).

Date Revisions Available. No entry is required for the prior year line if the contract has been awarded. If revisions are required, provide in last column the date or estimated date when they will be available.

Use Footnotes to provide reasons for Sole Source procurement; to provide reasons for use of letter contracts; to provide reasons why a multiyear contract cannot be used; to explain significant variations in unit cost from year to year, etc.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

P-1 Shopping List Item No 20-7 of 10

Exhibit P-10, Advance Procurement Funding
(Exhibit P-10, page 5 of 8)

Instructions - Exhibit P-10, Advance Procurement Requirements Analysis

This Exhibit should be submitted for each BY1 and BY2 in which Advance Procurement funds are being requested. The exhibit contains 5 pages. Only pages 1 and 2 need to be submitted in the congressional procurement backup books.

Page 1 - Budget Justification entries.

This format will include funding for all years of the program.

Appropriation (Treasury) Code/CC/BA/BSA/Item Control Number. This entry should match the procurement annex.

P-1 Line Item Nomenclature: Self explanatory.

Weapon System Type: End item for which advance procurement is required.

First System Award and Completion Date: Enter the month/year (do not use quarters) of the projected contract award for the end item for which the funds in the budget years support. For example: FY 1998 advance procurement funds are required in support of an FY 1999 procurement. The FY 1998 AP supporting the FY 1999 end item procurement will be awarded in March 1998 and the FY 1999 procurement will be awarded in January 1999. Enter March 1998. If the manufacturing processes require 24 months, then the item will be delivered in March 2000. Enter March 2000.

Interval Between Systems: Enter the time between end item deliveries.

Column 1. The first entry should be the procurement quantity budgeted for each year (use the actual fiscal year rather than template years) for the end item for which the advance procurement is requested. In addition, list the items that are required to be purchased ahead of the end item. Be specific as possible. Some examples are:

Contractor Furnished Equipment (CFE): This entry includes all advance procurement funding associated with effort accomplished by the prime weapon system contractor. (e.g. airframe contractor for aircraft; guidance and control contractor for missiles, satellites; chassis contractor for tanks, engines, nuclear propulsion equipment for ships, etc.)

Government Furnished Equipment (GFE): This entry should include a separate entry for each major subcomponent furnished by the government (e.g. engines and radars for ships and aircraft; warhead, fuzes, and rocket motors for missiles; engines and major electronic subsystems for tanks, satellites, etc.).

Economic Order Quantity (EOQ): This entry includes items for which an economic order is justified. List each item separately. The entry will require additional justification showing the analysis that supports an EOQ procurement in an advance procurement line.

Other Advance Funding. This would normally include non-EOQ funding that is requested in advance of authorization of the end item and is not based on leadtime considerations but based on price/cost considerations only.

Column 2. Production Leadtime (PLT). Enter the number of months required to manufacture the end item.

Column 3. Enter the number of months after the manufacturing process begins that the item is required for incorporation into the end item.

Columns 4-15. Enter the approved funding for all years of the program.

(Exhibit P-10, page 6 of 8)

Instructions-Exhibit P-10, Advance Procurement Requirements Analysis (Continued)

Page 2 Entries:

Column 1. List the items that need to be purchased ahead of the end item. This column should match the entries in column 1 on page 1.

Column 2. Production Leadtime (PLT): Enter the production leadtime of this particular item.

Column 3. Quantity Per Assembly (QPA): Indicate the quantity of the item required for each end item.

Column 4. Unit Cost: Enter the unit cost in tenths of millions.

Column 5. BY1 Qty: Enter the total quantity being procured in BY1. For the end item enter the quantity of end items being procured in BY2 (or subsequent years and identify by qty and year) for which the advance procurement in BY1 supports.

Column 6. BY1 Contract Forecast Date: Enter the date of the planned contract award for each of the items listed in column 1. For the end item enter the date of planned contract award of the end items being procured in BY2 (or subsequent years) for which the advance procurement in BY1 supports.

Column 7. Cost: Enter the cost in millions with one decimal place.

Columns 8-10. Repeat the entries above for BY2.

Description. Describe the technique used to estimate the termination liability request. If advance procurement funding is to be applied to years beyond the immediately succeeding year, the amounts and quantities by year should be specified and explained.

Page 3 Entries:

This page will provide a comparison of the advance procurement request to the cost of the program without advance procurement.

Page 4 Entries:

This page will provide a comparison of the request and actual program execution. If actual data is not available for the following items then provide the contract date or latest program manager's (PM) estimate and indicate with a footnote whether the data represents an actual date, a contract date or a PM projection.

Column 1. List the items that need to be purchased ahead of the end item. Include all items in the previous President's budget request and any items procured subsequently.

Column 2. Production Leadtime (PLT): Enter the production leadtime of this particular item. This column should match the entries in column 2 on page 2.

Column 3. PY-1 Quantity: Enter the quantity budgeted for the past year-1.

Column 4. PY-1 Contract Forecast Date: Enter the date of the planned contract award that was included in the previous President's budget request for the past year-1.

Column 5. PY-1 Actual Contract Date: Enter the date that the contract was actually awarded. Explain any differences in the Narrative for the past year-1.

Column 6. PY-1 Total Cost Request: Enter the cost estimated for this particular item that was included in the previous President's budget request for the past year-1.

Columns 7-14. Include the same type of information for the past year and current year as explained in columns 3-6.

(Exhibit P-10, page 7 of 8)

Instructions-Exhibit P-10, Advance Procurement Requirements Analysis (Continued)

Column 15. BY1 Quantity. Identify the quantity to be procured in BY1.

Column 16. BY1 Contract Forecast Date. Identify when the contract will be awarded for BY1.

Narrative. Provide explanations for differences between requested leadtimes and actual leadtimes, requested contract award dates and actual contract award dates and requested cost and actual contract cost. Include any items that were not identified in the previous President's budget request and provide an explanation for the change. Also, address why items were not procured if funding was requested for any items in the previous President's budget request. If advance procurement funding is to be applied to years beyond the immediately succeeding program year, the amounts by year should be specified on the applicable FY BY exhibit and addressed.

Page 5 Entries

Provide the termination liability schedule from the contractor. If one is not available, then explain how the requirement for advance procurement was determined. Provide actual expenditures by month for the amount of advance procurement funding including termination liability. Use additional columns as required to complete the period of execution performance for the advance procurement funding (i.e. until program is 100% executed).

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

Exhibit P-17, Layaway and/or Distribution
(Exhibit P-17, page 1 of 2)

Instructions - Exhibit P-17, Layaway and/or Distribution

1. The purpose of this exhibit is to provide the funding requirements for layaway and distribution projects at government-owned, government-operated (GOGO) facilities, at government-owned, contractor-operated (GOCO) facilities, and contractor-owned, contractor-operated (COCO) facilities.
2. For each project, provide information as to the type of action, i.e., in place, on site, central storage, complete layaway or increment, state of readiness, future cost, estimated completion date, background, and work to be accomplished. If reactivated, is the facility or line scheduled to produce new items? If so, list the items.
3. Group projects under each appropriate subclassification, such as facility expansion, machine tool replacement, etc.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

Exhibit P-18, Initial and Replenishment Spares and Repair Parts Justification

(Exhibit P-18, page 1 of 2)

Instructions - Exhibit P-18, Initial/Replenishment Spares Requirements

The purpose of this exhibit is to provide the funding requirements for the procurement of initial and replenishment spares and repair parts in support of end items of equipment and in support of modifications to existing end items of equipment where end items of equipment are being supported by procurement appropriations. A copy of this exhibit will be included in the budget justification book for the end item.

Entries:

Column 1. Enter the budget Exhibit P 1 line item and end items of equipment for which the initial spares and repair parts are required.

Columns 3 through 13. Enter the total cost of the initial or replenishment spares and repair parts for each fiscal year displayed in support of the end items procured. Funding must be consistent with the P-1 and P-40 exhibits.

If some of the initial spares and repair parts are to be financed by the DWCF or for buy-out by a procurement appropriation, provide a memorandum entry to indicate the DWCF-financed portion or footnote accordingly.

Include the following information in the remarks block.

Procurement Requirement:

- Funded Initial Spares.
- Funded Replenishment Spares.
- Funded Mobilization (War Reserve) Spares.
- Total Funded.
- Repair Turnaround time.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

P-1 Shopping List Item No 10-10 of 10

Exhibit P-20, Requirements Study
(Exhibit P-20, page 1 of 3)

Instructions - Exhibit P-20, Requirements Study

1. Purpose. The purpose of this form is to provide detailed information with regard to the determination of asset availability and requirements.

2. Submission. *The P-20 is required only for the budget estimate submission. A P-20 will be prepared and reviewed by the Services and Defense Agencies for all items being procured, even if the item is included in an aggregated P-1 line item, such as "Items Less Than \$5 million." Submittal of the P-20 is required for only those items costing \$5.0 million or more in budget year 1 or budget year 2. For aircraft and missile modifications, a P-20 is not required as long as the Exhibit P-3a description includes the inventory objective contained in the validated operational requirements document (ORD). Vehicle P-20 exhibits can be modified to accommodate the numerous vehicle types.*

3. Entries.

Leadtimes: Administrative leadtime is the amount of time after October 1 that is required to award a contract. Procurement leadtime is the amount of time from contract award until delivery of the first unit.

Quantity Budgeted. Show the quantities, unit cost, and funding approved for this program.

Asset Dynamics. This section will reflect the changing asset position starting with the assets on hand and adjusting for gains and losses. Tailor the entries to the program being represented.

Beginning Asset Position. Use the inventory position as of the end of the past fiscal year, or specify other date. As a memo entry in the remarks section, identify assets that are not in a serviceable condition.

Deliveries from all prior year funding and deliveries from CY, BY1 and BY2 funding. Enter the quantity funded during all prior years that are not yet delivered. Show the deliveries or other gains in the fiscal year in which they will be received. The analyst can then compare these entries to the P-21 Production Schedule (deliveries and leadtimes).

Deliveries from subsequent years' funding. Enter the quantity in the appropriate fiscal year. The due-ins should match the P-21 Production Schedule and be reflective of the procurement leadtimes and planned delivery schedules to be included on the contract.

Other Gains. Quantity due in for loans to other Services, other receipts, etc.

Usage. Identify projected annual usage, disposals, retirements, etc. that are projected for each fiscal year. There should be some correlation of the projected usage to actual expenditures. For aircraft, usage equates to attrition, retirement, FMS sales, etc. For vehicles, usage equates to disposals (quantity of vehicles scheduled for disposal through sale, salvage or transfer to another agency).

End of Year Asset Position. Add the gains and subtract the losses from the beginning of the year asset position.

Inventory Objective (IO). Identify the elements of the IO and the Approved Acquisition Objective, as applicable and approved through the Program Objective Memorandum process. For missiles, munitions, and munitions-related items, use the capabilities based munitions requirements process. Annotate in the Remarks block if the IO is different for any of the FYDP years. Cite the document and the date of the document that established the IO.

Actual Expenditures (for ammunition items). Identify actual expenditures for training and other than training for at least three years. For example, for the FY 1998 submission, FY 1997 will be the current year but no usage will have occurred. FY 1996 would be the past year but data will probably not be available for the entire fiscal year prior to the submission. Therefore, show actual usage for FY 1996 through June 30, 1996 and the usage for 3 fiscal years (FY 1995 (past year minus one, PY-1), FY 1994 (past year minus two, PY-2), and FY 1993 (past year minus three, PY-3)).

(Exhibit P-20, page 2 of 3)

Exhibit P-20 Instructions (Continued)

Authorized Allowances. Enter the authorized Vehicle allowances for units, installations, and activities supported by the appropriations of the service preparing the form. Replacement requirements will be excluded.

Vehicles Eligible for Replacement: Enter the quantity of vehicles eligible for replacement during the budget year(s) funded leadtime based upon the age, repair limits and mileage criteria of DoD 4500.36-R.

Vehicle Augmentation. Enter the quantity that represents an augmentation to the inventory. On a separate sheet, list the organizational units and quantities for each unit involved in the augmentation and include a full justification for the augmentation.

Aircraft. Include memo entries for each configuration of aircraft. Identify the acquisition objective by The Joint Staff (TJS) inventory category for each FY. Explain the basis for the approved acquisition objective and identify the applicable requirements document and approval authority (i.e. TJS/Service) that provides the basis for the approved acquisition objective number

Also each Service should submit documentation, by aircraft type, that provides the average age and average hours projected for the aircraft and the current age and hours. This documentation is required for all aircraft being procured and modified, as well as for the aircraft that are being replaced. Identify Active, National Guard and Reserve aircraft. Each Service can submit this documentation in formats currently used by each Service, as long as the above information is incorporated.

Entries should include: (1) total overall aircraft inventory; (2) active aircraft inventory, including primary aircraft inventory (with appropriate subcategories for mission aircraft, training aircraft, dedicated test aircraft, etc.), backup aircraft inventory, and attrition/reconstitution reserve; (3) inactive aircraft inventory, including bailments, drones, foreign military sales or other transfers, leases, loans, maintenance training, reclamation, and storage; and (4) the Joint Staff approved inventory requirements.

Not Installed Nonconsumables. Tailor the asset position to elements that pertain to this category. Include a brief explanation in the remarks block to explain why the entire quantity to meet the IO is not being procured. Include memo entries for the entire program inventory objective. Where applicable, the IO will be supported by showing the number of units or activities, by type and quantity required per unit or activity. Example:

	<u>Required</u>
20 Units	40
30 Activities	60
Spares	10
Total IO	110

REMARKS: Identify any items that can be substituted and explain why substitutes cannot be used to satisfy the IO, why expenditures do not represent an accurate portrayal of usage, and any other anomalies.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

P-1 Shopping List - Item No 25-5 of 6

Exhibit P-21, Production Schedule
(Exhibit P-21, page 1 of 3)

Instructions - Exhibit P-21, Production Schedule

1. **Purpose.** The purpose of this exhibit is to provide detailed information with regard to the monthly production of all applicable items.

2. **Submission.** *Exhibit P-21 will be submitted for the budget estimate submission to show the planned contractual production deliveries for Exhibit P-5 cost elements that have a value of \$5.0 million or more in budget year 1 or budget year 2. Those items that are supported by an exhibit P-23 do not need a P-21 unless multiple manufacturers produce the items. Exhibit P-21 will be submitted for the President's budget for all Acquisition Category 1 programs and for any other program requiring specific quantity authorization. Each Service, whether a leader or follower, is to provide the delivery schedule for the entire program. This ensures that each Service has the opportunity to adjust procurement quantities in terms of contractor capability to deliver all assets during the funded delivery period.*

3. **Entries.**

- a. Entries will be displayed in the same order as they appear on the Exhibit P-5 Cost Analysis.
- b. Use "E" for "each," "M" for "millions" and "K" for "thousands" for unit of measure.
- c. Production rates should be yearly rates. The following definitions apply.

Minimum Sustaining Rate. This is the production rate that is necessary to keep production lines open while maintaining a base of responsive vendors and suppliers; the quantity that will preclude start-up costs in the case of a production break; or the quantity that the contractor is willing to accept and produce at a reasonable cost

Economical Production Rate. This is the most efficient production rate for each budget year at which the item can be produced with existing or planned plant capacity and tooling, with one shift a day running for eight hours a day and five days a week (1-8-5).

Maximum Production Rate. This is the maximum capacity rate that a contractor can produce with extant or PY planned tooling. Indicate the number of shifts.

- d. The following leadtime definitions apply.

Administrative Leadtime (ALT). This is the amount of time required to complete the administrative actions leading to contract award. Since these actions do not require funding, the ALT can be separately identified into prior to October 1 and after October 1. The ALT is used to forecast contract awards. Longer leadtimes require that a larger quantity be purchased to support yearly requirements. Leadtimes should therefore reflect an accurate assessment of the time required to process the administrative actions.

Production Leadtime (PLT). This is the amount of time required by a contractor to produce an item once a contract is awarded. Leadtimes should be based on a realistic projection of a contractor's capability.

Procurement Leadtime. This is the total of ALT (post October 1) and PLT.

- e. Where procurements are being made for customers such as the FMS program or another Service, a separate line will be used to reflect each customer's planned buy and phased deliveries with a total provided by item by manufacturer. Use A for Army, N for Navy, AF for Air Force, F for FMS, and O for Other (and explain in the remarks section).

(Exhibit P-21, page 2 of 3)

Exhibit P-21 Instructions (Continued)

f. Enter respective schedules for all prior fiscal years with undelivered assets, for CY, BY1, and BY2. In addition, Acquisition Category 1 programs and programs requesting advance procurement funding will also enter schedules for all years of the future years defense plan. Show detail of production by month so that analysis can be accurately performed.

g. Missile Delivery Schedule. A separate P-21 exhibit will be prepared for each missile system reflecting the latest actual deliveries and scheduled outyear requirements. When the missile system includes the procurement of fire units or launching systems within the P-1 line item, the missiles and the major components of the fire unit or launching system (launcher, launch control center, radar set, track vehicle) will be depicted on the P-21 exhibit.

h. Ammunition. The total production plan for hardware items should be displayed to include time-phased schedules for LAP and the major limiting or pacing component as applicable. For Improved Conventional Munitions, display schedules for all major components. Provide separate information in those cases where procurement leadtimes for LAP and major components differ.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

Instructions - Exhibit P-21a, Production Schedule, All Types

In addition to the P-21, the Army will submit a P-21a showing “all types” ammunition deliveries for all Services for those items procured through the Single Manager for Conventional Ammunition.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

Exhibit P-21a, Production Schedule, All Types

(Exhibit P-21, page 3 of 3)

[illegible]

Instructions - Exhibit P-22, Ammunition Inventory

1. Purpose. The purpose of this exhibit is to provide visibility into the Single Manager for Conventional Ammunition (SMCA)-owned component inventory and into each of the Service's ammunition inventory.
2. The Services can submit the inventory listing format it currently produces, as long as the information required by this exhibit is presented.
3. Each Service will submit an inventory position listing of all Service-owned ammunition assets. The Army will also provide the SMCA-owned component inventory listing. The Exhibit is not required for the President's budget request.
4. The inventory position will be submitted in support of the Budget Estimate Submission and will be current as of June 30, Past Year (or later, if available).
5. Entries.

Columns 1-4. Enter the appropriate Nomenclature, SSN, DODIC, and Condition Code of each ammunition round in the Service or SMCA-owned inventory.

Columns 5 and 6. Enter the Capability Based Munitions Requirement (CBMR) and the training and testing requirements included in the CBMR.

Columns 7 and 8. Enter the quantity of rounds that the Service or SMCA is retaining for contingency level requirements and economic level considerations. Should these quantities be inordinately large, narrative should be provided to rationalize the quantity.

Column 9. Enter the total quantity of assets on hand.

Column 10. Enter the quantity that could be reutilized.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

P-1 Shopping List - Item No 5-6 of 9

Exhibit P-23a, Installation Data
(Exhibits P-23 and P-23a, page 2 of 4)

Instructions - Exhibits P-23, Time Phased Requirements Schedules, and P-23a, Installations Data

1. Purpose. The purpose of these exhibits is to provide detailed information with regard to the quarterly requirements and production of all applicable installed items.
2. Submission. The exhibit P-23, supplemented by Exhibit P-23a, will be submitted for all P-1 line items installed and/or components. A P-23 is not required if a P-3a modification exhibit is submitted for the installed item because a schedule is included on the P-3a.
3. Entries.

Time Period Covered by Exhibit P-23. The first fiscal year block represents the current fiscal year. The form provides for a total of 7 years. If the phased requirement for the equipment extends beyond 7 years, insert an additional column at the right edge of the form entitled "Later." Use this last column to reflect the balance of the requirement and/or deliveries.

Line #1. Active Force Inventories. The purpose of this line is to show by quarter, "installation opportunities" for a particular equipment based upon an established schedule. The quantities to be reflected are installed equipment quantities. The line entry is non-cumulative. In those cases where the actual or planned equipment procurement program will not provide sufficient units to meet total opportunities in a particular quarter, the missed opportunities will be shown in parentheses. For example, total opportunities might be 10, but only 6 can be met. This will be shown as 6 (4). Appropriate offsets will be made in this line when it is necessary to have the equipment to be installed on hand in advance of beginning of installation.

Line #2. This line is to be used for installation opportunities not in established schedules and is to be completed in the same manner as line 1.

Line #3. Schools and Other Training. Insert in the appropriate fiscal quarter units required for Schools and Other Training. Indicate "Other" unit requirements by use of an asterisk.

Line #4. Other. This line should reflect phased requirements for all other commodity users such as new construction of end items or MAP/FMS etc.

Line #5. Time Phased Requirements. This is a cumulative line entry and in the first quarter of the first fiscal year on the form is the sum of lines 1 through 4. For the second quarter, line 5 is equal to amount shown on line 5 in the first quarter plus sum of lines 1 through 4 in the second quarter.

Line #6. Assets on Hand. In the first quarter block on line 6, insert the number of equipment on hand at the beginning of the current fiscal year.

Line #7. Enter the planned deliveries from the prior fiscal year and prior programs. This is a non-cumulative line. Indicate appropriation on lines 7-16 when columns are filled.

Line #8. Reflect on this line deliveries from other appropriations financed by prior year programs.

Line #9. Reflect planned deliveries from the current fiscal year program. Also, indicate in the appropriate quarter when the contract for the current fiscal year quantity will be awarded. Identify the type of contract with the following codes:

C	Competitive procurement
SS	Sole Source
CMYP	Competitive multiyear
SSMYP	Sole Source multiyear

(Exhibits P-23 and P-23a, page 3 of 4)

Exhibits P-23/P-23a Instructions (Continued)

Line #10. Same as line 9 for current fiscal year when a different appropriation from line 9 is involved.

Lines #11-16. Follow the pattern of lines 9 and 10. Lines 15 and 16 may cover more than one fiscal year program and will reflect the equipment quantity required to fill the total requirement in the "Later" column.

Line #17. For each quarter, this line is the sum of lines 6 through 16 expressed on a cumulative basis as was line 5.

Line #18. Enter the difference between line 5 (total phased requirements) and line 17 (total assets).

Requirement Block (Lower right corner) - This block recaps total requirements by appropriation.

Total Requirement - This is the total ultimate quantity required for installation without regard to when installation will take place.

Installed Qty - Number of units installed prior to the beginning of the current fiscal year.

On Hand Qty - Units that have been delivered but not yet installed.

Prior Years Undelivered - This is the sum of all units due in from prior year, past years, and current year programs plus planned BY1 and BY2 procurements.

Unfunded - This is the quantity still required after BY2.

Reconciliation - The cumulative quantity shown on line 5 is equal to the sum of the on hand quantity, the FY(BY1) and undelivered quantity plus the unfunded quantity.

Procurement Leadtimes. Administrative leadtime is the amount of time after October 1 that is required to award a contract. Initial Order Leadtime means production or manufacturing leadtime and is measured from date of contract award to date of first delivery of equipment. Reorder Leadtime is production leadtime when follow-on procurement is made from previous source.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

P-23a, Time Phased Requirements Schedule

List the end item and/or facilities that are to receive the equipment. Include the quantity to be installed by quarter. Identify the installing agent.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

Narrative Explanation										

P-1 Shopping List - Item No 20-1 of 20-20

Exhibit P-25, Production Support and Industrial Facilities Cost Analysis
(Exhibit P-25, page 1 of 2)

Instructions - Exhibit P-25, Production Support and Industrial Facilities Cost Analysis

The P-25 exhibit will be used to display costs for each funded production facilities project at all government owned, government operated (GOGO) and government owned, contractor operated (GOCO) facilities. In addition the exhibit will display the costs associated with a facilities project for those government owned lines that are located at contractor owned, contractor operated (COCO) facilities. The cost categories on the P-25 exhibit represent a number of elements and the list should be tailored to adequately depict the production facility project cost. The sections on the P-25 exhibit are to be completed as follows.

Construction cost should depict the cost for construction that is funded in this line. If construction funds are required that are programmed in another appropriation, these funds and the associated amount should be identified in the Other Costs section.

Equipment Cost should identify the cost for individual equipment (list separately) costing more than \$0.5 million and a cumulative cost line for all equipment costing less than \$0.5 million.

Equipment Installation Cost should identify the cost to install all the equipment listed.

Contractor Support Cost should identify any cost for contractor support included in the production facility project.

Corps of Engineers Support Cost should identify any cost for the Corps of Engineers support included in the production facility project.

Other In-house Support Cost should identify any cost for other in-house support (excluding the Corps of Engineers support costs) included in the production facility project.

The Other Cost section reflects other costs associated with the project such as facility prove-out cost, military construction appropriation costs, etc.

Facility - Self explanatory.

Related Projects should include prior year and outyear funding required to complete the project.

Industrial Facilities - Provide specific line item identification for each project. Group projects under each appropriate subclassification, such as facility expansion, machine tool replacement, etc.

A DD Form 1391, Military Construction Project Data, is required for each project for proposed construction, alteration, expansion, or modernization of government owned facilities.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

Instructions - Exhibit P-26, Maintenance of Inactive Facilities

1. The purpose of this exhibit is to provide the funding requirements for the maintenance of inactive facilities, inactive lines at active facilities, and inactive lines at contractor facilities.
2. Provide information as to the types of costs that require funding.
3. List the inactive lines and the ammunition that will be produced if the line is reactivated.
4. Provide description of environmental requirements.
5. Provide detail by facility.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

Instructions - Exhibit P-32, Procurement Purchases from DWCF

1. Purpose. The purpose of this exhibit is to estimate the amount of new orders planned to be sent to the Defense Business Operations Fund (DWCF) business areas. The Procurement appropriations will report estimates of funding for DWCF business areas on the Purchases from DWCF Exhibits. For each appropriation, the Component will estimate by DWCF business area the amount of new orders planned to be sent to DWCF business areas for the CY, BY1 and BY2. The amounts provided should reflect the amount shown by the DWCF activity on the Fund-11 exhibit. Price growth will reflect the amount of inflation on the difference between fiscal years funding (change in DWCF rates). Program growth will show the change in program absent the effect of inflation. For further guidance, see the instructions for completing the OP-32 exhibit (Chapter 030402). A copy of the P-32 exhibit will also be provided directly to the Revolving Funds Directorate, Room 3B866, the Pentagon.

2. Specific Instructions:

In addition to the guidance above and in the OP-32 Exhibit instructions, the following provides by business area, the types of purchases reported on the P-32 exhibits:

- (1) Army, Navy and Air Force Supply Management: obligations for supply purchases from wholesale and retail supply organizations.
- (2) DLA Supply Management: obligations for purchases of consumable supplies.
- (3) Fuel Purchases (Defense Fuel Supply Center): obligations for fuel for purchases of fuel for aircraft, automobiles, non-nuclear ships, trucks, and heating fuel.
- (4) US Transportation Command: travel and transportation obligations for movement of people or goods by military air (Air Mobility Command owned C-17, C-5, or C-141 aircraft or leased commercial aircraft) and military sealift (through Military Traffic Management Command operated port facilities, in Military Sealift Command owned or operated ships).
- (5) Defense Finance and Accounting Service (DFAS): obligations for services rendered by DFAS.
- (6) Communications Services (DISA): obligations to pay for services provided by the for the Defense Switched Network (formerly AUTOVON, AUTODIN, Bulk Encrypted Communications, Defense Switched Network, Washington Area Wideband System, Defense Information Systems Network, and Defense Data Network) and for information processing, computer services, and software development support provided by the Defense Information Technology Services Organization (DITSO).
- (7) Fund Purchases not reported on P-32: Do not report purchases from the following Fund business areas: Defense Logistics Agency Distribution Depots; Navy Distribution Depots; Commissary Operations; and the Defense Reutilization and Marketing Services.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

(Exhibit P-32, page 3 of 3)

P-1 Shopping List - Item No 30-9 of 30-9

Exhibit P-35, Major Ship Component Fact Sheet
(Exhibit P-35, page 1 of 2)

Instructions - Exhibit P-35, Major Ship Component Fact Sheet

Item: A separate sheet is to be submitted for each component having a unit cost of \$3.0 million or more.

Description/Characteristics/Purpose. Self explanatory.

Current Funding. The cost details will be provided for each ship type for which equipment is being procured on a hull basis for the prior year (PY), current year (CY), budget year 1 (BY1) and BY2.

Identify estimates on an end item cost basis. If an equipment was procured in a prior year with advance procurement funds, it should be reflected on the exhibit next to the end cost estimates in parenthesis. The equipment costs in this section of the exhibit will include the building block elements listed below:

- Major Hardware
- Ancillary Equipment
- Technical Data and Documentation
- Spares
- System Engineering
- Technical Engineering Services
- Other Costs

Major hardware costs in excess of \$20 million must be broken down into sub-element hardware components that comprise the equipment cost estimate included on the P-5a cost analysis.

Contract Data. This section will be prepared for the major hardware procurement. The exhibit will include the contract plans for BY1 and BY2, the planned or actual contract information for the current year (CY) and the actual information for the last buy prior to the current year. The last buy should be included even though it is two or more years prior to the current year. The following codes should be used for indicating contract types: Fixed Price Incentive (FPI); Cost Plus Incentive Fee (CPIF); Fixed Price (FP); Sole Source (SS); and Competitive (C). Indicate whether it is a new contract or an option to an existing contract. Also indicate estimated or actual award dates and item delivery dates. List quantities for each fiscal year and the production leadtime associated with each equipment.

Delivery Data. This section should indicate delivery plans for BY1 and BY2, CY and past year (PY) programs contained in Section II of this exhibit. The required award date entry is determined by subtracting the months required before delivery and production leadtime from the earliest ship delivery date.

Competition/Second Source Initiatives. Describe any competition or second source initiatives associated with major hardware items.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

P-1 Shopping List - Item No 17-1 of 17-5

Exhibit P-40, Budget Item Justification

(Exhibit P-40, page 1 of 4)

Instructions - Exhibit P-40, Budget Item Justification

1. **Purpose.** The purpose of this exhibit is to provide overall narrative justification and total procurement costs for each P-1 line item. Include all advance procurement, initial spares and repair parts for acquisition category 1 programs.

2. **Submission.** A separate P-40 will be submitted to support each P-1 line item with funding of \$5.0 million or more in budget year 1 or budget year 2 or \$5.0 million or more in either the PY or CY. Funding will be provided for all years displayed on the P-40 for all programs for both the Budget Estimate Submission and the President's budget. *If prior year and to complete data are not relevant (i.e., items have a continuing requirement such as vehicles or ammunition), then leave those fields blank. In order to ensure compliance with the Department's policy to fully fund procurement programs, exhibits should reflect all costs and quantities from prior year (PY) through to complete (TC) for those programs buying a finite quantity.*

3. **Entries.**

a. Enter the applicable information that identifies the appropriation number and title, budget activity, procurement line item number, and serial number (the combination of these codes should match the procurement annex). Include the P-1 line item title and identify nicknames in parenthesis. Identify the program element for all Code B items shown on the P-5. Also list all other PEs associated with this procurement.

b. Funding will be presented for all prior years, past year, current year, budget years, FYDP years, to complete, and total on all line items having a finite quantity requirement. It is not relevant to show funding or quantities for items that are continuing requirements such as ammunition or vehicles. It is relevant to show funding for all fiscal years for items being procured to specified quantity, such as aircraft, missiles, or modifications. The funding should agree with the funding approved in the FYDP Procurement Annex. Omit line items that do not apply (for example, ammunition items would not include an initial spares line).

c. A complete narrative description of the line item will be provided. The description will include, but not be limited to, the nature, purpose and intended use of the item with sufficient depth of information to serve as a justification for funding.

d. If the item is a Code B item, provide the month and calendar year, actual or projected, for each applicable DTE, IOT&E, OTE and technical data package (TDP) or performance specification milestone date. TDP is assumed to be the date when all data necessary to initiate the procurement is available. Also provide the planned date for type classification as Standard or Alternate Standard (Army and Air Force) or approved by the CNO or other responsible official (Navy). Provide the nomenclature and model number of each item (as applicable) which will be replaced, as well as the comparative information in definitive terms with units of measure such as range, speed, cycle rate, meantime before failure, useful life, etc. Enter a brief but specific discussion of pertinent test results and development effort to date (successful firings, slippages, test failures, cost overruns, etc.).

e. For those programs that include advance procurement funds that support more than just the next or one subsequent FY program, specific FY detail needs to be provided to identify which FY programs are supported by prior year advance procurement. Advance procurement should be debited and credited according to the leadtimes of the advance procurement. For instance, if FY 1996 and FY 1997 advance procurement funds are required for an FY 1998 procurement, the FY 1996 AP funds would be debited in FY 1996, the FY 1997 AP funds would be debited in FY 1997, and the total of the FY 1996 and FY 1997 AP funds would be credited in FY 1998.

(Exhibit P-40, page 2 of 4)

P-40 Instructions (Continued)

Advance Procurement

FY TOA	<u>FY 1996</u>	<u>FY 1997</u>	<u>FY 1998</u>	<u>FY 1999</u>	<u>FY 2000</u>
FY 1996 for FY 1998 (memo)	0.4

FY 1998 (memo)			-0.8		
FY 1998 for FY 1999 (memo)			0.4		
FY 1998 for FY 2000 (memo)			0.4		
FY 1999 (memo)				-0.8	
FY 1999 for FY 2000 (memo)				0.4	
FY 1999 for FY 2001 (memo)				0.4	

4. Specific Guidance by Program Type.

- a. Shipbuilding and Conversion, Navy Programs. Include the following information:

Mission
 Characteristics (hull length overall, beam, displacement, draft)
 Armament
 Major Electronics
 Production status, by hull
 Contract Award Planned (Month/Year)
 Months to Complete
 a) Award to Delivery
 b) Construction
 Start to Delivery
 Delivery Date
 Completion of Fitting Out
 Obligation Work Limiting Date (OWLD)

The P-40 must list all Service and Other Small Craft Items by types and provide funding for all years still being executed.

- b. Modification Programs. For procurement modification programs the P-40 exhibit shall include the following information. A complete narrative description of the weapon system, its overall mission, number of aircraft in the inventory (include a breakout by Active, National Guard and Reserve), *the designed service life, and the average service life remaining*. The exhibit will, just below the narrative, include the specific modifications budgeted and programmed displayed in the format provided below:

Mod/	Total (TOA, \$ in Millions)											
<u>OSIP No.</u>	<u>Title</u>	<u>PYs</u>	<u>PY</u>	<u>CY</u>	<u>BY1</u>	<u>BY2</u>	<u>BY2+1</u>	<u>BY2+2</u>	<u>BY2+3</u>	<u>BY2+4</u>	<u>TC</u>	<u>Total</u>

Mod/OSIP No. Enter the modification number as applicable. List each modification on the aircraft P-40 exhibit. All P-3a exhibits must be included in the budget backup book in this numerical order.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

(Exhibit P-40, page 4 of 4)

Instructions - Exhibit P-40a, Budget Item Justification for Aggregated Items

1. Purpose. The purpose of this exhibit is to provide the quantities and funding covering the procurement programs included in aggregated P-1 line items such as "Items Less Than \$5.0 million." A P-5 is not required for items included on a P-40a.

2. Entries.

a. Enter the applicable information that identifies the appropriation, budget activity, and title. There should be no Code B (not approved for service use) items on the P-40a. If an item is a Code B item, however, the item must be listed as separate line items in the P-1, P-5 and P-40 exhibits.

b. Funding will be presented for all prior years, past years (PY), current year (CY), budget years (BY1 and BY2). The funding should agree with the funding approved in the FYDP Procurement Annex.

c. Spares. Funding will be presented for PY, CY, BY1 and BY2.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

(Exhibit P-40a, page 2 of 2)

Exhibit P-45, Summary of Reimbursables

(Exhibit P-45, page 1 of 2)

Instructions - P-45, Summary of Reimbursables

This exhibit will be prepared for all procurement appropriations for which reimbursable authority has been used in the PY or CY or is requested for the BY1 or BY2.

This exhibit will reflect reimbursable funding received or requested for each customer from a P-1 line item. For FMS customers, specify each country as a separate customer. Specifically identify other customers.

The totals on this exhibit should reflect the total amount of reimbursements anticipated as submitted in the Budget Estimates Submission and the President's budget request.

Verify that funding included on the P-45 from other Services is in fact budgeted in that Service's budget. With the exception of ammunition being procured through the Single Manager for Conventional Ammunition, explain why a procurement for another Service is being financed through a reimbursable order rather than a direct cite purchase.

A Service-generated or Defense Agency-generated exhibit can be used in lieu of this exhibit as long as it includes all the information required by this exhibit.

Exhibit MYP-4, Present Value Analysis
(MYP, page 5 of 8)

Multiyear Procurement Guidance

1. All multiyear procurements, regardless of cost, require the use of a present value analysis (MYP-4) to determine lowest cost compared to an annual procurement. Exhibits MYP-1 through MYP-4 will be included for all MYP candidate systems in the budget estimate submission. The President's budget request will include P-5a MYP-annotated entries for those multiyear programs not requiring congressional authority and Exhibits MYP-1 through MYP-4 for all multiyear candidate systems for which any of the following is true:
 - The anticipated multiyear procurement contract is \$500 million or greater.
 - There are economic order quantity (EOQ) procurements in excess of \$20 million in any one year.
 - There are economic order quantity (EOQ) procurements in advance of an MYP contract in excess of \$20 million in any one year.
 - There will be an unfunded contingent liability in excess of \$20 million in any one year.
 - The procurement quantities of a previously approved MYP have been adjusted.
2. If a system proposed for a multiyear contract includes more than one P-1 line item, prepare combined MYP-1 and MYP-2 exhibits. Prepare separate exhibits for the remaining MYP exhibit formats. All the exhibits associated with this system should be combined in one package, and submitted in numerical order, i.e., MYP-1, MYP-2, MYP-3¹, MYP-3², etc.
3. If multiple MYPs are proposed for components of the same P-1 line item, prepare a separate set of exhibits for each. Note that the MYP-3 will be the same in each package.
4. If a joint Service program is proposed for multiyear procurement, the executive Service is responsible for submission of all multiyear exhibits.
5. *Exhibits are to display actual fiscal years rather than the template years.*
6. Exhibits will be submitted in landscape format.
7. See Section 0102 for additional multiyear procurement guidance.

Instructions - MYP-1 Multiyear Procurement Criteria

1. Description: Provide a brief statement describing the multiyear procurement, i.e., this multiyear procurement will procure "x" number of units over "x" number of fiscal years by using one (or more) multiyear contract.

2. Benefit to the Government. The process of deciding to use or not to use a multiyear procurement (MYP) for production programs as well as how best to tailor and structure MYP requires management judgment. A multiyear procurement should yield substantial cost avoidance or other benefits when compared to conventional annual contracting methods. MYP structures with greater risk to the government should demonstrate increased cost avoidance or other benefits over those with lower risk. Savings can be defined as significant either in terms of dollars or percentage of total cost. This paragraph must include as a minimum the following narrative justification and data:

a. Substantial Savings. The use of a multiyear contract will result in substantial savings of the total anticipated costs of carrying out the program through annual contracts.

b. Stability of Requirement. The minimum need for the property to be purchased is expected to remain substantially unchanged during the contemplated contract period in terms of production rate, procurement rate, and total quantities. *The item should be technically mature, have completed RDT&E (including development testing, or equivalent) and Initial Operational, Test and Evaluation (IOT&E), with relatively few changes in item design anticipated. Deliveries of production items will indicate that the underlying technology is stable. This does not mean that changes will not occur but that the estimated cost of such changes is not anticipated to drive total costs beyond the proposed funding profile*

c. Stability of Funding. There is a reasonable expectation that throughout the contemplated contract period, the head of the agency will request funding for the contract at the level required to avoid contract cancellation.

d. Stable Design. There is a stable design for the property to be acquired and the technical risks associated with such property are not excessive.

e. Realistic Cost Estimates. The estimates of the cost of the contract and the anticipated cost avoidance through the use of a multiyear contract are realistic. *Estimates should be based on prior cost history for the same or similar items or proven cost estimating techniques. Normally, production assets should have been delivered in order to obtain actual costs for the comparisons (exceptions include satellites and ships).*

f. National Security. Use of a multiyear contract will promote the national security of the United States.

3. Source of Savings. Identify the detailed sources of savings, to include, as appropriate, inflation, vendor procurement, manufacturing, design/engineering, tool design, and support equipment. Each identified source of savings must include a narrative description of the specific savings, an estimate for that specific source and how the estimate was derived. The sum of the detailed sources of savings should equal the total savings.

4. Advantages of MYP. Identify the advantages the MYP will achieve and how they will achieve them. These advantages could include: production of items in economic order quantities, thereby resulting in lower costs; enhancement of standardization; reduction of administrative burden in the placement and administration of contracts; substantial continuity of production or performance, thus avoiding annual startup costs, pre-production testing costs, make-ready expenses, and phase-out costs; stabilization of contractor and subcontractor work forces; avoiding the need to establish quality control techniques and procedures for a new contractor each year; broadening the competitive base with opportunity for participation by firms not otherwise willing or able to compete for lesser quantities, particularly in cases involving high startup costs; providing incentives to contractors to improve productivity through investment in capital facilities, equipment, and advanced technology; enhancing partnering efforts between contractors/government and prime contractor/subcontractor; providing stable environment; and enhancing best commercial practices.

5. Impact on Industrial Base. The MYP justification should include a narrative that addresses the impact of the MYP on the industrial base in terms of both the prime contractor and the vendors/subcontractors, to include the following topics: improved competition, enhanced investment, improvement in vendor skills, training programs, use of multiyear contractors (vendors), and increased production capacity.

6. Multiyear Procurement Summary. List all comparisons from the MYP exhibits. *The Department's policy is to not have unfunded cancellation ceilings; however, if a program is structured with an unfunded cancellation, reflect those costs on this exhibit and explain fully why the program must be structured with one.*

Instructions - MYP 2 Total Program Funding

This chart will compare the funding for the annual proposal and the multiyear proposal. If there are multiple MYPs proposed for the same line item, the annual program should reflect only annual procurements and the multiyear program should reflect funding for all the proposed multiyear programs. Compare the same number of procurement years and same quantity in each year for the annual proposal and for the multiyear proposal. Explain the categories of costs included in the cancellation ceiling. Use as many columns as necessary to display outlays until liquidated. Use the same number of years for both annual and multiyear contract.

Instructions - MYP 3 Total Contract Funding

This chart will compare the funding for the annual proposal and the multiyear proposal for the multiyear contract. Compute savings for the same number of procurement years and same quantity in each year under an annual proposal and under a multiyear proposal. Explain the categories of costs included in the cancellation ceiling. Use as many columns as necessary to display outlays until liquidated. Use the same number of years for both annual and multiyear contract. The Services and Defense Agencies should perform an independent analysis of the cost and benefits of the contractor's proposal. Explain assumptions (outlay rate, contractor termination liability, other - explain what's behind the numbers). The total TOA difference on this chart will agree with the cost avoidance over annual line on Exhibit MYP-2 for each MYP contract. The Department's policy is to not have unfunded cancellation ceilings; however, if a program is structured with an unfunded cancellation, reflect those costs on this exhibit and explain fully why the program must be structured with one.

An exception, to be approved by the USD Comptroller, is needed to structure a contract with an unfunded cancellation ceiling. Justification explaining why an unfunded cancellation ceiling is the chosen acquisition strategy should be provided. This justification should specify what costs comprise the unfunded cancellation ceiling and why these costs are not funded under the full funding policy.

- *Funds obligated for multiyear contracts must be sufficient to cover any potential termination costs. The costs of cancellation or termination may be paid from (1) appropriations originally available for the performance of the contract concerned; (2) appropriations currently available for procurement of the type of property concerned, and not otherwise obligated; or (3) funds appropriated for those payments.*

Instructions - MYP 4 Present Value Analysis

This exhibit will be prepared for the contract values. Then year costs will agree with the outlay amounts contained on MYP-3. Constant costs will be expressed in budget year costs unless specified otherwise in the memorandum requesting submission of the budget. Compute savings for the same number of procurement years and same quantity in each year under an annual proposal and under a multiyear proposal. Present value analysis will be calculated in accordance with DoD Instruction 7041.3 and OMB Circular A-94.

Explanation by Budget Activity

1. Combat Aircraft

Explain. Include quantity and funding in explanation.

2. Airlift Aircraft

Explain. Include quantity and funding in explanation.

Instructions: For the second year of the biennial budget, the comparisons will be between BY1 and BY2. For example, in submitting the FY 1998/FY 1999 President's budget request, this exhibit is required as follows:

FY 1997: Compare FY 1997 in the FY 1997 PB request to FY 1997 in the FY 1998/FY 1999 PB request.

FY 1998: Compare FY 1997 in the FY 1998/FY 1999 PB to FY 1998 in the FY 1998/FY 1999 PB.

FY 1999: Compare FY 1998 to FY 1999 in the FY 1998/FY 1999 PB.

Exhibit PB-32B, Comparison of FY 19CY Program Requirements

Major Defense Acquisition Program (MDAP)
Program Elements (PE) to Procurement Line Items Cross-Track Data

Each Component must submit for each designated MDAP/pre-MDAP an automated data base that maps the FYDP Program Elements (PEs) to Procurement Line Items (PLIs or PALIs) and identifies their common funding and quantity. This FYDP PE-to-PALI Cross-Track data base must reconcile to the Budget Estimates Submission/President's budget Procurement Annex and FYDP data bases and the supporting congressional justification material. The PE to PALI (PE-PALI) Cross-Track data base should be submitted for past year (PY), current year (CY), budget years (BY1 and BY2), and FYDP years (BY2+1 thru BY2+4), and should be formatted as specified below. The PE-to-PALI Cross-Track quantity and funding data should be submitted as 2 flat ASCII files on either a 5 1/4 or 3 1/2 inch floppy, high or double density disk and submitted directly to OUSD(A&T), Steve Dratter, Room 1E474 , 697-8020.

CROSS-TRACK

<u>DATA</u>	<u>COLUMNS</u>
PE: Major Force Program	1:2
PE: PE ID	3:7
PE: Service Code	8:10
PLI/PALI: Treasury Code (Appropriation Code)	11:14
PLI/PALI: PLI/PALI Department Code	15:15
PLI/PALI: Budget Activity Code	16:17
PLI/PALI: Budget Sub Activity Code	18:19
PLI/PALI: PLI/PALI ID	20:29
PNO (Program number identified on attached listing of required MDAPs)	30:32
FY	33:36
Budget/Funding (in thousands)	37:46
Quantity	47:56

Formatting Guidelines:

1. Columns 1 thru 10 make up the complete PE number.
2. Columns 11 thru 29 make up the complete PLI/PALI number.
3. Left justify Service Codes and PLI/PALI ID.
4. Right justify Dollars and Quantities and **DO NOT** use commas.
5. FY should be formatted as 1996, 1997, etc.
6. Data are requested for PY thru BY2+4 (e.g. FY 1996 - 2003).
7. All alphanumeric characters are to be in UPPERCASE.

MDAP Program Elements to Procurement Line Items Cross-Track Data

(PE to Procurement Line Crosstrack, page 1 of 2)

FYDP Cross-Track

Cross-tracks between submissions must be provided whenever PE or PLI/PALI structures have changed (e.g., if a program's funding appears in a new or different PE/PLI/PALI) from the previous President's budget submission. The Components must submit to the OUSD(A&T) automated cross-track data bases for the FYDP Procurement Annexes that allow direct comparisons of PLIs/PALIs.

Old PLI/PALI to New PLI/PALI Crosswalk Data: A data file containing only those Procurement Line Items (PLIs or PALIs) which have been renumbered since the last submission of the FYDP/Procurement Annex must be submitted. It is to be submitted as a flat ASCII file on either a 5 1/4 or 3 1/2 inch floppy, high or double density disk to OUSD(A&T), Room 1E474.

CHAPTER 5

RESEARCH, DEVELOPMENT, TEST AND EVALUATION APPROPRIATIONS**0501 GENERAL****050101 Purpose**

This chapter provides instructions applicable to budget formulation and congressional justification for Research, Development, Test, and Evaluation (RDT&E) appropriations. The following appropriations and accounts are included in RDT&E:

- RDT&E, Army (2040A)
- RDT&E, Navy (1319N)
- RDT&E, Air Force (3600F)
- RDT&E, Defense-Wide (0400D)
- Developmental Test and Evaluation, Defense (0450D)
- Operational Test and Evaluation, Defense (0460D)

050102 Submission Requirements

General guidance on submission requirements is in Chapter 1. Chapter 5 provides additional specific requirements on justification material for the above appropriations and accounts. The above appropriations and accounts shall also submit applicable exhibits required by other chapters in the FMR. The Components will also submit any exhibits required by OMB Circular A-11, Preparation and Submission of Budget Estimates.

050103 Major Defense Acquisition Programs (MDAP)

MDAP Automated Submission. In order to provide consolidated funding information on DoD's major acquisition programs, automated data submissions are required to provide the approved funding level for each MDAP. These programs include all Acquisition Category (ACAT) ID, ACAT IC, and pre-MDAP designated programs. For joint programs, the lead service/agency is to coordinate the reporting effort, but each Service and Defense Agency involved in the program is responsible for reporting the portion of the program that it funds. In an annual memorandum (usually published in mid-summer), the USD(A&T) will identify the MDAPs required for submission. Specific data format instructions are included in Section 050502. These are similar to the automated submissions currently required by the Program Objective Management (POM) Preparation Instructions (PPI) for the POM submission. The required automated submissions should be on a 3 1/2 inch floppy, high or double density disks and delivered directly to OUSD(A&T), Room 1E474 (POC: Mr. Steve Dratter, telephone (703) 697-8020). The submission should agree with data submitted to the OUSD(Comptroller) for the FYDP and associated annexes. The final submission must agree with the supporting justification material that is submitted to the Congress.

050104 Preparation of Material

General guidance on format and preparation of material is presented in Chapter 1. Chapter 5 provides additional specific requirements on justification material required for RDT&E appropriations. All funding associated with each major system new start shall be identified in a unique program element.

050105 References

Section 010210 provides policies and definitions concerning costs that are to be financed in RDT&E.

0502 UNIFORM BUDGET AND FISCAL ACCOUNTING CLASSIFICATION**050201 RDT&E Budget Activities**

Definitions for RDT&E budget activities are contained in OMB Circular A-11, paragraph 25.4.

Budget Activity 1, Basic Research. Basic research is defined as systematic study directed toward greater knowledge or understanding of the fundamental aspects of phenomena and of observable facts without specific applications towards processes or products in mind. Program elements in this category involve pre-Milestone 0 efforts. Explanation: Basic research includes all effort of scientific study and experimentation directed toward increasing fundamental knowledge and understanding in those fields of the physical, engineering, environmental, and life sciences related to long-term national security needs. It provides farsighted, high payoff research that provides the basis for technological progress. It forms a part of the base for: (a) subsequent applied research and advanced technology developments in Defense-related technologies, and (b) new and improved military functional capabilities in areas such as communications, detection, tracking, surveillance, propulsion, mobility, guidance and control, navigation, energy conversion, materials and structures, and personnel support. Program elements in this category involve pre-Milestone 0 efforts.

Budget Activity 2, Applied Research. Applied research is defined as systematic study to gain knowledge or understanding necessary to determine the means by which a recognized and specific need may be met. It is a systematic application of knowledge toward the production of useful materials, devices, and systems or methods, including design, development, and improvement of prototypes and new processes to meet specific requirements. Explanation: This activity translates promising basic research into solutions for broadly defined military needs, short of development projects. This type of effort may vary from systematic mission-directed research beyond that in Budget Activity 1 to sophisticated bread-board hardware, study, programming and planning efforts that establish the initial feasibility and practicality of proposed solutions to technological challenges. It includes studies, investigations, and non-system specific technology efforts. The dominant characteristic of this category of effort is that it be pointed toward specific military needs with a view toward developing and evaluating the feasibility and practicability of proposed solutions and determining their parameters. Applied Research precedes the system specific research described in DoDD 5000.1. Program control of the Applied Research program element will normally be exercised by general level of effort. Program elements in this category involve pre-Milestone 0 efforts, but not all pre-Milestone 0 efforts are funded in Budget Activity 2. Some efforts are introduced by field activities.

Budget Activity 3, Advanced Technology Development. Includes all efforts that have moved into the development and integration of hardware for field experiments and tests. The results of this type of effort are proof of technological feasibility and assessment of operability and producibility rather than the development of hardware for service use. Projects in this category have a direct relevance to identified military needs. Advanced Technology Development is used to demonstrate the general military utility or cost reduction potential of technology when applied to different types of military equipment or techniques. Advanced Technology Development also includes evaluation and synthetic environment and proof-of-principle demonstrations in field exercises to evaluate system upgrades or provide new operational capabilities. Program elements in this category involve pre-Milestone I efforts, *but not all pre-Milestone I efforts are funded in Budget Activity 3.* Some efforts are introduced by field activities. Projects in this category do not necessarily lead to subsequent development or procurement phases.

Budget Activity 4, Demonstration and Validation. The demonstration and validation (Dem/Val) phase includes all efforts necessary to evaluate integrated technologies in as realistic an operating environment as possible to assess the performance or cost reduction potential of advanced technology. The Dem/Val phase is system specific and also includes advanced technology demonstrations that help expedite technology transition from the laboratory to operational use. Program elements in this category involve efforts between Milestone I and Milestone II. A logical progression of program phases and (development and/or production) funding must be evident in the FYDP.

Budget Activity 5, Engineering and Manufacturing Development (EMD). Includes those projects in engineering and manufacturing development for Service use but which have not received approval for full-rate

production. This area is characterized by major line item projects and program control will be exercised by review of individual projects. Engineering Development includes engineering and manufacturing development projects consistent with the definitions within DoDD 5000.1. Program elements in this category involve efforts between Milestone II and Milestone III. A logical progression of program phases and (development and/or production) funding must be evident in the FYDP consistent with the Department's full funding policy.

Budget Activity 6, RDT&E Management Support. Includes research and development effort directed toward support of installations or operations required for general research and development use. Included would be test ranges, military construction, maintenance support of laboratories, operation and maintenance of test aircraft and ships, and studies and analyses in support of the R&D program. Costs of laboratory personnel, either in-house or contractor operated, would be assigned to appropriate projects or as a line item in the Basic Research, Applied Research, or Advanced Technology Development program areas, as appropriate. Military construction costs directly related to a major development program will be included in the appropriate element.

Budget Activity 7, Operational System Development. Includes those development projects in support of development acquisition programs or upgrades still in engineering and manufacturing development, but which have received Defense Acquisition Board (DAB) or other approval for production, or production funds have been included in the DoD budget submission for the budget or subsequent fiscal year. All items in this area are major line item projects that appear as RDT&E Costs of Weapon System Elements in other programs. Program control will be exercised by review of individual projects. Program Elements in this category involve efforts that involve post-Milestone III. A logical progression of program phases and (development and/or production) funding must be evident in the FYDP, consistent with the Department's full funding policy.

0503 BUDGET ESTIMATES SUBMISSION**050301 Purpose**

This Section prescribes instructions for the preparation and submission of the budget estimates for the RDT&E appropriations. Unless otherwise specified, these instructions apply to all RDT&E appropriations and to all budgets. See Chapter 1, Section 0104, for specific printing requirements.

050302 Submission Requirements**A. Administrative Requirements.**

1. Classification. Information contained in the budget requests should be unclassified. Where classified information is required in order to explain the program, the classified material will be provided under separate cover and appropriately marked.
2. Exhibits will display the actual fiscal years (i.e., PYs, FY 1997, FY 1998, FY 1999, FY 2000, FY 2001, FY 2002, FY 2003, and FY 2004.) rather than the template entries (i.e., PYs, PY, CY, BY1, BY2, BY2+1, BY2+2, BY2+3, and BY2+4).
3. *If an amended budget is submitted, identify the revised budget exhibits accordingly.*
4. All pages will be annotated with the applicable R-1 line item number and page number within the line item (Item 1-1 of 5, 1-2 of 5, 2-1 of 1, 3-1 of 20, etc.) at the bottom center or bottom right of each page. Be consistent for all pages of the backup book.
5. If printing the RD&TE material in one volume is impractical, the justification material can be submitted by budget activity with the Science and Technology budget activities (BA 1 through BA 3) printed in one volume and the remaining budget activities printed in a separate volume or in individual volumes. Each volume should include an R-1 listing and a table of contents indicating which volume and page the applicable program element can be found. The justification material will be entitled

Fiscal Year 19BY1/19BY2 Budget Estimate Submission
RDT&E Descriptive Summaries, Volume I
February 1999

B. Service-generated and Defense Agency-generated exhibits can be used in lieu of the following exhibits as long as they include all the information required by the exhibits. The exhibits will be aggregated in the following order for each R-1 line item and submitted in R-1 line item order. The required exhibits shall be packaged in the following order, as applicable: R-2 (PE 1), R-2a (PE 1, Project A), R-3 (PE 1, Project A), R-2a (PE 1, Project B), R-3 (PE 1, Project B), etc.

Arrangement of Exhibits - General

R-33	Introduction and Explanation of Contents
R-1	RDT&E Program
R-1C	RDT&E Program - Comparison Report
R-2	RDT&E Budget Item Justification
R-2a	RDT&E Project Justification
R-3	RDT&E Project Cost Analysis
R-32	RDT&E Purchases from DWCF
MDAP	Major Defense Acquisition Programs RDT&E Project Level Data
DD 1391	Military Construction Project Data

C. Facilities Exhibit. For improvements to and construction of government-owned facilities funded in RDT&E, a DD Form 1391, Military Construction Project Data, will be provided separately for each budget year project and any PY or CY projects not previously reported. These exhibits will be included with the program element justification. In addition, a copy of all DD Forms 1391 should be packaged together and a copy provided to the OUSD(C) P/B Investment Directorate (4B915) and to the Military Construction Directorate (3D840). A copy of the form and the instructions are in Chapter 6.

D. MAX Schedule C. OMB Circular No. A-11 has incorporated the requirements for this research and development exhibit into the automated MAX schedule C. Subsequent instructions will be provided by the Director for Investment, OUSD(C) regarding the specific requirements for this submission to OMB's MAX system.

0504 CONGRESSIONAL JUSTIFICATION/PRESENTATION**050401 Purpose**

This Section presents the justification book organization and the exhibit requirement for submission to Congress. Preferred budget exhibit formats can be found in Section 0505. See Chapter 1, Section 0104, for specific printing requirements.

050402 Organization of Justification Books**A. Administrative Requirements.**

1. Classification. Information contained in the budget requests should be unclassified. Where classified information is required in order to explain the program, the classified material will be provided under separate cover and appropriately marked.
2. Exhibits will display the actual fiscal years (i.e., PYs, FY 1997, FY 1998, FY 1999, FY 2000, FY 2001, FY 2002, FY 2003, and FY 2004.) rather than the template entries (i.e., PYs, PY, CY, BY1, BY2, BY2+1, BY2+2, BY2+3, and BY2+4).
3. All pages will be annotated with the applicable R-1 line item number and page number within the line item (Item 1-1 of 5, 1-2 of 5, 2-1 of 1, 3-1 of 20, etc.) at the bottom center or bottom right of each page. Be consistent for all pages of the backup book.
4. If printing the RD&TE material in one volume is impractical, the justification material can be submitted by budget activity with the Science and Technology budget activities (BA 1 through BA 3) printed in one volume and the remaining budget activities printed in a separate volume or in individual volumes. Each volume should include an R-1 listing and a table of contents indicating which volume and page the applicable program element can be found.

B. Justification material will be entitled:

RDT&E Descriptive Summaries for
Fiscal Year 19BY1/19BY2 President's Budget
February 1999
Volume I

C. Service-generated and Defense Agency-generated exhibits can be used in lieu of the following exhibits as long as they include all the information required by the exhibits. The exhibits will be aggregated in the following order for each R-1 line item and submitted in R-1 line item order. The required exhibits shall be packaged in the following order, as applicable: R-2 (PE 1), R-2a (PE 1, Project A), R-3 (PE 1, Project A), R-2a (PE 1, Project B), R-3 (PE 1, Project B), etc.

Arrangement of Exhibits - General

R-33	Introduction and Explanation of Contents
R-1	RDT&E Program (OSD Generated) (Include in the backup book, if available.)
R-2	RDT&E Budget Item Justification
R-2a	RDT&E Project Justification
R-3	RDT&E Project Cost Analysis
DD 1391	Military Construction Project Data

D. Facilities Exhibit. For improvements to and construction of government-owned facilities funded in RDT&E, a DD Form 1391, Military Construction Project Data, will be provided separately for each budget year

project and any PY or CY projects not previously reported. These exhibits will be included with the program element justification. In addition, a copy of all DD Forms 1391 should be packaged together and a copy provided to the Military Construction Directorate (3D840). A copy of the form and the instructions are in Chapter 6.

E MAX Schedule C. OMB Circular No. A-11 has incorporated the requirements for this research and development exhibit into the automated MAX schedule C. Subsequent instructions will be provided by the Director for Investment, OUSD(C) regarding the specific requirements for this submission to OMB's MAX system.

0505 RDT&E APPROPRIATION SUBMISSION FORMATS**050501 Purpose**

The formats provided on the following pages reflect requirements presented in previous sections of this chapter. Formats currently being used within each Service and Defense Agency may be used in lieu of the formats contained in Section 050502 as long as all of the information required by the exhibits in Section 050502 is provided. With this exception and unless modified in an Office of the Under Secretary of Defense (Comptroller) budget submission memorandum, the formats in these exhibits shall be adhered to.

050502 Exhibits in Support of Section 0503 - Budget Estimates Submission

INTRODUCTION AND EXPLANATION OF CONTENTS

1. **General.** This document provides summary information on RDT&E programs for the (Component/Defense Agency Research, Development, Test and Evaluation (RDT&E) program elements and projects in the) FY 19BY1/19BY2 budget. The R-2, R-2a, and R-3 exhibits provide narrative information on all RDT&E program elements and projects.
2. **Comparison of FY 19PY and 19CY Data.** A direct comparison of FY 19PY and FY 19CY data in the R-1 exhibit dated (a year previous) will reveal significant differences. Many of the differences are attributable to the following factors:
 - a. FY 19CY reductions as a result of Congressional action on the appropriation (if applicable).
 - b. FY 19PY funding changes subsequent to October 1, 19CY, including RDT&E Reprogramming Actions and a Supplemental Appropriation (if applicable).
 - c. Reclassification of FY 19PY and FY 19CY data to achieve comparability with the program structure for FY 19BY1/19BY2. (If applicable, add short explanation.)
3. **Relationship of FY 19BY1/19BY2 Budget Structure to the FY 19CY Budget Approved by Congress.**
 - a. Provide a list explaining the origin of all program elements that do not appear on the Base for Reprogramming Action (DD 1414) for RDT&E (DoD Component) which was prepared pursuant to final Congressional action of the FY 19CY DoD Budget Submission to Congress.
 - b. Provide a list of all new starts, identified at the project level.
 - c. Provide a list explaining any program terminations or anticipated terminations.
4. **Classification.** Classified information is identified by use of brackets as []. It is preferred that this information be unclassified. If it is necessary to provide classified information, then it should be submitted separately. Identify the program elements that contain classified information to be submitted separately.
5. **Table of Contents.** The Table of Contents is presented in two different formats - by R-1 line item order and alphabetically. Each of these listings must include the program element number, program element title, R-1 line item number, the appropriate page number, and volume.

Exhibit R-33, Program Element Comparison Summary
(Exhibit R-33, page 1 of 2)

INTRODUCTION AND EXPLANATION OF CONTENTS

<u>Program Element</u>	<u>Remarks</u>
<u>Budget Activity 3: Advanced Technology Development</u>	
0603710N Man-Machine Technology	Provide the PE number and title of the previous PE(s). Example: New program element for effort previously included in Program Elements 0603707N, Acoustics, 0603720N, Communications, and 0603727N, Training.
<u>Budget Activity 4: Demonstration and Validation</u>	
0603209N Underwater Weapons	New program proposed for FY 19BY1 Acceptance Testing
0603382N Battle Group Anti-Air Warfare Coordination	New program element for Project S0324, Battle Group Anti-Air Warfare Coordination, previously included in Program Element 0604303N.
0603506N Surface Ship Torpedo Defense	Existing program element for effort last funded in FY 19PY
0603576N CHALK EAGLE	New program proposed for FY 19BY2
0603590N Wide Aperture Array (Advanced) 0603504N	New program element for Project S0222, Wide Aperture Array previously included in PE
0604228N SH-60 Carrier Variant	New program proposed for FY 19BY1

Exhibit R-1, RDT&E Programs
(Exhibit R-1, page 1 of 2)

Instructions - Exhibit R-1, RDT&E Programs

I. General.

A. Unless otherwise specified, this format will be used to present the Research, Development, Test and Evaluation (RDT&E) program to:

1. The Office of the Under Secretary of Defense (Comptroller) in support of the OSD/OMB budget review.
2. The Congress, in support of the President's budget request.

II. RDT&E Line Item Content.

A. The basic document for presenting RDT&E requirements is the Exhibit R-1, RDT&E Programs, provided to the Congress as supporting justification for budget requests. The R-1 line items are program elements, which define a development effort with specific design, cost, schedule and capability parameters. All costs of basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, and lease/operation of facilities and equipment will be included in appropriate R-1 line items.

B. The R-1 exhibit will contain the following information:

1. Program element title and number. Appropriate security classification coding should be included as part of each program element title listed. All classified material should be bracketed.
2. Line items will be arranged in ascending program element order within each budget activity.
3. Approved funding for the past year (PY), the current year (CY), budget year 1 (BY1), and BY2.
4. Summaries by (1) Budget Activities and (2) FYDP Programs.

Exhibit R-1C, RDT&E Programs - Comparison Report

In addition to the instructions for the R-1, the R-1C Comparison Report will provide a comparison between the last President's budget request and the budget estimate submission (BES) for the BES and between the last President's budget (PB) request and the current PB request for the PB. The comparison should identify the changes for each RDT&E appropriation by R-1 line item and by project. If a line item has more than one project, then a comparison total should be provided at the project level, the R-1 line item, the budget activity total level, and the appropriation level. The report should also identify appropriation and budget activity totals for each fiscal year for the PY through BY2+4 timeframe. If it is necessary to submit classified data, then it should be submitted in a separate report. The unclassified report must match the total for the appropriation/account being submitted. This report will not be included in the justification material provided to the Congress. The R-1C replaces the project listing.

Exhibit R-1C, RDT&E Programs - Comparison Report

(Exhibit R-1, page 2 of 2)

Exhibit R-2, RDT&E Budget Item Justification									Date: Month/Year	
APPROPRIATION/BUDGET ACTIVITY					R-1 ITEM NOMENCLATURE Program Element (PE) Name and No.					
COST (\$ in Millions)	FY PY	FY CY	FY BY1	FY BY2	FY BY2 +1	FY BY2 +2	FY BY2 + 3	FY BY2 + 4	Cost to Complete	Total Cost
Total PE Cost										
Project A Name/No. & subtotal cost										
Project B Name/No. & subtotal cost										
Project C Name/No. & subtotal cost										
Quantity of RDT&E Articles										
A. Mission Description and Budget Item Justification					[The software should be embedded for web site formatting.]					
Provide a description of the program and narrative justification. Identify the military requirement(s) that this program is being designed to meet. Identify new start efforts for the budget year(s) within the program element. Also identify new start efforts since the previous President's budget. This information can be displayed on the R-2a, if one is submitted, rather than on the R-2.										
B. Program Change Summary: (show total funding, schedule, and technical changes for the program element that have occurred since the last submission).										
C. Other Program Funding Summary										
<u>PY</u>	<u>CY</u>	<u>BY1</u>	<u>BY2</u>	<u>BY2+1</u>	<u>BY2+2</u>	<u>BY2+3</u>	<u>BY2+4</u>	<u>To</u> <u>Complete</u>	<u>Total</u> <u>Cost</u>	
P-1 Procurement Line Item No, Name. Provide related funding detail as indicated. Use a continuation page as necessary.										
C-1 Milcon Project No, Name. Provide related funding detail as indicated. Use a continuation page as necessary.										
Related RDT&E: List PE numbers and names. It is not necessary to include the related RDT&E funding profile unless there is a funding dependency between the RDT&E programs.										
D. Acquisition Strategy: *										
E. Schedule Profile. Include the program milestone chart that reflects Engineering Milestones, T&E Milestones, and Other Program Events for all years of the program, not just through BY2. *										
*Not required for Budget Activities 1, 2, 3, and 6.										
If an Exhibit R-2a is required, complete only sections A and B on the R-2 (summarize for the program element). With the exception of the program change summary, all sections are required on the R-2a for each project.										

R-1 Shopping List - Item No 20-1 of 20-4

Exhibit R-2, RDT&E Budget Item Justification
(Exhibit R-2, page 1 of 4)

Instructions
Exhibit R-2, RDT&E Budget Item Justification
Exhibit R-2a, RDT&E Budget Item Justification (Project)

General. An Exhibit R-2 shall be prepared for each program element. For budget activities 4, 5, and 7, an Exhibit R-2a shall be prepared for each project that has funding greater than \$1 million in budget year 1 or budget year 2. Care should be taken to see that exhibits are clear and concise. Abbreviations shall be identified on the page on which they occur.

These pages shall be printed on 8 1/2 by 11 inch paper in landscape format. Classified material shall be submitted separately so that the RDT&E backup book can be submitted in an unclassified version.

Date. Include the month and year of submission of the exhibit. If an Amended Budget is submitted, identify the date of the revised submission.

Appropriation (Treasury) Code Budget Activity. Identify the appropriation and budget activity. The budget activity must match the RDT&E service annex and data base lock position.

R-1 Item Nomenclature. Identify the name of the R-1 line item.

Program Element Number. Identify the program element.

Project Number and Nomenclature. Identify the project number and nomenclature.

Resource Summary. The Exhibit R-2 shall include a fiscal resource summary total for the total program element and, if there is more than one project in that program element, a fiscal resource summary for each project in that program element. The Exhibit R-2a shall include a resource summary for each project with funding greater than \$1 million in budget year 1 or budget year 2. Ensure the funding matches the RDT&E service annex and data base lock position and that total costs for Acquisition Category 1 programs are consistent with Selected Acquisition Reports. If this program element represents continuing similar efforts without distinct program or project initiations and completions, the "To Complete" and "Total Program" columns shall be marked "Continuing."

Test Articles. Include the quantity of RDT&E test articles that is being procured each year. Show the quantity in the first year of funding for that quantity of end items. Identify in the description the test articles (engineering development models, test articles, low rate initial production test articles, government furnished equipment articles, etc.) that are being procured and why. *The cost, by fiscal year, associated with the procurement of the test articles, may also be shown as a non-add entry.*

Mission Description and Budget Item Justification. The R-2 shall include a description and justification of the efforts included in the program element. The R-2a shall include a description and justification of the efforts included in the specific project. The justification narratives shall be included for the past year (PY), the current year (CY), and the budget year 1 (BY1) and BY2 in a bullet format. At least three, and preferably more, activities, and the associated funding, shall be identified for each program element (or project if on the R-2a) in each fiscal year. The total of funding reflected in the bullet narratives should match the total of program element (or project) funding. Identify when a program element or a project was previously funded in a different program element and so annotate in the index/cross track. If program element restructuring and project realignment diminish the value of cumulative fiscal resource information for FY PY, this column shall be footnoted with an explanation of the program elements that were restructured and realigned. Identify the test articles (engineering development models, test articles, low rate initial production test articles, government furnished equipment articles, etc.) that are being procured and why.

(Exhibit R-2, page 3 of 4)

Instructions - Exhibits R-2 and R-2a (Continued)

Program Change Summary. If there have been changes to the total funding, schedule, or technical parameters since the previous President's budget submission, the Exhibit R-2 shall include a concise narrative summary explaining the changes in the total program element.

Other Program Funding Summary. Development projects often lead to subsequent development phases, production, and military construction. Also, some projects may depend on concurrent development in other projects. These related efforts and the funding profiles for other appropriation efforts shall be identified by appropriation, budget activity, R-1 line item and program element, and P-1 line item title and number. If there are funding dependencies among related research, development, test, and evaluation programs, then the funding profiles for these related programs shall be included.

Acquisition Strategy. An explanation of acquisition, management, and contracting strategies shall be provided for each project.

Schedule Profile. A milestone chart shall be provided for each project shown on the R-2 exhibit. It is preferred that the milestone chart used by the program office be submitted. The chart should display all planned major milestones and test and evaluation events, such as LRIP approval, Milestone III, IOC, Developmental Test and Evaluation, and Operational Test and Evaluation for the total program. For non-acquisition programs, meaningful data should be provided. The software for the milestone chart should be embedded for web site formatting.

Formats currently being used within each Service and Defense Agency may be used in lieu of this format.

R-1 Shopping List - Item No 20-4 of 20-4

(Exhibit R-3, page 2 of 4)

Instructions - Exhibit R-3, RDT&E Project Cost Analysis

General: The R-3 exhibit is required only for projects with funding greater than \$1 million in budget year 1 or budget year 2 for programs funded in budget activities 4, 5, and 7. A separate R-3 exhibit shall be prepared for each project in an applicable R-1 line item. These exhibits shall be printed on 8 1/2 by 11 inch paper in landscape format. If a program element is not divided into projects, then the program element itself is defined as a project for purposes of submitting an R-3 exhibit, and the R-3 exhibit and instructions apply to the entire program element. Classified material shall be submitted separately so that the RDT&E backup book can be submitted in an unclassified version.

Date: Identify the month and year of submission of the exhibit. If an Amended Budget is submitted, identify the date of the revised submission.

Appropriation/Budget Activity. Identify the appropriation and budget activity. The budget activity must match the RDT&E service annex and data base lock position.

R-1 Item Nomenclature: Identify the name of the R-1 line item.

Program Element Number: Identify the number of the program element.

Project Number and Nomenclature: Identify the project number and nomenclature on each R-3 page.

Project Cost Categories. Cost information shall be provided for each project with funding greater than \$1 million in budget year 1 or budget year 2, with project costs broken down into cost categories. Sample cost categories shown are typical of various types of defense research and development efforts. Costs shall be distributed among categories in accordance with the project work breakdown structure (WBS) or other categories used by the project office in project execution. The illustrated sample cost categories may be used if these correspond to the project's structure; however, there is no requirement to use cost categories other than those used by the project office in project execution. Sample cost categories not used in project execution need not be included in the exhibit for that project. If the program office tracks efforts by major contract, then display the information accordingly. The cost categories shall be separated into 4 information categories as follows:

Product Development. Efforts associated with the delivery of a fully integrated system that are in direct support of the system and essential to the development, training, operation, and maintenance of the system. Include all efforts directly supporting system development and delivery to include primary contracts, major component contracts, contracted services, in-house support, and government furnished property. Contracts or government efforts greater than \$1 million in any displayed budget year shall be reported individually.

Support Costs. Efforts not directly associated with the delivery of the primary product, including technical engineering services, research studies, and technical support not related directly to product development or to testing and evaluation. Contracts or government efforts greater than \$1 million in any displayed budget year shall be reported individually.

Test and Evaluation. Efforts (other than those included within contracts or government efforts included above) associated with engineering or support activities to determine the acceptability of a system, subsystem, or component. Contracts or government efforts greater than \$1 million in any displayed budget year shall be reported individually.

Management Services. Efforts associated with services provided in support of program office management and administration processes such as: program oversight, resource justification, budget and programming, milestone and schedule tracking. Federally Funded Research and Development Centers (FFRDCs) are in this category. Contracts or government efforts greater than \$1 million in any displayed budget year shall be reported individually.

(Exhibit R-3, page 3 of 4)

Instructions - Exhibit R-3, RDT&E Project Cost Analysis (Continued)

Government Furnished Property. Property, such as hardware, software, or information, which the government is contractually obligated to furnish a contractor or government performing activity shall be identified. Provide a brief identification of the item to be provided, and the contractor or government activity providing the item. Provide estimated date that the government furnished property will be provided to the requiring contractor or activity. Provide the name of the requiring contractor or activity.

Award Fees. Identify amounts budgeted for award fees and indicate contractor performance and percentage of award fees actually awarded in past award fee periods.

Contract Method/Type or Funding Vehicle. The following codes shall be used to identify the contract method, contract type, and funding vehicle:

<u>Contract Type</u>	<u>Contract Method</u>
FP - Fixed Price	SS - Sole Source
CPIF - Cost Plus Incentive Fee	C- Competitive
FPI - Fixed Price Incentive	
CPAF - Cost Plus Award Fee	
CPFF - Cost Plus Fixed Fee	
FFP - Firm Fixed Price	

Funding Vehicle (when a government agency is the performing activity)

MIPR - Military Interdepartmental Purchase Request
PO - Project Order
WR - Work Request
Allot - Allotment
Reqn - Requisition

Performing Organizations. Identify each contractor and government or performing activity and the location for each effort greater than \$1 million in any of the displayed years.

Total PY Cost. Provide actual amounts for the total of all years before the current year (CY).

CY - BY2. Provide actual or budget amounts for each year for current year (CY), budget year (BY1), and BY2.

Award or Obligation Date. Provide actual or estimated date of contract award or the estimated date that funds will be obligated to government performing activities.

To Complete. Provide the amount required to complete this effort beyond BY2.

Total Program. Provide the cumulative total of all budgeted funds for the program (including funds obligated/budgeted for PYs, CY, BY1, BY2, and to complete). Provide a comment in the Remarks section when the Project Office Estimate at Completion (EAC) differs from the total cost. Also provide a comment when the Performing Activity EAC differs from the Project Office EAC.

Target Value of Contract. Identify the target value of the contract and explain those cases where total cost differs significantly. For example, if the budget is at ceiling value of the contract vice target value or if budget is "program manager's best estimate" vice target value, then explain.

Formats currently being used within each Service and Defense Agency may be used in lieu of this format.

Instructions - Exhibit R-32, RDT&E Purchases from DWCF

1. Purpose. The purpose of this exhibit is to estimate the amount of new orders planned to be sent to the Defense Working Capital Funds (DWCF) business areas. The RDT&E appropriations will report estimates of funding for DWCF business areas on the Purchases from DWCF Exhibits. For each appropriation, the Component will estimate by DWCF business area the amount of new orders planned to be sent to DWCF business areas for the CY, BY1 and BY2. The amounts provided should reflect the amount shown by the DWCF activity on the Fund-11 exhibit. Price growth will reflect the amount of inflation used for each fiscal year so that the change in DWCF rates is clearly identified. Program growth will show the change in program absent the effect of inflation. For further guidance, see the instructions for completing the OP-32 exhibit (Chapter 030402). A copy of the R-32 exhibit will also be provided directly to the Revolving Funds Directorate, Rm 3B866, the Pentagon.

2. Specific Instructions:

In addition to the guidance above and in the OP-32 Exhibit instructions, the following provides by business area, the types of purchases reported on the R-32 exhibits:

- (1) Army, Navy and Air Force Supply Management: obligations for supply purchases from wholesale and retail supply organizations.
- (2) DLA Supply Management: obligations for purchases of consumable supplies.
- (3) Fuel Purchases (Defense Fuel Supply Center): obligations for fuel for purchases of fuel for aircraft, automobiles, non-nuclear ships, trucks, and heating fuel.
- (4) US Transportation Command: travel and transportation obligations for movement of people or goods by military air (Air Mobility Command owned C-17, C-5, or C-141 aircraft or leased commercial aircraft) and military sealift (through Military Traffic Management Command operated port facilities, in Military Sealift Command owned or operated ships).
- (5) Defense Finance and Accounting Service (DFAS): obligations for services rendered by DFAS.
- (6) Communications Services (DISA): obligations to pay for services provided by the for the Defense Switched Network (formerly AUTOVON, AUTODIN, Bulk Encrypted Communications, Defense Switched Network, Washington Area Wideband System, Defense Information Systems Network, and Defense Data Network) and for information processing, computer services, and software development support provided by the Defense Information Technology Services Organization (DITSO).
- (7) Fund Purchases not reported on R-32: Do not report purchases from the following Fund business areas: Defense Logistics Agency Distribution Depots; Navy Distribution Depots; Commissary Operations; and the Defense Reutilization and Marketing Services.

(Exhibit R-32, page 3 of 3)

MAJOR DEFENSE ACQUISITION PROGRAMS (MDAP)
RDT&E PROJECT LEVEL (PL) DATA

Each Component must submit for each designated MDAP/pre-MDAP an automated RDT&E Project Level Funding (PL) data base that reconciles to the RDT&E Annex and FYDP data bases and the supporting congressional justification material. The RDT&E PL data base should be submitted for past year (PY), current year (CY), budget years (BY1 and BY2), and FYDP years (BY2+1 through BY2+4), and should be formatted as specified below. The RDT&E Project Level funding data should be submitted as 2 flat ASCII files on either a 3 1/2 inch floppy, high or double density disk and submitted directly to OUSD(A&T), Mr. Steve Dratter, Room 1E474, telephone (703) 697-8020.

<u>DATA</u>	<u>PROJECT TITLE</u>	<u>COLUMNS</u>
PE: Major Force Program		1:2
PE: PE ID		3:7
PE: Service Code		8:10
Project Number		11:16
Project Title		17:76
Project Classification		77:77

<u>PROJECT FUNDING</u>	
Budget Activity Code	1:2
PE: Major Force Program	3:4
PE: PE ID	5:9
PE: Service Code	10:12
Project Number	13:18
FY	19:22
Budget/Funding Request (in thousands)	23:32
Project Classification	33:33
Program Number (Identified on OUSD(A&T)'s MDAP listing).	34:36

Formatting Guidelines:

1. Left justify Service Code and Project Number.
2. Right justify Dollar Amounts and **DO NOT** use commas.
3. FY should be formatted as 1996, 1997, etc.
4. Data are requested for PY through BY2+4 (e.g. FY 1998 - FY 2005).
5. All alphanumeric characters are to be in UPPERCASE.

Old PE to New PE Crosswalk Data: A data file containing only those Program Elements (PEs) which have been renumbered since the last submission of the FYDP/RDT&E Annex must be submitted. It is to be submitted as a flat ASCII file on a 3 1/2 inch floppy, high or double density disk directly to OUSD(A&T), Mr. Steve Dratter, Room 1E474, telephone (703) 697-8020.

<u>DATA</u>	<u>OLD TO NEW PE</u>	<u>COLUMNS</u>

060504	Exhibits in Support of Section 060303 - Budget Estimates Submission/ Homeowners Assistance	37

CHAPTER 6

MILITARY CONSTRUCTION/FAMILY HOUSING APPROPRIATIONS**0601 GENERAL****060101 Purpose**

A. This chapter provides instructions applicable to budget formulation and congressional justification for Military Construction, Family Housing and Homeowners Assistance appropriations.

B. The following appropriations and accounts are covered:

Section**060201 Military Construction**

- Military Construction, Army
- Military Construction, Navy
- Military Construction, Air Force
- Military Construction, Defense-Wide
- Military Construction, Army National Guard
- Military Construction, Air National Guard
- Military Construction, Army Reserve
- Military Construction, Navy Reserve
- Military Construction, Air Force Reserve

060202 Family Housing

- Family Housing, Army
- Family Housing, Navy & Marine Corps
- Family Housing, Air Force
- Family Housing, Defensewide

060203 Homeowners' Assistance

- Homeowners' Assistance Fund, Defense

060304 NATO Security Investment Program

- North Atlantic Treaty Organization (NATO) Security Investment Program

060305 *NATO Security Investment Program*

- *NATO Enlargement*

060306 *Family Housing Improvement Fund***060102 Submission Requirements**

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 6 covers specific back-up material requirements for the above accounts. The above appropriations/accounts should also submit any applicable exhibits required in Chapter 19 - Special Analyses.

060103 Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 6 provides additional specific guidance with regard to the back-up material required for Military Construction, Family Housing and Homeowners Assistance appropriations.

060104 References

Section 010210 provides policies and definitions concerning costs that are to be financed by the Military Construction appropriations as opposed to other appropriations for R&D facilities.

060105 Family Housing Program Policies and Guidelines**A. Purpose**

1. This section outlines the service aspects of the Family Housing Program; establishes policies and guidelines for program financial management, budgeting, accounting, and reporting; and assigns responsibilities for executing the program. Specific procedures for the administration and management of program funds are set forth in section 060106.

2. The Family Housing Program encompasses Military Family Housing as defined and authorized by the provisions of Title 10, United States Code, Chapter 169, and includes all DoD Component family housing in the Defense Family Housing Property Account, leases of real property utilized by DoD Components for family housing, and associated family housing support services programs.

B. Policy

1. It is DoD Policy: 1) to provide military family housing for military families and for eligible civilian families only when suitable housing in the community does not exist; 2) to provide for the housing and support services, as authorized by law, that are necessary to meet the requirements of the Department of Defense; 3) that the program shall be financed and managed in the most cost effective and efficient manner possible in order to support these requirements and to maximize the use of available program resources; 4) that the program shall include the provision of assistance to all military personnel and certain eligible civilians in locating and utilizing privately owned housing including leasing; 5) that the program shall include, within available resources, the provision of Government-owned or leased family housing and furnishings (referred to as Defense Family Housing Property); and 6) that the program shall include the efficient and effective financial and program management of Defense Family Housing Property, including acquisition, operation, improvement, maintenance, debt financing, leasing, and family housing support programs.

C. Responsibilities

1. The Under Secretary of Defense (Acquisition and Technology) (USD(A&T)) is responsible for program management as set forth in DoD Directive 4165.63 and DoD 4165.63-M. The Under Secretary of Defense (Comptroller) (USD(C)) is responsible for financial management, program budget policies, program accounting policies, and financial reporting. As prescribed by the USD(C), the Director, Defense Finance and Accounting Service, is responsible for central accounting and financial reporting for the program. The Secretaries of the Military Departments and the Directors of the Defense Agencies, as prescribed by DoD Directive 4165.63, are responsible for execution of the program for personnel under their respective jurisdictions, including program and financial management, accounting and reporting.

2. In the financial management and execution of the program, DoD Components shall conduct program budget formulation, presentation, and execution in accordance with the guidance and provisions contained in Chapter 6 of this manual and adhere to the program accounting and financial reporting guidance and provisions contained in Volume 4 of this manual.

D. Objectives and Procedures

1. This section outlines the objectives and procedures of the Family Housing Program and is divided into the following subsections: assistance in locating and utilizing privately owned family housing; Defense Family Housing Property; and, management of Defense Family Housing Property.

a. Assistance in Locating and Utilizing Privately Owned Family Housing. Assistance provided to DoD personnel to obtain privately owned family housing under the program includes housing referral service including administration of private rental housing for DoD personnel overseas; DoD leasing of private housing; rental guarantee payments pursuant to section 507, Public Law 88-174, as amended, and mortgage guarantee payments under sections 809 and 810 of the National Housing Act, as amended (OMB scoring of Sections 2667 and 2836 for Family Housing is at the end of this section); and, service members' mortgage insurance payments on their privately owned housing made pursuant to section 222 of the National Housing Act, as amended.

b. Defense Family Housing Property. All DoD-owned or DoD-controlled physical property described below will be managed and controlled under the Family Housing Program. The properties will be recorded in a property account entitled the Defense Family Housing Property Account. Guidance for the maintenance of property accounting records is contained in Volume 4 of this manual. A continuing permanent accounting record will be maintained of the real property included in each installation's Family Housing Property Account. Appropriate classifications will be entered on the records to distinguish between real and personal property. Property will be removed from the Defense Family Housing Property account when the property is disposed of (as DoD property), or when it is transferred to DoD non-family housing use. The Report Control Symbol assigned to the special record keeping requirements is DD-COMP(AR)1501.

(1) The Defense Family Housing Property Account includes the following properties, under the jurisdiction of the Department of Defense, to which the Government has a right, title, or interest, with exceptions noted in paragraph 060105D.1.b.(2) below.

(a) All types of family dwelling units and mobile home park facilities, without regard to the military status of the occupant and including housing that is: located on or off station, owned or leased, occupied or unoccupied; situated in dispersed locations or in community-type areas; located at an active, inactive, standby, or reserve facility; or, operated or maintained by the Government, directly or by contract.

(b) Nondwelling buildings directly associated with family dwelling units or a family housing area, including structures outside the housing area required solely for family housing support.

(c) Roads, driveways, walks, and utility systems which primarily serve family housing units or areas.

(d) The grounds area of a group of family housing units and the yards of dispersed family housing units or areas.

(e) Community facilities which are integral to a family housing area and are available for use only by family housing area residents and their house guests.

(f) Fixtures and other appliances or equipment in a housing unit that are either integral components or movable items, such as: refrigerators, kitchen ranges and, when authorized, food freezers, room air- conditioners, washing machines, clothes dryers, dishwashing machines, garbage disposals, exhaust fans, roof or attic television antennas; and those appliances provided for family housing rented privately by DoD personnel in areas outside the conterminous United States, pursuant to DoD 4165.63-M.

(g) Furniture, furnishings, and other personal property that are directly associated with providing and supporting family housing units, including personal property provided for use outside the conterminous United States, pursuant to DoD 4165.63-M.

(2) The Defense Family Housing Property Account excludes the following properties, irrespective of the Government's right, title, or interest therein:

(a) Aerial roads, public walks, utility lines, and utility mains that may pass through or in front of family housing locations but serve those locations as an incidental or secondary purpose to other station requirements.

(b) Facilities similar to hotels or motels, which are provided for temporary family occupancy.

(c) Community facilities which are not integral to a family housing area or are available for use by other than family housing area residents and their house guests.

(d) Educational facilities.

(e) Telephone and other communication facilities for official use, and telephone facilities for unofficial use, installed in a family housing unit.

(f) Community Antenna Television distribution service by other Government agency, commercial cooperative, or private enterprise.

(g) Properties financed by and supporting the Defense Security Assistance Program.

(h) Food service facilities.

(I) Facilities used primarily for religious services or religious activities.

c. Management of Defense Family Housing Property. Management undertakings, which arise in connection with the DoD responsibility for and jurisdiction over Defense Family Housing Property, include:

(1) The acquisition, construction, and replacement of family housing facilities and the preliminary planning and design studies on prospective projects, including housing requirement surveys.

(2) The conversion of other real property facilities to family housing quarters.

(3) The upgrading to "adequate public quarters" of those family dwelling units designated as rental, substandard, or inadequate.

(4) The alteration of, or addition, expansion, or extension to, family housing facilities.

(5) The outfitting of family housing facilities, as defined in paragraph 060105D.1.b above, with fixtures and other equipment that are either integral components or movable items of major equipment of a housing unit, including major appliances; and furniture, furnishings, and other personal property. This function includes maintenance and repair.

(6) The maintenance and repair of family housing facilities.

(7) The furnishing of the following services to family housing facilities: utilities services, except telephone service and cable television; refuse collection and disposal; insect and rodent control; snow removal; handling and moving Government-owned furnishings; police and fire protection; and, administrative, supervisory and clerical services related to the performance of services rendered the family housing facilities.

(8) The maintenance and security of family housing property declared excess to DoD needs, which rests with the DoD Component until the Department of Defense is relieved of this responsibility. The following rules and principles apply:

(a) If the property is being disposed of by the General Services Administration, the transfer of financial responsibility to GSA will be in accordance with Federal Property Management Regulations, Part 101-47, 402.

(b) When the Department of Defense recommends to GSA that disposal of excess property be delayed because of economic considerations and a contract has been made with a local agency to rent the property and to protect and maintain it, the residual financial responsibility for maintenance and security rests with the Department of Defense.

(c) It has been agreed with the GSA that, in interpreting property disposal regulations, the Department of Defense will be deemed to have declared the property excess to GSA on the date that the protection and maintenance contract is discontinued.

OMB Scoring of Sections 2667 and 2836 for Family Housing

	<u>Section 2667</u>	<u>Section 2836</u>
Term of land lease	50 years	25 years with 25 year government renewal option
Rental rate for government owned land	fair market	none, unless government terminates housing contract
Priority given to military families for occupancy	yes; below market rents for military families	same as Section 2667
Rental guarantee	None	97%
General public units	Contractor may build additional units for rent to public	Available to public when military does not meet rental guarantee
Termination or base closure	Government waives termination right. Contractor would remain in property for remainder of lease, renting to the general public while paying fair market rental to government	Government can terminate guarantee. Contractor paid termination costs specified in contract, contractor remains in property, paying rent as in section 2667
Appropriation restrictions	None	Subject to annual appropriations
First year scoring	BA and Outlays: fair market land rental offsetting receipts (mandatory)	BA: termination liability included in contract. Outlays: none (discretionary)
Subsequent year scoring	BA and Outlays: fair market rental offsetting receipts (mandatory)	BA and Outlays: Government provided utilities/services and possible rental guarantees (discretionary)
Budget Process	Projects included in of budget and submitted to OMB for review of economic viability	Same as Section 2667

060106 Family Housing Procedures for Administration and Management of Program Funds**A. Purpose.**

This section outlines the procedures for the administration and management of funds appropriated or otherwise made available to the Department of Defense for the Family Housing Program including: authorized reimbursements; application of proceeds from sales or handling of excess family housing for debt service; administration of separate “fixed year” and “annual” accounts; and clarification and amplification of certain financial administration procedures.

B. Treasury Accounts

1. For construction and improvement of family housing facilities, funds are appropriated to remain available for five years. For Operation and Maintenance (O&M) of family housing facilities, funds are appropriated with annual account limitations. These and other funds made available for family housing are administered under the Treasury accounts outlined in section 010603 of this manual.

2. In accordance with current Federal budget concepts, transactions relating to debt assumption and repayment of debt principal are recorded and reported in a “Borrowing Account.” Other family housing financial transactions are treated in an expenditure account (hereafter referred to as the “Budget Account”). Reports to the Treasury Department, as specified in Volume 4 of this manual, will identify transactions under these accounts by means of a code prefix to the symbols as follows: (87) Borrowing Account decreases and (97) Borrowing Account increases.

C. Financing the Family Housing Program**1. The Family Housing Program will be financed from:**

a. Those funds primarily appropriated for family housing purposes.

b. Authorized reimbursements and collections from housing rentals and services furnished as set forth below:

(1) Charges will be made for rentals and services furnished certain occupants or users of family housing facilities. The amount of rent charged shall be determined in accordance with the provisions of DoD 4165.63-M. Disposition of the proceeds of handling or disposal of excess family housing property is treated in paragraph C.1.c of this section.

(2) Those collections for rents and services which will be utilized to finance family housing expenses in accordance with applicable statutes are listed below. Such reimbursements will be utilized within the financial authority issued by the Deputy Comptroller (P/B) but limited to the amount of reimbursements earned.

(3) Proceeds received for rental of Defense housing shall be utilized within the applicable DoD Component family housing account to defray O&M expenses. If the housing is rented with Government furniture provided, the combined total charge for shelter rent and furniture rent shall be treated as indicated above.

(4) Proceeds from the sale of utilities and services will be utilized within the applicable DoD Component family housing account to defray O&M expenses in accordance with the authority set forth in 10 U.S.C. 2481.

(5) Collections from other agencies related to O&M charges pursuant to 31 U.S.C. 686 will be effected.

(6) When nonexcess family housing property is leased, pursuant to 10 U.S.C. 2667, disposition of moneys received for rents will be deposited to the U.S. Treasury as miscellaneous receipts. Moneys received for utilities or services will be deposited to the applicable DoD Component family housing account.

(7) For accounting purposes, those reimbursements described above to be used for O&M purposes will be identified as financing the operations portion of the O&M expenses.

(8) All collections for family housing rents or services, other than those described above and in paragraph C.1.c of this section will be deposited to Treasury Miscellaneous Receipt Account 1830, "Rent of Real Property not Otherwise Classified," under a citation which includes the appropriate DoD Component two-digit prefix symbol. Such collections include those to cover costs of repairing damages to family housing facilities (including replacement of items) caused by family housing occupants.

c. Other funds which are available from disposal of excess family housing property as set forth below:

(1) In the case of family housing in the United States disposed of pursuant to title II of the Defense Authorization Amendments and Base Closure and Realignment Act (Public Law 100-526) or the Defense Base Closure and Realignment Act of 1990 (Public Law 101-510), the proceeds should be deposited in the Department of Defense Base Closure Account 1990.

(2) In the case of family housing disposed of under authorities contained in 10 U.S.C. 2871-2885, as added by section 2801 of the National Defense Authorization Act for FY 1996, for purposes of using the proceeds to carry out activities authorized under those provisions, the proceeds should be deposited in the DoD Family Housing Improvement Fund.

(3) In the case of family housing overseas disposed of under circumstances which fall within the provisions of section 2921 of Public Law 101-510, as amended, the proceeds should be deposited in the Defense Overseas Military Facility Investment Account.

(4) In the case of family housing disposed of under other circumstances, the proceeds should be deposited in the appropriate military family housing account.

2. Family Housing Program costs will be programmed, budgeted and accounted for by the DoD Component having responsibility for the Defense installation or housing area, regardless of the DoD Component of the housing occupant. Reimbursement for such costs will not be made between DoD Components.

3. Financing will be on a program-year basis. The detailed program-year criteria for the major functional categories and for the immediate subordinate accounts is set forth below:

a. The program year for the undertakings (projects for new construction, acquisition of housing, construction improvements, and minor construction) shall be the same as the year of the applicable annual Military Construction Authorization Act.

b. After the program year for a specific project is established as provided above, the financing and related appropriation accounting for that project will be administered under the designated program year, irrespective of when the work is undertaken or completed.

c. For planning and design, which is a "level of effort" type activity, the following program year concept applies:

(1) Budget estimates for the budget year and each future year will include the planning and design work programmed to be placed on contract or intragovernmental order during the program year and the planning and design work expected to be performed with in-house capabilities during the program year. The dollar value of a planned program will be determined on the basis of estimated obligations to be incurred during the program year for the program scope embraced by (a) and (b), above.

(2) Obligation authorities will be requested and issued by program year on the basis of obligations estimated to be incurred as a result of the issuance during the program year of contracts or other orders which constitute valid obligations pursuant to Volume 4 of this Regulation for planning and design work, irrespective of when the work is to be performed and the accomplishment during the program year of planning and design work with in-house capability. Obligations will be charged by program year on these same bases.

(3) Adjustments to obligations charged against a prior program year will be made only to the extent of an adjustment in the amount of an obligation recorded for specific work ordered in that prior program year or deobligations to reflect cancellation of work ordered in that prior year. New obligations for planning and design work for a particular project which are in addition to that ordered in prior program years for that project are charges against the program year in which those new obligations are incurred.

d. For rental guarantee payments, the program year shall be the fiscal year in which the rental guarantee payments are obligated. No new obligations may be incurred under a program year obligation authority after the close of that program fiscal year. Adjustments to obligations for rental guarantee payments may be made as necessary to reflect actual obligations incurred during the fiscal program year in accordance with existing procedures covering adjustment to annual accounts.

e. The major functional categories of operation and maintenance and debt payment are considered “level of effort” type activities. Program planning and budget estimates for these categories will be developed in accordance with that concept. Obligational authority for operation and maintenance and debt payment will be requested and issued by program year and will not be available for new obligations after the close of the fiscal year for which such authority is issued. Adjustments to obligations for operation and maintenance and debt payment may be made as necessary to reflect actual obligations incurred during the fiscal program year in accordance with existing procedures covering adjustment to annual accounts.

4. Economic analysis will be applied to all program investment proposals in accordance with this manual which sets forth budget submission requirements.

5. Apportionment of funds and issuance of financial authorities will be obtained as follows: each DoD Component (except Defense Agencies) shall submit to the Deputy Comptroller (P/B) an apportionment request, then the Deputy Comptroller (P/B) will issue specific financial authority to the DoD Components concerned in such amounts and at such levels as appropriate for efficient and economical administration of the Family Housing Program.

6. For the Construction category, OSD program approval and obligating authority will be provided by fiscal year, generally at the construction element level (immediate subordinate account level) or at project level where circumstances warrant. Volume 3 of this Regulation defines the scope of realignment authority delegated to the DoD Components. All program/fund realignments will be reported in accordance with Volume 4 of this Regulation and this volume.

7. Obligations, incurred costs, accrued expenditures, accrued revenues, disbursements and receipts will be recorded and reported in accordance with Volume 4 of this Regulation. When another appropriation, e.g., Operation and Maintenance, initially incurs a funded cost, the applicable DoD Component family housing account will be billed at least monthly. Obligations, incurred costs, accrued expenditures and disbursements will be charged to the applicable accounts.

8. The balance due on indebtedness previously assumed should be in a “Borrowing Account” in conformance with Federal budget concepts.

a. The acquisition of property will be recorded in accordance with Volume 4 of this Regulation. The amount of the mortgage assumed will be recorded as an increase in the “Borrowing Account” and will be reported to the Treasury under Code (97).

b. Payments on mortgage principal will be recorded as decreases in the Borrowing Account (Treasury Code (87)) and in accordance with Volume 4 of this Regulation. Payment of debt principal will be reported in separate format as prescribed in Volume 4 of this Regulation.

c. Receipts from sale, lease, or handling of excess property will be reported in separate format as prescribed in Volume 4 of this Regulation.

0602 UNIFORM BUDGET AND FISCAL ACCOUNTING CLASSIFICATION**060201 Military Construction Appropriations**

Programming, budgeting, financing and accounting for the Military Construction Program will be accomplished under an account structure uniformly used for these purposes by all DoD Components. The uniform account structure and scope of each account prescribed for the administration of the Military Construction Program are as follows:

A. Major Functional Category: Construction

1. Immediate Subordinate Account: Major Construction. Includes construction projects authorized under 10 U.S.C. 2802 for the purposes of erection, installation, or assembly of a new facility; the addition, expansion, extension, alteration, conversion, or replacement of an existing facility; or the relocation of a facility from one installation to another. Includes equipment installed and made a part of such facilities, and related site preparation, demolition, excavation, filling and landscaping, or other land improvements.

2. Immediate Subordinate Account: Minor Construction. Includes any urgently required construction project not otherwise authorized by law having a cost equal to or less than \$ 1,500,000. However, if the military construction project is intended solely to correct a deficiency that is life-threatening, health-threatening, or safety-threatening, a minor military construction project may have an approved cost equal to or less than \$3,000,000. Minor construction projects costing more than \$500,000 may not be carried out unless 10 U.S.C. 2805 requirements are met. This includes advance approval by the Secretary concerned and notification to the Congress. An unspecified military construction project costing not more than \$500,000 may be funded from appropriations available for operation and maintenance. However, if the project is intended solely to correct a deficiency that is life-threatening, health-threatening, or safety-threatening, up to \$1,000,000 may be funded from operation and maintenance accounts.

3. Immediate Subordinate Account: Planning and Design. Includes architectural and engineering services, construction design, planning, study, working drawings, specifications and estimates for construction projects. 10 U.S.C 2807 pertains to architectural and engineering services and construction design.

a. Design Status. Projects using parametric cost estimates should be considered zero (0) percent designed. Projects using the traditional method of design, being designed in-house, using a standardized design, or site adapting a previous design should use the milestone chart below to gauge their design status.

<i>1% Design Complete:</i>	<i>Design instructions issued to major command.</i>
<i>2% Design Complete:</i>	<i>Major command design instructions issued to design agent.</i>
<i>3% Design Complete:</i>	<i>Notice to proceed issued to architect/engineering firm (A&E) by the design agent.</i>
<i>30% Design Complete:</i>	<i>Concept plan, early preliminary working drawings, design analyses, and outline specifications issued by the designer.</i>
<i>35% Design Complete:</i>	<i>Concept or early preliminary review comments forwarded to the design agent.</i>
<i>60% Design Complete:</i>	<i>Regular preliminary working drawings, design analyses, and updated cost estimate and outline specifications issued by the designer.</i>
<i>65% Design Complete:</i>	<i>Regular preliminary review comments forwarded to the design agent</i>

90% Design Complete: Final design (working drawings, design analyses, cost estimates, and specifications) completed by the designer.

95% Design Complete: Final design review comments forwarded to the design agent.

100% Design Complete: Corrected final design accepted by the DoD Component.

4. Immediate Subordinate Account: Supporting Programs. Includes Defense access roads and land acquisitions.

B. Major Functional Category: North Atlantic Treaty Organization Security Investment Program

Includes contributions for the United States share of the cost of multilateral programs for the acquisition and construction of military facilities and installations (including international military headquarters) and for the related expenses for the collective defense of the North Atlantic Treaty Area. 10 U.S.C. 2806 pertains to contributions for North Atlantic Treaty Organization Security Investment Program.

060202 Family Housing

Programming, budgeting, financing and accounting for the Family Housing Program will be accomplished under an account structure uniformly used for these purposes by all DoD Components. Such account structure is designed and will be administered so as to provide within each of those accounts for program and financial administration of the Family Housing Program as necessary for the effective administration of the family housing program on a Defensewide basis and compliance with applicable statutes. The uniform account structure and scope of each account prescribed for the administration of the Family Housing Program are as follows:

A. Major Functional Category: Construction

1. Immediate Subordinate Account: New Construction (by Installation and Project). Includes the erection, installation, assembly, relocation or replacement of single or multifamily dwelling units; related land acquisition, site preparation, excavation, filling and landscaping, or other land improvements. Also included are the initial outfitting during construction of a dwelling unit with fixtures and other requirements which are either integral components or movable items of major equipment thereof, including major appliances; and architectural and engineering supervision and inspection of construction. *Includes design costs of contractor to perform a turnkey contract.* New construction also includes the construction of items included in section 060105D.1.b.(1) (a), (b), (c), and (e).

2. Immediate Subordinate Account: Post Acquisition Construction. Includes major construction projects (projects beyond those authorized under the minor construction program) for the following (by installation and project): upgrading inadequate public quarters, rental housing and acquired Wherry Housing units to produce adequate public quarters; conversion of existing facilities to public quarters; alterations, additions-expansions-extensions; construction of family housing real property, other than dwelling units required subsequent to and because of previously acquired dwelling units; and the payments made to military personnel for telephone reconnection charges shall be included in project costs under this subaccount when a construction project involves relocation, alteration, improvement, or other work necessitating Government directed, non-Permanent Change of Station moves between Government quarters. However, in cases where concurrent maintenance/repair work is involved, telephone reconnection costs shall be charged to the maintenance account.

3. Immediate Subordinate Account: Planning and Design. Includes the design, working drawings, specifications and estimates for construction projects approved by the Secretary of Defense for inclusion in the President's Budget. Also includes consolidated DoD guide drawings, specifications, and planning and design efforts on projects which are not subsequently constructed.

4. Immediate Subordinate Account: Rental Guarantee Payments. Payments which become due under rental guarantees to sponsors of family housing projects built in foreign countries for use by DoD personnel.

C. Major Functional Category: Operation and Maintenance

1. Immediate Subordinate Account: Operation. This account includes the following: initial acquisition, maintenance, repair and replacement of furniture, furnishings and other personal property (see section 060105D.1.b.(1)(g)); the furnishing of services included in section 060105D.1.c.(7); inspection of construction and administration of rental guarantee projects; and, leasing of family housing facilities by the Government as outlined in section 060105D.1.a.

2. Immediate Subordinate Account: Maintenance of Real Property Facilities. This account includes maintenance and repair of buildings, roads, driveways, walks, exterior and interior utility systems and grounds care; and maintenance, repair and replacement of fixtures and other equipment which are integral components of a housing unit. This account also finances the costs of reimbursements made to military personnel for telephone reconnection charges when maintenance or repair work necessitates Government-directed, non-PCS moves. This includes such charges resulting from improvement/repair projects funded in part from the family housing construction account.

C. Major Functional Category: Debt Payment (Interest and Other Charges)

1. Immediate Subordinate Account: Servicemen's Mortgage Insurance Premiums. This account includes payments of servicemen's mortgage insurance premiums pursuant to Section 222 of the National Housing Act as amended.

060203 Homeowners' Assistance Fund, Defense

The program/budget account classification structure for the Homeowners' Assistance program is prescribed in Exhibits HA-1 through HA-4, found in Section 060504.

0603 BUDGET ESTIMATES SUBMISSION**060301 Military Construction****A. Purpose**

1. This Section prescribes instructions for the preparation and submission of budget estimates for the Military Construction, appropriations.

2. Unless otherwise specified, these instructions apply to all Military Construction appropriations and to all budget estimates. Data submitted must be consistent with the budget estimate being supported.

B. Submission Requirements

1. General Guidance. Supporting data for each of the military construction appropriation requests will be submitted concurrently with all other Department of Defense appropriation requests. To facilitate the review and decision making process, it is essential that the packaging of justification materials conform to the uniform facility category structure established by DoD Instruction 4165.3.

a. Construction requirements will be determined in consonance with PDM guidance and with applicable Executive Orders, OMB Circulars, and DoD 4270.1-M.

b. Each proposed construction project will be supported by DD Form 1391/1391C, Military Construction Project Data. These will be prepared in accordance with guidance contained in Section 060502. Projects associated with intelligence or intelligence-related operations will be so identified. Block 5, Program Element, DD Form 1391, will include the annotation "NFIP", "JMIP", or "TIARA" as appropriate. DD Form 1390, Military Construction Program, will be prepared for each installation at which major construction is planned, utilizing the format prescribed in Section 060502. DD Form 1390S, Guard and Reserve Forces Military Construction, will be utilized by the Guard and Reserve Components.

c. Lump sum requests for a number of construction projects at a single location or for related projects at several locations will not be considered.

d. Budget estimates for military construction will continue to reflect fully funded requirements, regardless of their size, as directed by OMB Circular A-11. Incremental funding of construction projects is not acceptable unless justification coincident with the budget submission demonstrates that each segment would satisfy a fully definable mission objective without subsequent funding, or unless an exception to the provisions of OMB Circular A-11 has been requested and granted specifically.

e. In order to ensure prudent and economic investments a life-cycle, net present value economic cost analysis is required to support all new construction or renovation projects estimated to cost in excess of \$ 2 million dollars. Copies of these studies are to be retained by the DoD Components and must be available, when requested, during the OSD - OMB budget review. In accordance with Section 010303, components are required to indicate on the justification page for each individual construction project whether or not an economic analysis is applicable or pertinent. If not applicable, a statement is required indicating why.

f. In accordance with guidance provided under Section VI.D. of DoD Directive 2010.5, components are required to indicate on the justification page for each individual construction project for U.S. forces committed to NATO a statement whether or not the project is planned for prefinancing, with appropriate explanation as to: (a) why U.S. unilateral financing is being proposed; and (b) as appropriate, follow-on actions planned to seek reimbursement through NATO channels. A similar statement is required for any other overseas construction, describing why the project is not eligible for host nation funding. More specific guidance is provided in DoDD 2010.5.

g. Justification materials (DD 1390/1391/1391C) will be submitted in book form, with appropriate cover, bound on the left margin. Classified materials are to be submitted in separate volumes, with appropriate security classification markings on covers.

h. The following sections outline the specific materials to be provided including special guidance as to formats to be followed. The numbers of copies required are identified in Chapter 1. Other special materials required are outlined under related Chapter 16.

i. It is recognized that it may be necessary to revise construction project costs subsequent to the budget submission which have changed significantly because of Congressional action, design changes, etc. Such changes will be considered as an additional budget submission and all ground rules, including cut-off dates, will apply.

j. For the biennial budget, separate sections or volumes will be provided for Biennial Year 1 (BY1) and Biennial Year 2 (BY2). For the Biennial Year 2 (BY2) section, BY1 will be considered as the prior year and BY2 as the budget year.

k. All budget submissions for military construction and family housing programs should include outyear project level detail in the format specified in Section 060502.

2. Construction Programs for the Active Forces and Defense Agencies. The books containing the DD Forms 1391/1391C will be arranged by facility category, following the guidelines established by DoD Instruction 4165.3. *For each project, the DD Form 1390 will immediately precede the DD Form 1391/1391C.* In each DD Form 1391/1391C provided for the OSD submission, the following design status is required: (1) date of design initiation; (2) percentage of design complete on the OSD submission date; (3) date on which 35 percent design will be or has been completed (including review and approval of 35 percent drawings); (4) projected or actual date of design completion; (5) percentage of design utilizing standard design, and (6) if the project cost is based on parametric estimates, include the annotation "Parametric estimates have been used to develop project costs." Projects proposed for alternative construction methods such as turnkey, or private financing alternatives, for which percent design is not appropriate, should be noted in place of the design status required for normal projects. *Prior to the submission of the President's Budget to Congress, the OUSD(C) Military Construction Directorate shall be notified if any projects will not be at the 35 percent design status by January 1.*

a. Major Construction. For purposes of the OSD/OMB review:

(1) Each DD Form 1391 must show on the upper right hand corner, above the black borderline, the appropriate decision document (PBD) number applicable to that particular construction project or item. No project will reflect more than one number. No project will be identified or listed under more than one facility category.

(2) The "Operation and Training Facilities" category is to be packaged in the justification books as two separate categories, i.e., "Operation Facilities" followed by "Training Facilities."

(3) Books containing the Forms DD 1391/1391C are to include omnibus packages for the energy conservation investment, and air and water pollution abatement programs. The total requested for each of these programs will be identified separately on single DD 1391s with the detail of program (installation, location, cost, and project description) provided on continuation pages (DD 1391C). None of the projects included in these categories are to be listed under any other facility category.

(4) All specified projects shall be included in the appropriate major construction decision document (PBD) section regardless of the actual dollar cost of the project. There will be no special section for such projects. Projects costing less than \$1 million may be included with more than one project per page, as long as the projects are thoroughly justified. The amounts requested for projects costing less than \$1 million should be supported in detail (installation, location, cost, facility category code, and project description). The projects should be listed separately on the summary sheet preceding each major construction decision document (PBD) section.

b. Minor Construction. The total minor construction program request should be submitted as an omnibus package on a single Form DD 1391, specifying the lump-sum amount proposed for unspecified (unforeseen) minor construction projects costing up to \$ 1.5 million per project.

c. Supporting Activities. The funding request for Supporting Activities will continue to be reflected as a lump sum amount on DD Form 1391. Supporting detail (location/cost) will be shown parenthetically following the lump sum estimate. While this item will be addressed for decision making purposes in the document covering Utilities and Real Estate, it should be listed separately and not included in the indexes for either Utilities or Real Estate, which fall under different facility category codes.

d. Restrictions on Omnibus Construction Packages. Apart from the specific exceptions noted for the pollution abatement, energy conservation, and minor construction programs, which are discrete decisions, there are to be no other omnibus packages or breakouts in the DD 1391 justification books. All other projects are to be listed under the appropriate facility category. In this respect, the Marine Corps facilities program is to be integrated with the Navy facilities program so that all Navy and Marine facilities are included in a single Department of Navy facility category listing covering the entire "Military Construction, Navy" appropriation request. However, a separate "non-add" listing or index of all Marine Corps unique facilities, similar to those provided in the past, is both useful and desired.

e. Budget Summary and Indexing. Each Component will provide a one page Budget Summary at the front of the justification book that provides a summary of the total construction program request. The summary will show, by column, the total obligation authority (TOA), budget authority (BA), and authorization requested by PBD decision unit (301, 302, etc.) with subtotals by budget activity. Additionally, the books containing the Forms DD 1391/1391C should provide, immediately preceding each category section, an index showing facility category code numbers, installation and location, project number and title, cost, and DD 1391 page number. The index should also identify each project as either new mission or current mission.

f. Multi-service and National Level Support Programs. Projects providing multi-service or national level support are to be programmed/budgeted under the appropriation, "Military Construction, Defense-Wide", or, in the case of NATO Security Investment Program, under the appropriation "North Atlantic Treaty Organization Security Investment Program." These are to be determined on a case-by-case basis, and should be identified as early as possible in the program planning phase. Such items will be identified in the POM/PDM process with appropriate programmatic adjustment or treatment during that phase of the review.

g. Should, on rare occasions, other candidates surface following completion of the POM/PDM process, they will require review in the budget review process. The following guidelines apply:

(1) The individual military departments will serve in an executive agency capacity for support of those construction items. The military department assigned executive agency responsibility will continue to provide all necessary and appropriate management support for such projects, including preparation of budget justification materials, and will continue to fully manage and execute the program including the preparation of all budget justification materials and defense of estimates submitted to Congress.

(2) For those projects which have been identified and programmed as multi-service or national level support programs during the POM/PDM process, the executive agent will provide, at the time of its own budget submission, a separate submission consisting of all justification materials (DD 1391/1391C) necessary for OSD/OMB review. Such projects are not to be reflected (duplicated) in the submission covering the department's own program (i.e., financial program, facility category listings, etc.).

(3) For those projects which may surface following the POM/PDM process as possible additional candidates, the sponsoring military departments will include these in their own construction program submissions as outlined earlier in this chapter, within their own fiscal levels, and separately highlight such items, providing a narrative explaining the basis for change.

3. Construction Programs for the Guard and Reserve Forces. Justification materials for the Guard and Reserve construction programs will be submitted on DD Forms 1391/1391C (Project Data). A separate justification book is required for each of the five Guard and Reserve appropriations.

a. The DD Forms 1391/1391C will be in a single volume covering total requirements for each appropriation. The materials will be sequenced in alphabetical order, by state and by installation within state. The justification pages covering the lump-sum amount requested for minor construction will appear last. The DD Forms 1390S will be in a separate section following the DD Forms 1391/1391C. Each book is to include an index in the front, showing the installation and location, project title, project cost, DD 1391 page number, and arranged in alphabetical order by state.

b. Each Guard and Reserve program submission is to include separate listings identifying amounts requested in the budget year for: (a) air and water pollution abatement; and (b) energy conservation investment programs. Each listing is to show the installation and location, project title, project cost, and DD 1391 page number. "Negative response" listings are required to assure complete coverage.

4. Construction Planning and Design. The annual estimates for planning and design are to be identified and justified on DD Form 1391. In preparing the annual estimates, full consideration should be given to the lead-time required to meet the objective of having each construction project at the 35% to 50% design stage at the time the Budget is submitted to OSD. Guard and Reserve component construction projects will meet the design criteria established in DoDD 1225.7, "Reserve Component Facilities Programs," at the time the budget request is submitted to OSD.

a. The Military Departments will develop and submit planning estimates in support of the construction programs for the individual Active Forces, Guard and Reserve programs.

b. The Office of the Secretary of Defense will prepare a DD Form 1391, consolidating estimates to be submitted by the Defense Components having justified requirements for Defense Agencies planning and design funds.

(1) Each Defense Agency having a requirement for planning funds during the current and budget years is to submit its estimates on a DD Form 1391.

(2) The individual Military Departments may have a justified requirement for use of Defense-Wide planning funds under circumstances where the Military Departments serve as executive agents for certain multi-service or national-level support projects if funding is required to design a project which will be constructed using Military Construction, Defense-Wide funds. Under such circumstances, the Military Department should submit its estimates on a separate DD Form 1391.

5. Automated Data Requirement. All Military Construction estimates for the Active Forces, Defense Agencies, Guard and Reserve Components shall be addressed in the Exhibit C-1 Construction Annex input prescribed in Chapter 1.

6. Depot Maintenance Projects. For each military construction project involving a depot maintenance facility, include on the Form 1391 a statement that interservicing alternatives were fully considered by the Joint Military Construction Review Board. The purpose of this statement is to assure that facilities being constructed do not duplicate facilities built or being built by another DoD component.

7. Long-Term Facilities Contracts. A DD Form 1390 and 1391 must be submitted for each project proposed under the authorities of 10 U. S. C., Chapter 169. All additional supporting justification should be included in the DD 1390 Form and DD 1391 Justifications. These include Section 2809 ("Long-term facilities contracts for certain activities and services"), Section 2812 ("Lease-Purchase of Facilities"), Section 2835 (Long-term leasing of military family housing to be constructed"), Section 2836 ("Military housing rental guarantee program"), and other third party financed construction authorities. Private financing initiatives will be closely reviewed to ensure their programmatic and budgetary viability. So that an informed decision regarding inclusion of the project in the budget may be made during the budget review, proposed projects must be supported by an

economic analysis. In addition, to establish a reasonable expectation that the long-term facility project meets Congressional guidance that all third party financed projects, including proposed child care facilities, be at least five percent less expensive than regular military construction appropriation, a lease-versus-buy analysis conducted in accordance with the provisions of OMB Circular A-94 must also be submitted as backup documentation for the DD 1391.

a. In development of cost estimates, military construction alternatives should not exceed the published DoD pricing guidance. Private sector construction estimates should be fully supported by documentation and include all pertinent cost factors.

b. Guidance for development of the basic economic analysis required to support these long-term facility contracts is contained in DoDI 7041.3. The separate lease-versus-buy analysis must conform with OMB Circular A-104, and include full life-cycle costs and net present value discounting of each alternative.

c. Proposed child care facilities should also include in their justification the results of a market survey of child care services available in the local community, and the results of a need assessment and installation interest survey that documents and supports the need for the proposed project.

d. Authorization and appropriation procedures for long-term lease and lease-purchase contracts are special cases and may not be treated as regular military construction in some respects. General guidance for the treatment of budget authority, outlays, and scorekeeping guidelines for lease-purchase and capital lease contracts is contained in OMB Circular A-11.

(1) Under the provisions of public law these contracts may, depending on the authority used, be for periods of up to thirty-two years exclusive of the period of construction. However, for projects proposed under the authority of 10 U.S.C., Sections 2809, 2835, and 2836 the obligation of the United States to make payments under the contract in any fiscal year is subject to appropriations being provided specifically for that fiscal year and specifically for that project.

(2) Annual lease or annual lease-purchase payments commence at the time of beneficial occupancy, usually after the budget year in which the project is proposed for authorization.

(3) Components will request authorization for the full asset value of the contract (the estimated construction or acquisition cost, the differential cost of financing, and any contract termination liability costs). Components will request budget authority for each project in the amount equal to the full extent of the Government's first year liability under the contract (the sum of all cost and contract termination liability costs), in the budget year the project is submitted for approval.

e. Components shall submit proposals for long-term facilities contracts in a separate section in the OSD/OMB Justification books. The section shall be entitled "Long-Term Facilities Contracts". The section will include all DD Form 1390 and DD 1391s for newly proposed projects, and be preceded with an index showing facility category code numbers, installation and location, project number and title, estimated military construction cost and DD Form 1391 page number. Long-term leases and lease-purchases will be separately summarized in the index. In order to assess the long term financial impact of these proposals the section should also include a financial table that provides project data and cumulative totals for; total estimated project authorization, estimated annual lease payment, and year of planned beneficial occupancy.

f. Congressional budget presentation Justification Book guidance is provided in section 0604 of this manual.

g. Following approval of projects for inclusion in the President's Budget, Components may then proceed with project development.

h. In accordance with 10 U. S. C. these projects must be submitted to Congress for final review or approval 21 days in advance of contract award. Unless denied by Congress, Components may make contract award following the 21 day notification period.

(1) Components will submit these projects for approval to the Under Secretary of Defense for Acquisition and Technology, and the DoD Comptroller, prior to congressional notification, and again prior to the final submission to Congress.

(2) In order to ensure that only economical investments are approved, and that budget requests are sufficient to cover the full financing of the contract, only those projects demonstrated to be more cost effective than regular Military Construction will be approved for submission to Congress.

8. Construction Programs for Working Capital Funds

The Working Capital Funds related capital construction projects costing over \$300,000 will be included in the component military construction appropriation (including budget authority) budget estimates submission for review.

a. Military construction projects supporting the Working Capital Funds must be clearly labeled as Working Capital Fund projects. The C-1 Annex will include the Working Capital Fund projects (annotated as such) with their associated budget authority.

b. A separate copy of military construction projects supporting the Working Capital Funds will be provided to the Directorate for Revolving Funds, Program/Budget, OUSD(C) (Pentagon, room 3B866).

c. Copies of associated economic analysis studies supporting the construction requirements for Fund projects will be separately provided to the Directorate for Construction, Program/Budget, OUSD(C) (Pentagon, room 3D840).

9. Facilities Programming and Financing at DoD Installations Utilized by Two or More DoD Components. This section establishes the policy for programming and financing facilities at DoD installations where utilization by more than one DoD Component is involved, including host-tenant relationships.

a. Responsibilities

(1) **Single-Use Facilities.** The DoD Component requiring a facility for its own use shall program and budget for the construction project involved.

(2) **Joint-Use Facilities.** The DoD Component which has jurisdiction over the host command shall program and budget for a facility which is planned for the joint use or joint occupancy of two or more DoD Components.

(3) **Common-Purpose Facilities.** On a case-by-case basis, the individual DoD Components shall function as executive agents for programs whose output directly and uniquely operates to the benefit of two or more DoD Components. The executive agent shall be responsible for planning and programming all facilities.

(4) **Required Facilities.** Generally, the host Military Department will program and budget an extension, expansion, and/or increase the capacity of the main utilities and communications or transportation systems, consistent with the master plan of the installation, to support any required facilities, including those required by a tenant. However, programming and budgeting for such connecting utilities and communications or transportation systems as an integral part of any single-use facility are the responsibilities of the DoD Components requiring the facility.

(5) **Siting Facilities.** Siting of any facility for a tenant will conform to the master plan of the installation or will be in accordance with an agreed-upon location by the DoD Components concerned.

(6) **Design.** Standards of design and construction will conform to those of the host Military Department, consistent with the master plan of the installation; however, exceptions will be made in those

instances where tactical or other operational considerations requiring limited duration of occupancy economically would not justify construction of facilities to higher standards.

b. Utilization

(1) The tenant DoD Component will have exclusive use of any facility constructed for the duration of the tenants requirement. Upon termination of tenancy or use by the tenant, the facility will revert to the host Military Department for utilization without fee.

(2) Should the tenant DoD Component, at a later date have a requirement for use of the same facility, the host Military Department will make the facility, or an acceptable existing facility, available within a reasonable time period to the tenant. The host Military Department will not reconstruct or acquire a new facility for the tenant instead of returning the original facility or an acceptable existing substitute. If the host Military Department is not able to make a facility available to the tenant without creating unacceptable conditions for the host, the tenant will be responsible for obtaining a new facility.

c. Maintenance and Service Support Determination as to the levels of maintenance and service support and reimbursement therefore will be made by the DoD Components concerned consistent with DoD policies for host-tenant agreements.

060302 Family Housing

A. Purpose

1. This Section prescribes instructions for the preparation and submission of budget estimates for the Services' Family Housing, appropriations.

2. Budget estimates will be submitted by the Services and Agencies which have requirements for financing the Family Housing Program as defined in Section 060106.

B. Submission Requirements

1. Budget Estimates. Each DoD Component is to submit data to support the budget requirement for Family Housing on the basis of the accounts and account structure set forth in the detail prescribed in Section 060302 B.3 (Preparation of Material). In addition, each DoD Component will address Family Housing estimates in the Exhibit C-1 Construction Annex input prescribed in Section 010504.

2. General

a. All data (including the OP-5 exhibit) will be provided on 8-1/2 inch by 11 inch size paper, typed across the short dimension of the paper, except for the formal exhibits contained in Section 0605 which have been formatted across the long dimension of the paper (FH-2, FH-3, FH-4, and FH-5). All pages will be bound on the 11 inch side.

b. The family housing budget data will be bound in separate books for the Army, Navy (including Marine Corps, with Debt Payment and Operations and Maintenance Cost for Marine Corps shown separately), Air Force, and Defense Agencies.

c. The number of required copies of the above material is specified in Section 010302.

d. For the biennial budget, separate sections or volumes will be provided for Biennial Year 1 (BY1) and Biennial Year 2 (BY2). For the Biennial Year 2 (BY2) section, BY1 will be considered as the prior year and BY2 as the budget year.

3. Preparation of Material. Submit data using forms and formats as indicate below. Separate tabbed sections will be submitted for each of the categories below (a, b, and 4-18).

- a. Index Provide a detailed index to the submission.
- b. Summary

(1) Provide a short narrative summary (no more than one page) describing the most significant features of the request. This summary need not cover every facet of the request and is intended to highlight those items of special significance.

(2) Provide a one-page financial summary of the entire request. This should include, as a minimum, the amounts requested for authorization and appropriation for the major programs (Construction, Operation and Maintenance, Utilities, Leasing, Debt and Reimbursable) and for the major subdivisions of these programs, as described below.

4. Legislative Language. Submit the requested authorization and appropriation language. Existing language should serve as a base, with changes and omissions bracketed.

5. New Construction

a. Summary. Provide a brief summary of the New Construction program. The summary should include, as a minimum: a short narrative highlighting the most significant features of the request, a comparison of the prior year program with the request, and a listing of each project requested showing location, number of units and the estimated cost. The index should also identify each project as either new mission or current mission.

b. Project Justification. For each New Construction project, including the construction of mobile home spaces, the following forms and exhibits are required. Additionally, in accordance with Sections 2823 and 2824 of Title 10 U.S.C., provide documentation of consultations with the Secretary of Housing and Urban Development on the availability of suitable alternative housing at each construction location.

(1) Military Construction Project Data -- DD Form 1391. Form will be prepared in accordance with the instructions contained in Section 0605 of this manual. It is important to avoid the use of "boiler-plate" justification. Cost estimates for new construction projects will include the maximum level of detail practicable. Any unusual features impacting on the cost of the project must be fully justified. In order to ensure prudent and economic investments a life-cycle, net present value economic cost analysis is required to support all new construction projects estimated to cost in excess of \$2 million dollars. Copies of these studies are to be provided with the Family Housing budget estimates. Each DD Form 1391 will (1) state if an economic analysis has been prepared and provide a summary of the results of that analysis, including the calculated savings-to-investment ratio, or (2) provide the specific reasons why an economic analysis is not required. Assemble the DD Form 1391's in the same sequence as the listing of projects on the summary page.

(2) Military Family Housing Justification - DD Form 1523. Form will be prepared in accordance with DoD Housing Management 4165.64-M. Data supplied should be in agreement with the latest formal housing survey for the location, and with the information provided on the DD Form 1390. The date of the survey should be specified. The form must include a statement indicating whether a private sector housing market analysis has been conducted and the date the market analysis was completed. When a market analysis has been conducted and is used as justification for new construction, a copy of the analysis must be available for review upon request. Since this form deals with housing deficit calculations, the DD Form 1523 is required for housing unit and mobile home space projects only.

(3) Tri-Service Family Housing Cost Model - Exhibit FH-1. Provide, for each housing project, the calculations on which the budget estimate is based, using the "Tri-Service Family Housing Cost Model", Exhibit FH-1. The appropriate DoD cost factors should be used in the calculations. In addition, Tri-Service Family Housing Cost Models should be prepared using metric units of measure.

6. Post-Acquisition Construction

a. Summary. Provide a general summary of the Post-Acquisition Construction program being requested. The summary should include, as a minimum: a short narrative highlighting the most significant features of the request, and a comparison of the prior year program with the request. For consistency, the program should be referred to as “Post-Acquisition Construction” rather than “Improvements” or any other title.

b. Project Justification. Provide a DD Form 1391 covering the entire Post-Acquisition Construction program and DD Form(s) 1391C listing each project requested. Project description should be specific with regard to the work which is to be done (specify the number of units to be improved by the intended occupant grade; senior officer, junior officer, or enlisted), and note planned concurrent RPM non-routine costs. Projects should be arranged alphabetically by state and country. Federal Energy Management Program (FEMP) funding, if any, must be separately totaled. Projects, or portions of projects, for General and Flag Officer Quarters (G&FOQ) must be identified separately. For improvement projects where the cost per unit will exceed sixty percent of the current replacement value of the unit the project must be supported by a life-cycle economic analysis that demonstrates that renovation is more cost effective than new replacement construction or other available alternatives, such as demolition and reliance on housing allowances.

c. Projects in Excess of \$50,000 Per Unit. A separate DD Form 1391 is required for each project for which the per unit cost is in excess of \$50,000, multiplied by the appropriate DoD area cost construction index. In the case of improvements necessary to make the unit suitable for habitation by a handicapped person this threshold is increased to \$60,000 multiplied by the applicable area cost factor. The cost estimate should also include concurrent repair to be funded under O&M. The justification for the project must detail the findings of an economic analysis and the resulting savings-to-investment ratio. Any unusual features impacting on the cost of the project must be clearly cited. Additionally, note the total Post-Acquisition Construction and non-routine maintenance for the unit or set of units over the past five years.

d. Restriction on the Amount Invested in Improving Foreign Source Housing Units. The three-year limitation on overseas units is \$35,000. If the Services intend to program improvements to specific units which exceed \$35,000 over a period of three years, total funding should be requested in one year. The justification for each unit should identify all improvements and major maintenance work done in the past three years, and all improvements and major maintenance planned in the following three years.

7. Rental Guarantee Housing. For each rental guarantee housing project, both foreign and domestic, provide a listing showing: (1) location, (2) number of units (by intended occupants (senior officer, junior officer, enlisted), (3) term of contract, (4) fiscal year and month of contract renewal, and (5) maximum termination costs.

8. Advance Planning and Design. All requirements for Advance Planning and Design should be submitted in the format prescribed for military construction.

9. Operation and Maintenance Summary

a. Narrative Summary. Provide a brief general summary of the entire Operations and Maintenance program being requested, excluding leasing and debt. The summary should include, as a minimum: a short narrative highlighting the most significant features of the request, and a comparison of the prior year program with the request.

b. Inventory and Funding Summary.

(1) Provide the data called for on the attached Exhibit FH-2, "Operation and Maintenance, Summary." Separate exhibits should be provided for: (1) Conterminous U.S., (2) U.S. Overseas and Possessions, (3) Foreign, and (4) Total.

(2) Provide the total civilian personnel compensation for all U.S. Direct Hires, Foreign National Direct Hires and Foreign National Indirect Hires. This information should be provided for the prior year, current year and budget years in the format of Exhibit OP-8, Civilian Personnel Costs, shown in Section 030402 of this manual. This exhibit is only required for inclusion in the OMB/OSD review, but should be provided separately for the President's Budget submission.

c. Historic Housing Costs. The Statement of the Managers 101-345, on the DoD Appropriations Act for FY 1990, directed changes in the reporting of maintenance and repair costs associated with historic housing. Costs associated with Family Housing maintenance (improvements and repairs), should be reported on Exhibit FH-6 for both the OMB/OSD review, and for the President's Budget submission.

10. Operations. The sub-elements of Operations are Management, Services, Furnishings and Miscellaneous. For each of these provide:

a. Summary. A short narrative describing what the funds will be used for and highlighting the most significant features of the request. For the Furnishings program only, provide additional information in the format of Exhibit FH-3, "Furnishings Summary".

b. Reconciliation of Increases and Decreases. A reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President's Budget for the current year and budget years. The format of this reconciliation is to be identical to Attachment 1 to the OP-5 shown in Section 0605 of this manual. For each program increase or decrease, quantitative and qualitative information relative to the proposed change should be provided. Increases and decreases should address specific adjustments in the program, particularly changes in the number of family housing units being supported, changes in the FH-2 and FH-3 exhibits, etc.

11. Utilities. For the Utilities program, separate from Operations, provide the following:

a. A short narrative describing what the funds will be used for and highlighting the most significant features of the request. This should contain a section dealing with energy consumption reductions accomplished and progress made towards meeting Congressional and Defense energy conservation goals.

b. A breakout of KWH of electricity, tons of coal, cubic feet of gas, barrels of oil and other energy usage which supports the request for utilities.

c. Reconciliation of Increases and Decreases. A reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President's Budget for the current year and budget years. The format of this reconciliation is to be identical to Attachment 1 to the OP-5 shown in Section 0605 of this manual. For each program increase or decrease, quantitative and qualitative information relative to the proposed change should be provided. Increases and decreases should address specific adjustments in the program, particularly changes in the number of family housing units being supported, changes in the FH-2 exhibit, etc.

12. Maintenance

a. Provide a short narrative describing what the funds will be used for and highlighting the most significant features of the request.

b. Reconciliation of Increases and Decreases. A reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President's Budget for the current year and budget years. The format of this reconciliation is to be identical to Attachment 1 to the OP-5 shown in Section 0605 of this manual. For each program increase or decrease, quantitative and qualitative information relative to the proposed

change should be provided. Increases and decreases should address specific adjustments in the program, particularly changes in the number of family housing units being supported, changes in the FH-2 exhibit, etc.

c. Provide a summary on the backlog of deferred maintenance. Describe the plans for reducing the backlog to a manageable level. Provide an analysis of types of projects, type and accuracy of reporting and special efforts to reduce the backlog. Provide a table showing, for BY-3 through BY2, (1) backlog at beginning of year, (2) recurring maintenance arising during the year, (3) maintenance funds approved or planned, (4) backlog at end of year, and (5) backlog reduction (-) or growth (+) during the fiscal year.

13. Maintenance and Repair Over \$15,000 Per Unit

a. Using DD Forms 1391 and 1391C, provide data on maintenance and repair projects for which the per unit cost exceeds \$15,000. As a minimum, the 1391C should provide, for each project: (1) location, (2) number of units, (3) age of units, (4) per unit cost, (5) total square footage of unit and square footage of project, (6) total cost, and (7) short narrative description and justification of the work, including results of economic analysis and savings-to-investment ratio. Additionally, note the total Post-Acquisition Construction and non-routine maintenance for the unit or set of units over the past five years. Projects should be listed alphabetically by state and country, as with the Post Acquisition Construction projects.

b. Projects which appear as concurrent maintenance and repair on the 1391's for Post-Acquisition Construction (see Section 060302 B.7 above) will be shown here if they exceed the \$15,000 per unit threshold, with a notation stating that the project is also shown in the post acquisition construction section.

14. G&FOQ O&M Costs Over \$25,000 Per Unit

a. Provide a summary statement detailing your efforts to control and reduce expenditures for these "high-cost" units.

b. Provide a listing of all General and Flag Officer Quarters (G&FOQ) for which total Operation and Maintenance cost exceeds \$25,000 for the Budget Year. Listing should include, for each: (1) location, (2) quarters identification, (3) size of unit, (4) age of unit, (5) operations total, (6) utilities total, (7) maintenance total, (8) total O&M, and (9) short narrative description and justification of the work, including results of economic analysis and savings-to-investment ratio. Additionally, note the total Post-Acquisition Construction and maintenance costs for the unit or set of units over the past five years.

c. This listing will include all G&FOQ projects for which total Operation and Maintenance exceeds \$25,000, including those listed in other sections of the submission.

d. Provide a similar listing for the Prior Year and Current Year units with O&M over \$25,000 and which were not included in the previous budget request.

15. Reimbursable Program. Provide a detailed justification for the Reimbursable Authority requested. Include information on what precisely is funded through the reimbursable program and details on the sources of receipts for the prior year, current year and budget year.

16. Leasing

a. Provide a brief summary statement describing the program and highlighting major initiatives for which funds are being requested.

b. For domestic and foreign leases, provide a summary justification statement. Also provide data on the leasing program in the format of Exhibit FH-4, "Analysis of Leased Units." Information should be provided at the installation or community level, whichever is most applicable. For each new project requested, also include a full justification and description, in the same format as for a New Construction project (see Section 060302 B.6 above).

c. Reconciliation of Increases and Decreases. A reconciliation of increases and decreases, at the worldwide level, between the amounts requested in the President's Budget for the current year and budget years. The format of this reconciliation is to be identical to Attachment 1 to the OP-5 shown in Section 0605 of this manual. For each program increase or decrease, quantitative and qualitative information relative to the proposed change should be provided. Increases and decreases should address specific adjustments in the program, particularly changes in the number of family housing units being supported

d. For each new Section 801 lease project requested, include a full justification and description, in the same format as for a New Construction project (see Section 060302 B.6 above) , including the results of the economic analysis.

e. *Under Section 2828 of 10 U.S.C. the Components are allowed not more than 10,000 domestic (United States, Puerto Rico, or Guam) leased units. The cost of domestic leases may not exceed \$12,000 (including the cost of utilities, maintenance, and operation) per unit per year. Section 2828 permits an exception for 500 of these domestic leased units that may exceed \$12,000 per unit per year but can not exceed \$14,000 per unit per year. Beginning in FY 1994, these maximum lease amounts are adjusted each year by the percentage (if any) by which the Consumer Price Index (CPI) for All Urban Consumers, published by the Bureau of Labor Statistics, during the preceding fiscal year exceeds the CPI for the fiscal year before the preceding fiscal year. For example, the FY 1994 cap of \$12,000 is adjusted by the following formula: $\$12,000 * [FY\ 1993\ average\ annual\ CPI / FY\ 1992\ average\ annual\ CPI] = new\ cap$. The average annual CPI is calculated by adding the CPI for each month in a fiscal year and dividing by 12. Beginning in FY 1998, the Army has authority to lease 8 units in Miami, Florida. The lease cost of these units may not exceed \$280,000 per year, and no lease on any individual housing unit may exceed \$60,000 per year. These limits will be adjusted for increases in the CPI, using the above formula, beginning in FY 1999.*

f. *Also Under Section 2828 of 10 U.S.C. the Components are allowed not more than 53,000 foreign leased units. Foreign leases may not exceed \$20,000 per unit per year (including the cost of utilities, maintenance, and operation). Section 2828 permits exceptions for 450 leased units that may exceed \$20,000 but that can not exceed \$25,000 per unit per year and for 350 leases that may exceed \$25,000 per unit per year. The Navy also has authority to lease an additional 2,000 units in Italy that may not exceed \$25,000 per unit per year. These dollar limits are adjusted for the annual percentage change in the CPI as shown in section 060302 B.17.e. and for foreign currency fluctuations from October 1, 1987. To determine the impact of foreign currency fluctuation on the rental rate, these high cost "cap" rental rates must be computed for each foreign country, each year to adjust for the impact of foreign currency fluctuation. After the caps of \$20,000 and \$25,000 U.S. dollars are adjusted by country, the adjusted rates becomes the new cap for determining whether a lease must be counted against the exception limits for a given budget year. Then, if a rental exceeds the adjusted maximum costs, it counts against the high cost ceiling limitations of 450 and 350, units, respectively, DoD-wide. For each nation the formula that is to be applied is: $\$20,000\ adjusted\ for\ CPI\ changes\ or\ \$25,000\ adjusted\ for\ CPI\ changes * [FY\ 1988\ exchange\ rate / current\ budget\ exchange\ rate] = new\ cap\ limit$.*

(1) Where the "FY 1988 exchange rate" is the exchange rate that was published by the USD(C) for use in preparing the FY 1988 budget estimates, stated in units of foreign currency for one (1) U.S. dollar:

<i>Country</i>	<i>Monetary Unit</i>	<i>FY 1988 Exchange Rate</i>
<i>Belgium</i>	<i>Franc</i>	<i>42.77</i>
<i>Canada</i>	<i>Dollar</i>	<i>1.39</i>
<i>Denmark</i>	<i>Krone</i>	<i>7.75</i>
<i>Germany</i>	<i>Mark</i>	<i>2.06</i>
<i>France</i>	<i>Franc</i>	<i>6.72</i>

<u>Country</u>	<u>Monetary Unit</u>	<u>FY 1988 Exchange Rate</u>
Greece	Drachma	139.90
Italy	Lira	1,423.00
Japan	Yen	163.10
Netherlands	Guilder	2.33
Norway	Krone	7.52
Portugal	Escudo	150.5
Spain	Peseta	137.60
Turkey	Lira	743.50
United Kingdom	Pound	0.70

For countries not listed, use the October 1, 1987 exchange rate.

(2) Where the “current budget exchange rate” is the rate published by the USD(C) for use in preparing the fiscal year budget estimates for which the lease funds are being requested, stated in units of foreign currency for one (1) U.S. dollar.

(3) The new cap limit is the maximum amount in dollars that a lease may cost per unit per annum for each nation, before that unit must count against the worldwide 350 and 450 unit limits on exceptions for high cost leases for the fiscal year for which the budget resources are being requested.

(4) Provide a summary table showing application of the above formula for each nation where high cost leases exist or are proposed, and the total number of such leases.

17. Debt Payments

- a. Provide a brief justification statement describing the requested program.
- b. Provide a table identifying separately the total of the principal payments, and interest charges, and the totals for the Servicemen’s Mortgage Insurance Premium program for the prior, current, and budget years.
- c. For the Servicemen’s Mortgage Insurance Premium program provide a listing showing, for each fiscal year: the number of terminations, the number of mortgages on which payments are to be made, the average payment per mortgage, and the estimated payments for the year. This table should start with the prior year, and end with BY+1.

18. Foreign Currency Exchange Data All Family Housing Operation and Maintenance appropriations that participate in the Foreign Currency Fluctuations, Construction, Defense appropriation are required to prepare and submit a PB-18 Exhibit using the approved foreign currency exchange rates. The format for the PB-18 Exhibit is in section 191204 of Chapter 19 of Volume 2 of the DoD Financial Management Regulation (DoD 7000.14-R).

060303 Homeowners’ Assistance Fund, Defense

A. Purpose

1. This Section provides guidance for the preparation and submission of Homeowners’ Assistance Fund, Defense budget estimates under the Department of the Army allocation account.
2. Budget estimates will be submitted only by the Department of the Army since that Department has been assigned the overall responsibility for the administration and management of the Department of Defense Homeowners’ Assistance program by DoD Directive 4165.50.
3. Each Component is responsible for including sufficient resources in their budget estimate to fund Homeowners Assistance Program (HAP) costs related to their Component’s actions associated with base

closures, realignments, and force reductions. The level of resources required to fund HAP costs shall be developed in consultation with the Army, as the HAP executive agent. Budget estimates for HAP shall be separately identified and submitted in Component BRAC submissions for HAP costs associated with realignments and closures and in the O&M submission for non-BRAC related HAP costs.

B. Submission Requirements

1. Submit a narrative explanation and description for current and budget years, setting forth estimated cases of assistance by type and location, including a summary of management and disposal actions by the Federal Housing Administration relating to acquired property.

2. The following exhibits, provided in Section 0605, will be submitted:

HA-1	Workload and Obligation Data
HA-2	Status of Accounts
HA-3	Work Unit Data
HA-4	Program and Financing

In addition, the Army will address Homeowners' Assistance Fund estimates in the Exhibit C-1 Construction Annex input prescribed in Section 010504.

3. Required copies of the above material are identified in Section 010302.

4. For the biennial budget, separate sections or volumes will be provided for Biennial Year 1 (BY1) and Biennial Year 2 (BY2). For the Biennial Year 2 (BY2) section, BY1 will be considered as the prior year and BY2 as the budget year.

C. Preparation of Material. All material will be provided on 8-1/2 inch by 11 inch size paper, and bound on the long side. All narrative data will be typed across the short dimension of the paper, while Exhibits HA-1, 2, 3 and 4 will be typed across the long dimension.

060304 North Atlantic Treaty Organization (NATO) Security Investment Program

A. Purpose

1. This section provides guidance for preparation and submission of the NATO Security Investment Program budget estimates.

2. Budget estimates will be submitted by the OUSD(A&T) since that office has been assigned the overall responsibility for the oversight and management of the NATO Security Investment Program by DoDD 2010.5.

B. Submission Requirements. Submit a list of requirements at the project level. The listing should be sufficiently detailed to identify discrete projects and initiatives. Aggregations at the capability package level i.e., Defense of the Mediterranean, are not sufficiently detailed and should be broken down further to show the individual projects/initiatives comprising the capability packages. A narrative explanation and description of each of the requirements for the current and budget years should be provided.

C. Preparation of Material. All material will be provided on 8-1/2 inch by 11 inch size paper, and bound on the long side. All narrative data will be typed across the short dimension of the paper.

060305 North Atlantic Treaty Organization (NATO) Security Investment Program Expansion Costs

A. Expansion Costs. Submit a list of all requirements, construction and procurement, associated with NATO expansion. The listing should be sufficiently detailed to identify discrete projects and initiatives. Aggregations at the capability package level i.e., Defense of the Southern Region, are not sufficiently detailed and

should be broken down further to show the individual projects/initiatives comprising the capability packages. A narrative explanation and description of each of the requirements for the budget years should be provided. The budget estimate for NATO Expansion Costs should be identified in Budget Activity (BA) 02 as presented in Chapter 1.

060306 Family Housing Improvement Fund

A. Purpose

1. This section prescribes instructions for the preparation and submission of budget estimates for the Family Housing Improvement Fund.

2. The Housing Revitalization Support Office (HRSO), ODUSD(IA&I), is responsible for preparing justification material for the Family Housing Improvement Fund.

B. Submission Requirements

1. Justification material for the Fund should include

a. the expenditures and receipts of for the Prior Year (PY) and estimated expenditures and receipts for the Current Year (CY) and the Budget Year (BY)

b. a description of the methodology for evaluating the extent and effectiveness of the use of the authorities provided in Chapter 169 of Title 10 U.S.C., subchapter IV

c. a statement of the objectives of the Department for providing military family housing for members of the armed forces

d. any requested appropriation amounts for the fund in the BY, as well as a description of the intended use of, and justification for, requested appropriations

e. funding requirements for the HRSO in the CY and BY, along with justification of those requirements

f. Federal credit data for direct and guaranteed loans as prescribed in section 33 of OMB circular A-11.

0604 CONGRESSIONAL JUSTIFICATION/PRESENTATION

060401 Purpose

A. This Section presents the justification book organization and the exhibit requirement for submission to Congress. Examples of budget exhibits can be found in Section 0605.

060402 Organization of Justification Books

A. Justification material will be organized into one volume entitled:

Supporting Data for Fiscal Year
19BY1/19BY2 Budget Estimates
Descriptive Summaries

B. This volume will be divided into two sections, organized as shown on the following pages.

A. Organization

Table of Contents and Summary Data

The summary data will include a state list of all major, minor and family housing construction projects.

Section 1 Special Program Considerations

This section will include the following topics with a short narrative or summary table, and other special interest items as applicable.

Facilities Funded Through Other Than Military Construction
Pollution Abatement Program
Energy Conservation Program
Drug Interdiction Program

Section 2 Budget Appendix Extract

Legislative Language

**Section 3 Installation and Project Justification Data
DD Forms 1390 and 1391**

Section 4 Architectural and Engineering Services and Construction Design

Section 5 Unspecified Minor Construction

Section 6 Defense Access Roads

Section 7 Family Housing

Section 8 Homeowners' Assistance (Army Only)

Section 9 Long-Term Facilities Contracts

Section 10 Working Capital Fund Capital Construction

B. Biennial Budget Submission. For the biennial budget, separate sections or volumes will be provided for Biennial Year 1 (BY1) and Biennial Year 2 (BY2). For the Biennial Year 2 (BY2) section, BY1 will be considered as the prior year and BY2 as the budget year.

C. The volume will be organized by state/country and location. Projects should be shown in precisely the same order as they appear in the State List portion of the Construction Annex (C-1).

D. All construction line items included in the funding program in support of the total obligational authority for the Military Construction appropriations in the President's Budget will be summarized on Installation and Project Justification Data, DD Forms 1390 and 1391/1391C. In addition to data provided on DD Forms 1390 and 1391, justification books submitted to the House and Senate Appropriations, the House National Security Committee, and the Senate Armed Services Committees in support of Military Construction Program requests will contain supplemental data prepared in the formats prescribed below on the reverse of DD Form 1391. The Guard and Reserve Forces will use a DD Form 1390S continuation page in lieu of DD Form 1390. All forms required for a project will be grouped and combined in the same book arranged in category code order within state and station.

E. Section 5 will include an exhibit entitled "Long-Term Facilities Contracts", separately listing projects proposed under 10 U. S. C. Sections 2809 and 2812 authorities, arranged in the same order as they would appear in

the State list portion of the Construction Annex (C-1). This exhibit will be followed by the DD Forms 1390 and 1391 for each new project proposed. The section will also include a special financing table reflecting both prior approved long-term facility contracts and new requests, as specified in Section 060301 B.7.

F. Section 060502 contains detailed instructions for preparation of DD Forms 1390 and 1391/1391C. Detailed instructions for preparation of the supplementary justification material are given in Section 060405. The following additional instructions apply:

1. In addition to other data requirements, components are required to indicate on the DD Form 1391C for each individual project a statement indicating whether or not an economic analysis has been utilized in evaluating the project. In those instances where an economic analysis has not been prepared, a statement is required indicating why such analysis is not applicable or pertinent.

2. Lump-sum requests for a number of construction projects at a single location or for related projects at several locations will not be considered.

3. Projects associated with intelligence or intelligence-related operations will be so identified. Block 5, Program Element, DD Form 1391, will include the annotation "NFIP", "JMIP", or "TIARA" as appropriate.

4. Consistent with Executive Order 12770 of July 25, 1991, Military Construction and Family Housing budget submissions, including DD Forms 1390 and 1391, should be prepared using metric units of measure.

5. All DD Forms 1391 should include a name and phone number of the civil engineer at the installation responsible for the requested project. This information should be displayed in the bottom left hand corner on the last page of the 1391.

G. Justification Book Covers and Binding of Data

1. Justification materials will be provided on 8-1/2" x 11" white paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with Acco fasteners. Material is to be printed on both sides of the page using 1" margins. The DD Form 1390 should be printed on white paper, not on yellow paper as previously required.

2. Justification book covers will be 220 index stock using the following colors: Army - green; Navy - buff; Air Force - blue; Defense-Wide - white. Covers will bear the appropriate security classification (should any volume require such classification), title of the appropriation and fiscal year, and the phrase "Justification data submitted to Congress." The designation "For Official Use Only" will not be used.

3. Separate justification books will be prepared for those projects which require classified information on the DD Forms 1390 and 1391/1391C.

4. The individual Defense Agencies will submit either originals of DD Forms 1390 and 1391/1391C, or copies of a quality suitable for printing. These are to be used for preparation of consolidated justification books for submission to Congress. These submissions are not to be punched or bound. Pages are not to be numbered. Covers are not required. One complete set of each is to be delivered to: the OUSD(C) Program/Budget, Directorate for Construction; and the ODUSD(Industrial Affairs and Installations).

5. Each justification book (and each submission of the Defense Agencies described in Paragraph 4, above) is to include an index of installations and projects by state and country, arranged alphabetically, in precisely the same order as the projects appear in the State List portion of the Construction Annex (C-1).

060403 Submission of Military Construction Justification Books

A. Review by OSD. Before the justification material can be released by the Military Departments to the Congress, it must be reviewed by USD (Comptroller) to assure that policies and decisions made by the President

and Secretary of Defense are fully reflected. Justification material prepared by the individual Defense Agencies will be submitted to USD(C) as requested for preparation of consolidated justification books for submission to the Committees on Appropriations.

B. Security Clearances. Each Military Department will be responsible for the clearance of its justification books through OSD Security Review. OUSD(C) will be responsible for the clearance of the Defense Agencies justification books through OSD Security Review.

C. Number of Copies. Three advance sets of justification books will be forwarded for review to the Directorate for Construction, OUSD(C), Room 3D841, Pentagon. See Chapter 1 for the detailed instructions on number of copies and distribution of printed material.

D. Instructions for Preparation of Supplemental Justification Data in Support of Annual Military Construction Programs. Each data requirement shall be filled in as appropriate including negative responses to indicate that the item has been addressed.

1. Instructions for Preparation of Summary Lists Each Military Service and Defense Agency shall prepare a State List and an Installation List. These lists shall include every project for which funds have been requested.

2. Instructions for Preparation of DD Form 1390 Supplemental Installation Data. The following data shall be provided in an appropriate place on DD Form 1390:

a. Outstanding Pollution and Safety (OSHA) Deficiencies

(1) Air Pollution. Enter cost of all air pollution abatement projects for the out years. Do not include cost of budget year projects.

(2) Water Pollution. Follow instructions for Air Pollution, a.1., above.

(3) Safety and Occupational Health Deficiencies. Follow instructions for a.1 above and use definitions cited in Section 060403 above for this data.

3. Instructions for Preparation of DD Form 1391 Supplemental (Facility) Data. The following data shall be provided for each facility in the program using the back of standard DD Form 1391.

a. Design Data (Estimates)

(1) Status

(a) Enter date design was started (i.e., date when all appropriate design contracting procedures have been completed and the designer directed to proceed with design).

(b) Enter the percent of design completed as of January 1, of the year in which the budget is submitted to the Congress (e.g., January 2, 1992, for FY 1993 projects).

(c) Enter date design expected to be 35% completed.

(d) Enter date design will be completed (i.e., date when all reviews will be completed and construction contract ready for advertising).

(e) Include the annotation "parametric estimates have been used to develop project cost" if the cost estimate is based on parametric estimates in lieu of the traditional 35% design.

(f) *Indicate whether an energy study and a life-cycle analysis was performed in support of the design of the proposed facility.*

(2) Basis.

(a) Indicate whether or not design is based on a standard or definitive design.

(b) If answer to (a) is affirmative, indicate where design was previously used.

(3) Total Design Cost. Indicate total federal cost (all costs to be charged to planning and design accounts) as follows:

(a) Cost of the production of plans and specifications (those costs included within the 6 percent statutory cost limitations).

(b) All other costs of design

(c) Total Cost (a + b or d + e).

(d) Amount of cost estimated to be spent on contracts.

(e) Amount of cost to be spent in-house (total cost if design is all within house; overhead and administration costs if design is contracted out, or other breakout).

(4) Construction Start Date. Indicate month and year construction is planned to start.

(5) Construction Completion Date. Indicate month and year construction is planned to be completed.

b. Equipment Associated with This Project Which Will be Provided From Other Appropriations List only those items which support the cost shown in Block 9 of the DD Form 1391, for Equipment Provided from Other Appropriations. Enter the equipment nomenclature, procuring appropriation, fiscal year in which the equipment was appropriated or is to be requested and the cost in thousands of dollars.

c. Working Capital Fund Projects. DD 1391s submitted in support of Working Capital Fund Capital Budget requirements will be labeled as such in Block 4, above the project title.

E. FYDP Project Listing. An updated Military Construction/Family Housing Outyear Project Data exhibit in the format specified in section 060502 should be provided separately to the OUSD(C) Military Construction Directorate for all Active Force and Defense Agency military construction and family housing programs at the time justification materials are submitted for OSD review. The outyear project data exhibits for the Active Forces and Defense Agencies will not be included in the justification books provided to Congress. However, the justification book for each component of the National Guard and Reserve will contain a listing of all projects that are funded in the Future Years Defense Program (FYDP). The listing should be compiled by year and show the location, type of facility, and cost. The listing should contain only the projects that are funded in the FYDP. The Military Construction/Family Housing Outyear Project Data Exhibit to be used is contained in section 060502.

060404 Submission of Family Housing Justification Books

A. Family Housing Justification, Military Departments. The format for the Congressional justification books for Family Housing will be identical to that detailed in Section 060302 for the budget estimates, with the following exceptions:

1. Submission Requirements. Family Housing Congressional justification material will be submitted with the Military Construction justification books for each military department. The Family Housing material should follow that provided for Military Construction. (See Section 060302B.2.b)
2. Military Construction Program -- DD Form 1390. Form will be prepared in accordance with section 060502. One form is required for each location. Personnel data should be based on latest approved totals for the installation or area. Inventory data should include only Family Housing assets. The form should be printed on white paper, and should precede the DD 1391.
3. Tri-Service Family Housing Cost Model. This form is not required. (See Section 060302B.6.b.(3)).
4. Civilian Personnel Costs -- Exhibit OP-8. This form is not required. (See Section 060302B.10.b.(2)).
5. Furnishings Summary -- Exhibit FH-3. This form is not required. (See Section 060302B.11.a)
6. Submission by Department of the Army Only. Since the Department of the Army has been designated as the agent to execute the Homeowners' Assistance Program for the Department of Defense, only the Department of the Army will submit justification material as described in Section 060303.

B. Family Housing Justification, Defense Agencies

1. Component Responsibilities. Separate justification material, in the format described in Section 060302 and similar to that specified above for the Military Departments, will be provided by the individual Defense Agencies. The submissions will provide separate Construction, Operation and Maintenance, and Leasing exhibits, as appropriate, for Defense Intelligence Agency, Defense Logistics Agency, and National Security Agency.
2. Consolidation and Review by OSD. Original pages of justification material prepared by the individual Defense Agencies will be submitted to the Directorate for Construction, OUSD(C) Program/Budget, Room 3D841, as requested by the call letter for the preparation of consolidated justification books for submission to the Congress. One copy of the justification material should be submitted concurrently to the ODUSD(Industrial Affairs and Installations).
3. Justification Material Format. Justification material submitted by the Defense Agencies will be unbound. Covers are not required. Pages will not be numbered. All data will be provided on 8-1/2 inch by 11 inch paper, typed across the short dimension of the paper with 1 inch margins, except for the FH-2, and FH-4 exhibits, which will be typed across the long dimension.
4. Classification. All justification material will be unclassified.

060405 Submission of Justification Books for the Homeowners' Assistance Fund, Defense Appropriation

A. Organization of Justification Books. Justification data will include items detailed in Section 060303 for the budget estimates. Material will be incorporated as the final section of the Army's book.

B. Submission by Department of the Army Only. Since the Department of the Army has been designated as the agent to execute the Homeowners' Assistance Program for the Department of Defense, only the Department of the Army will submit justification data.

C. Review by OSD. Before the justification material can be released to the Congress, it must be reviewed by the USD(C) to assure that policies and decisions made by the President and Secretary of Defense are fully reflected.

D. Security Clearances. The Department of the Army will be responsible for clearance of the justification book through OSD Security Review.

E. Number of Copies. See Section 010401 for instructions on the number of copies required and the distribution.

0605 MILITARY CONSTRUCTION/FAMILY HOUSING APPROPRIATION SUBMISSION FORMATS**060501 Purpose**

The formats provided on the following pages reflect guidance presented in previous sections of the chapter. Unless modified in a submission budget call, these formats should be adhered to.

060502 Exhibits in Support of Section 060301 - Budget Estimates Submission/Military Construction

INSTRUCTIONS FOR PREPARATION OF
DD FORM 1390, "FY_ MILITARY CONSTRUCTION PROGRAM"

The DD Form 1390 will be used by the active services to list the projects proposed for inclusion in the Military Construction Program, including requests for (1) new authorization; (2) funding of new authorization; and (3) funding of prior years' authorization. The Guard and Reserve Forces will use a DD Form 1390s instead of the DD Form 1390.

Instructions for preparation of DD Form 1390 follow:

Items 1 and 2 - Component and Date: Self explanatory. Date prepared or the date the budget estimate submission is due to OSD.

Item 3 - Installation and Location: Enter the official name of the installation. Enter the name of the state if within the United States or the name of the country or island chain if outside the United States. In the case of Guard and Reserve facilities, enter the city and state if the facility is not to be constructed on a military installation. Use "classified location" only when necessary to meet security classification guidelines.

Item 4 - Command: Enter the name of the host major command responsible for management control of the installation.

Item 5 - Area Construction Cost Index: Enter the construction cost index used in estimating the cost of the project(s). Consult the latest guidance published by DUSD(IA&I).

Item 6 - Personnel Strength: Enter personnel strengths for permanent, student, and support activities. Include transient personnel where applicable.

- a. As of: Enter September 30 of the year of submittal to OSD.
- b. End FY 19__: Enter end of the budget year, plus 5 years.

Item 7 - Inventory Data (\$000):

a. Total Acreage: Enter the number of acres owned and/or leased by the Government, under accountability of the Military Department concerned, as shown in the latest Inventory of Military Real Property.

b. Inventory Total As Of September 30 __: Enter the date and the current real property inventory total (except land rent). These totals should include inventory amounts for family housing.

c. Authorization Not Yet In Inventory: Enter the amount of funded and unfunded authorization for the construction of facilities or acquisition of land which have not been included in the September 30 Inventory of Real Property. This amount will include only such authorization as is related to either the Military Construction Program or the Family Housing Program as the case may be.

d. Authorization Requested In This Program: Enter the total cost for construction and land acquisition being requested for authorization in the budget year.

e. Authorization Included in Following Program: Enter the total estimated cost of construction and land acquisition required for authorization for the program year following the budget year.

(page 2 of 4)

f. Planned in Next Three Program Years: Enter the total estimated cost of construction and land acquisition required for the three years beyond the budget year and following year programs (i.e., second, third, and fourth years beyond the budget year). This amount should agree with the data used in the preparation of the military construction or family housing estimates contained in the Future Years Defense Program.

g. Remaining Deficiency: Enter the total estimated cost of construction and land acquisition required for existing facilities deficiencies remaining beyond the three program years covered in 7.f., above.

h. Grand Total: Enter the total of items 7.b. through 7.g..

Item 8 - Projects Requested In This Program: Installation or activity projects for the budget year shall be listed individually with attendant information provided in the appropriate column. Both major and minor construction projects are to be included as shown on the sample form.

a. Column 1 - Category Code: Enter the applicable category code consistent with the category code shown in Item 6 of the DD Form 1391 for the project.

b. Column 2 - Projects Title: Enter the project title consistent with the title shown in Item 4 of the DD Form 1391.

c. Column 3 - Scope: Enter the same quantity shown in Item 9 of the DD Form 1391, "Cost Estimates," and include the unit of measure (e.g., SM, SY, LF, PR, EA, CY, etc.). In those instances where a specific quantity cannot be satisfactorily identified, enter LS for lump sum.

d. Column 4 - Cost (\$000): Enter the project cost consistent with the cost shown in Item 8 of the DD Form 1391. If two or more projects are listed, enter the total in this column, and use this figure in Item 7.d., above.

e. Column 5 - Design Status: Enter the most accurate possible dates for the start and completion of design using numerals (e.g., 6/94, 11/95).

Item 9 - Future Projects:

a. Included in Following Program (FY_): List all installation projects regardless of the number and include columnar data comparable to that provided in Item 8, but leave design status blank.

b. Planned Next Three Years: List projects planned for next three years in 9.b. and include columnar data comparable to that provided in Item 8., but leave design status blank. The total costs of the projects listed under Items 9.a. and 9.b. should be identical to the entries under Items 7.e. and 7.f., respectively. If additional space is required to list all projects under Items 9.a. and 9.b., a separate sheet of paper should be utilized.

Item 10 - Mission or Major Functions: Enter the principal types of peacetime units and/or functions assigned or scheduled for assignment to the installation that require facilities or substantially contribute to the base population. Also enter the current mission stating precisely what the activity will do and list the major functions performed. All entries should address the time period shown in Items 6.a. and 6.b..

Item 11 - Outstanding Pollution and Safety Deficiencies (\$000): List all projects included in the budget request and planned for the next three years that are programmed for outstanding pollution and safety deficiencies. Use the format in Item 8.

Notes:

1. Space requirements for Items 8, 9, 10, and 11 may vary. Therefore, remaining space on the DD Form 1390 may be utilized as necessary for the specific entries and continued on a separate sheet of paper. A solid black line should be used to set Items 8, 9, 10, and 11 apart and individual item titles and subheadings should be added.

2. Projects that were authorized (but not appropriated) in prior years will be listed in the same manner as projects for which new authorization is requested. The fiscal year in which the project was authorized will be shown after the project title in Item 8.

1. COMPONENT	FY 19___ MILITARY CONSTRUCTION PROGRAM					2. DATE 22 Apr 96

INSTRUCTIONS FOR PREPARATION OF
DD FORM 1390s, "FY_ GUARD AND RESERVE FORCES MILITARY CONSTRUCTION"

The DD Form 1390 will be used by the Guard and Reserve Forces to supplement the data entered in the DD Form 1391, FY 19_ Military Construction Program..

Instructions for preparation of DD Form 1390s follow:

Item 1 - Component: Enter the specific Guard or Reserve Forces component of the active services. Recognized abbreviations such as ARNG (Army National Guard); ANG (Air National Guard); etc., are acceptable.

Item 2 - Date: Date prepared or the date the budget estimate submission is due to OSD.

Item 3 - Installation and Location: For facilities not located at DoD installations or commercial airfields, enter the name of the city and State in which the projects are located. For other facilities, enter the name of the DoD installation and its geographical location to the extent that it is not included in the installation name.

Item 4 - Area Construction Cost Index: Enter the construction cost index used in estimating the cost of the project(s). Consult the latest guidance published by DUSD(IA&I).

Item 5 - Frequency And Type Of Utilization: Enter the type of utilization (e.g., weekend drill, weeknight drill, unit training activities, annual active duty for training, etc.) and indicate number of days the installation is used per month/year, as appropriate.

Item 6 - Other Active/Guard/Reserve Installations Within 15 Mile Radius: List the nearest six existing Active and existing or programmed (within the next five years) Reserve component facilities and their distances, within a fifteen mile radius of the proposed construction site. If no facilities exist within the fifteen mile radius, identify the three closest installations. Indicate the year the facilities were constructed and the size of the facility.

Item 7 - Projects Requested In This Program: Installation or activity projects for the budget year shall be listed individually with attendant information provided in the appropriate column. Both major and minor construction projects are to be included.

a. Column 1 - Category Code: Enter the applicable category code consistent with the category code shown in Item 6 of the DD Form 1391.

b. Column 2 - Project Title: Enter the project title consistent with the title shown in Item 4 of the DD Form 1391.

c. Column 3 - Scope: Enter the same quantity shown in Item 9 of the DD Form 1391, Cost Estimates, and include the unit of measure (e.g., SM, SY, LF, PR, EA, CY, etc.). In those instances where a specific quantity cannot be satisfactorily identified, enter LS for lump sum.

d. Column 4 - Cost (\$000): Enter the project cost consistent with the cost shown in Item 8 of the DD Form 1391. If two or more projects are listed, enter the total in this column. In the case of Army National Guard projects where part of the financing is from other than Federal sources, enter only the Federal share.

e. Column 5 - Design Status: Enter the most accurate possible dates for the start and completion of design using numerals (e.g., 6/94, 11/95).

Item 8 - State Guard/Reserve Forces Facilities Board Recommendations (Date): Enter the following statement “facilities identified in Item 6 have been examined by the State Reserve Forces Facilities Board for possible joint use/expansion. The Board recommendations are ____.” (Note: Project folders will contain justification data to support the recommendation.)

Item 9 - Land Acquisition Required (Number of Acres): Enter the acreage required for the project and the method of acquisition (e.g., fee, title, donation, lease, etc.). For all projects involving land acquisition, a site survey must be conducted in accordance with DoD Directive 1225.5 and the following statement must be entered, either in Item 9 or Item 10: “Site survey has been completed and site is suitable for constructing the proposed project at the estimated cost indicated.”

Item 10 - Projects Planned In Next Four Years: Enter the Project Title and Estimated Cost for projects planned at the installation identified in Item 3 for the next four years beyond this program year. A maximum of five projects should be identified. For armory-type projects, list those facilities which are programmed for replacement within the next four years within a fifteen mile radius of the proposed project as well as the year the facilities were constructed. If none are planned, so indicate. Items shall contain columnar data comparable to that provided in Item 7 with the exception of design status which should be left blank.

Item 11 - Personnel Strength As Of _____: In the appropriate columns, enter the number of authorized and actual personnel at this facility as of six months prior to project submission.

Item 12 - Reserve Unit Data: List the designated units assigned and/or scheduled to be trained in the requested facilities. Enter the corresponding authorized and actual strengths of each unit, indicating actual strength as of the date listed in Item 11.

Item 13 - Major Equipment and Aircraft: List the vehicular and/or other large equipment and aircraft which are to be accommodated at the installation and which have a bearing on the type and/or scope of the facility requirement. When vehicle maintenance shops are being requested, the Weighted Equipment Density (WED) for the vehicles to be maintained will be included in this item.

INSTRUCTIONS FOR PREPARATION OF
DD FORM 1391/1391C
"FY __MILITARY CONSTRUCTION PROJECT DATA"

1. The DD Form 1391 will be used, as applicable, by the Active, Guard, and Reserve Forces to support each project proposed for inclusion in the Military Construction Program. This includes both new authorization projects in the program as well as urgent unforeseen projects using emergency or contingency authorization. This form will also be used to transmit supporting data for the following types of projects:

- a. Minor construction projects, 10 U.S.C. 2805.
- b. Operation and maintenance type projects required to be submitted to OSD in accordance with the provisions of DoD Directives 4270.36, 1225.7 and 4165.6.
- c. Nonappropriated fund construction projects requiring OSD concurrence or approval.
- d. Nonappropriated fund construction projects requiring OSD concurrence or approval.
- e. Family housing projects.

2. The continuation sheet (DD Form 1391c) will be used as required for explanation of the requirement for the project (item 11.) and other mandatory statements concerning flood plains and wetlands environmental impact, accessibility to the handicapped, fallout shelters, etc. However, when submitting an annual Military Construction Program, these mandatory statements may be included in the front of the program book.

3. Instructions for preparation of DD Form 1391 are outlined below:

- a. ITEMS 1 and 2 - COMPONENT AND DATE: Self-evident.
- b. ITEM 3 - INSTALLATION AND LOCATION: Enter the official name of the installation. Use code name or designations only when necessary to preclude security classification or when an official name is not available. Enter the name of the State if within the United States or the name of the country or island chain if outside the United States. In the case of Guard and Reserve Forces facilities, enter the city and State if the facility is not to be constructed on a military installation.
- c. ITEM 4 - PROJECT TITLE: Enter the title used in item 8, column 2 of the DD Form 1390, assuring that it corresponds to the category code in item 6.

(1) Except for new construction, the type of work, such as "addition," "conversion," "alteration," or "modernization" shall be used in the title.

(2) Where a single structure is to serve more than one purpose, the title should reflect the predominate use.

(3) The scope of a project or number of buildings involved will not be shown in the title (i.e., and "Enlisted Quarters" project will not be shown as "Two 250 Man Enlisted Quarters.")

(4) Avoid the inclusion of acronyms.

(5) If a project requires land acquisition estimated to cost in excess of \$50,000, the project title will be suffixed with "With Land Acquisition". Land to be acquired for the construction of several projects or for other purposes shall be programmed as a separate project and identified on a separate DD Form 1391.

d. ITEM 5 -PROGRAM ELEMENT: Enter the appropriate number as it relates to the "Five Year Defense Program," except when inclusion of this number would require classification of an otherwise unclassified form.

e. ITEM 6 - CATEGORY CODE: Enter the applicable category code using no less than three nor more than six digits consistent with item 8, column 1 on DD Form 1390.

f. ITEM 7 -PROJECT NUMBER: Enter the number of the project assigned by the Component concerned. If no number has been assigned, indicate N/A (not applicable).

g. ITEM 8 - PROJECT COST: Enter the estimated cost in thousands of dollars (excluding design except for family housing) for which funding is being requested. The amount indicated should be identical to that shown in item 8., column 4, of the DD Form 1390 and should include the costs of the primary facilities, supporting facilities, contingencies, supervision, inspection, and overhead. Figure will be the Total Request entered in item 9. and will not include the figure entered for "Equipment Provided From Other Appropriations."

h. ITEM 9 - COST ESTIMATES: This portion of the DD Form 1391 is comprised of several elements which collectively comprise the Total Request. Each element will be identified, quantified, and costed in a series of five column entries as follows:

(1) Item: Identity of the Primary or Supporting Facility, etc. as described in item 9., line 1.

(2) U/M (unit of Measure): Each entry in the "item" column will be followed in the "U/M" column by the accepted two-character abbreviation for the unit of measure associated with the quantity of the item concerned (e.g., SM, SY, LF, KV, etc.). Where it is not feasible to show a specific unit of measure, use LS (Lump Sum).

(3) Quantity: Enter the required number of units of measure comprising the "item" entry. Where "LS" is the unit of measure, enter a dash (-).

(4) Unit Cost: Enter the appropriate unit cost for each "item" entry where a unit of measure is indicated. Where the unit of measure is "LS" enter a dash in the unit cost column.

(5) COST (\$000):

(a) Enter the cost, in thousands of dollars, represented by the product of the "Quantity" and "Unit Cost" entries.

(b) When a single primary facility is listed enter the cost of the facility without parentheses. If unusual features or functional areas of the primary facility are listed, the cost of each shall be enclosed with parentheses. The sum total cost of these features shall equal the figure entered for the primary facility.

(c) When more than one primary facility is listed, the cost of each facility will be entered in the cost column without parentheses.

(d) The cost entry for the item "Supporting Facilities" shall be entered without parentheses and shall be the total of the various supporting facilities listed. However, each of the individual supporting facility costs shall be enclosed by parentheses.

(e) The cost entered for items such as "Subtotal," "Contingency," "Contract Cost," "SIOH," and "Total Request" shall be entered without parentheses. However, the cost for Equipment Provided From Other Appropriations" shall be entered as a nonadd item.

(f) Projects in category Code 500 will have separately identified the equipment purchased for the Surgeons General as "Category Equipment" showing the total cost of such equipment added to the "Total Request". Labor cost for installation of "Category E" equipment should be included in the unit cost for the primary facility because it is part of the "Total Contract Cost."

(6) PRIMARY FACILITY: Enter the identity and required columnar data for the primary facility. When the primary facility consists of two or more components the cost of the primary facility will be the sum of the costs of the individual components. In addition, subordinate components will be entered under the primary facility after indenting two spaces.

(a) Normally, the cost of fixed equipment provided as part of the construction contract (e.g., cooling, heating, and electrical systems, etc.) will be included in the cost of the primary facility. However, when the primary facility includes unusual features of significant cost, such as hyperbaric vessels and standby cooling, such features should be identified under the primary facility.

(b) Land acquisition required specifically for the project and estimated to cost \$50,000 or more shall be listed in the same manner as an unusual feature. Conversely, land acquisitions estimated to cost less than \$50,000 are to be accomplished under 10 U.S.C. 2672 and should not be listed.

(c) For family housing new construction, the entry under primary facility will show the total number of units in the project. As subordinate components to the primary facility "Units to 5' line," "GFE," and "Land Acquisition" will be shown in parentheses in the cost column to add up to the cost of the primary facility shown. Item 10 will be used to show the numbers and cost computations for the various types of living units which comprise the primary facility.

(d) "Lump-sum" funding requests are prohibited. The only instance for which separate construction projects can be combined under a single DD 1391 is when each of the projects is in the same general facility category (i.e., supply facilities, maintenance and production facilities, unaccompanied personnel housing, etc.). Programs such as "facility upgrades," "ATB Beddown Facilities," and others combining a number of disparate construction efforts must be justified as separate projects. If it is planned, in execution, to construct several of these projects at a single location under one contract, a statement to that effect should be included in the "Additional" section of Item 10.

(e) *Antiterrorism Force Protection/physical security measures: the entry under primary facility will show physical security improvements (e.g. special structural improvements, ballistic glass, etc.). Where land acquisition serves a specific purpose such as stand-off distance for force protection, the acquisition shall be listed as an antiterrorism force protection subordinate component to the primary facility.*

(7) SUPPORTING FACILITIES: List those items of construction directly related to and required for the support of the primary facility. Such items should include (a) special construction features (piles, spread footings, seismic, fill, etc.); (b) utilities (gas, oil, steam, electric, and water supply lines as well as sanitary and storm sewers); (c) site preparation; (d) roads, sidewalks, and parking; (e) site improvements (seeding, sodding, landscaping, etc.); (f) *antiterrorism force protection/physical security measures such as physical security site improvements (e.g. fencing, perimeter/area lighting, blast mitigation barriers, berms and landscaping, etc.);* and (g) demolition. All supporting facility items should be listed in terms of accepted units of measure and quantity whenever practicable. For family housing, design cost will be identified under "Supporting Facilities."

(8) SUBTOTAL: Enter the sum of the costs shown for all primary and supporting facilities.

(9) CONTINGENCY: Enter the appropriate contingency rate, in parentheses, immediately following the item designation in column 1, and enter the cost equivalent in the proper column. While the normal contingency rate is 5 percent, contingency rates may vary with unusual conditions. Therefore, rates in excess of 5 percent shall be adequately justified.

(10) TOTAL CONTRACT COST: Enter the sum of the "Subtotal" and the "Contingency" costs. In the case of Army National Guard, armory projects which are funded, in part, from other than Federal funds, enter the Federal costs on the first line and the State or other cost on the next line below.

(11) SUPERVISION, INSPECTION, AND OVERHEAD (SIOH): Enter the appropriate SIOH rate in column 1 after the item designation and reflect the cost equivalent in the proper column.

(12) TOTAL REQUEST: Enter the sum of the "Total Contract Cost" and the "SIOH". This figure should be identical to the entry in item 8., "Project Cost (\$1000)". Total request should be rounded-off to provide a more realistic approach to the presentation of MILCON programs. The following guidance is provided for "rounding-off" a projects' total request:

Project (P) Estimate (\$000)		Rounding Guidance (\$000)
< 1,000		Nearest \$ 10K
1,000 to 5,000		Nearest \$ 50K
5,000 to 10,000		Nearest \$ 100K
10,000 to 15,000		Nearest \$ 200K
15,000 to 20,000		Nearest \$ 500K
> 20,000		Nearest \$ 1,000K

(13) EQUIPMENT PROVIDED FROM OTHER APPROPRIATIONS: Enter the total cost of equipment which is procured with other than MILCON funds and which is essential to the mission of the facility. DD Form 1391 should reflect only the cost of equipment identified in the Associated Equipment Report. If no such major equipment is associated with the project, enter a "zero" in the appropriate space. Note that this figure is not included in the "Total Request" above. This excludes minor items procured with O&M funds, and in the case of Army National Guard, excludes equipment provided from other than Federal appropriations.

i. ITEM 10 - DESCRIPTION OF PROPOSED CONSTRUCTION:

(1) In a clear and concise manner, provide a complete outline of all principal features of the work and its correlation with the various data entered in item 9.

(2) *List specific antiterrorism force protection measures and antiterrorism force protection considerations that this project provides.*

(3) Begin with an accurate description of the primary facility. For buildings, indicate the materials planned to be used for the frame, walls, roof, and foundations, and identify the major functions for which space is being provided. For structures other than buildings, describe each major element required to produce a complete and usable facility. Avoid the use of generalities such as "most economical means" or "modern methods and materials."

(4) Provide only such additional descriptive details as are necessary for clarity.

(5) Identify and list the buildings or structures to be demolished in connection with the proposed construction, if applicable.

(6) For single person quarters projects, indicate the grade mix of personnel, officer or enlisted, who will occupy the facilities.

(7) For projects involving additions, alterations, or conversions, describe the changes to be made.

(8) At the last entry in item 10., indicate the amount of air conditioning required (e.g., air conditioning - 15 tons).

j. ITEM 11 - REQUIREMENT: This portion of the DD Form 1391 is comprised of five elements which are to be set forth in the following format:

(1) Immediately after the item title "Requirement" indicate, in appropriate units of measure, the total facility requirement (e.g., 77, 366 SF), followed by two additional entries giving the status of the existing facility (e.g., adequate: 66,134 SF; substandard: -0-).

(2) PROJECT: Provide a one-sentence statement indicating what this project provides.

(3) REQUIREMENT: Provide detailed, informative statements as to precisely why the project is needed. Use positive statements to support the requirement and avoid the use of such words as "inadequate," "uneconomical," and "necessary" unless they are fully explained. Similarly, when identifying contributing factors, assure that the presentation leaves no pertinent questions unanswered (e.g., *vulnerability to terrorist threats (reference threat/vulnerability assessment)*; excessive maintenance (show cost comparison); self-liquidation (show amortization); or advanced deterioration (describe effects)). The requirements must establish maximum utilization of existing facilities and identify alternatives considered, along with reasons for their rejection.

(4) CURRENT SITUATION. Describe how and under what conditions the requirement is presently being met. Comments should support the stated requirement and include the identity and description of current assets as well as the reason they are considered unsuitable for continued use. For Guard and Reserve Forces projects which are to replace existing facilities, identify and describe the disposition to be made of them. Similarly, for Guard and Reserve Forces facilities to be constructed and/or utilized jointly with other Guard/Reserve components, include pertinent information and status of coordination or negotiations.

(5) IMPACT IF NOT PROVIDED. Describe the manner and extent to which mission accomplishment would be affected if the project were not approved.

(6) ADDITIONAL. If the project is justified on an economic basis (primary economic analysis), so state and indicate the projected payback period. As a minimum, all renovation, upgrade, and replacement projects must be supported by an economic analysis. For all other projects, state precisely why a primary economic analysis cannot be applied to the project. When providing supporting documentation for the OSD budget submission, enter appropriate statements on commercial/industrial operations in accordance with the OMB Circular A-76 and as required by applicable DoD Instruction. Entry of this information on the DD 1391 or on a separate DD 1391c is optional. For all overseas projects, state whether or not the project is eligible for NATO Infrastructure or other host nation funding.

NOTE: Space requirements for items 10. and 11. will vary. Therefore, remaining space on the DD Form 1391 may be used as necessary for the specific entries and continued on a DD Form 1391c as appropriate. A solid, black line should be used to set items 10. and 11. apart, and individual item titles and subheadings should be added.

Military Construction/Family Housing Outyear Project Data

Component	Fiscal Year	Appropriation	Installation	Location	Project Title	Facility Category	Program Element	Budgeted Amount	Change from Previous submission

Instructions:

1. This exhibit will be executed at the project level for each of the program years included in the Future Years Defense Program (FYDP) for which the Component has programmed funding (do not include projects for which funding is not programmed except as noted in instruction number 11 below) in MilCon (Major Construction & Supporting Activities and Family Housing Construction accounts) No project level detail is required for Minor Construction, Planning and Design, Family Housing Improvement or BRAC. List the totals for these as line items.
2. Data should be submitted in hard copy and on a disk in a Microsoft Access format or in Microsoft Excel format.
3. Text data should be in title case.
4. Component should be the specific Service Active, Guard or Reserve Force component or Defense Agency. Recognized abbreviations such as ARNG (Army National Guard), etc. are acceptable.
5. Fiscal year should be a four-digit number.
6. Appropriation should be a four digit number (treasury code).
7. Location is the two digit state or country code.
8. Facility category should be the three-digit code from the list in DoDI 4165.3.
9. Program element should be the appropriate number as it relates to the FYDP except when inclusion of this number would require classification of an otherwise unclassified form.
10. Budgeted amount is in thousands.
11. The change from previous submission column should show any changes from the budgeted amount in the previous submission. If a project from the previous submission is deleted, list the project and show a zero in the budgeted amount column and the amount previously programmed in the change column.
12. For the hard copy, the data should be sorted by location and then by installation. The hard copy should also include a total for each fiscal year.

TRI-SERVICE FAMILY HOUSING COST MODEL

SERVICE _____ LOCATION _____

INSTRUCTIONS FOR PREPARATION OF
FAMILY HOUSING FURNISHINGS SUMMARY
EXHIBIT FH-3

General. Furnishings to be included in Exhibit FH-3 are defined in Enclosure 6 to DoD Instruction 4165.43. For Unaccompanied Personnel Housing furnishings, see Exhibit OP-21, Chapter 232, this Manual.

Prior Year Data. For the prior year, enter estimated end year obligations.

Current, and Budget Year Data. Estimates should be based on requirements determined to be in accordance with Section XI of DoD Instruction 4165.43 and applicable experience data. Provide a short narrative explaining differences of more than \$1 million or 10%, whichever is less, between the total amount shown for furnishings in the current year and the budget year.

Moving and Handling. All identifiable transportation, handling and storage costs should be included here.

Initial Issue. Certain initial issue movable equipment, such as stoves and refrigerators, is usually procured as part of a construction project with construction funds, instead of operation funds. Likewise, in some circumstances leasing funds are utilized for furnishings in leased quarters. The FH-3 should reflect all Family Housing, Defense resources applied to furnishings, with memo entries to indicate the amounts funded from accounts other than the Furnishings portion of Operations and Maintenance.

CHAPTER 7

BASE REALIGNMENT AND CLOSURE APPROPRIATIONS**0701 GENERAL****070101 Purpose**

A. This chapter provides instructions applicable to budget formulation and congressional justification for Base Realignment and Closure (BRAC) appropriations.

B. The following appropriations and accounts are covered:

Section

070201

- DoD Base Closure Account (1988 Commission)
- DoD Base Closure Account 1990 (1991, 1993 & 1995 Commissions)

070102 Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 7 covers specific back-up material requirements for the above accounts. The above appropriations/accounts should also submit any applicable exhibits required in Chapter 19 - Special Analyses.

070103 Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 7 provides additional specific guidance with regard to the back-up material required for Base Realignment and Closure appropriations.

070104 References

Chapter 3 provides guidance related to costs and Chapter 6 provides guidance and formats related to Military Construction and Family Housing costs.

0702 UNIFORM BUDGET AND FISCAL ACCOUNTING CLASSIFICATION**070201 Base Closure Account, Defense Appropriations**

The budget account classification structure for the Base Closure Account, Defense is prescribed in Comptroller of the Department Of Defense Memorandum, dated December 21, 1993 and outlined below.

A. Overview

The Director for Budget and Finance, Washington Headquarters Services (WHS), is responsible for departmental-level accounting and reporting for the DoD Base Closure Account. The Military Departments are responsible for implementing all base closure and realignment actions, and administering their allocations of base closure funds.

B. Guidance

1. WHS shall be responsible for obtaining and recording the appropriation warrant (TFS Form 6200) for the DoD Base Closure Accounts. The Directorate for Construction, ODC(P/B), is responsible for initiating the Apportionment and Reapportionment Schedule (DD Form 1105) for the DoD Base Closure Accounts and providing it to WHS for recording in the departmental-level accounting records.

2. The Comptroller of the Department of Defense shall make funds available to the Military Departments based on their official financial plans. Financial plans shall be prepared by the Military Departments in cooperation with and at the direction of the Deputy Assistant Secretary of Defense (Industrial Affairs & Installations). Military Department financial plans and the subsequent allocation of funds shall be supported by the Format 460-BC, "DoD Base Closure Account Financial Plan". For planned military construction and family housing construction requirements, each project to be executed with the funds requested will be individually listed on the plan. A separate narrative explanation for other planned expenditures shall also be submitted to the Directorate for Military Construction, ODC(P/B), in sufficient detail on the Format 460-BC to support the Military Department financial plan.

3. In response to a request from the DoD Comptroller, WHS shall allocate DoD Base Closure Account funds to the Military Departments on SD Form 477, "Fund Authorization," with a Format 460-BC and supporting documentation attached. The Military Departments may re-phase planned execution as the situation dictates but shall notify DUSD(Industrial Affairs and Installations) and Directorate for Construction, Deputy Comptroller (P/B) of all changes. Where a military construction or family housing project is to be executed, but does not appear on the current approved financial plan, the prior approval of the Directorate for Military Construction is required. This will ensure that the Department has complied with the notification requirements of House of Representatives Report 101-176, Military Construction Bill, July 26, 1989, prior to the expenditure of DoD base Closure Account funds. To keep the Comptroller and DUSD(Industrial Affairs and Installations) apprised of these changes, the Military Departments shall submit a revised Format 460-BC and supporting documentation as required to reflect the status of the current plan being as required executed. The Military Departments and Defense Agencies will be allocated BRAC funds by subaccounts. The amounts allocated represent limitations subject to the provisions of section 1517 of 31 U.S.C., the Anti-Deficiency Act. Obligations are not to be incurred beyond the approved allocation amounts. However, Components may adjust amounts between BRAC subaccounts by up to 5 percent per quarter without prior Comptroller approval with the exception of the amounts provided for environmental efforts which may not be decreased or increased without OUSD(C) prior approval.

4. The Military Departments and Defense Agencies shall receive and record the suballocations of base closure funds received from the WHS and allot that suballocation to respective installations. The Military Departments and Defense Agencies shall subdivide their allocations of the base closure accounts by subaccount, and distribute the base closure funds to the installations responsible for base closure actions. Each Military Department and Defense Agency shall distribute the base closure funds to its installations in accordance with its normal fund

distribution procedures. This distribution process shall include allotment, or suballotment, as appropriate, of the suballocation for the WHS. The applicable subaccounts are as follows:

- Military Construction:
 - a. Construction
 - (1) (Project)
 - (2) (Project)
 - b. Planning and Design

NOTE: The military construction subaccount should be reserved for projects listed individually on the Format 460 accompanying the fund allocation document.

- Family Housing:
 - a. Construction
 - (1) (Project)
 - (2) (Project)
 - b. Planning and Design
 - c. Operations
- Operation and Maintenance (O&M):
 - a. Civilian Severance Pay
 - b. Civilian Permanent Change of Station (PCS)
 - c. Transportation of Things
 - d. Real Property Maintenance
 - e. Program Management (civilian workyears, travel, and related support dedicated to implementation efforts)
- Environmental: Includes environmental restoration, including reducing, removing, and recycling hazardous wastes, and removing unsafe buildings and debris; Memoranda of Agreements between Defense and States (DSMOA), and reimbursements to the Agency for Toxic Substance and Disease Registry (ATSDR); and mitigation efforts associated with a military installation closure or realignment. Mitigation efforts do not apply to the DoD Base Closure Account.
- Community Programs:
 - a. Community Planning Assistance: For communities located near a military installation to which functions will be transferred as a result of a closure or realignment of a military installation.
 - b. Economic Adjustment Assistance: For communities located near a military installation being closed or realigned.
- Federal Agencies Reimbursement: Includes reimbursements to other Federal agencies for actions, other than for environmental activity discussed above, performed with respect to any closure or realignment.
- Military Personnel: Limited to PCS and TDY expenses dedicated to implementation efforts.
- Procurement-type Items: The procurement account should be limited to those items costing more than \$5,000 each and normally capitalized on installation-level accounting.
- Other Costs: Expenses, other than those above, associated with base closure and realignment efforts.

5. The general criterion to apply when deciding whether to charge specific costs to the DoD Base Closure Account is that the cost in question is a one-time implementation cost associated with the overall base closure effort. If the increased cost is a recurring one driven by the transfer of workload from one location to another, it should be documented to the extent practicable, but budgeted for and charged to the applicable Military

Department appropriation. A legitimate one-time cost of base closure implementation should be charged to the subaccount of the DoD Base Closure Account consistent with the cost category under which the item has been justified in the President's Budget. For example, the one-time operations and maintenance-type costs at R&D funded installations should be allocated to the appropriate subaccount of "Operations and Maintenance." Low dollar value construction projects budgeted as a lump sum under the real property maintenance category should be charged to that subaccount and not the construction subaccount of military construction, which should be reserved for projects listed individually on the Format 460-BC accompanying the fund allocation document. Charges to the procurement account should include items normally charged to procurement accounts.

6. Proceeds resulting from transfer or disposal of property or facilities (including buildings and structures) due to the base closure process shall be deposited as reimbursements into the DoD Base Closure Account. These reimbursements shall be reprogrammed from reimbursable to direct before distribution to the Military Departments. The detailed accounting and financial management procedures relating to the revenues from asset sales are prescribed in Comptroller of the Department of Defense memorandum, dated December 21, 1993.

C. Accounting Entries (see end of this section).

D. Reporting Requirements WHS is responsible for preparation of the departmental-level appropriation and fund status reports for the DoD Base Closure Account that are required by Volume 6 and Volume 12 (to be issued) of this Regulation. The specifications for any additional reports required by the Base Closure and Realignment Act are to be issued by the DUSD(Industrial Affairs and Installations).

1. The budget execution reports required for the DoD Base Closure Account are as follows: a) Year-end Closing Statement, FMS Form 2108; b) Report on Budget Execution, Acct Rpt(M)1176; c) Flash Report on Obligation Status, Acct Rpt(M)1445; d) Report on Obligations, SF-225, IRCN 1183-TD-QU; e) Report on Appropriation Status by Fiscal Year Program and Subaccounts, Acct Rpt (M)1002; and, f) Report on Reimbursements, Acct Rpt(M)725.

2. WHS shall prepare the required reports based on accounting information held at the departmental level and feeder reports from the Military Departments and Defense Agencies. Each Military Department/Defense Agency shall provide feeder reports to WHS on the status of its allocation. These reports shall be submitted in accordance with a schedule of due dates to be published by WHS.

3. Special Instructions for Reports on Appropriation Status by Fiscal Year Program and Subaccounts, Acct Rpt(M)1002. Each Military Department will receive an allocation from OSD/WHS at the subaccount level. The Military Departments are required to distribute their allocations by the subaccounts shown below, and prepare the feeder Acct Rpt (M)1002's by those subaccounts within each fiscal year program specified in Section 070201 B.4.

4. Line Entries for the 1002 are as follows:

a. Column (a). The DoD Base Closure Account must be subclassified to show, where applicable, the following: Fiscal Year Program, Direct Program and Subaccounts (as specified above).

b. Columns (b) through (j). follow the instructions contained in Volume 6 of this Regulation.

ACCOUNTING ENTRIES

1. Departmental Level (WHS)

- a. Dr 4119 Other Appropriations Realized
Cr 4450 Authority Available for Apportionment
and

Dr 1013 Funds with Treasury
Cr 3100 Appropriated Capital

To record an appropriation realized.

- b. Dr 4450 Authority Available for Apportionment
Cr 4511 Unallocated Apportionment – Direct Program - Current Period

To record the Apportionment and Reapportionment Schedule (DD Form 1105).

- c. Dr 4511 Unallocated Apportionment - Direct Program - Current Period
Cr 4541 Allocations Issued - Direct Program - Current Period

To record the allocation of obligational authority to an intermediate command.

2. Intermediate Level (Military Departments)

- a. Dr 4550 Internal Fund Distributions Received
Cr Unallotted Allocations - Direct Program - Current Period

To record receipt of an allocation of direct program obligational authority.

- b. Dr 4561 Unallotted Allocations - Direct Program - Current Period

Cr 4571 Allotments Issued - Direct Program - Current Period

To record the allotment of direct program obligational authority to a subordinate activity.

3. Installation Level (Military Departments)

- a. Dr 4580 Allotments Received
Cr 4610 series Allotments Available for Commitment/Obligation

To record receipt of an allotment.

0703 BUDGET ESTIMATES SUBMISSION**070301 Purpose**

A. This Section prescribes instructions for the preparation and submission of budget estimates for the Base Realignment and Closure appropriations.

B. Unless otherwise specified, these instructions apply to all Base Realignment and Closure appropriations and to all budget estimates. Data submitted must be consistent with the budget estimate being supported.

C. Examples of budget exhibits can be found in Section 0705.

070302 Submission Requirements

A. General Guidance. *Each Service will prepare separate justification books for each Base Closure Account. For Base Closure Account-Part I, information is required for FY 1990 through FY 1995. For Base Closure Account-Part II, information is required for FY 1992 through FY 1997. For Base Closure Account-Part III, information is required for FY 1994 through FY 1999. For Base Closure-Part IV, information is required for FY 1996 through FY 2001.* The justification books will be organized by closure package with narrative and financial summary exhibits. Section 070502 contains sample exhibits BC 01 through BC 03 for use in preparation of justification books. Included in the sample exhibits are instructions pertaining to the substance and format of the information to be displayed. In addition, detailed Form 1391s (with design status for each project noted on the Form) are to be provided by closure package for all military and family housing projects to be executed in biennial budgets subsequent to FY 1991 with Base Closure Account funding.

B. Base Realignment and Closure Service Overview Exhibit (BC-01). Each Service will prepare an overview exhibit (BC-01) for each Base Closure round summarizing by fiscal year, the names and locations of the affected bases, and how much of the DoD Base Closure Account will be expended in the fiscal year. The overview will also address mission impact and environmental considerations affecting closures and realignments for that round.

C. Base Realignment and Closure Cost and Saving Exhibit (BC-02). Each Service will prepare a cost and saving exhibit (BC-02) for each base closure package included in a Base Closure round *and a BC-02 exhibit summarizing the packages contained in that round of closures.* BRAC saving estimates reported in Exhibit BC-02 must be based on the best projection of what savings will actually accrue from approved realignments and closures. *Prior year estimated savings must be updated to reflect actual savings when available.*

D. Base Realignment and Closure Package Description Exhibit (BC-03) Each Service will prepare a short narrative for each package describing the actions necessary to complete the realignment or closure at that location. The narrative will also address one-time implementation costs and anticipated savings that will accrue from the partial or complete closure of the base.

E. Base Realignment and Closures Military Construction/Family Housing Construction Projects. There will be an individual Form 1391 for each military construction/family housing construction project. The 1391s will be prepared in accordance with guidance contained in DoD Instruction 7040.4 and reproduced in Section 0605 of this volume. As a minimum, BRAC construction projects should be at least 35-percent design complete or based on the Congressionally-approved parametric estimation process to be included in the budget submission. Components will also prepare a state list for BRAC construction projects being requested in the budget year similar to the Construction Annex (C-1). This project list must be included in the back section of each BRAC justification book.

F. Base Realignment and Closure Environmental Exhibits. Each service will prepare environmental progress and funding by priority exhibits BRAC Env-1A and 1B as provided in section 070502. These BRAC environmental exhibits include requirements by relative risk category and each phase of environmental restoration, as well as requirements for environmental compliance and planning. A diskette with installation level detail for environmental restoration activities at BRAC installations, similar to that identified for submission in Chapter 13 of the DoD FMR for environmental restoration activities at active installations, should be forwarded together with hard copy versions to OUSD(Comptroller) (P/B), Military Construction Directorate (Room 3D840). Questions concerning the data file structure should be addressed to OUSD(A&T), Deputy Under Secretary of Defense (Environmental Security), Director for Program Integration ((703)695-2195.)

G. Budget Submission. Coincident with the hard copy submission of the Base Closure budget estimates, Military Departments and Defense Agencies, as applicable, will submit machine-readable data entries for all applicable budget accounts for budget years only. Detailed data entries only will be submitted since subtotals and summary totals are computer generated. Input data will be formatted in accordance with DD Form 2232 on a media type specified in Section 010506, Name Edit System (NES) structure and description, of this manual. An example of the Name Code File Listing for Base Realignment and Closure Accounts can be found in Section 010506. A full listing will be made available periodically from the DoD Comptroller, Directorate for program and Financial Control (rm 3B872, com:(703)697-7564, DSN:227-7564). All TOA values for BY1 and BY2 will be submitted on DD Form 2232 in accordance with the detail prescribed by the Name Edit System (Structure documented in the "Budget Accounts Title File Listing"). Amounts will be in agreement with the PB-2 and PB-2A exhibits.

1. Submission of Outyear Estimates. The submission for BY+1 through BY+4 TOA will be made coincident with the budget submission. Input to the data base will be formatted in accordance with DD Form 2234 using the Name Edit System structure and description by base closure round, base closure account and subactivity.

2. Decision Rounding. DD Form 2233 and DD Form 2236 will not be used for budget estimates submissions. These forms are used to record decisions documented by Program Budget Decisions (PBDs).

0704 CONGRESSIONAL JUSTIFICATION/PRESENTATION**070401 Purpose**

A. This Section presents the justification book organization and the exhibit requirement for submission to Congress. Examples of budget exhibits can be found in Section 0705 and reflect those addressed in Section 0703.

070402 Organization of Justification Books

A. Justification material will be organized into four volumes entitled:

1. DoD Base Realignment and Closure (1988 Commission)
2. DoD Base Realignment and Closure (1991 Commission)
3. DoD Base Realignment and Closure (1993 Commission)
4. DoD Base Realignment and Closure (1995 Commission)

B. Each justification book will be organized as shown on the following page for each base realignment and closure round contained in the book

ORGANIZATION/EXHIBIT REQUIREMENTS

A. Organization

- Table of Contents
- Base Realignment and Closure Overview
- Financial Summary
- Base Realignment and Closure Detail:

By Package (Each package will include appropriate 1391/1391C Military/Family Housing Construction Exhibits).

- Base Realignment and Closure Construction Projects

By Component, State, Project Description, Project Number, BRAC Round and Dollar Amount.

0705 BASE REALIGNMENT AND CLOSURE APPROPRIATION SUBMISSION FORMATS**070501 Purpose**

The formats provided on the following page reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

070502 Exhibits in Support of Section 0703 - Budget Estimates Submission

BC-01 BRAC Service Overview.....	12

INSTRUCTIONS FOR PREPARATION OF
EXHIBIT BC-01
"FY ____ BASE REALIGNMENT AND CLOSURE DATA"
19__ COMMISSION

Service Overview

Schedule: Summarize by fiscal year, the names and locations of the affected bases, and how much of the DoD Base Closure Account will be expended in the fiscal year. Discuss possible problems in meeting the schedule. Highlight realignment/closure actions where the estimated implementation costs and impacts significantly differ from those determined by the Commission.

Mission Impact: Describe possible mission impact in completing the realignment/closure.

Environmental Considerations: Describe potential problems in closing an installation due to the complexity in cleaning up environmental wastes and hazards.

Address any other items/issues appropriate for the overview section.

BASE REALIGNMENT AND CLOSURE
19__ COMMISSION
PACKAGE DESCRIPTION

Service/Location/Package: Cross-reference to standard terminology employed in the Commission's report.

Closure/Realignment Package: Brief description of the actions necessary to complete the realignment or closure at this location. A package is defined as all actions, costs and savings associated with the closing or realignment of a base or installation as recommended by the Commissions. Include how the physical plant will be affected and the missions that must be terminated or transferred to other locations. Reflect planning and design and management overhead costs in a separate package covering, overall one-time implementation cost. All military construction savings should also be addressed in this same package.

One-time Implementation Costs:

Military Construction: New facilities that must be constructed to accommodate a realignment or closure action. List the construction projects associated with the package as follows:

<u>Location/Project Title</u>	<u>Fiscal Year</u> <u>of Award</u>	<u>Amount</u> <u>(\$ in 000)</u>
-------------------------------	---------------------------------------	-------------------------------------

Subtotal for Each Fiscal Year

Conjunctively-Funded Construction: Identify each project that is funded conjunctively, the total cost of each project and the amounts funded by non-Base Closure Account sources. These projects will also appear on the above list, which will reflect only that portion of the project to be funded by the Base Closure Account.

Family Housing Construction: Specify the number of units and location. As with military construction, list each family housing construction project.

Family Housing Operations: The one-time family housing operations costs associated with package implementation.

Operation and Maintenance: Includes PCS of civilian personnel, civilian severance costs, transportation of things, RPM and other one-time implementation costs as a result of closure or realignment. Program management costs should also be addressed, but only in the separate package covering overall one-time implementation costs.

Procurement Items: Items normally funded from procurement appropriations.

Revenues From Land Sales: Provide statistics and narrative to adequately describe the land being proposed for sale. Describe the method and date of appraisal.

Exhibit BC-03 BRAC Package Description
(page 1 of 2)

Environmental: Indicate the environmental restoration actions that will occur at both the losing and gaining locations, the funding requirements and status of all such restoration actions.

Savings: Demonstrated savings that will accrue from the partial or complete closure of the base.

Military Construction: To be addressed in the single package addressing overall/program management costs.

Family Housing Construction: Self-explanatory.

Family Housing Operations: Savings (offset by increased recurring costs).

Operation and Maintenance: One-time and recurring savings (offset by increased recurring costs) in civilian personnel, base operations, RPMA and other costs as a result of closure or realignment. Be specific as to the category,

Military Personnel: One-time and recurring savings (offset by increased recurring costs) in military personnel as a result of closure or realignment. Be specific as to the category.

Other: Self-explanatory.

INSTRUCTIONS FOR PREPARATION OF
DD FORM 1391/1391C
"FY __MILITARY CONSTRUCTION PROJECT DATA"

- (5) The DD Form 1391 will be used, as applicable, by the Active, Guard, and Reserve Forces to support each project proposed for inclusion in the Military Construction Program. This includes both new authorization projects in the program as well as urgent unforeseen projects using emergency or contingency authorization. This form will also be used to transmit supporting data for the following types of projects:
 - (5) Minor construction projects, 10 U.S.C. 2805.
 - (5) Operation and maintenance type projects required to be submitted to OSD in accordance with the provisions of DoD Directives 4270.36, 1225.7 and 4165.6.
 - (5) Nonappropriated fund construction projects requiring OSD concurrence or approval.
 - (5) Nonappropriated fund construction projects requiring OSD concurrence or approval.
 - (5) Family housing projects.
- (5) The continuation sheet (DD Form 1391c) will be used as required for explanation of the requirement for the project (item 11.) and other mandatory statements concerning flood plains and wetlands environmental impact, accessibility to the handicapped, fallout shelters, etc. However, when submitting an annual Military Construction Program, these mandatory statements may be included in the front of the program book.
- (5) Instructions for preparation of DD Form 1391 are outlined below:
 - (5) ITEMS 1 and 2 – COMPONENT AND DATE: Self-evident.
 - (5) ITEM 3 – INSTALLATION AND LOCATION: Enter the official name of the installation. Use code name or designations only when necessary to preclude security classification or when an official name is not available. Enter the name of the State if within the United States or the name of the country or island chain if outside the United States. In the case of Guard and Reserve Forces facilities, enter the city and State if the facility is not to be constructed on a military installation.
 - (5) ITEM 4 - PROJECT TITLE: Enter the title used in item 8, column 2 of the DD Form 1390, assuring that it corresponds to the category code in item 6.
 - (1) Except for new construction, the type of work, such as "addition," "conversion," "alteration," or "modernization" shall be used in the title.
 - (2) Where a single structure is to serve more than one purpose, the title should reflect the predominate use.
 - (3) The scope of a project or number of buildings involved will not be shown in the title (i.e., and "Enlisted Quarters" project will not be shown as "Two 250 Man Enlisted Quarters.")
 - (4) Avoid the inclusion of acronyms.
 - (5) If a project requires land acquisition estimated to cost in excess of \$50,000, the project title will be suffixed with "With Land Acquisition". Land to be acquired for the construction of several projects or for other purposes shall be programmed as a separate project and identified on a separate DD Form 1391.

d. ITEM 5 -PROGRAM ELEMENT: Enter the appropriate number as it relates to the "Five Year Defense Program," except when inclusion of this number would require classification of an otherwise unclassified form.

e. ITEM 6 - CATEGORY CODE: Enter the applicable category code using no less than three nor more than six digits consistent with item 8, column 1 on DD Form 1390.

f. ITEM 7 -PROJECT NUMBER: Enter the number of the project assigned by the Component concerned. If no number has been assigned, indicate N/A (not applicable).

g. ITEM 8 - PROJECT COST: Enter the estimated cost in thousands of dollars (excluding design except for family housing) for which funding is being requested. The amount indicated should be identical to that shown in item 8., column 4, of the DD Form 1390 and should include the costs of the primary facilities, supporting facilities, contingencies, supervision, inspection, and overhead. Figure will be the Total Request entered in item 9. and will not include the figure entered for "Equipment Provided From Other Appropriations."

h. ITEM 9 - COST ESTIMATES: This portion of the DD Form 1391 is comprised of several elements which collectively comprise the Total Request. Each element will be identified, quantified, and costed in a series of five column entries as follows:

(1) Item: Identity of the Primary or Supporting Facility, etc. as described in item 9., line 1.

(2) U/M (unit of Measure): Each entry in the "item" column will be followed in the "U/M" column by the accepted two-character abbreviation for the unit of measure associated with the quantity of the item concerned (e.g., SM, SY, LF, KV, etc.). Where it is not feasible to show a specific unit of measure, use LS (Lump Sum).

(3) Quantity: Enter the required number of units of measure comprising the "item" entry. Where "LS" is the unit of measure, enter a dash (-).

(4) Unit Cost: Enter the appropriate unit cost for each "item" entry where a unit of measure is indicated. Where the unit of measure is "LS" enter a dash in the unit cost column.

(5) COST (\$000):

(a) Enter the cost, in thousands of dollars, represented by the product of the "Quantity" and "Unit Cost" entries.

(b) When a single primary facility is listed enter the cost of the facility without parentheses. If unusual features or functional areas of the primary facility are listed, the cost of each shall be enclosed with parentheses. The sum total cost of these features shall equal the figure entered for the primary facility.

(c) When more than one primary facility is listed, the cost of each facility will be entered in the cost column without parentheses.

(d) The cost entry for the item "Supporting Facilities" shall be entered without parentheses and shall be the total of the various supporting facilities listed. However, each of the individual supporting facility costs shall be enclosed by parentheses.

(e) The cost entered for items such as "Subtotal," "Contingency," "Contract Cost," "SIOH," and "Total Request" shall be entered without parentheses. However, the cost for Equipment Provided From Other Appropriations" shall be entered as a nonadd item.

(f) Projects in category Code 500 will have separately identified the equipment purchased for the Surgeons General as "Category Equipment" showing the total cost of such equipment added to the "Total Request". Labor cost for installation of "Category E" equipment should be included in the unit cost for the primary facility because it is part of the "Total Contract Cost."

(6) PRIMARY FACILITY: Enter the identity and required columnar data for the primary facility. When the primary facility consists of two or more components the cost of the primary facility will be the sum of the costs of the individual components. In addition, subordinate components will be entered under the primary facility after indenting two spaces.

(a) Normally, the cost of fixed equipment provided as part of the construction contract (e.g., cooling, heating, and electrical systems, etc.) will be included in the cost of the primary facility. However, when the primary facility includes unusual features of significant cost, such as hyperbaric vessels and standby cooling, such features should be identified under the primary facility.

(b) Land acquisition required specifically for the project and estimated to cost \$50,000 or more shall be listed in the same manner as an unusual feature. Conversely, land acquisitions estimated to cost less than \$50,000 are to be accomplished under 10 U.S.C. 2672 and should not be listed.

(c) For family housing new construction, the entry under primary facility will show the total number of units in the project. As subordinate components to the primary facility "Units to 5' line," "GFE," and "Land Acquisition" will be shown in parentheses in the cost column to add up to the cost of the primary facility shown. Item 10 will be used to show the numbers and cost computations for the various types of living units which comprise the primary facility.

(d) "Lump-sum" funding requests are prohibited. The only instance for which separate construction projects can be combined under a single DD 1391 is when each of the projects is in the same general facility category (i.e., supply facilities, maintenance and production facilities, unaccompanied personnel housing, etc.). Programs such as "facility upgrades," "ATB Beddown Facilities," and others combining a number of disparate construction efforts must be justified as separate projects. If it is planned, in execution, to construct several of these projects at a single location under one contract, a statement to that effect should be included in the "Additional" section of Item 10.

(e) *Antiterrorism Force Protection/physical security measures: the entry under primary facility will show physical security improvements (e.g. special structural improvements, ballistic glass, etc.). Where land acquisition serves a specific purpose such as stand-off distance for force protection, the acquisition shall be listed as an antiterrorism force protection subordinate component to the primary facility.*

(7) SUPPORTING FACILITIES: List those items of construction directly related to and required for the support of the primary facility. Such items should include (a) special construction features (piles, spread footings, seismic, fill, etc.); (b) utilities (gas, oil, steam, electric, and water supply lines as well as sanitary and storm sewers); (c) site preparation; (d) roads, sidewalks, and parking; (e) site improvements (seeding, sodding, landscaping, etc.); (f) *antiterrorism force protection/physical security measures such as physical security site improvements (e.g. fencing, perimeter/area lighting, blast mitigation barriers, berms and landscaping, etc.);* and (g) demolition. All supporting facility items should be listed in terms of accepted units of measure and quantity whenever practicable. For family housing, design cost will be identified under "Supporting Facilities."

(8) SUBTOTAL: Enter the sum of the costs shown for all primary and supporting facilities.

(9) CONTINGENCY: Enter the appropriate contingency rate, in parentheses, immediately following the item designation in column 1, and enter the cost equivalent in the proper column. While the normal contingency rate is 5 percent, contingency rates may vary with unusual conditions. Therefore, rates in excess of 5 percent shall be adequately justified.

(10) TOTAL CONTRACT COST: Enter the sum of the "Subtotal" and the "Contingency" costs. In the case of Army National Guard, armory projects which are funded, in part, from other than Federal funds, enter the Federal costs on the first line and the State or other cost on the next line below.

(11) SUPERVISION, INSPECTION, AND OVERHEAD (SIOH): Enter the appropriate SIOH rate in column 1 after the item designation and reflect the cost equivalent in the proper column.

(12) TOTAL REQUEST: Enter the sum of the "Total Contract Cost" and the "SIOH". This figure should be identical to the entry in item 8., "Project Cost (\$1000)". Total request should be rounded-off to provide a more realistic approach to the presentation of MILCON programs. The following guidance is provided for "rounding-off" a projects' total request:

Project (P) Estimate (\$000)		Rounding Guidance (\$000)
< 1,000		Nearest \$ 10K
1,000 to 5,000		Nearest \$ 50K
5,000 to 10,000		Nearest \$ 100K
10,000 to 15,000		Nearest \$ 200K
15,000 to 20,000		Nearest \$ 500K
> 20,000		Nearest \$ 1,000K

(13) EQUIPMENT PROVIDED FROM OTHER APPROPRIATIONS: Enter the total cost of equipment which is procured with other than MILCON funds and which is essential to the mission of the facility. DD Form 1391 should reflect only the cost of equipment identified in the Associated Equipment Report. If no such major equipment is associated with the project, enter a "zero" in the appropriate space. Note that this figure is not included in the "Total Request" above. This excludes minor items procured with O&M funds, and in the case of Army National Guard, excludes equipment provided from other than Federal appropriations.

i. ITEM 10 - DESCRIPTION OF PROPOSED CONSTRUCTION:

(1) In a clear and concise manner, provide a complete outline of all principal features of the work and its correlation with the various data entered in item 9.

(2) *List specific antiterrorism force protection measures and antiterrorism force protection considerations that this project provides.*

(3) Begin with an accurate description of the primary facility. For buildings, indicate the materials planned to be used for the frame, walls, roof, and foundations, and identify the major functions for which space is being provided. For structures other than buildings, describe each major element required to produce a complete and usable facility. Avoid the use of generalities such as "most economical means" or "modern methods and materials."

(4) Provide only such additional descriptive details as are necessary for clarity.

(5) Identify and list the buildings or structures to be demolished in connection with the proposed construction, if applicable.

(6) For single person quarters projects, indicate the grade mix of personnel, officer or enlisted, who will occupy the facilities.

(7) For projects involving additions, alterations, or conversions, describe the changes to be made.

(8) At the last entry in item 10., indicate the amount of air conditioning required (e.g., air conditioning - 15 tons).

j. ITEM 11 - REQUIREMENT: This portion of the DD Form 1391 is comprised of five elements which are to be set forth in the following format:

(1) Immediately after the item title "Requirement" indicate, in appropriate units of measure, the total facility requirement (e.g., 77, 366 SF), followed by two additional entries giving the status of the existing facility (e.g., adequate: 66,134 SF; substandard: -0-).

(2) PROJECT: Provide a one-sentence statement indicating what this project provides.

(3) REQUIREMENT: Provide detailed, informative statements as to precisely why the project is needed. Use positive statements to support the requirement and avoid the use of such words as "inadequate," "uneconomical," and "necessary" unless they are fully explained. Similarly, when identifying contributing factors, assure that the presentation leaves no pertinent questions unanswered (e.g., *vulnerability to terrorist threats (reference threat/vulnerability assessment)*; excessive maintenance (show cost comparison); self-liquidation (show amortization); or advanced deterioration (describe effects)). The requirements must establish maximum utilization of existing facilities and identify alternatives considered, along with reasons for their rejection.

(4) CURRENT SITUATION. Describe how and under what conditions the requirement is presently being met. Comments should support the stated requirement and include the identity and description of current assets as well as the reason they are considered unsuitable for continued use. For Guard and Reserve Forces projects which are to replace existing facilities, identify and describe the disposition to be made of them. Similarly, for Guard and Reserve Forces facilities to be constructed and/or utilized jointly with other Guard/Reserve components, include pertinent information and status of coordination or negotiations.

(5) IMPACT IF NOT PROVIDED. Describe the manner and extent to which mission accomplishment would be affected if the project were not approved.

(6) ADDITIONAL. If the project is justified on an economic basis (primary economic analysis), so state and indicate the projected payback period. As a minimum, all renovation, upgrade, and replacement projects must be supported by an economic analysis. For all other projects, state precisely why a primary economic analysis cannot be applied to the project. When providing supporting documentation for the OSD budget submission, enter appropriate statements on commercial/industrial operations in accordance with the OMB Circular A-76 and as required by applicable DoD Instruction. Entry of this information on the DD 1391 or on a separate DD 1391c is optional. For all overseas projects, state whether or not the project is eligible for NATO Infrastructure or other host nation funding.

NOTE: Space requirements for items 10. and 11. will vary. Therefore, remaining space on the DD Form 1391 may be used as necessary for the specific entries and continued on a DD Form 1391c as appropriate. A solid, black line should be used to set items 10. and 11. apart, and individual item titles and subheadings should be added.

CHAPTER 8

REAL PROPERTY MAINTENANCE/MINOR CONSTRUCTION**0801 GENERAL****080101 Purpose**

A. This chapter provides instructions applicable to budget formulation and congressional justification for Real Property Maintenance and Minor Construction.

B. The following appropriations and accounts are covered:

Section

0802

- Operation and Maintenance Appropriations
- Research, Development, Test, and Evaluation Appropriations

080102 Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 8 covers specific additional back-up material requirements for the above Real Property Maintenance and Minor Construction accounts.

080103 Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 8 provides additional specific guidance with regard to the back-up material required for Real Property Maintenance and Minor Construction.

080104 References

Chapter 3 provides guidance related to Operation and Maintenance costs and submission organization and Chapter 5 provides guidance, submission organization and formats related to Research, Development, Test, and Evaluation appropriations.

080105 Definition of Repair and Maintenance

A. *Repair means "to restore a real property facility, system or component to such a condition that it may effectively be used for its designated functional purpose".*

B. *When repairing a facility, the components of the facility may be repaired by replacement, and the replacement can be up to current standards or codes. For example, Heating, Ventilation, and Air Conditioning (HVAC) equipment can be repaired by replacement, can be state-of-the-art, and provide for more capacity than the original unit due to increased demand/standards. Interior rearrangements (except for load-bearing walls) and restoration of an existing facility to allow for effective use of existing space or to meet current building code requirements (for example, accessibility, health, safety, or environmental) may be included as repair.*

C. *Additions, new facilities and functional conversions must be done as construction. Construction projects may be done concurrent with repair projects as long as the projects are complete and useable.*

0802 BUDGET ESTIMATES SUBMISSION**080201 Purpose**

A. This Section prescribes instructions for the preparation and submission of budget estimates for Real Property Maintenance and Minor Construction requirements.

B. Guidance covers all Operation and Maintenance, RDT&E, Real Property Maintenance (RPM) and minor construction costs. Real Property Maintenance and minor construction includes: all recurring maintenance costs and repair projects (MRP), minor construction (MC) costs, real property renovation project costs (that combine minor construction and repair costs), and planning and design costs associated with projects; providing funding support to maintain and repair buildings, structures, warehouses, roadways, aprons, railway trackage, utility plants, distribution systems, and other real property. O&M funded minor construction includes funding for the erection, installation, or assembly of new facilities, and for the alteration, or conversion of existing facilities and can cost up to a maximum of \$500,000 per project, or up to \$1,000,000 if the project is intended solely to correct a deficiency that is life-threatening, health-threatening, or safety-threatening and \$300,000 for reserve accounts. These categories do not include RPM funds included in Defense Working Capital Funded activities. These accounts also do not include operation of utilities, utility charges, annual lease payments, or other support services (such as custodial contracts, snow removal, etc.) included in Base Operations Support. For analysis purposes, RPM expenditures fall into two general categories: (1) annual operational expenses which include all recurring maintenance costs and contracts, and minor repair or minor construction projects costing up to \$15,000 per project, and (2) RPM facility investments which include major repair projects (costing more than \$15,000 per project) and minor construction projects costing between \$5,000 and \$500,000 per project.

C. Program funding submitted in Component justification materials must reflect the approved funding levels identified in the RPM Program Elements in the current FYDP.

D. Examples of special budget exhibits can be found in Section 0806.

080202 Submission Requirements

A. General Guidance. All Components (i.e., active forces, defense agencies, national guard and reserve forces) shall submit justification data and exhibits to support budget estimates for Real Property Maintenance and Minor Construction, in a separate bound attachment (reference Chapter 3, Section 030201). Two copies of this attachment will be delivered to: Directorate for Construction, Program/Budget, OUSD(C) Room 3D840, Pentagon, on the same date as all other submissions required for O&M Appropriations. Exhibits required include:

- | | |
|--------|--|
| OP-27 | Real Property Maintenance Activities |
| OP-27P | Real Property Maintenance and Minor Construction Projects (All Appropriations - Projects Costing More than \$ 500,000) |
| OP-28 | Summary of RPM and PRV (All Appropriations) |
| OP-5 | Part 2 Attachment 5: Real Property Maintenance and Minor Construction |

B. Military and civilian personnel costs reflected on Exhibit OP-28, will include only those personnel assigned in support of RPM and minor construction accounts. It will include those personnel performing planning and design functions for both projects and installation RPM surveys and RPM master planning, but will exclude those involved in other base operating services or support services.

C. For the biennial budget, separate sections or volumes will be provided for Biennial Year 1 (BY1) and Biennial Year 2 (BY2). For the Biennial Year 2 (BY2) section, BY1 will be considered as the prior year and BY2 as the budget year.

080203 Preparation of Material

All material will be provided on 8-1/2 inch by 11 inch size paper, and bound on the long side. All narrative data will be typed across the short dimension of the paper, while exhibits will be typed across the long dimension.

0803 CONGRESSIONAL JUSTIFICATION/PRESENTATION**080301 General**

Components are required to conform to the PBD approved funding levels when submitting final budget exhibits to Congress.

080302 Organization of Justification Books

See chapters covering specific appropriation (Operation and Maintenance - Chapter 3, RDT&E Chapter 5, RPMD same as O&M in Chapter 3). In addition to exhibits cited in section 0802, a PBA-7, Real Property Maintenance exhibit is also required.

0804 REVENUE FROM TRANSFER OR DISPOSAL OF DOD REAL PROPERTY AND REVENUE FROM LEASING OUT OF DOD ASSETS**080401 General**

Sections 2805 and 2806 of the FY 1991 National Defense Authorizations Act, P.L. 101-510, require detailed information on revenues, transfers, and the use of proceeds derived from these authorities as follows:

080402 Revenue From Transfer or Disposal of DoD Real Property (Section 2805)

When revenue from the transfer or disposal of DoD Real property is received, there is a requirement to identify each transfer and disposal made during the fiscal year, including a detailed explanation of each such transfer and disposal and of the use of the proceeds received. An estimate for the current and budget year transfers or disposals should also be included.

080403 Revenue From Leasing Out of DoD Assets (Section 2806)

When revenue from leasing out of DoD assets is received, there is a requirement to identify each lease entered into during the fiscal year, including a detailed explanation of each lease and amendments, and of the use of the lease proceeds that were expended. An estimate for the current and budget year leases and revenues should also be included.

080404 Deposit and Accounting Procedures

Cash receipts obtained from the transfer or disposal of real property will be deposited into the Disposal of DoD Real Property Account, 97X5188. Cash receipts obtained from leasing out of DoD assets will be deposited into the Lease of DoD Real Property, 97X5189. Accounting instructions are included in Volume 12, Chapter 14, of the DoD Financial Management Regulation.

080405 Funds Release Procedures

Funds deposited into these accounts are available only for purposes of maintenance and repair and environmental restoration at U.S. facilities as specified in the Act. The Components may request release of funding, based on verifiable deposits, by memorandum to the USD Comptroller, Director for Construction.

080406 Budget Exhibits for Congressional Submission

To comply with this requirement, a PB-34 exhibit must be completed by each component and included in the O&M RPM Justification Book (Volume II) for both the revenue from the transfer or disposal of DoD real property (Section 2805) and for the revenue from leasing out of DoD assets (Section 2806).

0805 DOD OVERSEAS MILITARY FACILITY INVESTMENT RECOVERY ACCOUNT**080501 General**

Section 2921 of the FY 1991 National Defense Authorizations Act, P.L. 101-510, established the Department of Defense Overseas Military Facilities Investment Recovery account. The purpose of the account is to collect payments from host nations for the value of new construction and improvements made by the United States at overseas military installations being returned.

080502 Deposit and Accounting Procedures

Cash receipts obtained from return of overseas real property and improvements to host nations will be deposited into the DoD Overseas Military Facility Investment Recovery Account, 97X5193. Accounting instructions are included in USD Comptroller letter, dated 17 June 1991, subject: Guidance for Department of Defense Overseas Military Facility Investment Recovery Account (which will be superseded by Volume 12 of the DoD Financial Management Regulation when published).

080503 Funds Release Procedures

Funds deposited into the DoD Overseas Military Facility Investment Recovery Account are available only for purposes of maintenance and repair and environmental restoration at U.S. facilities and maintenance and repair and environmental compliance at military facilities outside the U.S. as specified in the Act. The Components may request release of funding, based on verifiable deposits, by memorandum to the USD Comptroller, Director for Construction.

080504 Budget Estimate Submission Exhibit

Components returning overseas military facilities to host nations that have resulted in collections to this account must complete OP-29. This exhibit provides information on the cost and improvements, depreciation, residual value, and amount collected from the host nation that is necessary in accomplishing an annual report to the Congress. It also documents proposed real property maintenance or environmental restoration/compliance projects at military installations to be financed from the proceeds deposited into this account.

0806 REAL PROPERTY MAINTENANCE/MINOR CONSTRUCTION FORMATS**080601 Purpose**

The special formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

(page 1 of 2)

Notes:

a/ Prepare this exhibit by State, in alphabetical order, following the same format as the MilCon C-1 Annex.

b/ The Project Title. A short title that describes the nature of the project (example; "Repair Roof, Bldg. 15").

c/ The Justification is a short narrative that describes the nature of the project, scope of the project, and the reason it is required (example; Title - "Repair Roof, Bldg. 15", Justification - "Projects repairs 40,000 SF roof on warehouse. Repairs required to fix trusses and roof leaks. Repairs needed due to age of facility (37 years), and normal deterioration from weather and other causes").

d/ Minor Construction. This is the total cost of minor construction being used concurrently for major repair projects appearing in this exhibit.

e/ Total Repair and Maintenance This column is the total of costs for all projects listed in this exhibit. It includes only projects costing more than \$500,000. All totals will be listed only at the end of the exhibit.

f/ Total Active Installations. This column is the sum of Minor Construction costs, and the total costs of Repair and Maintenance projects costing more than \$500,000, for active installations.

g/ Total Inactive Installations. This column is computed in the same manner as "f" above, for inactive installations. The Grand Total is the sum of costs reflected in this exhibit, for both active and inactive installations.

CHAPTER 9

★July 1998

DEFENSE WORKING CAPITAL FUNDS
ACTIVITY GROUP ANALYSIS**0901 GENERAL****090101 Purpose**

This chapter highlights the policies and justification procedures underlying budget formulation for the Defense *Working Capital Funds (DWCF)*.

090102 Background

A. Revolving funds were established to satisfy recurring Department of Defense requirements using a businesslike buyer-and-seller approach. The generators of requirements justify the need for funds to the Congress, but are not always the organizations that execute the requirement. In some instances, the "customers" or "buyers" contract with DoD "provider" or "seller" organizations that have expertise in the service or product required, and operate under business financial management principles. Unlike profit-oriented commercial businesses, the revolving funds goal is to break even over the long term. Revolving fund selling prices established in the budget are stabilized or fixed during execution to protect customers from unforeseen fluctuations that would impact on their ability to execute the programs approved by the Congress.

B. The basic tenet of the revolving fund structure is to create a customer-provider relationship between military operating units and support organizations. This relationship is designed to make managers of support organizations funded through DWCF and decision-makers at all levels more concerned with the costs of goods and services. Requiring the operating forces to pay for support they receive provides increased assurance that services supplied and paid for are actually needed.

Prior to the establishment of an activity under DWCF, a charter, which sets forth the scope of the activity group shall be prepared and signed by the Secretary or Assistant Secretary of the Military Department or by the Director of a Defense Agency, as applicable. The charter is submitted to the Comptroller of the Department of Defense for approval. Four criteria are used in evaluating potential activity groups for inclusion into the Fund. The four criteria are: identification of outputs that relate to products or services provided by the business to customers; establishment of a cost accounting system to collect costs of producing outputs; identification of customers so that resources can be aligned with the requirements; and evaluation of buyer-seller advantages and disadvantages to include assessment of the customers' ability to influence cost by changing demand.

C. Revolving funds have been in use by the Military Components for a considerable period of time. Modern day revolving fund authority is provided by the National Security Act of 1947, as amended (Title 10 U.S.C., Section 2208). The FY 1996 DoD Authorization Act (Public Law 104-106) codified the Defense Business Operations Fund (the predecessor of the Defense Working Capital Fund) in Chapter 131 of Title 10, U.S.C.

D. Revolving fund activities evolved from two distinct categories. The first type, Stock Funds, dealt with procuring material in volume from commercial sources and holding an inventory. Subsequently, activities sold to the authorized customer who needed the item in order to achieve weapon systems readiness or provide required personnel support items. The second type, Industrial Funds, provided industrial and commercial goods and services such as depot maintenance, transportation, and research and development. Both types of revolving funds were financed primarily by reimbursements from customers' appropriated accounts.

E. The Department of Defense expanded the use of businesslike financial management practices through the establishment of the Defense Business Operations Fund (DBOF) on October 1, 1991. Building on revolving fund principles, cost and performance are linked together and the Fund's managers are expected to operate within cost goals established in operating and capital budgets.

F. DBOF combined existing commercial or business operations that were previously managed as individual revolving funds into a single revolving, or business management, fund. The Fund Treasury account has five subaccounts (one for each Military Department and Defense-wide). *On December 11, 1996, the Under Secretary of Defense (Comptroller) reorganized DBOF and created four Working Capital Funds: Army, Navy, Air Force, and Defense-Wide. Further, on December 16, 1997, a separate Working Capital Fund was established for the Defense Commissary Agency effective in FY 1999. This change retains the numerous benefits and improvements resulting from the implementation of DBOF while clearly establishing the Component's responsibility for managing the functional and financial aspects of their activities.*

G. Prior to FY 1992, industrially funded activities did not receive funding documents. All funding authority was provided through customer orders. With the implementation of the Funds, annual operating budgets that provide official management cost goals *and capital budgeting limitations* are issued to the Services and Agencies for each activity group.

H. For businesses within the Fund, high level unit cost goals and fixed prices make it possible to measure changes in cost based on financial operating results. This cost-oriented approach encourages management to look at all costs, including overhead, in terms of the output of the business and provides visibility of cost drivers.

090103 Policy

These policy statements are provided for budget formulation and are to be used as the basis for preparing Budget Estimate Submissions (BES).

A. Cash Management

The cash management policy is to maintain the minimum cash balance necessary to meet both operational requirements and disbursement requirements in support of the capital program. Cash generated from operations is the primary means of maintaining adequate cash levels. The ability to generate cash is dependent on setting rates to recover full costs to include prior year losses; accurately projecting work load; and meeting established operational goals.

The responsibility for *DWCF* cash management was returned to the Components and Agencies effective February 1, 1995. This provides activity group managers additional control of and accountability for their operations, since cash management is an integral part of operational and cost management. Since cash management has been decentralized, there is no longer a requirement for the Defense Finance and Accounting Service (DFAS) to implement automatic advance billing procedures when overall Departmental cash levels fall below \$1 billion, and it has been determined that the cash shortage was not caused by an anomaly. Volume 11B will be updated to reflect this change in policy.

The major points included in the policy are:

- Effective cash management is directly dependent on the availability of accurate and timely data on cash levels and operational results.

- Cash levels *should* be maintained at 7 to 10 days of operational cost and cash adequate to meet six months of capital disbursements. *Cash levels will be calculated using the following formula: Total operating budget disbursements for a fiscal year divided by either 260 or 261 available workdays in a fiscal year (as documented in OMB Circular A-11) multiplied by the number of days cash desired. This amount is then added to the projected disbursements for six months of Capital Investment Program Outlays.*

- Cash plans will be developed to facilitate the cash management process. Plans consider collections, disbursements, appropriations, and other cash transactions based on Component estimates. This annual plan will be initially developed during the budget process and will be an integral part of the budget document.

- In addition, a monthly phasing analysis of collections and disbursements as part of the cash plan will be required to monitor execution. This monthly execution review will lead to increased management attention in reducing costs, emphasizing timely billing, collecting revenue, and disbursing.

A goal of the DWCF is to eliminate the use of Advance Billing of Customers to maintain cash solvency unless required to avoid Anti-Deficiency Act Violations. The DoD Authorization Act of FY 1998 Section 1011 requires that the Secretary of the Military Department notify Congress within 30 days after an advance billing is made. Any requirements for advance billings by a Service Component or Activity Group will be coordinated in advance with the Director for Revolving Funds. A copy of the letter to Congress will also be provided to the Revolving Funds Directorate.

- The operational control of actions taken by each DWCF activity, which result in cash disbursements and collections, always has and continues to reside with the Components and Agencies. Decentralizing cash management was done to provide the Components' and Agencies' managers additional control of and responsibility for their operations, as cash management is an integral part of operational management. The policy requires that each level of management within the Department participate in the execution of the policy in order to insure results are achieved to improve the management of DWCF cash.

B. Operating Budget

The operating budget contains the annual operating costs of an activity or Component, including depreciation or amortization expenses. To minimize costs within activity groups, all goods and services should be purchased, whenever possible, from the source that provides them at least cost, unless there are some other considerations such as mobilization or readiness that prohibit this flexibility. Of course, the performance and quality of the source must be considered as well. When comparing costs of organic or commercial sources, both direct and indirect costs are to be included in the evaluation.

1. Depreciation expenses shall be calculated and accumulated using the straight-line method based on the capitalized amount less residual value, and divided equally among accounting periods during the asset's useful life based on established depreciation schedules. *Residual value will be used in the calculation only if it exceeds 10% of the cost of the asset.* The depreciation schedules to be used for Fund activities are as follows: *For assets acquired prior to October 1, 1999: Facilities Construction (including Minor Construction) – 20 years; Equipment purchases, other than ADPE and Telecommunications Equipment – 10 years; ADPE, Commercial Software, and Telecommunications Resources – 5 years; General Purpose Vehicles – 5 years; Internally Developed Software – 10 years. For assets acquired on or after October 1 1999: General Purpose Vehicles (includes heavy duty trucks and buses), ADP Systems and Hardware (Computers and Peripherals), High Tech Medical Equipment, Equipment used in RDT&E, Radio and Television Broadcasting Equipment, Commercial Software – 5 years; Printing, Publishing, and Duplicating Equipment; Telecommunications Equipment and Towers, Internally Developed Software – 10 years; All Other Equipment, Machinery, and Automated Warehouse Retrieval Systems – 12 years; Vessels, Tugs, Barges, and Similar Water Transportation Equipment (non-national Defense PP&E vessels/ships) – 20 years; Steam (12.5K pounds per hour or more) and Electrical Generation Equipment (500 Kilowatt or more) – 20 years; Improvements made or added to Land (i.e. Fences, Roads, Bridges, Sewers, Ships and Railroad Wharves and Docks, Dry Docks) including improvements made to Stewardship Land – 20 years; Buildings, Leasehold Improvements to Buildings (includes improvements to Heritage Buildings), Hangars, Warehouses, Fuel Storage Facilities, Air Traffic Control Towers, and Other Real Property Structures – 40 years.*

2. *These depreciation rules are consistent with Federal Accounting Standards Advisory Board Statement on Federal Financial Accounting Standard No.6.*

a. For equipment transferred into a activity group that has preexisting depreciation schedules, depreciation will be based on the remaining book value plus any associated costs for transportation, installation, and other related costs necessary to put the asset into operational use.

b. For capital assets that are transferred to a activity group that have no preexisting depreciation schedules, depreciation will be calculated based on the net value (original acquisition cost less

calculated accumulated depreciation) plus any associated costs for transportation, installation, and other related costs necessary to put the asset into operational use

c. Depreciation of capital equipment will be fully reflected in the operating costs and rates of Fund businesses.

C. Capital Investments

1. With the exception of major construction and items listed in paragraph D.1, acquisition of all capital assets for use by businesses within the Fund are financed through the Fund. The Capital budget shall not be used to establish a new or to expand organic capability except as specifically approved in a capital budget. Capital assets include depreciable property, plant, equipment, and software developed, manufactured, transferred or acquired during a fiscal year for a determinable cost of \$100,000 or more, effective October 1, 1995, and having a useful life of two years or greater. *Once assets are capitalized by the DWCF activity, they will continue as a capital asset and depreciated until the book value of the asset reaches zero or its salvage value as appropriate. Changes in the capitalization threshold will not impact existing capital assets unless directed by higher authority.*

2. These assets will be funded through the capital budget and their costs will be depreciated according to depreciation schedules *found above and in Volume 2a, paragraph 010219C*. Fund resources necessary for capital assets shall be derived primarily from depreciation of existing Fund assets. The estimated depreciation expense shall be included in stabilized rates and prices billed to Fund customers. A capital purchase positive or negative surcharge, if required, shall also be included to fund the increment, if any, in excess of, or less than, depreciation when necessary to fund the approved capital investment.

3. Purchase and installation costs for the initial procurement of any and all depot maintenance capital equipment unique to newly introduced platforms or weapon systems will continue to be funded in the appropriate procurement account. Once transferred to or otherwise capitalized by the depot, the capital equipment becomes the property of the depot. The depot will treat the equipment as a capital asset, depreciate the equipment, and fund subsequent replacement and maintenance of the equipment in its capital and operating budgets in the Fund.

4. The term “software” includes both operating software and application software. As defined in OMB Circular A-11, software includes systems programs, application programs, commercial-off-the-shelf (COTS) software, independent subroutines, data bases, and software documentation. Software that is integrated into hardware, and is necessary to operate the hardware, rather than to perform an application, should be budgeted with, and capitalized as part of the hardware. Systems application software, however, should be budgeted separately either as an expense or as a capital investment depending on whether it meets the criteria for a capital asset. Systems application software may be acquired through (1) the purchase of COTS system; (2) the development of new applications through either in-house or contractual effort; or (3) the modernization of existing software that expands and/or enhances its existing capabilities.

a. Software development/modernization will be budgeted by project. The full scope of a software development project may consist of efforts in any or all of the following four phases: (1) planning and system design, (2) management and technical support during development, (3) system development including software modification and conversion, and (4) deployment, including environmental and operational test and installation. The inclusion of these phases and related cost elements will ensure that software development budgets are properly prepared. Technical and maintenance software support occurring after system installation are treated in *DWCF* as operational expenses. (Refer to the instructions for the Fund-9a exhibit of the Capital Investment Summary, paragraph C, Software Development/Modernization, of this chapter for those detailed costs to be captured in software development budgets).

b. Software amounts included in *DWCF* capital budget submissions should include those software development or acquisition efforts for the benefit of the *DWCF* activity, and exclude software developed or acquired for a specific customer order. (Software developed or acquired for a specific customer order should be charged to and reimbursed by the requesting customer.) Types of cost to be included in a software development project include total labor and non-labor costs such as: (1) all direct costs for civilian and military personnel;

(2) contractor labor; (3) supplies; (4) travel; (5) processing support for testing; (6) indirect costs; and (7) general and administrative costs (e.g., base operations support, higher headquarters, and depreciation for central design activity-owned assets). Exclude from the capital budget all costs incurred prior to Milestone 0, Concept Exploration and Definition. Costs such as basic research, study, exploratory development establishing feasibility and practicality of proposed solutions, rough order of magnitude estimates, etc., are treated in *DWCF* as operational expenses.

c. Software projects may be accomplished by modules. A module is an application that may be operated or used independent of other modules within a system. Where an entire system consists of more than one severable module, the request for capital budget authority (Fund-9b) for each deliverable module should be requested in the budget year the module is started, and should be funded in an amount sufficient to finance the specific module to its completion. However, budget justification material for development of *DWCF* capital investment projects involving software must disclose the total estimated costs of all software development efforts associated with the applicable system with which the software is to be utilized, including the cost of software development efforts of other modules funded separately from the specific *DWCF* capital investment project being justified.

d. While the costs of acquiring ADP equipment should be excluded from the cost of software development projects, such costs also should be disclosed in the *DWCF* capital investment budget justification material for the software development project.

e. Budget submission and justification should be documented on Exhibit Fund-9a, 9b, and 9c. Exhibit Fund -9a, "Capital Investment Summary," represents the summary data of all software deliverables requested for a system. Exhibit Fund-9b, "Capital Investment Justification," provides detailed cost data and narrative justification for each module of a system. Exhibit Fund-9a and Fund-9b data should agree with, and also may be used for cross referencing, Exhibit 43-IT2 of the Information Technology budget. Exhibit Fund-9c, "Capital Investment and Financing Summary," outlines authority obligations, outlays, unobligated balances, and unexpended obligations by fiscal year.

f. The following shows, as an example, severable deliverable modules of a fictitious financial management system:

- XYZ FINANCIAL MANAGEMENT SYSTEM SOFTWARE MODULES

SOFTWARE DEVELOPMENT, MODIFICATION, OR CONVERSION PHASE

Deliverables

- a. Cash Management Module
- b. Property Control
- c. Inventory Control
- d. Receivables
- e. Payables
- f. Cost Accounting
- g. Reporting

g. Software development and modernization costs incurred by Fund activities for projects installed and operational after October 1 of a specific fiscal year will be depreciated beginning in the month the project is installed and operational (even though it may not be used in operations that month). Incremental deliveries of these projects will be depreciated if the cost of the delivery exceeds \$100,000.

5. Facility investment of \$100,000 or more but less than \$500,000 for a new or replacement facility, or for changes in the function of a facility, will be funded through the minor construction line of the capital budget and depreciated. *For minor construction projects involving the correction of life threatening, health, or safety problems, the upper limit is increased to \$1,000,000.*

6. Each proposed acquisition of a capital asset shall be reviewed to ensure that it satisfies all of the following criteria:

a. It is more economically feasible to purchase rather than to lease the capital asset. While leasing is not a part of the Capital Purchases Program, it may be appropriate for areas of fast changing technology or when work loads are expected to cease before the end of the program or payback period. Leasing also may be used as a means of obtaining near-term benefits from productivity improvement opportunities until sufficient data to verify the benefits of procurement can be developed.

b. The acquisition of a capital asset meets the Department's long-range planning and programming objectives and results in satisfying a documented need for capability to perform valid operations, functions, or services that cannot be performed as effectively or economically by the use of existing equipment and facilities or by contract.

c. The acquisition of a capital asset complies with policies and regulations governing the acquisition and management of facilities, special tooling, and special test equipment as established by DoD Directive 4275.5, "Acquisition and Management of Industrial Resources" as well as other applicable policies and regulations governing the lease and acquisition of equipment and facilities.

7. Work load projections used to justify capital purchases must take into account the results of interservice decisions, work load posture planning decisions, readily available commercial alternatives, and other reasonable options available for accomplishing applicable work load.

8. Capital assets recommended for acquisition shall be those deemed to most efficiently and effectively accomplish the objective for which they are justified. The criteria are: improved efficiency (savings) or effectiveness; required new capability and capacity that cannot be met with current equipment and facilities; replacement of unsafe (locally determined), beyond economical repair, or inoperative and unusable assets; and environmental, hazardous waste reduction, or regulatory agency (state, local, or Federal) mandated requirements.

9. A formal pre-investment analysis or a cost comparison is required to justify investment projects for Capital Budget submissions in the four Capital budget investment categories. In addition to budget formulation, either an economic analysis or cost comparison shall be used to support a project substitution or to accomplish a reprogramming request. *An economic analysis shall be used for all project of \$1,000,000 and over. A cost analysis will be used for projects under \$1,000,000.* This pre-investment analysis must be completed prior to inclusion of the capital asset in the capital budget submission, accomplishment of a reprogramming action, or a project substitution. The scope of analysis shall be tailored depending on the dollar value of the project. These analyses shall be maintained by the originating office of the DoD Component as projects documentation support for the Capital Budget submission as well as program execution.

a. The four capital budget investment categories are: Automated Data Processing (ADP) and Telecommunications Equipment; Non-ADP Equipment; Minor Construction (\$500,000 or less for most projects, \$1,000,000 or less for projects impacting health, safety or environment); and Software development.

b. Capital budget projects in the four investment categories shall also identify one of the following primary reasons for justifying the investment: replacement; productivity; new mission; or environmental.

c. There are two exceptions that may apply in lieu of performing a pre-investment analysis. In both instances, an exception justification statement shall be prepared documenting the requirement or authority for the exemption claimed. Exemption statements shall be validated as would a pre-investment analysis and approved through DoD Component review channels.

(1) Environmental, hazardous waste reduction, or regulatory agency (state, local, or Federal) mandated requirements including directed action by higher DoD or Component authority which precludes choice among alternatives.

(2) DoD instruction or directive waives the requirement (e.g., equipment age or condition replacement criteria).

d. A cost comparison shall be prepared for investment projects under \$1,000,000. The cost comparison initially shall be prepared in constant base year dollars and shall present a differential cost display by year for up to a six-year evaluation period beginning with the budget year for which investment funds are requested.

- Documentation for a cost comparison shall describe the functional process performed; define the need/requirement/objective; identify work load projections; address feasible alternatives; present total costs attributed to each alternative and the differential costs/monetary benefits expected in constant and current dollars over the six-year evaluation period; and provide significant assumptions, constraints, estimating methods, and rational and data sources.

- Payback shall be the primary economic indicator used for cost comparisons to rank order projects up to \$1,000,000 within the investment categories of each activity group.

e. An economic analysis shall be prepared to justify capital investment projects of \$1,000,000 or more. The economic analysis shall be prepared on a net present value (NPV) basis and shall comply with applicable DoD or Component guidance as well as functional program guidance. The economic analysis initially shall be prepared in constant base year dollars and shall present a differential cost display by year over the project's expected economic life beginning with the budget year for which investment funds are requested.

- Documentation shall describe the functional process performed; define the need/requirement/objective; present and explain work load projections; identify feasible alternatives; present total costs and the differential costs/monetary benefits in constant, discounted, and current dollars over the expected economic life of the project; present estimating methods/relationships, and data sources; identify significant constraints, assumptions, and variables; treat sensitivity and uncertainty of key parameters; and address all other quantifiable benefits as well as any intangible benefits influencing the recommended course of action.

- Quantifiable benefits are all outputs/results achieved in return for investment dollars associated with an alternative.

- Benefit to Investment Ratio (BIR) shall be the primary economic indicator used to rank order projects of \$100,000 or more within the investment categories of each activity group.

- Automated economic analysis programs and reports may be used if the programs provide comparable information to that of standard economic analysis reports.

10. Annually, each activity within the DWCF shall prepare post-investment analyses. *Post investment analysis will only be prepared for those projects with a unit cost over \$1,000,000 and should be limited to recurring type investments where lessons learned in prior projects would influence future investment decisions. For example, an activity is investing \$5 million in similar new equipment over a 3 year period. A post investment analysis would be required to show how equipment being purchased in the last year of the purchase cycle has demonstrated cost savings over purchases at the beginning of the buying periods.* The format and technique for each post-investment analysis shall be similar to the cost comparison or economic analysis used for the project justification. The post-investment analyses shall be retained for ready review for five years.

11. The total annual capital budget approved for each Component by the Congress during review of the Fund may only be exceeded to the extent that projects which were included in the operating budget based on approved expense/investment criteria must be executed as capital budget items due to revised cost estimates. Transfer of projects from the operating budget to the capital budget reduces the amount earned in the operating budget. Exceeding the total capital budget (the total includes amounts reprogrammed) is an Anti-Deficiency Act violation.

Each Component may reprogram capital funds between activity groups; however, the maximum annual increase in any one activity group must be less than \$10 million for each capital investment category

approved in the President's budget; i.e., ADP equipment and telecommunications, non-ADP equipment, minor construction, and software development. Reprogramming into an activity group's capital budget from the operating budget does not count against the \$10 million threshold.

Only those capital asset projects that have been included in a President's budget for the DoD Component may be financed through the Capital Investment Program (CIP). However, in the year of execution, substitutions may be made for projects when delays are incurred in placing the approved projects on contract or when operational necessity warrants. The following approval levels and dollar threshold apply to changes to projects approved in the capital budget section of the AOB including re-programming, substitutions, cancellations and additions:

(1) All *current year* adjustments or changes to capital projects that are equal to, or greater than \$1,000,000 shall be approved by the *Director for Revolving Funds*.

(2) All *current year* adjustments or changes between categories of capital projects (i.e., minor construction, equipment, ADP equipment and telecommunications, non-ADP equipment and software development) or activity groups that increase a category or a activity group by a cumulative amount equal to, or greater than \$1,000,000 within a program year shall be approved by the *Director for Revolving Funds*.

If either of these thresholds is breached, then substitutions must be approved by the *Director for Revolving Funds* prior to their initiation. Subdividing of projects is not allowed.

(3) *Capital obligation adjustments must be charged to the program year cited in the President's Budget for the original project. The prior year capital investment program limitation is equal to actual obligations at September 30 of that fiscal year plus adjustments approved by the Director for Revolving Funds to the prior year program. Other than these approved adjustments, the only time after September 30 that a prior year CIP authority will exceed its obligations is when de-obligations occur in a prior year CIP after September 30.*

(4) *Capital obligation authority is automatically provided for prior year within-scope increases of less than \$100,000 provided the unobligated balance in the prior fiscal year capital program is sufficient to finance the increase. Prior year within-scope increases of \$100,000 or greater or increases of less than \$100,000 for which there is no unobligated balance will be approved by the Directorate for Revolving Funds. The request should propose, when possible, equal offsetting reductions to the current year capital authority to finance the prior year increase. If an activity cannot fully obligate its current year program and can justify a request for additional current year authority in the following fiscal year, the activity should submit such a request (including justification) to the Revolving Funds Directorate for each capital purchase line item NLT August 5 of each fiscal year. Approved adjustments to the prior year CIP will be included in the subsequent year's capital purchase apportionment request to OMB. Normally, prior year CIP authority will not be approved above the level requested by DoD in the President's Budget and approved by the Congress. However, prior year CIP authority may be increased above the President's Budget approved levels for high priority and unanticipated purposes (e.g. retroactive safety, environmental, or audit finding related requirements). Requests to increase prior year CIP authority received after August 5th (for which there is no apportioned contract authority) should propose offsetting decreases to the current year CIP authority.*

D. Exclusions from the Capital Purchases Program

The following are mandatory exclusions from the Fund capital purchases program and must be financed directly from appropriated funds:

1. Major Range and Test Facility Activities Items (equipment and minor construction) that meet the DoD investment capitalization criteria for use by major ranges and test facility bases operating within the Fund.
2. Military and tenant support functions.
3. Aircraft, ships, barges, and general-purpose passenger-type vehicles.

4. Equipment and minor constructions projects purchased to meet mobilization requirements, but not used during peacetime operations.
5. Equipment initially procured and usually furnished as part of a weapon system and/or support system to include initial common support equipment for depot maintenance support of new weapon systems.
6. Equipment normally funded by appropriated funds and provided to contractors as Government-furnished equipment to be incorporated into, used in conjunction with, or consumed in the production of, an end product. (Such equipment should be funded by appropriated funds and provided to the applicable *DWCF* activity at no cost to the *DWCF* activity.)
7. Minor construction projects for a non-*DWCF* activity or military support function.
8. Construction and facility investment projects that exceed the amount specified in 10 U.S.C. 2805 for funding from accounts available for operations and therefore must be funded by the Military Construction appropriation.
9. Environmental projects financed or submitted for funding by the Defense Environmental Restoration Account.
10. Capital investments for morale, welfare and recreation activities.
11. Such other exclusions as may be approved by the USD (C).

E. Construction

1. Minor construction projects of \$500,000 or more shall be funded within the Military Construction appropriation.
2. Effective in FY 1996, 10 U.S.C. 2805(c)(1) was amended to increase the threshold for unspecified military construction projects funded by the Fund and intended solely to correct a deficiency that is life-threatening, health-threatening, or safety-threatening from \$300,000 to \$1,000,000. However, projects costing \$500,000 or more must still be approved by the USD (C) and identified on the AOB prior to execution to avoid an Anti-Deficiency Act violation. Reprogramming thresholds identified in paragraph 090103.C.11 still apply.
3. Effective in FY 1996, 10 U.S.C. 2805(c)(1)(B) was amended to increase the threshold for minor construction projects from \$300,000 to \$1,000,000 for activities designated under the DoD Laboratory Demonstration Program. Fund activities designated to participate in the DoD Laboratory Revitalization Demonstration Program must still obtain prior USD(C) for projects costing over \$500,000 and have it separately identified on the AOB prior to execution of the project to avoid an Anti-Deficiency Act violation. Reprogramming thresholds for the capital asset program identified in paragraph 090103.C.11 still apply. The authority for the Laboratory Revitalization Demonstration Program expires on September 30, 1998.
4. Project planning and design costs are considered a capital investment cost that is capitalized by the *DWCF* activity and financed in the minor construction portion of the capital budget. Planning and design costs are not included as part of the statutory threshold for minor construction projects. The amount of planning and design funds should be separately identified from individual projects in the Budget Estimates Submission.

F. Mobilization/Surge Costs and War Reserve Material

Mobilization capability costs include the costs to maintain a surge capacity, to procure and maintain approved war reserve material levels, and/or to maintain other assets, functions, or capabilities required to meet an operational contingency as documented in Defense Planning guidance or operational plans.

All costs at businesses within the Fund related to maintaining a capacity to meet mobilization requirements will be reimbursed by funds that are from direct appropriations and will not be financed through customer rates.

1. War Reserve Material. Initial procurement of war reserve material will be funded by a direct appropriation to the Fund. Such appropriated amounts for secondary items shall be reflected as a separate goal within the applicable Supply Management or Commissary Resale activity group AOB.

2. Unutilized and Underutilized Plant Capacity.

- As provided in Program Budget Decision 407 dated December 11, 1996, Unutilized Plant Capacity (UPC) represents costs associated with maintaining facilities to meet necessary surge capacity due to mobilization or war. UPC costs are not to be included in the DWCF rate structure. Rather, budget these costs in the Operations and Maintenance Accounts. As a general rule, any month during which these mobilization facilities are not used, or if utilized only 20% or less of available work days, the pro-rata support costs for those facilities will be included in the UPC funding. Unutilized capacity is considered a mobilization requirement that is to be funded by appropriated funds provided by the DoD Component having management responsibility for the Fund activity

- Mobilization Program expenses related to UPC may include both maintenance and labor costs related to the Program.

G. Military Personnel

1. Since the majority of military personnel at DWCF activities are there for reasons other than DWCF business requirements (e.g., mobilization, rotational training, command opportunities), the full cost of military personnel should not be included in the DWCF cost of operations or customer rates. Instead, for development of customer rates, a civilian equivalent rate, provided by the USD (C), will be used to price military personnel at DWCF activities during budget formulation. The difference between the civilian equivalent costs, included in the DWCF budget, and the actual military personnel cost will be budgeted directly in the appropriate military personnel appropriation. The number of military included in the budget will be the number of military average strength assigned to the DWCF business. *The budget amount will equal the average strength multiplied by the civilian equivalency rate for each grade. The average strength for the budget year(s) will be calculated using the average fill rate for the three prior years. The fill rate is calculated by dividing actual average strength by the authorized strength for each grade. No adjustments will be made to the DWCF cost of operations to reflect the actual cost of military personnel employed by DWCF activities.*

2. The amount expensed for military personnel by DWCF activities and the amount reimbursed to the appropriate military personnel appropriation will be the same as the amount budgeted. No adjustments will be made to the DWCF cost of operations to reflect the actual cost of military personnel employed by DWCF activities. Military Departments having military personnel assigned to other Components will provide to each Component the number of workyears that should be included in the DWCF budget submission.

3. The civilian equivalent costs are provided by the OUSD(Comptroller) and are calculated as follows: (a) The current General Schedule of civilian pay rates, step 5 or Executive Service pay rates of the equivalent grade are used. (b) The amount in (a) should be multiplied by any proposed pay raise effective in future periods that may impact the level and cost for negotiated military support. (c) The amount calculated in (b) is to be multiplied by the civilian personnel fringe benefits factor applicable to the Military Service or Defense Business Operations Fund to arrive at the total civilian cost. The 14.7 percent for unfunded civilian retirement is not to be included in the calculation. (d) Civilian personnel fringe benefit rates and military composite rates are provided by the OUSD(Comptroller).

4. See Volume 2A, paragraph 010217 for military personnel pricing policy.

H. Full Recovery of Costs and the Setting of Prices

1. Managers of activity groups within the Fund are required to set their prices based upon full cost recovery, including all general and administrative support provided by others. Prices are established through the budget process and *except for the Depot Maintenance Activity Group*, remain fixed during the year of execution. This stabilized rate policy serves to protect customers from unforeseen inflationary increases and other cost uncertainties and better assures customers that they will not have to reduce programs to pay for potentially higher-than-anticipated prices. In turn, this policy allows activities to execute the budgeted program level and permits a more effective use of Fund resources.

2. Prices for the budget year will be set to recover costs over the long run. This means that prices will be set to achieve an Accumulated Operating Result (AOR) in the budget year of zero. During budget execution, activity groups will record either a positive or negative Net Operating Result. Accordingly, prices in the budget year will be set to either make up actual or projected losses or to return actual or projected gains in the budget year(s).

3. *An activity group may request that AOR losses be recovered over a two year period. The request must be included in the budget submission, may recover no more than 50% of the loss in the second fiscal year, and must demonstrate that the delay in the recovery of losses will not adversely effect the cash balance of the activity group. A phased recovery schedule must be provided with the budget. The Directorate for Revolving Funds will provide final approval for any extended AOR loss recovery plans.*

4. *Unbudgeted Depot Maintenance operating losses and operating gains of \$10 million or more per activity group will be recouped or returned as appropriate, in the current fiscal year or, in the case of fourth quarter gains and losses, in the subsequent quarter of the next fiscal year. This rate adjustment will increase financial discipline, encourage depot commanders to implement cost controls more rapidly, and provide the right incentives to set rates correctly in the budget, eliminate the routine use of advance billing to cover execution losses, and improve operational efficiency.*

5. *The established procedures will impose a surcharge on customer bills to recoup losses. The amount of the losses to be recouped will be determined at the first budget execution review meeting of the fiscal year. Additional adjustments will be determined during the mid-year review as needed. Customers will be required to absorb or finance all cost increases*

6. Non-Organic Contract Costs

As stated above, DWCF policy requires that Components budget for total costs incurred for activity groups. Thus, Components will include in prices contract costs for effort funded at a DWCF activity group by the customer but performed by contractor (non-organic effort) in the total cost of that DWCF activity group. In addition, the budget estimate will recover all costs associated with contract award and administration through prices charged to the customer.

7. Unbillable Expenses and Operational Losses.

Expenses that cannot be billed to an identifiable customer or that were generated from unforeseen cost overruns are to be treated as expenses in the fiscal year in which the costs were incurred. The operating losses accruing, therefore, will be included in calculating net operating results.

8. The prices set for all activity groups processes will match the rate changes approved during the budget review.

I. Base Realignment and Closure (BRAC)

1. BRAC Costs - Costs incurred in implementing the recommendations of the Base Realignment and Closure (BRAC) Commissions will be funded by the appropriate BRAC account and are not to be included in the rates and costs of businesses within the Fund. Prior year, current year, or budget year operating losses in DWCF

are not to be budgeted in the base closure accounts. Costs attributable to base closure actions at *DWCF* activities to be budgeted in BRAC may include:

- BRAC directed reductions-in-force, separation incentives, plant closures, plant layaway or custody costs or other BRAC related expenses, such as all costs not associated with a valid work order during the year of closure.
- Environmental Restoration and Mitigation. This includes reducing, removing, and recycling hazardous waste, and removing unsafe building debris.
- Planning. Conduct of such advance planning and design as may be required to transfer from an activity being closed to another military installation.
- Outplacement Assistant. Assistance in relocation, training, or other necessary assistance to civilian employees employed by the Department at installations being closed.
- Community Programs. This includes economic adjustment assistance to a community in which the closed base is located, or community planning assistance to the community to which functions will be transferred as a result of closure of a military installation.

2. BRAC and DWCF Rates - Overhead, not specific to BRAC and not in support of producing goods or services for customers, will be financed in the year the costs are incurred with the Components' Operation and Maintenance (O&M) appropriations. *DWCF* losses occurring in years prior to closure will be recovered through the rate structure to the extent that there are new customer orders. When there are no new customer orders in the budget year, all overhead not included in rates supported by ongoing work or prior year losses to be recovered in the budget year must be financed as a pass through to the *DWCF* from the O&M appropriations of the Military Department or Component responsible for the activity incurring the loss. All costs at a closing activity in the year of closure that are not associated with a valid work order or are not valid BRAC costs are O&M costs and must be budgeted in the fiscal year when they will be incurred. BRAC costs are defined in the paragraph above.

J. Funding of Civilian Voluntary Separation Incentive Program.

The Fund will finance and include costs in stabilized rates for civilian separation incentive requirements of assigned employees unless they must be offered as a result of directed base realignment and closure action. If the offering is a result of a base realignment and closure action then the appropriate Base Realignment and Closure Account will fund the civilian separation incentive.

K. Base Support

DWCF activities that use any of the services as listed in Exhibit Fund-22 must reimburse host activities in accordance with DoDI 4000.19 (Interservice and Intragovernmental Support) to the extent that the specified support for the *DWCF* activity increases the host activity's direct costs. Costs for *DWCF* mission products and services (e.g., depot supply, depot maintenance, Public Works Center services, information processing, communications, and software development) shall be based on the approved stabilized rate. Other support incidental to the *DWCF* activity's primary mission or purpose shall be budgeted based on direct costs measurable and directly attributable to the *DWCF* activity (incremental direct cost). Only the incremental change in cost attributable to the *DWCF* activity (incremental direct cost) shall be chargeable to the *DWCF* activity. Indirect costs are not to be included as a cost to the *DWCF* activity. The cost of operations budgeted for these services either as a host or tenant activity should be noted by activity group in Exhibit Fund-22 (Summary of Base Support) that is provided to OSD/OMB with the fall budget submission.

L. First Line Supervision

First line supervision is that level immediately over non-supervisory workers. First line supervisors and above are official supervisory positions and, when acting in a supervisory capacity, their labor costs shall always be budgeted and charged as an indirect cost of the cost center supervised. Crew chiefs, snappers, team leaders, and

other subordinate job leaders are not considered first line supervisors. Volume 11B, Chapter 63, paragraph K contains additional information related to charging labor costs.

M. *DWCF* Management Headquarters Costs

A *DWCF* management headquarters is a discrete organization or part of an organization that has authority over the management of the *DWCF* activity group. OSD and Service Departmental activities normally do not have this direct responsibility. All the major systems/logistics organizations in the Services include headquarters elements directly supporting *DWCF* activities that should be funded or reimbursed by *DWCF* activity groups.

Costs for discrete *DWCF* management headquarters organizations and parts of organizations that perform direct *DWCF* management headquarters functions should be directly funded by *DWCF*, if feasible, or reimbursed by *DWCF*. Only significant costs (exceeding 1 percent of the total activity group costs, or if less than 1 percent, costs that exceed \$1 million) should be reimbursed. In addition, significant costs for common support functions (e.g., counsel, personnel, etc.) at organizations partially funded or reimbursed by *DWCF* (i.e., that have direct *DWCF* management responsibilities) should also be allocated, if feasible.

N. Dual Funded Organizations

A dual funded organization is an organization that is funded (including reimbursable funding) by both the *DWCF* and other appropriations or accounts. In those instances where a function is funded with a combination of both *DWCF* and appropriated funds, the function initially will be funded in its entirety either by the *DWCF* or by appropriated funds. The determination of whether the particular function initially is to be funded by the *DWCF* or by appropriated funds will be based on the predominance of definable units of measure for the function--e.g., work load, productive hours, outputs, or ultimate use. The part of the organization (or funding source provided) initially funding the function shall be reimbursed for appropriate amounts by other parts of the organization (or financing sources or customers) involved. Reimbursement (and the allocation of costs) between the provider and customer shall be made based on the same unit of measure--e.g., work load, productive hours, outputs, or ultimate use--as was used to determine which organization (or funding source) initially funded the applicable costs; and the amount of reimbursement shall be determined based on the relative portion of that unit of measure attributable to each part of the organization (or funding source) involved. Notwithstanding this policy, the amount of reimbursement for base support services provided by the *DWCF* to tenant activities shall be determined in accordance with the policies in paragraph 090103.K and DoDI 4000.19.

For example, if the part of an organization that is within the *DWCF* account for 60 percent of the unit of measure for a function shared with the part of the organization funded through appropriated funds, then the *DWCF* portion of the organization initially would fund all of the costs of performing that function. However, the applicable part of the organization funded through appropriated funds would reimburse the *DWCF* for (and be allocated) 40 percent of the costs.

When a capital asset purchased by the *DWCF* is also used by the appropriated fund part of the organization, the Fund activity will capitalize the capital asset and bill the appropriated fund customer for the use of the capital asset. Such billings will utilize a stabilized rate that recoups both depreciation and operating costs.

When a capital asset purchased by an appropriated fund part of the organization is also used by the *DWCF* part of the organization, the appropriated fund side will capitalize the asset and bill the *DWCF* for operating costs only. (Appropriated fund activities do not bill DoD activities for depreciation of capital assets.)

O. Revenue Recognition

Revenue and associated costs must be recognized in the same accounting period. Revenue must be recognized in the same manner (that is, a standard policy for recognizing and reporting revenue must apply) for all activities within a *DWCF* activity group. *Beginning in FY 2000, the "Percentage of Completion Method" will be the only method of Revenue Recognition used by non-Supply DWCF activities.* The amount of revenue recognized cannot exceed the amount specified in the order. The policy varies based on the type of customer order, the length

of time necessary to complete the order, and the value of the order. There are two types of customer orders: (1) end-product (end-item) type orders which, at the completion of the customer order, produce a usable end-product (an overhaul, repair, manufacture, construction, modification, etc.); and (2) service type orders which provide a service over a specified period of time.

It is important that current period net income/loss include revenues earned and costs incurred in the same periods in order for the activity group manager to better evaluate the performance of an organization for the period(s) in which the work is performed. The revenue recognition policy does not encompass or establish policies for billings to customers or payments from customers.

DoD Financial Management Regulation (DoD 7000-14R), Volume 11B, Chapter 61 provides specific revenue recognition guidance by *DWCF* activity group.

P. Customer Mandated Schedule

When a job order is canceled or reduced in scope after a *DWCF* activity has commenced work or incurred costs on the order, the costs incurred, plus the applied overhead (that is indirect and other normally allocated overhead (G&A) costs)), plus costs associated with the cancellation or reduction shall be charged to the customer.

DoD 7000-14R, Chapter 1, paragraph 010222, provides specific guidance for the types of directly associated cancellation or reduction costs that can be charged to customers.

Q. Extraordinary Write-offs.

Extraordinary write-offs of losses, chargeable against AOR in accordance with accounting policies, shall not be recovered through increases in customer rates in the following circumstances: losses resulting from the disposal or divestiture of capital budget items that have not been fully depreciated at the time they are taken out of service due to BRAC action; gains from customer returns without credit; or losses associated with systematic inventory reductions by disposal of assets associated with force draw downs. All such extraordinary write-offs will be separately identified in the Component's budget submission using either Form SM-5B or Fund-7B and will include an attached explanation which cites the fiscal year, the action which precipitated the divestiture action, the basis of the proposed write-off, and the dollar value. *All requests for extraordinary write-offs must be approved by the OUSD(C). Any out of cycle requests for extraordinary write-offs should be forwarded to the Directorate for Revolving Funds, Program and Budget for review and approval.*

R. Funding policies reflecting relationships with, and requirements of, other appropriations are provided in Chapter 1, Section 0102.

090104 Rate Setting in the Activity Groups

A. In accordance with paragraph 090103, stabilized rates reflecting full costing will be set during the budget process for all activity groups. The Fund includes a variety of activity groups that are categorized in two groups for rate setting purposes.

1. Supply Management Activity groups. Utilize commodity costs in conjunction with a surcharge to establish customer rates (see paragraph 090203 Supply Management).

2. Non-Supply Management Activity groups: Depot Maintenance, Research and Development, Transportation, Distribution Depots, Base Support, and all other activity groups have unit cost rates established based on identified output measures or representative outputs. These output measures establish fully cost burdened rates per output, such as a cost per direct labor hour, cost per product, cost per item received, cost per item shipped, etc. These activity groups establish both their output rates and the stabilized customer rates through the same general process. An example of this process is described below, and a more detailed explanation is provided in paragraph 090204.

B. Definitions and Procedures

1. Stabilized Rate. The stabilized rate is the cost per direct labor hour (or other output measure) customers are charged for the products and services provided by the depot or activity group. A stabilized rate is established for the fiscal year(s) budget being formulated during the budget review process. The stabilized rate is determined by taking the approved Direct Labor Hour rate (or other cost per output measure) for the budget year and adjusting it for both inter-Fund transactions (adjustments to reflect changes in the costs of purchases between activity groups within the Fund), and for the impact of prior year gains or losses as reflected by the AOR. This annual stabilized rate is the rate that will be charged for all new customer orders received and accepted during that specific fiscal year, regardless of the fiscal year the work is actually executed and billed. *The only exception to this stabilized rate policy is for unplanned losses in the Depot Maintenance Activity Groups. See paragraph 010218B or 090103H for more specific guidance.* In Supply Management, customers are charged the stabilized price in effect when the item is dropped from inventory.

2. Rate Change. The annually published rate change for activity groups is the percentage change of the stabilized rate or price between fiscal years. As an example, for depot maintenance, the budget year rate is determined by dividing the approved Direct Labor Hour rate proposed for the budget year by the stabilized Direct Labor Hour rate in effect for the current execution year. That value, expressed as a percentage (plus or minus from a base of one), is the composite price change rate customers will use in their appropriated funds submissions.

C. Budgeted Rates. DoD(C) will review and approve all final rates and prices developed for the President's budget submission during the Budget Review. Rates to be charged customers will be developed by the Components in their budget estimate submission to recoup all costs associated with the Activity group operating and capital budgets including all labor and non-labor, direct, indirect, and general and administrative overhead costs. Following the determination of required costs and proposed rate structures necessary to recover the full costs of executing the Components' planned support program. *During budget formulation, Components may propose more detailed rates that break out overall composite rates by activity or product line within an activity group. If approved, these rates would be used in final budget development and execution.* Components will make corresponding adjustments in appropriated customer account budget requests to ensure the customer and Fund business budgets are in balance.

D. Budget Formulation Rates and Prices. Rates will be established in a multiple step process as described below:

1. Each Service or DoD Component managing a activity group should carefully review all projected costs for all operations projected for the fiscal year, and propose the most cost-efficient operation possible.

2. Customer requirements must be projected to include all anticipated work load programmed for accomplishment during the budget year based on identified outputs such as direct labor hours by product, tons shipped, line items received, and all other approved output measures for each activity group.

3. Adjustments required to conform to OSD and OMB guidance on the impact of inflation, projected pay changes, and other programmatic and policy changes will also be included by Components in developing proposed rates.

4. DoD Components will propose costs, program levels, and rate changes by activity group in their budget estimate submissions. *Components may propose that customer unique, non-labor direct costs be excluded from the stabilized rates charged to customers. These costs would instead be charged on an actual cost reimbursable basis. Components should show the impact the change in rates structure would have on overall stabilized rates. Final approval of any rate structure proposal will be made by the OUSD(C) P/B in the budget process.*

5. Final approved costs, program levels, and rate changes will be established by Program Budget Decision documents, after adjustments required to balance changes to the customer account program levels with anticipated Fund costs, inter-Fund sales and transactions, and adjustments for NOR in order to bring Accumulated

Operating Result to zero for the Budget Year for each activity group. *Exceptions to this policy are found in paragraph 090103H.*

090105 Preparation of Materials

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 9 provides additional specific guidance with regard to the back-up material required for the Fund and other unit cost budget areas.

090106 References

Chapter 1 provides funding policies to be adhered to include those that impact other appropriations and accounts. Chapter 2 provides guidance related to Military Personnel costs. Chapter 3 provides guidance related to Operation and Maintenance costs and Chapter 8 provides guidance related to Real Property Maintenance and Minor Construction.

0902 BUDGET FORMULATION**090201 Purpose**

This section provides guidance for preparation and submission of fall budget and execution review estimates for the Defense *Working Capital Funds (DWCF)*

090202 General

A. Copies. Number of copies of the required materials to be submitted with the annual budget estimates are identified in Chapter 1. Four (4) copies of relevant materials will be submitted with the execution review when a separate review is required. An execution review will be conducted when approved by DoD(C).

B. Classification. The *DWCF* justification books prepared by the Components are to be unclassified. Any classified exhibits will be submitted under separate cover.

C. Formats. Exhibits will be submitted on 8-1/2 x 11 inch paper, with 3 holes punched along the 11-inch side. Minor variations in format to facilitate automation must be approved by OUSD(Comptroller) prior to September 1. Provide written request for variations to the Director for Revolving Funds no later than August 1. The response to the request will be forthcoming within 10 working days.

D. Automated Requirements. Consistent with the guidance contained in paragraph 010505, the *DWCF* budget estimates will be entered into the Budget Review System (BRS). BRS entries are in obligations.

1. *DWCF* Operating Budgets will be entered into the BRS as new obligations. However, the hard copy submission should reflect costs with a correlation provided of the relationship between obligations and cost.

2. *DWCF* Capital Budgets will be entered into the BRS as obligations regardless of program year. Do not enter into the BRS the program year totals. However, the hard copy submission should reflect the full costs of the project or item with Exhibit Fund-9c providing the correlation between the program and obligations.

3. Enter estimates of civilian full-time equivalents (FTEs) for civilian personnel data and military end strength for military personnel data.

4. During the budget review, the alternative estimate contained within Program Budget Decisions will be expressed as obligations, FTEs for civilian personnel, and end strength for military personnel, and will adjust the BRS. Program Budget Decisions will also, based on the proper correlation provided by the Components, contain compatible cost adjustment summaries to be used for rate and price adjustments and for adjusting financial statements used for budget justification.

090203 Supply Management Activity Groups

A. The methodology formerly contained in DoD Instruction 4140.24, "Requirements Priority and Asset Application for Secondary Items," will be used to develop budgetary requirements until updated. Stratification products will be submitted on a routine basis. A copy of the transition from the stratification to the budget will be provided for each wholesale division.

B. The following statements/tables/exhibits are prescribed for the supply management activity groups of the Fund.

		OSD/OMB Budget	Backup to Pres Budget	President's Budget	Execution Review
SM-1	Supply Management Summary by Division	yes	yes	yes	yes
SM-2	General Narrative Justification by Division	yes	no	no	yes
SM-3a	Operating Budget	yes	no	no	no
SM-3b	Operating Requirement by Weapon System by Division	yes	yes	yes	no
SM-3c	Mobilization by Division	yes	no	no	no
SM-4	Inventory Status	yes	yes	yes	no
SM-5a	Surcharge Computation	yes	yes	no	no
SM-5b	Customer Price Change	yes	yes	yes	no

Fund-28	Execution Performance Monthly Analysis	no	no	no	yes
Fund-29	Civilian Personnel Execution Performance Quarterly Analysis	no	no	no	yes
OP-32	Operation & Maintenance Budget Activity (Part of the O&M submission, Chapter 3)	yes	no	no	no
R-32	RDT&E Appropriation Budget Budget Activity (Part of the RDT&E submission, Chapter 5)	yes	no	no	no
P-32	Procurement Appropriation Budget Activity (Part of the Procurement submission, Chapter 4)	yes	no	no	no

C. Definition of Terms Used in Supply Management Activity groups

Acquisition Lead Time. The interval in months between the initiation of procurement action and the receipt into the supply system of the production model (excludes prototypes) purchased as the result of such actions. Acquisition Lead Time is composed of two elements, production lead time and administrative lead time.

Administrative Leadtime. That portion of the procurement leadtime that begins with the identification of the need to buy and the awarding of the contract.

Allocation. Under the appropriations act, direct funds may be appropriated to the *DWCF*; therefore, obligations may be made against *DWCF* to procure war reserve material inventory. Obligation authority for Mobilization purposes should be separately identified in annual funding documents. Obligations shall be separately accounted for and reported as mobilization and operating.

Beginning of Period (BOP, BP). The start of a specified fiscal year normally on October 1 used to determine the opening "snapshot" status of resources.

Capitalized Inventory. On-hand and on-order inventories of supplies funded by other appropriations and funds are considered as contributed capital as of the date when management responsibility for the items is undertaken.

Capitalization. The process whereby the Fund assumes management responsibility and ownership without reimbursement for inventories financed from other DoD appropriations or funds.

Commitment. A firm administrative reservation of funds, based upon firm procurement directives, orders, requisitions, authorizations to issue travel orders, or requests which authorize the recipient to create obligations without further recourse to the official responsible for certifying the availability of funds. The recording of a commitment reserves funds for future obligations.

Contingency Retention Stock. That portion of the quantity of an item excess to the Approved Acquisition Objective and for which there is no predictable demand or quantifiable requirement and which normally would be allocated as potential reutilization stock, except for a determination that the quantity will be retained for possible contingencies.

Cost of Goods Sold (COGS). COGS represents the latest acquisition price *or the latest repair price* of the items sold *at the standard or exchange price respectively*. This matches the sales revenue in one period with the transactions affecting costs, which may have occurred in several previous periods. COGS is not affected by surcharge rates, obligations for replenishment, or net outlays. COGS is the essential baseline to establish prices.

Decapitalization. The transfer of Fund inventories to other appropriations or funds without reimbursement.

Demands. An indication of a requirement (requisition, request, issue, repairable generation, etc.) for issue of serviceable material. Demands are categorized as either recurring or nonrecurring and are also referred to as orders. Demands for repairable items should indicate whether or not a carcass will be returned.

Direct Appropriations. Amounts appropriated by the Congress to the Fund for war reserve material, Defense Commissary Agency, or other purposes.

Economic Retention Stock. That portion of the quantity of an item greater than the Approved Acquisition Objective determined to be more economical to retain for future peacetime issue than to dispose and satisfy projected future requirements through procurement or repair. To warrant economic retention, items must have a reasonably predictable demand rate.

End of Period (EOP, EP). The last day of a specified fiscal year normally on September 30 used to determine the closing status of resources.

Exchange Price. This is the price charged to customers exchanging a repairable item (DLR) for a serviceable one (new or repaired). Equates to the latest repair price plus wash out costs per item plus the surcharges necessary to recover other *operating* costs in the supply management activity group.

Expendable Supplies and Material. Supplies which are consumed in use, such as paint, fuel, cleaning, preserving materials, surgical dressing, drugs, and medicines, etc., or which lose their identity in use, such as spare parts, etc. They are sometimes referred to as consumable supplies and material.

Initial Spare and Repair Parts. Those spares and repair parts introduced through the provisioning process to sustain material systems programmed operations until requirements are forecast based on actual demands (i.e., replenishment).

Insurance Item. A non-demand-based stocked essential item for which no failure is predicted through normal usage. However, if a failure were to be experienced or a loss occur through accident, abnormal equipment or system failure, or other unexpected occurrence, lack of replacement would seriously hamper the operational capability of a weapon system.

Inventory (Supply). An aggregation of material (supplies, equipment or end items) which is maintained for the primary purpose of issue to replace a failed, lost, or consumed item, or to provide initial stockage or stock replenishment to supported or supporting units or activities.

- Consumer Level of Inventory: An inventory, usually of limited range and depth, held only by the final element in an established supply distribution system for the sole purpose of internal consumption. Inventory at the consumer level is normally no longer considered Fund inventory.

- Intermediate Level of Inventory: An inventory between the wholesale and consumer levels, regardless of funding source.

- Wholesale Level of Inventory: Inventory, regardless of funding sources, over which the inventory manager at the inventory control point level has asset knowledge and exercises unrestricted asset control to meet worldwide inventory management responsibilities.

Inventory Cost Categories

- Operating Costs, other than initial purchase of war reserve material, consist of orders placed, contracts awarded, and similar transactions which legally encumber the government to a specified future outlay of funds.

- Mobilization Costs cover fiscal year New Budget Authority to procure items with funds appropriated specifically for war reserve stocks. These quantities of material are required to support approved force mobilization objectives. The approved force mobilization objective is the quantity required, in addition to peacetime assets normally available on any given date, to equip and support the approved force structure in accordance with current Defense Guidance.

Numeric Retention Stock. Formerly, the quantity of an item in excess of all identified requirement objectives but for which disposal is currently infeasible or uneconomical or for which a management decision has been made to retain stock in the supply system. This category of stock is no longer valid.

Latest Acquisition Cost (LAC)). The price paid for each item the last time it was purchased from a supplier (latest invoice price), unless the last purchase is not a representative purchase. Can be based on an earlier buy if the latest purchase is considered nonrepresentative. Does not include any surcharges or inflation factors.

Numeric Stockage Objective (NSO) Item. A nondemand-based, stocked, essential item for which, although failure may be predicted, the probability of demand is so low that it does not meet the stockage criteria at a given activity and, as a demand-based item, would not be stocked. Since the lack of a replacement item would

seriously hamper the operational capability of a weapon or weapon systems, the item is therefore stocked; but as non-demand-based. Also included in this category are:

- Items needed to support particular programs of a nonrecurring or sporadic nature (e.g., set assembly, non-repetitive overhaul programs) where re-procurement is not required once the particular program has been completed.
- Items that are procured on a life-of-type basis or which are “bought out” at the termination of a production program.
- Items that are not fully consumed during a one-time or non-repetitive program but which should be retained for possible future need on a similar program.

Other War Reserve Material Requirements. The total war reserve material requirement less the sum of the pre-positioned war reserve requirements.

Outlays. Checks issued or other payments made by the government for goods and services received. Gross outlays are equal to the cumulative amount of disbursements made for the fiscal period to date. Net outlays are equal to gross outlays less the cumulative amount of collections received for the fiscal period to date.

Peacetime Operating Level of Supply. The quantities of material required to sustain operations in the interval between requisitions and the arrival of successive shipments. These quantities should be based on the established replenishment period (monthly, quarterly, etc.).

Pre-positioned War Reserve Material Requirement (PWRMR). That portion of the war reserve stocks required to be on hand on M-Day which approved Defense Guidance dictates be reserved and/or positioned at or near the point of planned use or issued to the user prior to hostilities, to reduce reaction time and to assure timely support of a specific force/project until replenishment can be effected.

Price Stabilization. The policy through which the standard price of each cataloged item shall remain constant throughout each fiscal year except for correction of errors.

Production Lead Time. The time interval between the letting of a contract or the placing of an order and the first significant receipt into the supply system of material purchased as a result of such action.

Provisioning Item. Spares and repair parts required as both demand and nondemand-based levels in the supply system to support new fielding of end items.

Provisioning Item (Outfitting). That portion of Provisioning consisting of items for which a sale is anticipated to an appropriated outfitting (buy-out) account.

Reclassification. The transfer of assets between inventory strata.

Repair Cycle Level. The quantity of repairable items required to sustain operations during the repair cycle that commences when a maintenance replacement takes place and ends when the unserviceable asset is returned to stock in a serviceable condition. This includes such stages as removed, awaiting shipment, in transit, in pre-repair screening, in process of repair, and being returned to serviceable stock. Any extraordinary awaiting-parts delays and any intentional extended-transit, storage, or repair-process delays should be excluded from the repair cycle.

Repairable Item. An item of supply subject to economical repair and for which the repair (at either depot or field level) is considered in satisfying computed requirements at any inventory level.

Requisitioning Objective. The maximum quantities of material to be maintained on hand and on order to sustain current operations and core war reserve. It will consist of the sum of stocks represented by the operating level, safety level, and the order and shipping time or procurement time, as appropriate.

Retail Inventory. Supplies/material held below the wholesale level (e.g., the intermediate and consumer levels of inventory).

Replenishment Spare and Repair Parts. Those spare and repair parts required to resupply or increase initial stockage of reparable or consumable parts in support of fielded items.

Safety Level of Supply. The quantity of material required to be on hand to permit continuous operations in the event of minor interruption of normal replenishment or unpredictable fluctuations in demand.

Standard Price. The price customers are charged which, for DoD ICP managed item (excluding subsistence), remains constant throughout a fiscal year except for the correction of significant errors. The standard price is computed based on various factors which include the latest acquisition cost of the item plus surcharges to recover costs for transportation; inventory loss, obsolescence and maintenance; depreciation; and supply operations. Customers are ultimately charged exchange price for DLRs unless the carcass is not returned. If the carcass is not returned, the customer is charged the full standard price.

Stockage Objective. The maximum authorized quantity of material on hand to sustain current operations. It consists of the sum of stock represented by the operating level, the safety level, the repair cycle level, and authorized additive levels.

Stratification Process. A uniform portrayal of requirements and asset application that is a computer-generated simulation of actions causing changes in the supply position, e.g., procurement, repair, receipt, issue, terminations, and disposal of material.

Surcharge. Factors added to the latest acquisition cost or repair cost price of an item to arrive at the customer's standard or exchange price. Surcharges will include:
(1) transportation, for such costs as deliveries from production site to points of use or storage; (2) inventory obsolescence and loss, for the costs of pilferage, damage, deterioration, physical inventory shortages and excess; (3) inventory maintenance; (4) supply operations support costs; (5) inventory augmentation; (6) depreciation; and (7) DLR carcass attrition costs, if applicable.

Unfunded Requirement. The difference between the spare and/or repair parts requirement computed in accordance with DoD Policy (such as, DoDI 4110.24, DoDI 4140.39, and DoDI 4140.24) and the amount of that requirement that is funded.

Unobligated Commitments. Amount of commitments incurred this fiscal year to date which have not resulted in obligation at the end of the report period.

War Reserves. War reserves are stocks of material amassed in peacetime to meet the increase in military requirements forecasts contingent on an outbreak of war. War reserves are intended to provide the interim support essential to sustain operations until resupply can be effected.

D. Budget Submission Formats are provided in Section 0904.

090204 Non-Supply Activity Groups

A. The following statements/tables/exhibits are prescribed for the remaining activity groups of the Fund other than Supply Management. Exhibits Fund-7a and Fund-7b are to be included for all activity groups which use direct labor hours in their rate computation. Exhibit Fund-8b is to be included only for the Transportation activity groups.

		OSD/OMB Budget	Backup to Pres Budget	President's Budget	Execution Review

B. Definitions Used in Non-Supply Activity groups

Maintenance Depot. Industrial facilities of the Defense Business Operations Fund including; Army and Marine Corps Multiple Commodity Maintenance Depots, Ordnance Depots, Arsenal, Navy and Air Force Aviation Depots, Shipyards, and DLA Industrial Plant Equipment Repair Sites.

Direct Labor Hour Rate. The fully burdened cost per direct labor hour used as the initial basis for establishing stabilized rates. The direct labor hour rate is computed by dividing the sum of all labor, nonlabor, and material direct, indirect, general and administrative expenses projected to be incurred by the depot (or other activity group) during the fiscal year, by the total number of direct labor hours (or other outputs) anticipated to be accomplished during the fiscal year.

Direct Labor Hour (DLH). DLHs, sometimes referred to as Direct Product Standard Hours, are the number of hours required to perform the direct work on a product, or to perform a billable service for customers. Direct labor hours generally include the hands-on maintenance, repair, overhaul, test, and related direct production effort that follows the established sequence and content of work necessary to accomplish the billable job. Direct Labor Hours do not include the support work or manhours identified as either indirect or general and administrative in nature. DLHs are estimated for budget purposes, by product or service, based on industrial or management engineering standards developed using time, method, and motion studies, historical usage averages, or professional estimating and evaluation (E&E) techniques.

Fixed Price Catalogs. Depot Maintenance activity groups may maintain a catalog of products and services (major end items, components, depot level repairables, modification kits, etc.) with their associated rework, repair, overhaul, installation, etc., based on the Standard Depot Level Maintenance (SDLM) or Planned Depot Maintenance (PDM), work package Direct Labor Hours (DLHs). The DLHs associated with the product or service multiplied by the stabilized composite rate for a fiscal year constitutes the firm fixed price for the catalog item. Catalogs may be maintained in hard copy or in electronic data bases accessible to customers.

Total Cost of Goods Sold. Refers to the total costs incurred in the operating budget of the activity group associated with the revenue planned to be recognized for the budgeted fiscal year.

C. Component Estimates of Rates. Each Activity group will include proposed new customer order rates for each budget year in accordance with paragraph 090104. The rates will be established during the budget review process and will remain stabilized through the execution year.

1. Total direct labor hours (DLHs) required to accomplish the budget year's work program will be identified by the Component in their OSD/OMB submission. The work program is the total number of DLHs planned to be executed in support of known and projected customer requirements during execution of the budget.

2. Total costs estimated to be incurred in execution of this work load will also be projected. This process should include application of general inflation, pay raise, and other inflation or DoD(C)-directed price adjustments, as specified in the DoD(C) budget formulation Budget Call. The sum of all these costs (including supplies, materials, pay, depreciation, and other charges, etc.) is the estimate of the total cost of goods sold.

3. Customer requirements must be projected and separately identified to include: current (on hand) unfilled customers orders expected to be executed during the budget year (carry-in or backlog), and work in process that will be completed; new orders anticipated to be accepted and executed during the budget year; and orders anticipated to be accepted but will not be executed during the year (anticipated carry-over).

4. Work load mix, availabilities, and production schedules must be assessed, along with any other factors that may impact program outputs such as policy changes, productivity initiatives, planned work load competitions, plant capacity, and other factors. Based on this analysis the total anticipated work load both by major work load category (or product), and the associated Direct Labor Hours needed to accomplish this work during the program year will be identified and reported.

5. Total costs required to execute the planned program to produce the outputs in the approved execution program will be identified and reported in budget exhibits, with significant changes from the prior year highlighted in the Exhibit Fund-2, Changes in the Costs of Operations.
6. To determine program financing requirements and initial rates, the estimate of the total cost of goods sold will be divided by the programmed output (total Direct Labor Hours), to identify an initial cost per direct labor hour.
7. The number of DLHs associated with carry-in work load (unfilled customer orders on hand at the start of the year), times the prior year stabilized rate (rate in effect when the carry-in orders were accepted) will be identified. Since this work load is already financed, its DLHs and associated dollars will be subtracted from the FY total DLHs and Cost identified in step 5 above.
8. The orders anticipated to be accepted but not recognized as revenue during the fiscal year (the carry-over) will be identified in the same manner as the carry-in orders. The initial cost per direct labor hour for these carry-over DLHs (set in step 5 above) will be inflated in accordance with DoD(C) guidance for the following fiscal year when the work will actually be executed. The value of this additional inflation cost for these carry-over DLHs will be added to the total program base cost identified in step 4.
9. The revised base cost from step 7 above, plus the additional inflation cost for carry-over orders will be divided by the total number of DLHs associated with new program orders planned to be accepted whether scheduled to be worked or carried-over to the next fiscal year (all orders planned for acceptance or execution in the fiscal year program except unfilled customer orders that were carried-in to the fiscal year). The resulting cost per direct labor hour should be used as the basis for the DoD Components' proposed initial rate. The proposed initial rate is adjusted for prior year gains or losses necessary to achieve an end-of-year AOR of zero for the budget year. The end result is a proposed New Customer Order Stabilized Rate.
10. Components may develop, report, and use subsidiary rates (engine rate, airframe rate, missile rate, etc.) as long as these subsidiary rates are rolled into a single composite rate for activity group rate setting.

090205 Submission Requirements

A. All businesses, except Supply Management, operating within the Fund or under Unit Cost will provide a Summary by Component in table form. For part I, each Component will provide a summary *table* for each of its Activity Groups.

Component Activity Group Narrative Analysis - For each activity group, the Component will submit a narrative analysis that, as a minimum, addresses the following areas: a general description of the activity group, its outputs and customers, and significant changes in the nature of the business over the period encompassed by the President's budget submission; an analysis of the budget statements covering revenue and expenses, costs of operation, and the statement of financial condition. The analysis should focus on the changes from year to year and how these changes are related to work load and productivity trends; an analysis of any special business-type schedules requested in the Budget Call letter; and a discussion of work load and manpower trends, productivity initiatives/cost reductions, unit costs, and customer prices incorporated in activity group budgets.

B. Section 090203 listed submission requirements for Supply Management and Section 090204 listed submission requirements for the remaining activity groups.

C. Budget Submission Formats are provided in Section 0904.

0903 CONGRESSIONAL JUSTIFICATION/PRESENTATION**090301 Purpose**

This chapter provides the policies and procedures to guide the development of budget justification and supporting narrative to be submitted by Components to the OUSD(Comptroller) in development of congressional justification material. The OUSD(Comptroller) will prepare the executive overview. Each Component will prepare a separate volume including their operating and capital budgets for direct submission to the Congress following review and approval by the OUSD(Comptroller). The Defense-wide volume material will be prepared by each Defense Agency and submitted to DoD(C), Revolving Funds Directorate, for review and approval prior to submission to DLA. DLA, with appropriate support from the submitting organization, will assemble the volume containing Defense-wide businesses and supervise its printing and distribution.

090302 Organization of Justification Books**A. Background**

1. The OSD/OMB budget review focuses on a set of business-type schedules as a means of evaluating progress towards meeting cost and productivity targets, developing (with Component financial management personnel) unit cost goals by activity group and setting prices for the budget year(s).
2. The Budget Call for budget justification and supporting narrative will request that selected Fund schedules be updated for inclusion in congressional justification material.
3. All data submitted for the President's budget should be consistent with approved costs, work load and productivity assumptions, customer prices, and unit costs. Any deviation from the approved level must be completely justified and coordinated with the appropriate Revolving Fund Directorate activity group analyst.
4. The justification books submitted to Congress are to be unclassified, will be in one volume organized into three sections: Component Overview, Operating Budget, and Capital Budget.
5. Justification books should follow the guidance contained in the DoD Financial Management Regulation, volume 2, paragraph 010401 for preparation of budget materials to Congress.
6. Financial exhibits required by Chapter 9 will agree with the Annual Financial Statements required by the Chief Financial Officers Act of 1990. Proposed deviations from data reported on the Annual Financial Statements are to be coordinated with the Revolving Funds analyst responsible for the affected activity group.

B. Component Operating and Capital Budgets

1. **Component Overview:** This volume summary section and other Component justification will be submitted to Congress during February. The Component summary will consist of individual Component inputs in the following main sections:
 - a. **Component Activity Group Narrative Analysis** - For each activity group, the Component will submit a narrative analysis that, as a minimum, addresses the following areas: a general description of the activity group, its outputs and customers, and significant changes in the nature of the business over the period encompassed by the President's budget submission; an analysis of the budget statements covering revenue and expenses, costs of operation, analysis of government equity, and the statement of financial condition. The analysis should focus on the changes from year to year and how these changes are related to work load and productivity trends; an analysis of any special business-type schedules requested in the Budget Call letter; and a discussion of work load and manpower trends, productivity initiatives/cost reductions, unit costs, and customer prices incorporated in activity group budgets.

b. Budget Statements - The Component will submit summary budget statements requested to support the external budget submission.

c. Special Schedules - For the Supply Management activity groups, the narrative must include a section on work load and economic assumptions. These assumptions must include the following data for the prior, current, and budget fiscal years: items managed (#), requisitions received (⌘), receipts (#), issues (#), contracts executed (#), purchase inflation (%), and supply material availability (%).

2. Component Operating Budget: For each activity group, the Component will submit a narrative description that explains the activity group as well as the budget statements indicated in Section 0904.

0904 ACTIVITY GROUP ANALYSIS FORMATS**090401 Purpose**

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. These formats should be adhered to unless modified in a submission budget call.

INSTRUCTIONS FOR PREPARATION OF
SUPPLY MANAGEMENT SUMMARY (EXHIBIT SM-1)

The purpose of the SM-1, Supply Management Summary by Division, is to provide summary justification for the Service or Defense Agency request. Instructions for preparation of SM-1 and SM-1a follow:

1. Prepare the SM-1 for each year being reviewed.
2. Dollars in millions and tenths of a million.
3. Both approved and proposed should be shown if they differ.
4. Peacetime Inventory will reflect the numbers shown on SM-2, line 6C.
5. Net Customer Orders will reflect the numbers shown on SM-2, line 2B.
6. Net Sales will reflect the numbers shown on SM-2, line 1.
7. Obligation Targets will reflect the targets shown on SM-2, lines 3A, 3B, 3C, 3D, and 3E. An obligation target total (*excludes capital obligations*) will be shown and be equal to line 3F of the SM-2. Only obligations will be shown on this form. Any other cost data, such as depreciation, will not be shown on this form.
8. Other Obligation Target includes appropriated dollars for any purpose other than mobilization.
9. Commitment Targets will reflect the numbers shown on SM-2, line 4.
10. Target Total will reflect the numbers shown on SM-2, line 5.

13. NARRATIVE EXPLANATION						

Exhibit SM-2 Justification by Division

INSTRUCTIONS FOR PREPARATION OF
GENERAL NARRATIVE JUSTIFICATION (EXHIBIT SM-2)

The purpose of the General Narrative Justification, SM-2 is to provide the basic justification for the budget request. Instructions for preparation of SM-2, General Narrative Justification follows:

1. Prepare an SM-2 for each supply management material division except for the Defense Logistics Agency and the Army, which may submit a consolidated statement for the retail divisions for the President's budget and the apportionment and midyear review. No summary SM-2 is required. An SM-2 is not required for a supply operations division.
2. Dollars in millions and tenths of a million except the Air Force Academy Division exhibits will be prepared in thousands.
3. For Net Sales use reimbursable issues minus stock fund credits and allowances (line 1). Amount entered will agree with the amount entered on SM-1.
4. For Gross Customer Orders (Demands) use gross sales (reimbursable issues) plus or minus the change (from the prior year) in unfilled orders (line 2A). An unfilled order is an unsatisfied requisition which upon issue of the material will become a sale. For Net Customers Orders (line 2B) subtract credits and allowances.
5. Obligation Targets will be divided into Operating less Repair of DLRs (line 3A), Repair of DLRs (line 3B), Provisioning (line 3C), Mobilization (War Reserves) (line 3D), and Other (line 3E). Other obligations include appropriated dollars for any purpose other than mobilization. These categories may be subdivided if approved by OSD. The total requested by division will reflect the total obligations shown on the Program and Financing Statement for the OSD/OMB Review and the President's budget *for Operating Budget*. See definitions of terms Section 090203, Supply Management Activity groups, for description of categories.
6. Commitment Targets will provide an administrative reservation of authority which when approved authorizes the supply management activity group to incur additional obligations on a dollar-for-dollar basis if customer orders (demands) increase without the requirement for a revised apportionment and reapportionment request. Commitment targets will also provide for normal unobligated end-of-year commitments (line 4).
7. Total Authority (line 5) is the total of obligations (line 3F) and commitment target (line 4).
8. Operating Inventory EOP (End Of Period) is the total applicable peacetime on hand and in transit inventory at standard price (include any provisioning inventory on hand or in transit) (line 6C). Peacetime inventory EOP (End Of Period) is the total Operating Inventory (line 6A) and Other Inventory (line 6B). Mobilization Inventory is shown on line 7. Total Inventory is line 6C plus line 7.
9. General Description (item 9) is a short narrative describing what the supply management division covers and supports.
10. Number of Items Managed (item 10) should provide quantitative data and narrative explanation of major changes.

11. Measures of Effectiveness (item 11) should provide quantitative data and narrative explanation of major changes in measures of supply effectiveness. The following measures of effectiveness will be used:

Percent stock availability (fill rate)--The number of units requisitioned that are immediately available expressed as a percent of the total units demanded for the period. This percent should be shown for both the wholesale and the retail level of supply.

Requisition delay time--The length of time between the date a supplier receives a requisition for an item and the date he ships the item. This should be expressed as a number of days for all stock funded items.

Mission capable rate supply--The number of weapon systems either fully or partially mission capable because of a stock funded item expressed as a percent of the total number of weapon systems. This measure should be shown for each major weapon system.

Quality Deficiency Reports (QDRs)--This measures the percentage of discrepancies in customer receipts in comparison to total item issuances by the ICP (in response to customer requisitions). It is a measure of customer satisfaction.

QDR Processing Time--This measures the time interval from ICP receipt of QDR to the issuance of corrective action. It is a measure of timeliness and customer satisfaction.

12. Operating Tempo Assumptions (item 12) should provide quantitative data such as flying hours (by aircraft type), steaming days, programmed overhauls, training days, etc., which may impact the supply management division's requirements.

13. Narrative Explanation (item 13) should cover an explanation of major changes between fiscal years as well as in the relationship between sales, orders (demands), and obligations.

INSTRUCTIONS FOR PREPARATION OF
OPERATING BUDGET REQUIREMENTS (EXHIBIT SM-3a)

The purpose of the SM-3a, Operating Budget Requirements is to provide backup information to support the obligations. Instructions for preparation of the SM-3a:

1. Prepare an SM-3a for each supply management material division except for the Defense Logistics Agency and the Army, which may submit a consolidated statement for the retail divisions. An SM-3a is not required for a supply cost of operations division. For the requested columns for the current year, display estimated actuals. For budget year and budget year plus one display revised request.

2. Dollars in millions and tenths of a million except the Air Force Academy Division exhibits will be prepared in thousands.

3. See Section 090203, Supply Management, for definitions of inventory categories.

4. Operating Requirements (line A1E) should include the total requirements for new customer orders (demands), unfilled orders at the beginning of the period, operating inventory requirement to replace sales, and others (listed and explained as necessary) at standard price.

5. Mobilization Requirement (line A2) should be the funded requirement as of the end of the period. Show unfunded mobilization requirement on line D7.

6. Total Inventory Requirement (line A4) should be the total of lines A1E, A2, and A3.

7. Applicable Resources should be shown in Section B.

8. Requirement (Standard Price) is shown on line C1. Line C1 is line A4 minus line B4. Line C2 is the surcharges amount included in line C1.

9. Line D1, Funding Requirement at Cost, is line C1 minus line C2. It includes obligations plus commitments for inventory requirements. Lines D2 through D4 are other obligation requirements for noninventory requirements. Line D5 is the total obligation requirement (the sum of D1 through D4). Line D6 is any unfunded operating requirement included in D5. (Explain in narrative.) D7 will reflect line 4C on SM-3C. D8 will reflect line 6B on SM-3a.

10. Line F5 is the total obligation target, line D5 minus lines D6 through D8 and E, and will agree with SM-2 (line 3F) total obligation target.

11. Basis of Operating Objectives. (Section G) This section contains an analysis in financial terms of peacetime on-hand and on-order objectives for the end of the past year, current year, and the budget year. Objectives will be based on subsequent fiscal year estimated demands, and will be constructed by element (e.g., safety levels, production leadtime, review cycle, repair cycle, and the like). Column 1 will reflect the actual end-of-period objectives for the past fiscal year.

The purpose of this exhibit is to portray statistically computed supply inventory objectives which will be used to test the reasonableness of the total inventory objectives computed by means of the simulation-of-buy stratification process. Substitute formats may be used provided they present substantially the same information, and provided that prior approval for substitution is obtained from the Director for Revolving Funds, USD(C).

The following is an explanation of specific entries.

a. Safety Level. (Days/Dollars) This entry will reflect the relationship between the dollar value of issues/transfers, and the dollar value of the safety level, to the average number of days of supply contained in the safety level. Requirements for numeric stockage objectives are excluded. Provision is made for more than one echelon of supply by permitting the safety level at the highest echelon to consider, in addition to issues, transfers to lower echelons. This section is applicable to both repairable and consumable items. The narrative should describe significant changes in safety level requirements or average days from one fiscal period to the next period.

b. Leadtime. (Days/Dollars) The requirement to support demands (requiring replacement through acquisition) over the acquisition leadtime period of procurement or order and ship time, depending on the echelon of supply, is included in this entry. No leadtime requirement is to be included for issues replaced through the repair cycle or for issues which will not be replaced. Therefore, these types of issues are subtracted from gross demands in the computation. The narrative should describe significant changes in leadtime requirements or average days from one fiscal period to the next period.

c. Procurement Cycle/Operating Level. (Days/Dollars) The procurement cycle applies to the first echelon of supply. This requirement supports demands from the end of the fiscal year until the next scheduled procurement. For each fiscal year it represents the dollar value of that portion of the procurement cycle which requires funding during that fiscal year. The operating level applies to the second echelon of supply. The operating level requirement support demands during the interval, between arrival of successive replenishment shipments. Only one-half of the dollar value of the operating level requirement is included here since it is assumed that on the average one-half of this requirement would be on order at any given period in time.

No procurement cycle or operating level requirement is to be included for issues replaced through the repair cycle. The narrative should describe significant changes in procurement cycle/operating levels or average days from one fiscal period to the next period.

d. Repair Cycle. (Days/Dollars) This entry will consist of the requirement for material to be on hand at the end of the fiscal year to accomplish repair operations during the repair turnaround period. This will include the time interval required to generate, through returns, sufficient stocks of an item to warrant an economical repair work order (accumulation time), and the time interval between approval of a work order for repair until the item is reclassified as serviceable (repair leadtime). The repair cycle will consist of the time interval between pickup of the unserviceable item on inventory control records and the time when the item is reclassified as serviceable. In those instances where asset visibility has been extended below the wholesale (first) echelon of supply, repair cycle requirements should include the full range of funding needed to support the visible portions of the repair cycle as first echelon requirements. A repair cycle for both a first and second echelon of supply should be described in those cases where the requirements process does not comprehend all repair cycle requirements within the first echelon. The narrative should describe significant changes in repair cycle requirements or average days from one fiscal period to the next period.

e. Other Operating Inventory Objectives. (Days/Dollars) Objectives included here will be limited to those which cannot be properly assigned to any of the objectives identified above. The narrative analysis will include appropriate data to support each objective listed under this classification. This entry excludes requirements/funding for peacetime inventory augmentation or mobilization. The narrative should describe significant changes in other operating inventory objectives from one fiscal period to the next period.

f. Total Operating Inventory Objective. (Days/Dollars) This entry is the sum of total computed on-hand and on-order peacetime operating inventory requirements as of the end of each fiscal period. (Sums of lines G1 through G7.)

12. Narrative. This provides a narrative explanation of significant changes. Also, this narrative provides a presentation of the adjustment required to the basic stratification tables prescribed by DoDI 4140.24 in order to adjust the basic data or to add data not considered. A detailed explanation of operating obligation requirements in excess of orders will be provided. The narrative should describe significant revisions or additions to the stratification tables which provide the basis for budget review and analysis. Individual statements for each budget submission should be prepared for each budget category.

Exhibit SM-3b By Weapon System

9-42

INSTRUCTIONS FOR PREPARATION OF
OPERATING REQUIREMENT BY WEAPON SYSTEM (EXHIBIT SM-3B)

The purpose of the SM-3B, Operating Requirement by Weapon System is to provide a breakout of the operating obligation request by type of supply system action (procurement versus repair) and by weapon system or category.

1. For the OSD/OMB budget review, prepare SM-3B for each Service stock fund wholesale division which provides military spare parts. (This excludes fuel, medical/dental, subsistence, etc.). For each division, one Exhibit SM-3B should be prepared for each fiscal year (CY, BY1, BY2).

2. Definitions.

a. Basic Replenishment consist of the sales replacement spares.

b. Outfits are initial outfittings to support a new weapon system or modification to an existing weapon system. This material is anticipated to be sold to an appropriated outfitting (buy-out) account which finances the lay-in of authorized allowances at the outfitting site.

c. Special Programs are instances where special management action is required, such as a Service initiative responding to abnormally high wear-out rates.

d. Basic Rework is repair obligations for sales replacement.

3. Dollars in millions and tenths of a million. Weapon systems, as defined by the applicable Service, may be aggregated into categories when individual systems are less than \$25 million. Appropriate levels of aggregation will be approved by the Director for Revolving Funds. Common parts may be grouped by category such as radios or may be allocated to specific systems such as F-16 aircraft. Obligational authority requests for nonweapon system-related requirements such as reverse engineering and forgings & castings must be separately identified.

4. Estimated data may be used and noted as such until accurate systems can be developed to provide accurate data.

5. This form will be prepared at latest acquisition cost or repair cost as appropriate.

Exhibit SM-3c By Division

INSTRUCTIONS FOR PREPARATION OF
MOBILIZATION REQUIREMENT (EXHIBIT SM-3C)

The purpose of the SM-3C, Mobilization Requirement is to provide a breakout of the funded and unfunded mobilization requirement.

1. Prepare SM-3C for each supply management division which has a mobilization requirement.
2. Dollars in millions and tenths of a million.
3. Provide for current year through FYDP. Only totals for each category (1 through 4) need be shown for FYDP years.
4. Show all data at cost.
5. See Section 090203, Supply Management, for definition of prepositioned. All other war reserve requirements will be included under sustaining.
6. The unfunded deficit is that portion of the total requirement for which no funds are available. The total requirement will encompass the minimum number of days specified in the Defense Guidance. Explain in narrative any constraints not due to funding.

Exhibit SM-4 Inventory Status

INVENTORY STATUS (EXHIBIT SM-4)

The purpose of the Inventory Status, SM-4 Exhibit is to show estimated inventory levels that will result from the proposed budgets and operating levels. Prepare SM-4 for each budget submission or review. This report shall be submitted for the prior fiscal year, the current fiscal year to date, the total current year, and the budget year for each supply management division. For each fiscal year, the form will be prepared at standard price. Line 7 will show the ending inventory converted to cost with discounting factors for repair cost and salvage value applied as appropriate. A consolidated summary for the total fund will be prepared for the OSD/OMB Review. The prior fiscal year and the current fiscal year to date exhibits shall reflect in column (1) the amount, at standard price, from supply management general ledgers used in preparation of fiscal and accounting reports. Amounts in columns (2), (3), and (4) may be statistically derived based upon related inventory stratification reports. Instructions for preparation of SM-4 Inventory Status at standard price are as follows:

1. Inventory, BOP at Standard Price. (Beginning of Period) Amounts of inventory on hand and in transit reported must equal amounts reported as of the end of the prior year. If not, explain any difference in a footnote. The Component must have title to all inventory listed here.
2. Inventory, Repriced at New Standard Price. Stratified inventory, valued at new standard price. Memorandum entry for amount due to price change (line 2B) and for change due to reclassification (line 2A) will be shown. Reclassification nets to zero in total column.
3. Receipts. Add the amount of inventory value on which title has passed or will pass to the reporting supply management division during the period of the report. Use standard price.
4. Gross Sales. Material sold to customer during the period of the report at standard price.
5. Inventory Adjustments.
 - a. Capitalization (Net). Report at standard price the inventory value of material capitalized or decapitalized during the period of the report. Show a net decapitalization with (-) preceding value.
 - b. Returns from Customers for Credit. Show the cumulative amount of material returned from customers on which title has passed to the reporting supply management division during the period of the report for which credit has been given. Use standard price.
 - c. Returns from Customers without Credit. Show the cumulative amount of material returned from customers on which title has passed to the reporting supply management division during the period of the report for which credit was not given. Use standard price.
 - d. Returns to Suppliers. Show as a negative number the cumulative amount of material returned to supplier during the period of the report. Use standard price.
 - e. Transfers to Property Disposal. Show the net amount of material transferred to/from the Defense Reutilization and Marketing Service (DRMS) on which title has been passed to DRMS. Use standard price.
 - f. Issues/Receipts Without Reimbursement. Show the net cumulative amount of material issued or received without reimbursement during the period of the report. This item could include transfers from other divisions or material categories, etc., as required. Show net issued with (-) preceding value. Use standard price.

g. Other Adjustments. Identify and report the amounts of other adjustments to inventory. Include all other adjustments to inventory such as adjustments to record for physical inventory count and extraordinary losses (fire, weather). Explain with footnotes if necessary. Show (+) or (-) as appropriate. Use standard price.

h. Total. Add 5a through 5g.

6. Inventory EOP. (End of Period) Report the amount of inventory available as of the end of the reporting period. Includes all on hand, in transit, work-in-process, and other stocks on which title is rested in the reporting stock fund division. Use standard price.

7. Inventory EOP at Approved Valuation Method. Convert the inventory at standard price in line 6 to latest acquisition cost. Then apply the discounting factors for repair cost and salvage value as appropriate. Provide breakout of Peacetime Other Inventory (column 4, line 6) value as economic retention, policy retention, potential excess, and other for OSD/OMB review only.

8. Inventory on Order, EOP at Cost. (End of Period) Report the amount of peacetime (operating and other) and mobilization undelivered orders (excluding in transit) for material outstanding at the end of the period.

Exhibit SM-5a Wholesale Only - Surcharge Calculation

INSTRUCTIONS FOR PREPARATION OF EXHIBIT SM-5a SURCHARGE COMPUTATION

The purpose of the SM-5a, Surcharge Computation Exhibit, is to show the surcharge elements for the wholesale divisions of supply management activity groups. This form will be prepared for each wholesale division. Each Service/Agency will provide a consolidated form for the sum of all wholesale divisions managed by that Service/Agency.

1. *Components* will provide the estimated surcharge and customer price changes on this form and the SM-5B, Customer Price Change, that will be reflected in the upcoming budget years to OUSD(C) by August 1. OUSD(C) will review these estimates and distribute pricing factors to all Components in seven working days after receipt of these products.
2. On line 1 of the form, enter net sales at cost for that wholesale division. If the division is consumable, the sales at cost should be at latest acquisition cost (LAC). For example, in estimating FY 2000 costs, FY 1998 contract prices plus FY 1999 inflation should be used. If the division is repairable, separate exhibits should be prepared for sales at standard price and sales at exchange price. For the estimated sales at standard price, the net sales reflected should represent sales at LAC. (Note: Since Air Force pricing computation modules can compute only forecast acquisition price, the Air Force must manually compute the difference between latest acquisition cost and forecast acquisition price and provide that computation for review with the rest of the exhibits required. That calculation of latest acquisition cost will be used as sales at cost in the Air Force budget exhibits). For sales at exchange price, the net sales reflected should represent sales at latest repair cost (LRC). For example, in setting FY 2000 prices, FY 1998 repair prices plus approved depot rate changes should be used. The surcharge elements described below should be allocated to sales at standard price or sales at exchange price. There should also be a composite exhibit for repairables that sums both the sales at LAC and LRC and the surcharge elements. For the Current Year (CY) the sales at cost should reflect the number approved in the President's budget for that fiscal year. This is the only form in which President's budget approved numbers are required. All other forms will reflect actual, estimated actual, or new projections as appropriate. For the BY1/BY2 the sales at cost should reflect the Components' best estimate of sales for that fiscal year including the approved inflation for that fiscal year only. On this line do not fill out the percent of sales column. For the composite supply management surcharge, the net sales at cost line will be comprised of a mix of consumable and repairable sales at LRC and LAC based on the estimated standard price and exchange price sales.
3. On line 2A enter obligations for supply operations approved in the President's budget for the CY less other supply operations obligations separately identified such as distribution depots obligations and transportation obligations. For the BY1/BY2 enter the estimated obligations for the budget year less obligations reflected under other categories. For the percent of sales column, divide the dollar amount in each category by the sales at cost in line one for each column. Inflation for each fiscal year should be included in the obligations cited for each surcharge element. At Component discretion, obligations for supply operations may be further broken down and displayed on this form.
4. On line 2B enter obligations to reimburse DLA distribution depots for receipts and issues approved in the President's budget for the PY and the CY. For the BY1/BY2 enter anticipated obligations to reimburse DLA distribution depots for receipts and issues. Work with DLA as you develop your rates to identify the number of receipts and issues and the price DLA plans to charge in estimating the budget year amount. During the budget review these estimates will be adjusted based on the budget decisions.
5. On line 2C enter the sum of obligations to reimburse DLSC, DAASO, and DRMS approved in the President's budget for the PY and the CY. For the BY1/BY2 enter anticipated obligations to reimburse DLSC, DAASO, and DRMS. *List the amounts applicable to each of these organization on lines 2C1, 2C2, and 2C3.* Work with DLA as

you develop your rates to determine the amount of funding required to support these activities in the budget year. During the budget review these estimates will be adjusted based on the budget decisions.

6. On line 2D enter obligations to reimburse DFAS for accounting services approved in the President's budget for the PY and the CY. For the BY1/BY2 enter anticipated obligations to reimburse DFAS. Work with DFAS as you develop your rates to identify the obligations required to reimburse DFAS for the budget year. During the budget review these estimates will be adjusted based on the budget decisions.

7. On line 2E enter depreciation expense approved in the President's budget for the PY and the CY. For the BY1/BY2 enter anticipated depreciation expense.

8. On line 2F enter the obligational impact associated with the approved inflation related to material for the PY and CY. For the BY1/BY2 inflation should be calculated based on several factors: (1) actual experience over production leadtime preceding the CY setting of prices; (2) approved inflation over the production leadtime preceding the CY setting of prices; and (3) a combination of these two factors based on an estimation of the gain/loss resulting from the inflation estimate in prior year price setting. Inflation for supply operations and other surcharge elements should be included within the supply operations element listed above.

9. On line 2G enter the obligations required to replace items that have either been lost, pilfered, or have become obsolescent approved in the President's budget for the PY and the CY. For the BY1/BY2 enter anticipated obligations associated with replacing items that have become lost or obsolete. If the carcass return rate is less than 100 percent for repairables, obligations required to replace items should be included in this category.

10. On line 2H, for repairable items only, enter the obligations required to replace items that have attrited through the repair process approved in the President's budget for the PY and the CY. For the BY1/BY2 enter anticipated obligations associated with replacing items that have attrited in the repair process. Attrition for repairable items occurs on items that have been sold at exchange price. Subsequently, the items wash out in the repair process and some must be replaced.

11. On line 2I enter the obligations required for first and second destination transportation of secondary items approved in the President's budget for the PY and the CY. For the BY1/BY2 enter anticipated obligations associated with transportation of secondary items. Obligations for first destination transportation of secondary items should only be included as a surcharge element if not included in the price of the item.

12. On line 2J enter the capital surcharge required to support disbursements for capital investments that will not be covered by depreciation approved in the President's budget for the PY and the CY. For the BY1/BY2 enter anticipated surcharge amount required to support disbursements for capital investments that will not be covered by depreciation.

13. On line 2L enter the amount added to prices to adjust for prior year gains/losses approved in the President's budget for the PY and the CY. For the BY1/BY2 enter anticipated surcharge amount required to adjust prices for prior year gains/losses. This estimate for the BY1/BY2 must be based on actual PY results and revised CY estimates in the President's budget.

14. This form is not intended to limit the Component in the display of surcharge elements. The Other (List) category permits the Component to display other costs as required.

15. On line 2M sum up line 2A through 2L across the columns.

Note: 1/ Exclude direct reimbursable costs such as tenant base support. Identify the amount excluded by footnote on this form.

SUPPLY MANAGEMENT
Wholesale Only
Customer Price Change

	CY	BY1	BY2
1. Net Sales at Cost			
2. Less: Material Inflation Adj.	XXXXXXXX		
3. Revised Net Sales at Cost	XXXXXXXX		
4. Surcharge (\$)			
5. Change to Customers			
a. Previous Year's Surcharge (%)			
b. This year's Surcharge and material inflation divided by line 3 above (\$)			
c. Percent change to customer			

Line 1. On this line enter the net sales at cost for each fiscal year. The dollar value on this line should match the net sales at cost line on the composite line 1, SM-5A and include an estimate for material inflation.

Line 2. This line should have the dollar value of the material inflation adjustment applicable between the previous year and the fiscal year of the column, i.e., in the budget year column, enter the amount of material inflation included in line 1 between BY and CY.

Line 3. Subtract line 2 from line 1.

Line 4. Enter the surcharge (\$) for that fiscal year from the SM-5A, i.e., for the budget year enter the composite total surcharge for line 2M of the SM-5A.

Line 5a. Enter the percentage (decimal) of the previous fiscal year's surcharge, i.e., for the budget year enter the percentage (decimal) from the CY line 2M of the SM-5A.

Line 5b. Add together line 4 and line 2. Divide the total of line 4 and line 2 by line 3 to get the entry for this line.

Line 5c. Divide line 5b plus one by line 5a plus one and subtract one from the result.

Exhibit SM-8 Collections/Disbursements

INSTRUCTIONS FOR PREPARATION OF
COLLECTIONS/DISBURSEMENTS (EXHIBIT SM-8)

The purpose of the Collections/Disbursements Exhibit, SM-8, is to provide detailed backup for cash impacts. Instructions are:

1. The exhibit is required to be submitted with each budget submission or review. It may be determined based upon computation from amounts recorded in general ledgers, from memorandum records, or projections of recent experiences. Amounts shall be rounded to the nearest tenth of a million dollars. Prepare SM-8 for prior fiscal year and each succeeding fiscal year through the FYDP.

a. Prior Fiscal Year:

- (1) Balance, BOP. Report the balance at the beginning of the period.
- (2) Appropriations. Report the amount of appropriations realized in the prior fiscal year.
- (3) Transfers. Report the amount of transfers from or to other funds during the prior fiscal year.
- (4) Collections. Report the amount of collections received.
- (5) Disbursements. Report the amount of disbursements made.
- (6) Net Outlays. Report the amount of net outlays for columns 1 and 4 by subtracting the estimated collections line 1.d from expenditures line 1.e.
- (7) Cash Balance, EOP. (End of Period). Report the fund balance as of the end of the reporting period.

b. Current Fiscal Year. Provide the same data as for the prior fiscal year, allowing balance EOP + BOP to compute based on transactions.

c. Budget Year. Provide the same data as for the current fiscal year.

d. Outyears. Provide the same data for the year following the budget year for the OSD/OMB Budget Review only.

2. Other Fund Balance (column 2) includes appropriated dollars for any purpose other than mobilization.

Exhibit Fund-1 Summary of Price and Program Changes - Costs

Instructions for Preparation of Exhibit Fund-1
Summary of Price, Program, and Other Changes

This exhibit reflects the total operating costs (including reimbursements for non-Fund activity groups) to accomplish the work load represented by all measured and unmeasured outputs. Measured outputs are those for which total costs for the output are estimated on the basis of the average total cost per unit. Unmeasured outputs are those remaining outputs which are expressed only in terms of total program costs. The operating budget will show depreciation for all capital benefiting the activity group. Both the Summary Exhibit (Fund-1) and the Detail Exhibit (Fund-1a), which reflect the costs incurred to support sales activity, are required for all activity groups except for Supply Management activity groups. For Supply Management Activity groups, all entries on this form are obligations except for depreciation.

Definitions of Fund-1a Categories - Cost
Details of Price, Program, and Other Changes (Operating Budget)

General. The Fund-1 and Fund-1a Exhibits reflect the total costs (expenses) of supporting the applicable activity group for each fiscal years PY, CY, BY1, and BY2. All activity groups will report the amortized capital costs of the activity for the capital investments benefiting the activity group. All entries on this form are costs except for Supply Management activity groups. For Supply Management activity groups, all entries on this form are obligations except for the costs of depreciation. Round data to the nearest tenth of a million (e.g., show \$10.4 million, not \$10 million).

Military Personnel Compensation - The elements of cost to be included in the calculation of Military Personnel composite enlisted and officer rates can be found in chapter 26 of the DoD Accounting Manual.

Civilian Personnel Compensation - The elements of cost now include VERA and RIF costs as well as the costs to offset the short-term costs of buyouts.

109 - 15 percent of the final basic pay of each employee who takes a buyout and voluntary early retirement under the Civil Service Retirement System (CSRS) during fiscal year 1995. ***This line item was 9% prior to FY 1998.***

110 - \$80 per year for each employee on an agency's rolls under CSRS and the Federal Employees Retirement System as of March 31 of fiscal years 1995 - 1998, of whether an agency offers buyouts. ***Discontinued after FY 1998.***

Material, Equipment, & Supplies - These elements support the internal material, equipment, and supply costs associated with operation of the associated supply activity. Distinguish between expenses associated with material purchased from Fund businesses and that purchased from non-Fund businesses.

413 - For equipment purchases of less than \$100,000 per item. Equipment costing more than \$100,000 per item will be capitalized and depreciated under element 801.

Other Purchases

941 - The amount entered for Technical Drawings will agree with the amount for this element in supporting budget justification materials.

942 - The amount entered for Forgings and Castings will agree with the amount for this element in supporting budget justification materials.

War Reserve Material Sales - Enter the amount for this element of expense supported by budget justification materials and included in operating budget totals.

Other pertinent information is explained below:

- Exhibits are required to show changes from the prior year to the current year, the current year to the BY1, and from the BY1 to the BY2.

- Elements of expense for which there are no costs should be excluded from the data submitted (rather than included with an amount of zero).

- Elements of expense 601-699 should be used for purchases from Working Capital Fund Activity Groups other than supply operations to support the internal operations of the activity group. Purchases by supply operations from depot maintenance businesses should be included in category 600. Purchases from the supply operations business to support the internal operations of the business should be reported in category 400.

Lines 601-676 and 680-689 should include purchases made at stabilized rates. Cost reimbursable purchases should be included in line 699.

- Purchases of engineering services, other than those shown on lines 931-934 should be included on line 969, Other Engineering Services and Support.

FY BY2 Estimate:

This exhibit will explain the changes in the operating budget (expenses) from one fiscal year to the next at a meaningful level of detail, relating program changes to changes in the level of work load (Unit Cost outputs) to the maximum extent possible. A Fund-2 exhibit for each Fund activity group is required. Of particular interest are the strategies and plans to improve activity group productivity and quality. Accordingly, the cost impacts of productivity initiatives (Defense Management Reviews (DMR) and other) should be separately identified on this schedule. Each activity group should include a paragraph outlining major productivity improvement plans and associated resources including but not limited to capital investment, education and training initiatives, process improvement, consolidation and streamlining, work force motivation, and incentives.

Provide a narrative explanation for changes. Round data to the nearest tenth of a million (e.g., show \$ 10.4 million, not \$ 10 million).

For changes in cost due to productivity initiatives, list the detailed initiatives and amounts for each. Distinguish the cost reductions associated with individual DMR's from other productivity initiatives.

Exhibit Fund-3 Labor Cost Breakdown

Instruction for the Preparation of Exhibit Fund-3
Labor and Unit Cost Breakdown

This exhibit *combines the requirements of Fund-6 exhibit (Derivation of Unit Costs)*. Accordingly, the Fund 6 exhibit will no longer be required. The Fund-3 exhibit stratifies, by fiscal year, the total activity group costs in the operating budget by Direct, Indirect, and General and Administrative (G&A) categories, which respond differently to changes in work load. *In addition it displays total workload in terms of direct labor hours or other measure and the applicable unit cost.* For the G&A category, only the personnel carried in and paid for by the activity group should be reflected in the personnel strength numbers. This includes personnel paid from the activity group payroll such as assigned security guards and personnel working in the office of the activity group director, but not the personnel assigned to a G&A activity that provides base operations support to the activity group unless they are carried in the end strength of the business activity.

Summary of General and Administrative Costs

Funding Source

Parent Service (List customers by appropriation, fund, or other sources. All orders must match the OP-21, R-32, and P-32 exhibits in total.)

Other DoD Services (List by Service. Show by appropriations, fund, or other source.)

Other DoD Agencies (List by agency.)

Other DoD Funds (List by Fund, i.e., Navy Supply Management, Air Force Depot Maintenance, etc.)

**Non DoD Agencies,
Individuals & Others**

Total

1/ These orders are included within Total New Orders Accepted, but are not programmed for execution during the budget year.

2/ This column would include all orders from column 7 (New Orders Accepted but Not Worked), plus any additional multi-year orders funded in prior years (FY-1, etc.), but still not programmed for execution in this fiscal year.

Exhibit Fund-7a Summary of Sources of Revenue

Instructions for Completing the Fund-7a, Summary of Sources of Revenue

Separate fiscal year exhibits are required for the prior year, current year, and budget year.

Revenue from carry-in orders at the beginning of the fiscal year must equal the carry-out balance at year-end for the previous fiscal year. New customer orders should be priced at the rate used in the Components' customer account request (see guidance on setting rates). Carry-out orders should be priced based on the pricing guidance. Because carry-out orders cannot be billed until accomplished, the sum of the revenue derived from carry-in orders, new orders planned for execution in this fiscal year, and the other column should equal total revenue from orders for the fiscal year. Other revenue includes pass-through, direct funding, and cost reimbursable orders that are not subject to stabilized rates.

Direct labor hours (DLHs) for carry-in work include only carry-in (balance on hand beginning of the year) anticipated to be executed during the program year. For multiyear projects, that portion of carry-in programmed for execution in future years should be added to carry-out work load. Show new customer order received from each appropriation, agency, or fund, as applicable. Any new customer orders not programmed for execution during the programmed fiscal year should be included in the carry-out category.

Revenue amounts must agree with the applicable Revenue and Expense Exhibits (Fund-11) and with Summary of Price and Program Changes Exhibits (OP-32, R-32, and P-32). (See pricing and customer account guidance in the DoD Financial Management Regulation and in the budget guidance.)

The prior year stabilized rate is the DoD composite revenue rate set in the prior year(s) budget(s). If carry-in from more than one year is involved, provide the weighted average based on the number of DLHs and the rate applicable for each year. If all carry-in was at the same rate, then only one entry is required at the top of the column. If the business has established subcomposite rates (that make up the DoD stabilized rate) such as a rate by major commodity or product (engines, airframes, components, etc.), these subcomposite rates may be used in the "Prior Year Stabilized Rate" column if grouped by customer or appropriation.

The column "New Orders Accepted but not Worked" will reflect carry-out orders.

Funded carry-in showing excess of three months in FY PY - FY BY2+1 should be explained in a narrative footnote to this exhibit.

The formula for determining carryover as it applies to the three-month carry over rule is:

Gross Unfilled Orders at end of prior FY

+ *New Orders for Current FY*

- *Revenue for Current FY*

- *Work in Process for Current FY*

= *Gross Orders carried over to Next FY*

- *Non-Supply Intra-DWCF Orders*

- *Non-Supply Inter-DWCF Orders*

- *FMS Orders*

- *BRAC Orders*

- *Non-DoD Orders*

- *Direct Contact Obligations*

= *Adjusted Orders Carried-over to Next FY*

Months of Carryover = Adjusted Orders Carried-over to Next FY divided by (Current Year Revenue divided by 12)

CUSTOMER RATE COMPUTATIONS
Department of (Component Name)
Activity group: _____

<u>Adjustment</u>	<u>Direct Labor Hours</u>	<u>Program Cost</u>	<u>Rate (\$)</u>
Prior Year Stabilized Rate:			\$xx.xx
1. Total programmed Direct Labor Hours (DLHs) anticipated to be executed during the fiscal year:	xxx,xxx,xxx		
2. Total Cost of Goods Sold during year:		\$xxx,xxx,xxx	
3. Minus DLHs associated with carry-in orders:	- xxx,xxx		
4. Minus nonstabilized rate revenue and revenue from carry-in orders at prior year composite rate: (including BRAC funding, direct reimbursables, UPC funds, pass-throughs, etc.) <i>with related DLHs:</i>		-\$ xx,xxx,xxx	
BRAC	xxx.xxx	xxx,xxx	
Passthroughs	xxx,xxx	xxx,xxx	
Direct Reimbursables (List)	xxx,xxx	xxx,xxx	
5. Total Direct Labor Hours for New Orders accepted and programmed for execution this year (Line 1 minus line 3 minus line 4):	xxx,xxx,xxx		
6. Adjusted Cost of Goods Sold (Line 2 minus line 4):		\$xxx,xxx,xxx	
7. Initial Cost Per Direct Labor Hour for New Orders: (line 6 divided by line 5).			\$xx.xx
8. DLHs associated with new orders to be carried-over* for execution in the next fiscal year:		xxx,xxx	
9. Add inflation differential value for New Orders accepted but programmed for carry-over to next fiscal year. (Line 7 times Line 8 times inflation rate).		+\$xxx,xxx	
10. Adjusted Cost of Goods Sold (Line 6 plus line 9):		\$xxx,xxx,xxx	

Exhibit Fund-7b Customer Rate Computations

CUSTOMER RATE COMPUTATIONS

Department of (Component Name)

Activity group: _____

<u>Adjustment</u>	<u>Direct Labor Hours</u>	<u>Program Cost</u>	<u>Rate (\$)</u>
11. Adjusted Cost Per Direct Labor Hour: (Line 10 divided by the sum of the DLHs from Step 5 and step 8).			\$xx.xx
12. Adjustment for prior year gains or losses necessary to achieve an end-of-year AOR of zero for the budget year: Step 12 is calculated as follows:		+/- \$xxx,xxx,xxx	
(a) Take the previous year end-of-year AOR and add to that any gains or losses in the budget year(s) and new surcharges required. (b) The resulting dollar value (from "a" above) is then multiplied by the following ratio: (Line 5 DLHs + Line 8 DLHs) / Line 5 DLHs			
The resulting dollar value, either positive (if your AOR is negative) or negative (if your AOR is positive), is then used as an adjustment to program cost in Item 12. The adjustment for capital surcharges is positive. This will ensure that all prior year gains or losses planned to be recouped or distributed will be accomplished during the budget year for which rates are being set. <i>If an activity proposes to recover an operating loss over more than one fiscal year, the total operating loss and the amount carried to the next fiscal fiscal year must be displayed.</i>			
13. Adjusted Cost of Goods Sold (the sum of Line 10 and line 12):d		\$xxx,xxx,xxx	
14. New Customer Order Stabilized Rate (Cost Per Direct Labor Hour): This rate is calculated by dividing line 13 by the sum of the DLHs from line 5 and line 8.			\$xx.xx
15. Percentage rate change from prior year: (line 14 rate divided by Line 1 rate) minus 1.			+/- xx.xx%

*Note - When determining inflation adjustments for carry-over orders you may include those orders from multiple year projects that were carried-in from the prior year, but will not be accomplished in the current year. The total carry-over DLHs should match the number reported on the Fund-7a exhibit.

Navy Research and Development Rates. The Navy will include the total composite rate change for the Research and Development activity group in addition to the stabilized rate (for work performed in-house only) in the budget estimates submission. *Activity groups may separately propose and justify rates by activity or product line provided that the total for all rates ties back to the activity group composite rate.*

Exhibit Fund 9a Activity group Capital Investment Summary (Page 1 of 4)

Instructions for the Fund-9a Exhibit
Capital Investment Summary

I. General - Each line item shown on the Fund-9a Exhibit represents the summary data associated with an individual capital investment reported on the Fund-9b Exhibit (Capital Investment Justification). The line number assigned to the item from the Fund-9b Exhibit will be cross-referenced in the first column of the Fund-9a Exhibit. In addition, the ADPE and Telecommunications equipment and software development Fund-9b Exhibit line number assigned should also be used for cross-referencing within the Information Technology Exhibits as outlined in Chapter 18 of this regulation. Use the approved *Defense Working Capital Fund* name for the activity group. All individual projects with a cost of \$1,000,000 or more will be separately justified on Fund-9b Exhibit. *All projects with a cost of \$500,000 to \$999,999.99 may be included together on one line. However, each project making up the total of this line item will be listed separately on the Fund 9b exhibit showing project name, location where the project will be used and the dollar amount by fiscal year. All project with a cost between \$100,000 and \$499,999.99 may be included on one line. Listing of individual projects in this category is not required. However, sufficient back-up data should be maintained to identify these projects, if requested. Provide the number of projects included in the total for each fiscal year.* Section 090103, Policy, provides specific guidelines in deciding whether or not to include an item in the capital budget, and the necessary pre- and post-investment analysis required to substantiate a capital budget request. *Specific rules regarding depreciation of Capital Assets are found in paragraphs 010219C and 090103B.* Definitions for these capital budget categories are provided below:

A. Equipment, other than ADPE and Telecommunications Resources, costing \$100,000 or more will be capitalized and depreciated. Equipment will be categorized by the primary reason justifying the purchase: Replacement, Productivity, New Mission, or Environmental Compliance.

(1) Replacement Equipment should be systematically analyzed and alternatives considered to meet the replacement requirement in the most cost-effective manner supported by an economic analysis. The level of effort devoted to this analysis should be related to the dollar value of the proposed investment and should employ traditional capital investment evaluation techniques such as net present value and internal rate of return analysis. In the situation where a new piece of equipment being considered significantly exceeds the capability of existing equipment, the repair versus purchase decision should be justified in the category "Productivity Equipment."

(2) Productivity Equipment consists of equipment that significantly exceeds the efficiency or capability of existing equipment and should be supported by an economic analysis comparing the net present values of alternatives considered by the decision maker. Productivity equipment reduces the cost of operations of the business activity, thereby reducing cost per unit of output, or results in a product or service improvement that reduces the customer's cost of use.

(3) New Mission Equipment is equipment needed to support an increase in work load or a new mission that cannot be adequately accomplished with the existing equipment. Purchase decisions should be supported, where applicable, with a thorough and systematic analysis of the alternatives available to satisfy the requirement in the most cost-effective manner.

(4) Environmental Compliance Equipment is equipment needed to correct or forestall a condition in violation of local, state or federal statutes and regulations. Rather than an economic analysis, a description of the possible violation ought to be included and how the particular item of equipment will remedy the situation.

B. ADPE and Telecommunications Equipment having a system unit or life cycle cost of \$100,000 or more will be capitalized and depreciated.

(1) ADPE and telecommunications resources consist of computer hardware, operating system software (including utility and communications software) and telecommunications equipment as defined in OMB Circular A-11.

(2) ADPE costs will be displayed in four parts: (1) Computer Hardware (Production), (2) Computer Software (Operating System), (3) Telecommunications, and (4) Other Computer and Telecommunications Support Equipment. The last category includes investments such as uninterrupted power sources and air conditioning that must be purchased to support computer and telecommunications resources.

C. Software Development/Modernization with a system unit or life cycle cost of \$100,000 or more will be capitalized and depreciated. *Internally developed software and externally developed Software will be listed separately.*

(1) Software development includes the actual development and acquisition of the information system as defined in OMB circular A-11. This category does not include software developed for a customer for use in a weapon system.

(2) Software development/modernization will be budgeted by project. A project is defined as any change, modernization, or improvement to a system or subsystem that by itself will provide an economic benefit or improvement in a business process. This must include all changes or improvements needed to interface or integrate with other ancillary systems. A project has a start and stop date, a specific amount of funds, and results in a usable end product. The full scope of a software development project may consist of efforts in any or all of the following four phases: (1) planning and system design; (2) system development including software modification and conversion; (3) deployment, including environmental and operational test and installation; and (4) management and technical support.

(3) Costs to be included in a software development project include the total labor and nonlabor costs such as: (1) all direct cost for civilian and military personnel; (2) contractor labor; (3) supplies; (4) travel; (5) processing support for testing; (6) indirect costs; and (7) general and administrative costs (e.g., base operations support, higher headquarters, and depreciation for central design activity-owned assets). Software development/modernization projects will exclude ADPE and maintenance/operations costs. These will be identified separately in the ADPE and telecommunications section of the Fund-9a and Fund-9b.

D. Minor Construction projects financed by the activity group and costing from \$100,000 to \$500,000 will be capitalized and depreciated. *Minor Construction projects costing up to \$1,000,000 may be financed by the DWCF if the project is required to correct a deficiency that is life-threatening, health threatening, or safety threatening.* Where appropriate, minor construction decisions should be supported by an economic analysis.

E. Column Entries

(1) Item Description. Enter the category - Equipment \$1.0 million or more, Minor Construction, etc., and the proper nomenclature, or descriptive title, of the item to be procured or service to be purchased.

(2) Quantity. As applicable, enter the quantity of items procured/estimated to be procured during , as FY PY, FY CY, FY BY1, and FY BY2. The quantity shown in this exhibit should reflect all program changes through the date of preparation of the exhibit regardless of whether such changes have been previously reported.

(3) Cost. Enter the estimated total cost of the applicable quantities procured/estimated to be procured during FY PY, FY CY, FY BY1, and FY BY2, as applicable. This amount should reflect all costs associated with program changes through the date of preparation of the exhibit regardless of whether such changes have been previously reported. Costs will be expressed in millions of dollars, to the nearest tenth (i.e., \$2.6 million).

ACTIVITY GROUP CAPITAL INVESTMENT JUSTIFICATION (\$ in Thousands)										A. Budget Submission		
B. Component / Business Area / Date				C. Line No. & Item Description			D. Activity Identification					
	FY PY			FY CY			FY BY1			FY BY2		
Element of Cost	Quantity	Unit Cost	Total Cost	Quantity	Unit Cost	Total Cost	Quantity	Unit Cost	Total Cost	Quantity	Unit Cost	Total Cost

Narrative Justification:

This exhibit will provide detailed justification by line item in support of summary capital investment purchases shown on the Fund-9a Exhibit.

- Describe the capability afforded by the existing equipment/ADPE and telecommunications resources/software development/facility and the shortcomings inherent in the current situation.
- Describe the benefits to be realized from the proposed capital investment.
- Indicate whether an economic analysis or *cost analysis* has been performed and, if not, why not. Summarize the net present value advantages of the proposed investment over alternatives considered and discarded. Be prepared to provide a copy of supporting economic analysis upon request.
- For MilCon projects, provide a copy of the supporting Form 1391 for new projects not previously submitted or identified.
- Describe the impact of not making the proposed capital investment.
- For computer software, separately identify license fees.

Exhibit Fund-9b Activity group Capital Purchase Justification

Instructions for the Preparation of Exhibit Fund-9b
Capital Investment Justification

I. General

A. The purpose of this exhibit is to provide detailed cost data and narrative justification in support of each line item in Fund-9a. Separately justify each capital investment which costs \$1,000,000 or more. It is important that the Fund-9b be complete and accurate as it is the primary justification for business capital purchases.

B. Separate Fund-9b exhibits will be submitted for each line item on the Fund-9a where there is an entry in either the current year or budget year(s) columns. *Line items over \$1,000,000 are justified separately. For line items for projects costing between \$500,000 and \$999,999.99, list each project making up line item total separately. Show project name, location where it will be installed, fiscal year and amount of project. For projects costing between \$100,000 and \$499,999.99, indicate the number of projects making up the total for each fiscal year.*

II. Headings

A. For "Budget Estimate Submission," insert "FY XX OSD/OMB submission" (XX is used for illustration purposes only. Insert the applicable fiscal year in lieu of XX.)

B. Identify the applicable Component/Activity group for the proposed capital investment. Use the approved Business Operating Fund name for the activity group. Identify the activity that will benefit from the capital item, if possible. Specific activities need not be identified for Equipment, ADPE, and telecommunications resources, Software Development, and Minor Construction Purchases costing under \$500,000 each.

C. For each item (e.g., five new forklifts), indicate the item description contained in Exhibit Fund-9a.

D. Line Item No. & Item Description. Enter a line item identification number to cross-reference the corresponding entry on the Fund-9a along with a description of the investment.

III. Column Entries

A. Element of Cost. Purchases of equipment and systems often require more than one procurement action to complete the program or, if only one contract is involved, there may be several cost elements such as the end item itself, publications, installation, minor construction support, etc. Each of these elements should be shown separately in the "Elements of Cost" section with related costs shown separately under the total cost sections. Quantity and unit cost should be shown for these elements when appropriate.

B. Quantity. The quantity related to any cost element should be stated in units. Cost columns will be totaled.

C. Per Unit Cost. Enter the actual or estimated unit cost, when appropriate, for each element listed. Express unit costs in thousands of dollars, to the nearest tenth (i.e., \$20.1 thousand). Unit costs should be expressed in terms of "then year" costs.

D. Total Costs. Enter the total cost of each building block entry taking into consideration quantity to be procured/estimated to be procured and unit costs.

IV. Narrative Justification

A. Provide complete narrative description for each applicable item. The description should include, but not be limited to, the nature, purpose, and intended use of the item. This narrative justification should include sufficient information to serve as the sole justification for funding the item. The narrative must indicate whether a pre-investment economic analysis was performed. The narrative must also indicate the dollar value of associated estimated savings/cost avoidance after the equipment is installed or the project is complete and the fiscal year when the savings/cost avoidance should begin. If no savings/cost avoidance should result from the purchase, an explanation must be provided to indicate why. The narrative must also provide a clear, concise statement relating planned procurement to the total objective for the applicable item/program. For example, the total objective for a type of supply management equipment might be 40 units at an estimated cost of \$300,000 each for a total cost of \$12.0 million. Ten units have been procured in prior years, 15 units are included in the budget year, leaving 15 units to be procured in subsequent years. If the items are to be used/installed at more than one Activity, a list of the applicable Activities that are to receive the equipment/system should be provided.

A separate page will be submitted for each category of Capital Purchases as well as a summary page. The categories are Equipment-Non-ADPE, Equipment-ADPE and Telecommunications, Minor Construction, and Software Development. (PY-X should go back to, and include, FY 1992. Although the sample exhibit reflects program year obligations of 100% of CY, PY, and PY-X program authority, that need not be the case; CY, PY, and PY-X program year obligations should reflect your best estimates.

The percentages used above are for display purposes only. The actual amounts used will vary by activity group.

Exhibit Fund-9c Capital Investment and Financing Summary

Department of (Component Name)
Activity group: _____
FY 19 ____
FY 19 ____ **Budget Estimate**

PROJECTS ON THE FY __ PRESIDENT’S BUDGET

(Dollars in Millions)						
<u>FY</u>	<u>Approved Project</u>	<u>Reprogs</u>	<u>Approved Proj Cost</u>	<u>Current Proj Cost</u>	<u>Asset/Deficiency</u>	<u>Explanation</u>
	Equipment except ADPE and TELECOM					
	Equipment - ADPE and TELECOM					
	Software Development					
	Minor Construction					
	Total FY __					

Instructions:

Complete the form for each fiscal year required in the Budget Submission. The “Approved Project Column” is the program approved in the President’s Budget.

FY	Fiscal Year of the Project.
Approved Project	Project title and amount from the President’s budget.
Reprogs	Amount of reprogramming which have occurred since the President’s budget.
Approved Project Cost	Approved Project Cost plus/minus Reprogramming.
Current Proj Cost	Current estimate of project cost
Asset/Deficiency	Asset: funds excess to current project cost estimate. Excess funds may be reprogrammed to other projects that show a deficiency in this column.

Prepare the Fund-9d exhibit to show the changes between the FY PY President’s Budget Submission the FY BY1/BY2 OSD/OMB Budget Submission.

Price Changes
Component: _____
Activity group: _____
Date: _____

<u>Output</u>	Rate/Price Change (%)		
	<u>FY CY</u>	<u>FY BY1</u>	<u>FY BY2</u>
Output 1	Break each rate change into its detailed components (i.e., general inflation, productivity, etc.) on a percentage basis. Rate changes should be consistent with Fund-2.		
Output 2			
Etc.			

Explanation

This exhibit should list each output and the computed change in customer price from the previous year. The components of price contributing to changes in customer prices should be explained. All Fund customer rates for FY CY will be those reflected in the President's budget. FY BY1 and FY BY2 price changes should be based on cost reflected in this submission to achieve an accumulated operating result (AOR) of zero in both FY BY1 and FY BY2.

Exhibit Fund-10 Price Changes

2. Carry-In Orders				
3. Total Gross Orders				
4. Funded Carry-over				
5. Total Gross Sales				

Exhibit Fund-11 Source of *New Orders & Revenue*

Instructions for the Preparation of Exhibit Fund-11
Source of Revenue

This Exhibit will identify the customers of each activity group at the level of detail indicated. Appropriated fund customers should be identified at the appropriation level. Be specific as to the source of funding. Entries such as OSD or Army are not acceptable on this Exhibit. Lack of specificity will indicate that the funding source is unknown and may not be considered as a legitimate source of funding. The identification will be on the basis of funded orders so that activity group activity may be linked to the appropriations for goods and services.

For line 1.a (Orders from DoD Components), show the amounts by appropriation (e.g., Army National Guard Operation and Maintenance, Army RDT&E, etc.) for orders accepted within the submitting Service/Component. For orders accepted from other Components, show the appropriation detail for significant customers.

For line 1.b (Orders from Other Fund Activity groups), show the orders accepted from other Defense Business Operations Fund Activity groups. Be specific as to the activity group.

Total New Orders on Line 1 must match data provided in the OP-32, R-32, and P-32 exhibits.

For line 2, display the carry-in orders from prior fiscal years. For the Supply Management activity groups, carry-in orders represent back orders.

For line 3, add the sum of lines 1 and 2.

Line 4 should equal orders from line 3 that will not be sold in the current year. For the Supply Management activity groups, funded carry-over represents backorders.

Line 5 will equal total gross sales shown on the Revenue and Expense Statement.

Components will submit summary Fund-11 exhibits for activity groups (such as Navy Research and Development) that have subdivisions and will submit a summary Fund 11 at the Component level.

Performance and Quality Measures

Component _____

Activity group _____

Output Measure _____

Performance Effectiveness Measure Definitions

<u>Category</u>	<u>Title</u>	<u>Description</u>
1. Net Operating Results (NOR)		
2. Timeliness		Provide a brief description of the
3. Quality		performance measure and identify the
4. Customer		source of the data. Include how the
Satisfaction		measure will be used to influence work process
	improvement, customer feedback, and	
	management control.	

Performance Measures

<u>Performance Measure</u>	<u>Goal</u>	<u>FY PY Actual</u>	<u>FY CY Estimate</u>	<u>FY BY1 Estimate</u>	<u>FY BY2 Estimate</u>
----------------------------	-------------	-------------------------	---------------------------	----------------------------	----------------------------

Criteria: These measures should identify the critical characteristics of the product or service from the customer's perspective for activity groups. Each activity group should use the performance effectiveness measures submitted in the March 1, 1993, Milestone II Report to Congress and those measures mandated for use in financial statements by the Chief Financial Officers Act. Each performance effectiveness measure should: (1) describe the final product as it is received by the customer, (2) be a discrete straightforward indicator, (3) be critical to the outcome goals, (4) be controllable by the business activity manager, (5) be distinguishable from work process measures, and (6) be automated to the maximum extent possible. Measures of sub-processes or internal operations should not be used unless they have a major predictable impact on the final output characteristics. Timeliness measures are typically expressed as average days it takes for a customer to receive a product or service or as the percentage goods or services provided within prescribed time frames. Quality measures gauge conformance to objective use requirements and are typically expressed as the number of defects in the product as reported by the customer or number of customer complaints reported. Customer satisfaction is a measure of conformance to customer expectations. Customer satisfaction is best measured directly with customer surveys.

Exhibit Fund-12 Performance & Quality Measures

Note: For Supply Management, expense estimates should be consistent with estimated surcharge elements included in Exhibit SM-5a except for the current year. Current year should reflect current estimates and should not necessarily be identical to the previous budget submissions as required for the SM-5a.

Instructions for Statement of Revenue and Expenses
Keyed to Statement Footnotes

- A. For supply management activity groups, the line should reflect **Gross** sales at standard. *Credit returns should be displayed in the Refunds/Discounts line.*
- B. Capital Surcharge represents the increase in prices (and projected revenue) due to surcharging the capital budget requirement to provide sufficient cash to support the capital budget. This line should be left blank if a capital surcharge is not included in price (also see note F).
- C. Other income is to include passthroughs.
- D. Cost of material sold from inventory includes the value of material sold from inventory and the cost of repair. Both wholesale and retail costs should be included. The cost of material sold from inventory will be computed differently for wholesale and retail divisions. For wholesale divisions, the surcharge shall be subtracted from the sale and the inflation added. For consumable items, the intent is to reflect anticipated sales at latest acquisition price plus inflation. For repairable items, the computation becomes more complex. Sales for repairable items shall be split between sales at standard and sales at exchange price. For sales at standard, the surcharge is removed from the sales and inflation is added similar to consumable items. For sales at exchange price, the cost of material sold reflects the sales at repair cost including rate changes for the appropriate year. For retail divisions, the cost of material sold from inventory is the obligations recorded during the fiscal year.
- E. Depreciation expenses reflect actual or estimated depreciation of all assets defined by the capital program.
- F. This represents the “gross” result from operations, prior to adjustments.
- G. Capital Surcharge reservation here should offset capital surcharge in revenue. This line is left blank when there is no capital surcharge revenue.
- H. This represents any appropriations realized to offset current period expenses (e.g., *Passthroughs*, appropriations to cover underutilized plant capacity). Appropriations for war reserve material do not offset current period expenses, do not affect NOR, and should therefore be reported as an adjustment below NOR.
- I. This represents (1) transfers to correct for prior period over- or under-pricing, (2) other approved transfers for collections from customers for which an expense has not been recorded, (3) other collections (that are not transferred out, but placed in some sort of reserve) from customers for which an expense has not been recorded, or (4) for unfunded expenses resulting from a policy change, which must be deleted prior to determining NOR.
- J. The Net Operating Result (NOR) is the net result from operations. Only NOR will be carried into AOR in the Government Equity portion of the balance sheet. We are using NOR as a performance indicator of how activity groups perform in relation to the standard established.

For the supply management activity groups, expenses shall be recorded as obligations, except for depreciation and cost of material sold from inventory.

Additional line entries are required for supply management activity groups. For each element in the surcharge applying to material such as condemnations or inventory maintenance, a separate line should be added reflecting the obligations for these items.

1. *Line 8 of the CFO Statement of Operations*
2. *Line 15 of the CFO Statement of Operations*
3. *Line 18 of the CFO Statement of Operations*

New Supply Management Exhibits Fund 14A. New exhibits will be submitted for the Supply Management Activity Groups. These new exhibits have been prepared to refine the concept of a financial management (rather than fiduciary) net operating result in supply management. Its chief features are a simpler definition of material costs, an increased emphasis and more detail on “other than material” costs, and specific information on the impact of sales volume changes on financial results. The purpose of these modifications are to help focus attention on elements of supply operation that are subject to more direct management control. These forms are substitutes for the current Fund 14 exhibit in the OSD budget submission for the supply activity group. The Fund 14 is still required for uniform displays of operating results in the President’s budget.

Instructions for the Preparation of Exhibit Fund-15 Fuel Data

The purpose of Fund-15, Fuel Data, is to provide a reconciliation between the supply management, the Defense Logistics Agency, and the customer budgets. Prepare Fund-15 for prior year actual, current year, and budget year. The Defense Stock Fund will prepare the exhibit for those stocks procured by DFSC only. Prepare exhibit for each division which procures fuel and a consolidated exhibit. Instructions for preparation of Fund-15, Fuel Data:

1. Barrels. Use 42 gallons per barrel. Show barrels in nearest tenth of million barrels.
2. Cost Per Barrel. Use cost in dollars and cents per barrel.
3. Extended Price. Multiply number of barrels by cost per barrel. Use dollars in millions and tenths of a million.
4. Product. List by product.
5. Stabilized Price. Show current approved stabilized price.

CIVILIAN PERSONNEL COSTS

Fund-21 Exhibit Instructions

Separate Fund-21 exhibits must be prepared for PY, CY, BY1, BY2 for each Military Department in total and for each appropriation/fund in which civilian personnel are funded. Exhibit Fund-21 is a modified OP-8 Exhibit. A modified OP-8 Exhibit can be submitted in lieu of the Fund-21 Exhibit.

Rate data on the Fund-21 exhibit should be shown parenthetically. To calculate the required rate data, use the formulas displayed on the Fund-21 Exhibit. Show the average salary for Basic Compensation, overall salary for Total Compensation, and FTE cost for Compensation and Benefits. Show the other rate data, as a percentage in decimals to five places, for total variables and benefits.

Full-time equivalent end strength (FTE) vice end strength authorizations will be displayed for all beginning and ending end strengths. FTE end strength is the actual or estimated number of employees on board as of 30 September. The beginning FTE end strength must agree with previous FY's September 30 FTE end strength.

Display end strength for disadvantaged employment. Display disadvantaged employment for all years. The approved FTE employment estimates will include persons appointed under the Workers Trainee Opportunity Program, Federal Cooperative Education Program, and the Federal Junior Fellowship Program, as well as certain other programs that in the past were referred to as "Ceiling Exempt"

In accordance with the Federal Employees Part-Time Career Employment Act of 1978 (Public Law 95-437), only part-time permanent employees are counted on a full time equivalent basis, i.e., an individual working 30 hours a week becomes .75 of an end strength. There is no adjustment for other part-time or intermittent employees - these employees would be counted on an individual basis not on a fractional basis.

Consult either DoDI 7330.18 or the Office of Personnel Management's Federal Personnel Manual (FPM) for definitions of full-time employees with permanent appointments (FTP). FTP (Full-Time Permanent), according to OMB Circular A-11, is the number of full-time employees with permanent appointments that are on board, or planned to be on board, as of the end of each fiscal year displayed. Such entries will exclude anticipated vacancies. Do not display FTP for Indirect Hire Foreign Nationals. Consult the DoDI or FPM to determine if your Foreign National Direct Hire employees are considered FTP employees.

Do not include overtime workyears in FTE totals. The FTEs on the Fund-21 exhibit are straight-time FTEs only. Where applicable, the BA-3 exhibit supporting the President's budget must agree with the FTE on the automated computer reports printed from the "Budget Review System" (BRS) and with the personnel summary data included in the program and financing schedules (galleys) for the printed budget. (See OMB Circular A-11.)

For the PY supporting the FY BY President's budget request, the end strength data must agree with the SF-113A, Monthly Report of Federal Civilian Employment, provided to OPM to report military functions employment levels as of 30 September.

- Direct hire FTE end strength data on the Fund-21 exhibit must agree with data provided on the 30 September supplement to the SF-113A report. This supplement is entitled, Report of Part-Time Permanent Employees on a Fractional Basis.
- Indirect hire end strength data must agree with the Indirect Hire supplement to the 30 September SF-113A report.
- The FTP end strength data must agree with data provided on line 30, Full-Time with Permanent Appointments, of the 30 September SF-113A.

Civilian Personnel Direct Funding (#7) will be total Civilian Personnel (#5) less reimbursable funding (#6). Provide end strength, FTE, and funding reimbursable data for all of the columns. Appropriations/funds (e.g., Defense Business Operations Fund, etc.) that are not funded with budget authority show all of the data as reimbursable so that "0" will be displayed in every column on the "Civilian Personnel Direct Funding" (#7) line.

CHAPTER 10

PUBLIC ENTERPRISE, MANAGEMENT, AND TRUST FUNDS**1001 GENERAL****100101 Purpose**

A. This chapter highlights the policies and justification procedures underlying budget formulation and congressional justification.

B. The following accounts are covered:

Section

1002

Public Enterprise Funds

- National Defense Stockpile Transaction Fund
- Pentagon Reservation Maintenance Revolving Fund
- National Defense Sealift Fund
- Buildings Maintenance Fund

Management Funds

- Conventional Ammunition Working Capital Fund (*Ceases operating as a revolving fund at the end of FY 1998. Will process existing orders on hand through Revolving Fund Accounts until complete.*)

Trust Funds

- National Security Education Trust Fund
- Surcharge Collections, Sales of Commissary Stores, Defense
(see Section 010603 for listing of all current trust fund accounts)

100102 Background

A. Public Enterprise Funds are expenditure accounts authorized by Congress to be credited with collections, primarily from the public, that are generated by, and earmarked to finance, a continuing cycle of business-type operations.

B. Trust Funds. The following definitions apply to trust fund accounts.

1. Trust fund receipt account. Trust fund receipt accounts are credited with receipts generated by the terms of a trust agreement or statute. At the point of collection, these receipts are available for transfer to a trust fund expenditure account or are not available for transfer depending upon the terms of the trust agreement or statutory authority.

2. Trust fund expenditure account. Trust fund expenditure accounts are established to record amounts appropriated or otherwise made available by transfer from a trust fund receipt account to be obligated and expended in carrying out the specific purposes or programs in accordance with the terms of the trust agreement or statute. Funds transferred or appropriated to a trust fund expenditure account are normally available for obligation and expenditure within the limits imposed by the trust agreement or authorizing statute.

3. Trust revolving fund account. A trust revolving fund is a single account that is authorized to be credited with receipts and incur obligations and expenditures in support of a continuing cycle of business-type operations in accordance with the provisions of the trust agreement or statute. Trust revolving fund receipts are available for obligation and expenditure without further action by Congress.

4. Unavailable collections. Are either (1) unappropriated receipts or receipts that are precluded from obligation because of a provision of law, such as a benefit formula or limitation on obligations in PY, CY, or BY1/BY2, or (2) collections unavailable for obligation because of limitations on obligations in PY, CY, or BY1/BY2. Section 36.6 of OMB Circular A-11 provides instructions on MAX Schedule N on unavailable collections for trust funds and O&M special funds which Federal agencies must include in their annual budget submission to OMB.

100103 General

A. In general, DoD trust funds authorized to incur obligations and expend receipts have been exempted from apportionment by OMB. However, the Surcharge Collections, Sales of Commissary Stores, Defense trust revolving fund, and the National Security Education Trust Fund are subject to apportionment by OMB. However, each trust fund must be viewed as a unique fund in light of any special provisions in the trust agreement or the enabling legislation.

B. Trust funds have been assigned account symbols between 8000 and 8999. Within this range trust revolving funds have been assigned symbols between 8400 and 8499. Some trust funds used by DoD are:

- Surcharge Collections, Sales of Commissary Stores, Defense
- National Security Education Trust Fund

C. *The Conventional Ammunition Working Capital Fund ceases operations as a Revolving Fund at the end of FY 1998. This activity will become a direct funded activity under the cognizance of the Single Manager for Conventional Ammunition. The SMCA will provide budget data for this revised organization.*

100104 Submission Requirements

General guidance with regard to submission requirements is presented in the DoD Financial Management Regulation (DOD 7000.14-R), Chapter 1. Chapter 10 covers specific back-up material requirements for the above areas.

100105 Preparation of Material

General guidance with regard to format and preparation of material is presented in the DoD Financial Management Regulation (DOD 7000.14-R), Chapter 1. Chapter 10 provides additional specific guidance with regard to the back-up material required for Public Enterprise, Management Fund and Trust Fund accounts.

100106 References

The DoD Financial Management Regulation (DOD 7000.14-R), Chapter 1 provides funding policies to be adhered to include those that impact other appropriations/accounts. Chapter 9 provides guidance related to Defense Working Capital Funds accounts. Certain exhibits required by this chapter are found in Section 0904 of Chapter 9.

1002 BUDGET ESTIMATES SUBMISSION**100201 Purpose**

A. This section highlights the policies and justification procedures underlying budget formulation for Public Enterprise, Management Fund, and Trust Fund accounts.

100202 Submission Requirements

A. Public Enterprise Funds.

1. The Defense Working Capital Funds (Fund) schedules referenced here are in the DoD Financial Management Regulation (DOD 7000.14-R), Chapter 9. *The O&M type exhibits (PB, OP) are found in Volume 2A, Chapter 3 and Volume 2B, Chapter 19.* Fund budget-type exhibits as noted below should be submitted for the OSD/OMB budget review.

- National Defense Stockpile Transaction Fund
Exhibits Fund-1, 1a, 2, 4, 11, 14, 17, 21, & 23.
- Pentagon Reservation Maintenance Revolving Fund
Exhibits Fund-1, 1a, 2, 3, 7, 9a, 9b, 11, 12, 14, & 23. *OP-8 & 9. PB-22.*
- Building Maintenance Fund
Exhibits Fund-1, 1a, 2, 3, 7, 9a, 9b, 11, 12, 14, & 23. *OP-8 & 9. PB-22.*
- National Defense Sealift Fund (NDSF)
Exhibits Fund-1a, 2, 11, & 12.

2. The instructions and formats for the preparation of the NDSF required procurement and RDT&E exhibits are included in the DoD Financial Management Regulation (DoD 7000.14-R), Chapters 4 and 5, respectively.

Procurement/Ship Acquisition:

- Budget Item Justification Sheet (P-40)
- Weapon System Cost Analysis (P-5)
- Analysis of Ship Cost Estimates (P-8a/8b)
- Advance Procurement Analysis (P-10/10a)
- Ship Production Schedule (P-27)
- Ship Outfitting Costs (P-29)
- Ship Post Delivery Estimates (P-30)

National Defense Features (NDF):

- Budget Item Justification Sheet (P-40)

RDT&E:

- Budget Item Justification Sheet (R-2)
- Program Element/Project Cost Breakdown (R-3)

3. Additional data required by OMB Circular A-11 will be submitted in the fall in accordance with annual DoD Comptroller budget guidance.

B. Management and Trust Funds - For Trust Funds, Trust Revolving Funds and other Management Funds, program and financing, and object classification schedules will be submitted for each account. The budget authority for each trust fund account must agree with the amounts reported against the applicable receipt accounts as required by DoD accounting guidance related to offsetting receipts. The receipt accounts are published in Treasury's Federal Account Symbols and Titles. For the Defense Commissary Agency, a footnote to the program and financing schedule will show the value of the obligations for renovation/construction of commissaries included in total obligations of the trust revolving fund.

C. Special Budget Exhibits - Unique data pertaining to a particular fund are required as follows:

National Defense Stockpile

- Stockpile Financial Status Report (SP-1)

Pentagon Reservation Maintenance Revolving Fund

- Cost of Services (PR-1)
- Summary Statement (PR-2)

Buildings Maintenance Fund

- Cost of Services (PR-1)
- *Summary Statement (PR-2)*

Surcharge Collections, Sales of Commissary Stores, Defense

- Summary (CT-1)
- Facility Programs Justification (CT-2)

National Defense Sealift Fund (NDSF)

Ready Reserve Force (RRF):

- Budget Item Justification Sheet (RRF-1)
- Ship Composition Funding Requirements (RRF-2)
- Ship Readiness Operational Status (ROS) Composition (RRF-3)

D. Budget exhibits will be submitted in accordance with the schedule published annually in DoD Comptroller budget guidance. Formats and instructions for preparation of the Special Exhibits are provided Section 1004.

E. All NDSF related budget justification materials should be submitted directly to the Director for Investment, room 4B917. In addition to the DWCF schedules, procurement, and RDT&E exhibits referenced in paragraph 100202.A above, the special exhibits identified above must be included in the NDSF justification budget backup book for both the OSD and Congressional submissions. The backup book should include a table of contents, a computer generated FYDP funding report identifying each business area, and each business area/section should be tabbed.

1003 CONGRESSIONAL JUSTIFICATION/PRESENTATION**100301 Purpose**

This chapter provides the policies and procedures to guide the development of budget justification and supporting narrative to be submitted by Components to the DoD Comptroller in development of congressional justification material.

100302 Submission Requirements

A. Guidance is applicable to the following DoD Public Enterprise, Management Funds, and Trust Funds:

Public Enterprise Funds

- (1) National Defense Stockpile Transaction Fund
- (2) Buildings Maintenance Fund
- (3) Pentagon Reservation Maintenance Revolving Fund
- (4) National Defense Sealift Fund

Management Funds

- (5) Conventional Ammunition Working Capital Fund
Ceases operations as a Revolving Fund on September 30, 1998.

Trust Funds

- (6) National Security Education Trust Fund
- (7) Surcharge Collections, Sales of Commissary Stores, Defense

B. The table on the following page presents the exhibit requirements to be submitted as part of the President's budget for the Funds identified in paragraph A. above. Additional budget justification material to accompany the President's budget may be prescribed by separate DoD Comptroller budget guidance.

CHAPTER 11
OFFSETTING RECEIPTS
Table of Contents

1101	GENERAL	1
110101	Purpose.....	1
1102	BUDGET ESTIMATES SUBMISSION	1
110201	General Instructions	1
110202	Special Instructions - Receipt account 3041, Recoveries under the Foreign Military Sales Program	2

CHAPTER 11

OFFSETTING RECEIPTS**1101 GENERAL****110101 Purpose**

This chapter prescribes budget justification requirements for offsetting receipts consistent with the provisions of OMB Circular No. A-11.

1102 BUDGET ESTIMATES SUBMISSION**110201 General Instructions**

A. Each Military Department will include offsetting receipts in their annual September initial budget submission. See Volume 2A, Chapter 1, for general guidance on submission requirements.

B. Each Military Department will also submit actual data on receipts in millions of dollars for the prior year and estimated receipts for the current year, biennial budget years 1 and 2, and the outyears. These estimates will include the impact of all known proposed legislation. A copy of the receipts listing in the form of a spreadsheet as of the end of the prior fiscal year will be provided to the Military Departments by OUSD(C). The Military Departments will update these listings (legible, hand-written markup is acceptable) and return them to the Directorate for Program and Financial Control, Office of the Deputy Comptroller (Program/Budget), Room 3B872 for review and, ultimately, input to OMB. Submittal due date will be established by OSD based on certification to the Treasury of actual execution data for the prior fiscal year.

C. If a DoD component proposes legislation which would impact DoD offsetting receipts and such impact is not included in the estimates submitted by the Military Departments, then the DoD component proposing the legislation will submit to OUSD(C) P/B the impact of the proposed legislation for each Treasury receipt account affected.

D. Amounts reported should include all collections credited to the component's receipt accounts, including "F" (clearing) accounts if applicable (e.g., receipt account 3875), and should exclude collections credited to receipt accounts of other DoD components. Receipts will be reported on the basis of collections credited to receipt accounts during the year, plus or minus any adjustments during the year. Amounts for the prior year will agree with receipts reported to Treasury on the Treasury Combined Statement. Only zero (0) estimates are permitted in the current year, biennial years 1 and 2, and the outyears for "F" accounts. For indefinite appropriations of receipts (Wildlife Conservation, Military Reservations; special fund accounts; and trust fund accounts), the amount of estimated collections will be equal to the related estimates of appropriations (budget authority).

E. New entries will be titled in accordance with Treasury's Federal Account Symbols and Titles. Include the 2-digit Treasury agency prefix for each account, but do not include the "F" in clearing-account codes. Enter in the appropriate columns the type of receipt and applicable function and the amounts for each account involved. Proposed legislation will be identified by the addition after the Treasury receipt account symbol of the letter "L" for new legislation.

F. Where the Treasury Department has assigned decimal suffixes to the symbol (e.g., 21-8927.1, etc.), amounts will be reported separately for each suffix.

G. Each receipt account will be identified as to governmental, proprietary, intragovernmental, Federal intrafund, trust intrafund, inter-fund transactions, etc., as specified in OMB Circular A-11.

H. Receipts data is required for DoD-Military as well as DoD-Civil accounts.

110202 Special Instructions - Receipt account 3041, Recoveries under the Foreign Military Sales Program

Additional detail is required for this account, subdivided into the following categories for PY, CY, BY, BY+1, and the outyears:

1. Nonrecurring RDT&E and production costs and royalty fee collections;
2. Sale of principal/major items from stock which do not require replacement;
3. Sale of excess stock fund and procurement secondary items from stock;
4. Charges for the use of DoD assets (including asset use charges or contractor rental payments); and
5. Charges for unfunded civilian retirement costs.

CHAPTER 12
DEFENSE HEALTH PROGRAM

1201 GENERAL**120101 Purpose**

A. This chapter provides instructions applicable to budget formulation and congressional justification for the Defense Health Program.

B. The following appropriations are covered as subsections of the Defense Health Program appropriation:

- Operation and Maintenance
- Procurement

120102 Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 12 covers specific backup material requirements for the above accounts. The ASD(HA) should also consult all of the other chapters of this regulation for exhibit requirements that are not specifically addressed in this chapter including Chapter 19 - Special Analyses. The ASD(HA) is also responsible for providing data to update the Budget Review System (BRS) and the Future Years Defense Plan (FYDP) automated systems for the Defense Health Program appropriation. The Military Components must submit any proposed military and civilian medical end strength changes to the BRS and FYDP through Health Affairs -- *TRICARE Management Activity (Resource Management)*.

120103 Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 12 provides additional specific guidance with regard to the back-up material required for the Defense Health Program.

120104 References

Chapter 3 provides guidance related to Operation and Maintenance costs and Chapter 4 provides guidance and formats related to Procurement appropriations.

1202 BUDGET ESTIMATES SUBMISSION**120201 Purpose**

This Section provides guidance for preparation and submission of budget estimates for the Defense Health Program. The budget estimates consist of all operation and maintenance and procurement resources that support the medical activities that were consolidated into the Defense Health Program.

120202 Submission Requirements

A. The Assistance Secretary of Defense (Health Affairs) is responsible for submitting all exhibits required for the operation and maintenance and procurement appropriations as specified in Chapters 3 and 4, respectively. *The Assistant Secretary of Defense (Health Affairs) is also responsible for submitting exhibit requirements specified in the other chapters of this regulation including Chapter 19 – Special Analyses.*

B. In addition, the Cost of Medical Activities Exhibit (PB-11, PB-11A, PB-11B) will be prepared and submitted to the Office of the USD(Comptroller). Formats for these exhibits are provided at the end of this Chapter. Two copies of each exhibit should be provided to Office of the USD(C) P/B Operations and Personnel Directorate, Room 3D868, the Pentagon.

1203 CONGRESSIONAL JUSTIFICATION/PRESENTATION**120301 Purpose**

A. This Section presents the exhibit requirements for submission to Congress. Examples of budget exhibits can be found in Section 1204.

120302 Submission Requirements

A. The Assistant Secretary of Defense (Health Affairs) is responsible for submitting all exhibits required for the operation and maintenance and procurement appropriations as specified in Chapters 3 and 4, respectively. *The Assistant Secretary of Defense (Health Affairs) is also responsible for submitting exhibit requirements specified in the other chapters of this regulation including Chapter 19 – Special Analyses.*

B. In addition, the cost of Medical Activities Exhibit (PB-11, PB-11A, PB-11B) will be prepared and submitted to the Office of the Under Secretary of Defense (Comptroller) (USD(C)). Formats for these exhibits are provided at the end of this Chapter. Two copies of each exhibit are provided at the end of this Chapter. Two copies of each exhibit should be provided to the OUSD (C) , Program/Budget, Operations and Personnel Directorate, Room 3D868, the Pentagon.

C. Two Copies of the PBA-9 (Medical Programs Exhibit for the O&M Overview) will be due to the OUSD(C), Program/Budget, Operations and Personnel Directorate at the time that the President's budget exhibits are due. The required format for the PBA-9 is provided at Chapter 3, Section 0304.

D. The OP-5 exhibit and other supporting exhibits will be prepared for each of the following activities. Meaningful performance criteria should be displayed for each activity.

- *In-House Care*
- *Private Sector Care*
- *Consolidated Health Support*
- *Information Management*
- *Management Activities*
- *Education and Training*
- *Base Operations/Communications*

1204 DEFENSE HEALTH PROGRAM SUBMISSION FORMATS**120401 Purpose**

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, the formats should be followed.

CHAPTER 13

DEFENSE ENVIRONMENTAL RESTORATION**1301 GENERAL****130101 Purpose**

A. This chapter provides instructions applicable to budget formulation and congressional justification for the Defense Environmental Restoration Program. The National program to manage hazardous wastes and cleanup old hazardous wastes extends to the Department of Defense. The Congress is interested in assuring that the DoD Program is complying with all the requirements levied by the Resource Conservation and Recovery Act (RCRA), the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and the Superfund Amendments and Reauthorization Act (SARA) legislation. This Chapter provides the funding data necessary to respond to congressional concerns.

B. The appropriations that finance the Defense Environmental Restoration Program include the following subsections:

- Operation and Maintenance
- Procurement
- Research, Development, Test, and Evaluation (RDT&E)
- Military Construction

130102 Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 13 covers specific backup material requirements for the Defense Environmental Restoration Program. The Deputy Under Secretary of Defense, Environmental Security (DUSD(ES)) of the USD(A&T) is responsible for all submission requirements for this program.

130103 Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 13 provides additional specific guidance with regard to the back-up material required for the Defense Environmental Restoration Program.

130104 References

Chapter 1 provides general funding policies, Chapter 3 provides specific policies related to Operation and Maintenance costs, Chapter 4 provides specific policies related to Procurement appropriations, Chapter 5 provides specific policies related to RDT&E funding, and Chapter 6 provides specific policies related to Military Construction appropriations.

130105 Definitions

A. Installation Restoration Program (IRP). This subelement is a comprehensive program to identify, investigate, and cleanup contamination from hazardous substances and wastes resulting from past DoD activities on active installations and formerly-used DoD lands. This includes requirements incident to remedial action, both on-installation and off-installation (e.g., provision of permanent alternate potable water supplies to communities affected by groundwater contamination that resulted from DoD activity). Actions under this element may include:

1. Investigations to identify, confirm and quantify contamination; feasibility studies; remedial action plans and designs; and remedial or removal actions.
2. Research, development and technology demonstrations necessary to conduct cleanups.
3. Expenses associated with cooperative multi-party cleanup plans and activities.
4. Remedial actions to protect or restore natural resources damaged by contamination from past hazardous waste disposal activities.
5. Cleanup of low-level radioactive waste sites which meet the criteria of the CERCLA, as amended.
6. *Remedial action construction costs.*
7. *Remedial action operations costs.*
8. *Costs of long-term monitoring.*
9. Immediate actions necessary to address health and safety concerns such as providing alternate water supplies or treatment of contaminated drinking water, when the hazard results from a release from DoD property.
10. CERCLA assessments necessary prior to excessing real property assets.
11. Proportion of RCRA permit preparation associated with solid waste management units which would meet the definition of a past disposal site under CERCLA, as amended.
12. *Management expenses associated with IRP, including civilian salaries.*

B. Building Demolition and Debris Removal Program (BD/DR). This subelement applies to both active installations and formerly-used DoD lands. The purpose of this subelement is to plan and execute a comprehensive program to demolish and remove unsafe buildings and structures. Expenses incident to complete restoration, such as restoration of natural resources are included if such expenses are clearly and directly related to the demolition and debris removal. Demolition that is required as part of a new construction project is excluded. Actions under this element may include:

1. The demolition of buildings or the removal of debris that constitute a safety hazard on active installations.
2. The demolition of buildings or the removal of debris which constitute a safety hazard on lands formerly-used by the Department of Defense, provided such lands were transferred to state or local governments or native corporations.

C. Other Hazardous Waste (OHW). *This subelement is intended primarily to capture DoD clearance and cleanup requirements for Unexploded Ordnance (UXO). Currently, only the Formerly-Used Defense Sites program budgets for these type requirements within its Environmental Restoration account. As the Department incorporates recent policy changes to require the Components to program and budget for UXO cleanup at closed, transferring, and transferred ranges in the United States and its territories, the OHW subelement will be used by all Components participating in the Environmental Restoration Program, including FUDS, beginning with the FY 2001 budget estimate submission in September 1999. This does not include cleanup of active and inactive ranges at active installations.*

1302 BUDGET ESTIMATES SUBMISSION**130201 Purpose**

This Section provides guidance for preparation and submission of budget estimates for the Defense Environmental Restoration Program. The budget estimates consist of all operation and maintenance, procurement, RDT&E, and Military Construction resources that support the Defense Environmental Restoration Program. The Components should consult all of the other Chapters for exhibit requirements that are not specifically addressed in this Chapter including Chapter 19, Other Special Analyses.

130202 Submission Requirements

A. Based on the Department's decision to devolve the centralized Environmental Restoration, Defense (ER,D) appropriation, the Military Departments and applicable Defense Agencies shall incorporate separate narrative justification material for their respective programs and the Environmental Restoration Exhibits (ENV 30a-30e) in their Budget Estimates Submission. The DUSD (Environmental Security) is responsible for consolidating the Defense Agency budget submissions and for preparing the ENV 30a-30e exhibits for the Formerly-Used Defense Sites (FUDS). The diskette of installation level detail required by the DUSD(ES) should be forwarded together with the Components' justification material to the OUSD (C) P/B Operations and Personnel Directorate, Room 3D868, Pentagon.

B. The Components and DUSD(ES) are also responsible for providing data to update the Budget Review System (BRS) and the Future Year Defense Plan (FYDP) automated systems for the various Environmental Restoration appropriations as identified in Chapter 1 *and for updating the OP-32 exhibit (Summary of Price and Program Change) identified in Chapter 3.*

C. In addition to submitting the above items, the DUSD(ES) is responsible for establishing policy for the Defense Environmental Restoration Program.

1303 CONGRESSIONAL JUSTIFICATION/PRESENTATION**130301 Purpose**

This Section presents the exhibit requirement for submission to the Congress.

130302 Submission Requirements

A. Based on the Department's decision to devolve the centralized Environmental Restoration, Defense (ER,D) appropriation, the Military Departments and applicable Defense Agencies shall incorporate separate narrative justification material for their respective programs and Environmental Restoration Exhibits (ENV 30a-30c) in their O&M justification books, Volume II. *Environmental Restoration Exhibits (ENV 30d-e) should be submitted separately to the DUSD (Environmental Security).* The DUSD (Environmental Security) is responsible for consolidating the congressional justification material for the Defense Agencies and for preparing the ENV 30a-30e exhibits for the Formerly-Used Defense Sites (FUDS).

B. The diskette of installation level detail required by the DUSD(ES) should be forwarded together with the Components' justification material to the OUSD (Comptroller) P/B Operations and Personnel Directorate, Room 3D868, Pentagon. Copy requirements are identified in Chapter 1.

C. Examples of budget exhibits can be found in Section 1304.

1304 DEFENSE ENVIRONMENTAL RESTORATION PROGRAM SUBMISSION FORMATS**130401 Purpose**

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to. *Formats should be titled as “Budget Estimates” for the fall budget estimate submission and as “President’s Budget” for the final budget submission due the following February.*

CHAPTER 14

DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES**1401 GENERAL****140101 Purpose**

A. This chapter provides instructions applicable to budget formulation and congressional justification for Drug Interdiction and Counter-drug Activities.

B. The following accounts are covered as subsections of the Drug Interdiction and Counter-drug Activities, Defense appropriation:

- Military Personnel
- Operation and Maintenance
- Procurement
- Research, Development, Test, and Evaluation (RDT&E)
- Military Construction

140102 Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 14 covers specific backup material requirements for the Drug Interdiction and Counter-drug Activities program. The Coordinator for Drug Enforcement Policy and Support (CDEP&S) is responsible for all submission requirements for this program. The Components are responsible for providing all needed input to CDEP&S consistent with the submission requirements and due dates established by CDEP&S.

140103 Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 14 provides additional specific guidance with regard to the back-up materials required for the Drug Interdiction and Counter-drug Activities program.

140104 References

Chapter 1 provides general funding policies. Chapter 2 provides specific policies and formats for the Military Personnel appropriations. Chapter 3 provides specific policies and formats related to Operation and Maintenance costs. Chapter 4 provides specific policies and formats related to Procurement appropriations. Chapter 5 provides specific policies and formats related to RDT&E funding. Chapter 6 provides specific policies and formats related to Military Construction appropriations. Chapter 16 provides specific instructions applicable to budget formulation, implementation, and congressional justification for intelligence program aggregations, and is applicable to the Defense Intelligence Counterdrug Program (DICP) of the Joint Military Intelligence Program (JDMIP) aggregation.

1402 BUDGET ESTIMATES SUBMISSION**140201 Purpose**

This Section provides guidance for preparation and submission of budget estimates for the Drug Interdiction and Counter-drug Activities program. The budget estimates consist of all military personnel, operation and maintenance, procurement, RDT&E, and Military Construction resources that support the Drug Interdiction and Counter-drug Activities Program.

140202 Submission Requirements

A. The Coordinator for Drug Enforcement Policy and Support (CDEP&S) is responsible for submitting all exhibits required supporting military personnel, operation and maintenance, procurement, RDT&E, and Military Construction requirements as specified in this Chapter to the OUSD(C) Operations and Personnel Directorate, Room 3D868 for the OSD budget submission. This includes the various exhibits for the Drug Interdiction and Counter-drug Activities program found in Section 1404, as well as other exhibits identified below but contained in Chapters 2 through 6 and the Program and Financing (P&F) Schedule requirements identified in Chapter 1. The CDEP&S is also responsible for providing data to update the Budget Review System (BRS) and the Future Years Defense Plan (FYDP) automated systems for the Drug Interdiction and Counter-drug Activities appropriation as identified in Chapter 1. *The CDEP&S should check all of the chapters of this regulation for exhibit requirements, especially Chapter 19 – Special Analyses.*

B. The DoD counternarcotics program will be financed in a central transfer appropriation (CTA). However, the OSD submission will reflect the actual or planned distribution of counternarcotics funds by appropriation. The following exhibits are required for the OSD submission. *In addition, the CDEP&S will provide the OUSD(C) Operations and Personnel Directorate with copies of procurement and RDT&E budget exhibits for programs funded in the prior year in the Military Departments' budget that were financed with CTA funds.*

Drug Interdiction and Counter-drug Activities Unique Exhibits:

PB-43 Drug Interdiction and Counter-drug Activities by Appropriation by Goal (Chapter 14)

PB-44 Drug Interdiction and Counter-drug Appropriation Summary (Chapter 14)

PB-45 Drug Interdiction and Counter-drug Summary by Project Listing by Fiscal Year (Chapter 14)

PB-47 Drug Interdiction and Counter-drug Detailed Project Description (Chapter 14)

Operation and Maintenance Exhibits:

OP-32 Summary of Price and Program Changes (Chapter 3) (automated submission also required)

Military Construction Exhibits:

DD 1390 Military Construction Program (Chapter 6)

DD 1391 Military Construction Project (Chapter 6)

Procurement Exhibits:

P-1 Procurement Programs (Chapter 4)

Research, Development, Test & Evaluation Exhibits:

R-1 RDT&E Programs (Chapter 5)

1403 CONGRESSIONAL JUSTIFICATION/PRESENTATION**140301 Purpose**

This Section presents the exhibit requirement for submission to Congress.

140302 Submission Requirements

The Coordinator for Drug Enforcement Policy and Support (CDEP&S) is required to include the following exhibits in the justification book(s) to Congress. Copy requirements are identified in Chapter 1. Examples of budget exhibits can be found in Section 1404 or as identified below:

- PB-43 Drug Interdiction and Counter-drug Activities by Appropriation by Goal (Chapter 14)
- PB-44 Drug Interdiction and Counter-drug Appropriation Summary (Chapter 14)
- PB-47 Drug Interdiction and Counter-drug Detailed Project Description (Chapter 14)
- OP-32 Summary of Price and Program Changes (Chapter 3) (automated submission also required)
- DD 1390 Military Construction Program (Chapter 6)
- DD 1391 Military Construction Project Data (Chapter 6)

1404 DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES SUBMISSION FORMATS**140401 Purpose**

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

CHAPTER 15

OVERSEAS COST REPORT**1501 GENERAL****150101 Purpose**

A. This chapter provides instructions applicable to congressional justification material for the Overseas Cost Report *which consists of the OP-53 Exhibit (Overseas Funding) and the OP-53A (Basing Costs)*.

B. The following appropriations and accounts are covered in the scope of the subsections of the Overseas Cost Report:

Section
150301

- Military Personnel appropriations (including Reserves and National Guard)
- Operation and Maintenance appropriations
- Family Housing Construction and Family Housing Operations appropriations
- Military Construction appropriations

150102 Submission Requirements

Chapter 1 provides the general guidance about submission requirements for justification material. Chapter 15 covers specific material requirements for the Overseas Cost Report.

150103 Preparation of Material

Chapter 1 stipulates the general guidance concerning format and preparation of material. Chapter 15 provides additional specific guidance with regard to the material required for the Overseas Cost Report.

150104 References

Chapter 1 provides general funding policies, Chapter 2 provides specific policies related to Military Personnel appropriations, Chapter 3 provides specific policies related to Operation and Maintenance costs, and Chapter 6 provides specific policies and formats related to Military Construction and Family Housing appropriations.

1502 BUDGET ESTIMATES SUBMISSION

150201 General

At this time there is no budget estimate submission requirement.

1503 CONGRESSIONAL JUSTIFICATION/PRESENTATION**150301 Purpose**

This Section presents the exhibit requirement for submission to Congress and formats for the Overseas Cost report. Section 8125 of the FY 1989 DoD Appropriations Act (P.L. 100-463) requires that the Department of Defense separately identify the amounts necessary for payment of all personnel, operations, maintenance, facilities, and support costs for all DoD overseas military units and the costs of supporting all dependents who accompany DoD personnel outside the United States.

150302 Submission Requirements

A. The Overseas Cost Report consists of the OP-53 exhibit (Overseas Funding) and the *OP-53A exhibit (Basing Costs)*. Chapter 1 contains general guidance on congressional justification material. The exhibits will include a biennial budget year 2 (FY BY2) column or section as shown in Section 1504 for all submissions in support of a biennial budget. Alternate year budget submissions will exclude the FY BY2 column or section.

B. The OP-53 addresses all funding and personnel resources related to overseas activities as defined below. *The OP-53A displays basing costs.*

C. Provide these exhibits to OUSD(C) P/B, Operations and Personnel Directorate, Room 3D868, the Pentagon.

D. The Military Departments will report all military personnel permanently assigned overseas and associated costs to include those assigned to Defense Agencies. Input must be identified to those countries listed later in this Chapter. Therefore, the Defense Agencies should not report data citing military personnel appropriations or line items.

150303 Definitions

The following definitions pertain to the costs to be included in Military Department and Defense Agency input:

A. Overseas costs will include amounts only from the following appropriations: military personnel; operation and maintenance; family housing operation and maintenance; family housing construction; and military construction.

B. Overseas amounts include the appropriated support of all DoD activities located outside the United States that are being performed on a permanent basis.

C. Overseas amounts also include the cost of transporting personnel, material, and equipment to and from overseas locations.

D. The United States includes all 50 states, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

E. Military and civilian personnel amounts will be based on the number of personnel assigned to permanent duty ashore outside the United States. Accordingly, personnel on temporary duty outside the United States are not included in the overseas amounts. Because personnel assigned to the deployed fleet are excluded from overseas troop strengths, amounts for deployed steaming days are not included.

F. Generally, funding for DoD activities in the United States in support of overseas activities is excluded. For example, overseas amounts exclude the funding of depot maintenance performed in the United States

on components/aircraft used by an overseas unit. Similarly, flight/specialized training that is conducted in the United States would be excluded.

G. Basing costs include overseas Defense funding in the following areas:

- (1) Family Housing Operations and Construction (All)
- (2) Military Construction (All)
- (3) Base Operating Support (All)
- (4) Real Property Management (All)
- (5) Base Communications (All)
- (6) Real Estate Management (All)
- (7) Environmental Activities (All)

1504 OVERSEAS COST REPORT SUBMISSION FORMATS**150401 Purpose**

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

CHAPTER 16

INTELLIGENCE PROGRAM/ACTIVITIES**1601 GENERAL****160101 Purpose**

A. This chapter provides instructions applicable to budget formulation, implementation, and congressional justification for Intelligence Program Aggregations.

B. The following Program Aggregations are covered in this Chapter:

- *National Foreign Intelligence Program (NFIP) – Defense elements*
- *Joint Military Intelligence Program (JMIP)*
- *Tactical Intelligence and Related Activities (TIARA)*

160102 Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 16 covers specific material requirements for the NFIP, JMIP and TIARA.

160103 Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 16 provides additional specific guidance with regard to the material required for the Intelligence Program Aggregations.

160104 References

The Office of the Director for Program Analysis and Evaluation maintains a listing of program elements (PEs) in the Future Years Defense Program (FYDP) making up certain intelligence programs. For details, please contact the POC for the FYDP Structure Management (FSM) system. The FSM system and its Web site are described in FMR Volume 2A, Section 010702.

160105 Definitions and Classification

General guidance with regard to classification of budget material is presented in Chapter 1. Chapter 16 provides additional specific guidance with regard to the material required for the Intelligence Program Aggregations.

A. *National Foreign Intelligence Program (NFIP).*

The NFIP provides integrated intelligence that covers broad aspects of national policy and national security. The portion of the NFIP contained in the DoD Budget contributes substantially to meeting Defense intelligence requirements, but also contains programs/activities in support of elements of the US Government outside the DoD.

B. *Joint Military Intelligence Program (JMIP).*

The JMIP funds joint, defense-wide activities and programs that provide intelligence information and support to multiple Defense components.

C. *Tactical Intelligence and Related Activities (TIARA).*

TIARA encompasses those programs/activities outside the NFIP and JMIP that: 1) respond to operational commanders' tasking for time sensitive information on foreign entities; 2) respond to national intelligence community tasking of systems whose primary mission is support to operating forces; 3) train personnel for intelligence duties; 4) provide an intelligence reserve; or 5) are devoted to research and development of intelligence or related capabilities. Specifically excluded are programs which are so closely integrated with a weapon system that their primary function is to provide immediate-use targeting data. TIARA programs/activities are funded as part of normal Service budget development, and as a result are often embedded in larger force structure or weapon system budget lines.

D. *Classification. Classification of US Intelligence budget information is determined by the Director of Central Intelligence (DCI) pursuant to Executive Order 12958, Section 1.5(c), Executive Order 12333, Section 1.5(g), and the DCI's authorities under the National Security Act of 1947.*

1. NFIP Budget Resource Information:

- a. Unless other specific NFIP program guidance in effect requires a higher classification
- b. Information which, standing alone or in aggregate, reveals any Program Element total of the funding or manpower requirements of any program in the NFIP will be classified SECRET.
- c. Information which permits the disclosure of any Program Element total or the funding or manpower requirements of any program in the NFIP, for example, through a subtractive process, will be classified SECRET.
- d. Information which, standing alone or in aggregate, reveals overall DoD Component funding or manpower levels of the NFIP or its programs will be classified SECRET.
- e. Whenever NFIP funding and manpower resource detail is combined with other unclassified programs in such a way as to effectively mask the NFIP resource Program Element total, such combined resource Program Element total may be treated as unclassified.
- f. Documents containing NFIP resource detail that is classified on the basis of this guidance shall be marked, for example:

CLASSIFIED BY DCI memo on 22 Dec 96
DECLASSIFY ON OADR

g. Requests for clarification of the foregoing classification guidance should be forwarded to ASD(C3I). Questions of application will be coordinated with the Intelligence Community Management Staff and responses will be disseminated to all interested DoD components.

2. Joint Military Intelligence Program information

- a. Total funding for JMIP is SECRET.
- b. Total funding for JMIP sub-programs and Program Elements may be classified or unclassified according to content, unless disclosure of such a total would allow derivation of classified totals.

3. Tactical Intelligence and Related Activities.

- a. Total funding of this program aggregation is SECRET.

b. Individual Program Elements and line items may classified or unclassified according to content, unless disclosure of such a total would allow derivation of classified totals.

1602 BUDGET ESTIMATES SUBMISSION**160201 Purpose**

This Section provides guidance for presentation of annual budget estimates for the JMIP, TIARA, and Defense elements of the *NFIP*.

160202 NFIP Submission Requirements

A. The NFIP manpower and resource levels submitted in the budget for the Military Departments and Defense Agencies shall be identical to the manpower and resource levels included in BES FYDP *and should be identified as Budget Subactivities 330-336 as shown in section 160202 C*. Any PBDs other than 330 through 339 affecting elements of the NFIP must be coordinated with the Director for Construction. The approved resource levels will include all pay raises, inflation, and any other fact-of-life or miscellaneous adjustments.

B. When developing *NFIP* Military *personnel* cost estimates for the budget submission, the Components will apply the most current pay and PCS rates for military personnel consistent with DoD policy for manpower pricing. If applying the correct pricing causes the program to differ from fiscal guidance for that program, an undistributed wedge, either plus or minus, will be identified against program element 0305180D.

C. Data submitted by each Military Department and Defense Agency to OSD will be assembled and submitted in separate packages as follows:

1. Consolidated Cryptologic Program (CCP) – BSA 330
2. General Defense Intelligence Program (GDIP) – BSA 331
3. *National Reconnaissance Program (NRP) – BSA 333*
4. Special Activities, Navy (SA/N) – BSA 332
5. *National, Selected, Federal Activities (NSFA) – BSA 334*
6. Foreign Counterintelligence Program (FCIP) – BSA 335
7. *National Imagery and Mapping Agency Program (NIMAP) – BSA 336*

D. Copies of *NFIP* budget materials prescribed by the Director of Central Intelligence (DCI) will be delivered by each *Program Manager* to the Under Secretary of Defense (Comptroller) (Program/Budget), Directorate for Construction, Room 3D841, Pentagon, concurrent with submission to the DCI. *Copies should also be provided to the Director, Program Analysis and Evaluation, and the Assistant Secretary of Defense, Command and Control, Communications and Intelligence ASD (C³I)*. For the Consolidated Cryptologic Program, two copies should also be made available for OSD use at NSA Fort Meade (N22). Copy requirements are identified in Section 010301.

160203 JMIP Submission Requirements

JMIP Programs/Activities are contained in budget materials developed in accordance with guidance contained in Chapters 1 through 7. Chapter 16 includes additional specific guidance with regard to the material required.

A. *In order to maintain the C³ISR data base, each Military Department and Defense Agency contributing to the JMIP will report BES data to the ASD(C³I) in intelligence project code (PC) detail*

simultaneously with their BES input to USD(C). In accordance with Section 1605, the OASD(C³I) will maintain this data and make it available to other elements of OSD/JCS as required.

B. Data submitted by each Component to OSD in support of JMIP program estimates will include all manpower and resource requirements consistent with the FYDP and will be assembled and submitted in separate packages as follows:

- 1. Defense Airborne Reconnaissance Program (DARP)*
- 2. Defense Cryptologic Program (DCP)*
- 3. Defense Imagery and Mapping Program (DIMAP)*
- 4. Defense Intelligence Special Technology Program (DISTP)*
- 5. Defense Intelligence Counterdrug Program (DICP)*
- 6. Defense Intelligence Tactical Program (DITP)*
- 7. Defense Space Reconnaissance Program (DSRP)*

C. Copies of supplementary JMIP budget materials will be delivered to the ASD(C³I), Room 3C200, Pentagon and the Directorate for Construction, USD (Compt) (Program/Budget), Room 3D841, Pentagon.

160204 TIARA Submission Requirements

TIARA Programs/Activities are contained in Budget materials developed in accordance with guidance contained in Chapters 1 through 7. Additionally, in order to maintain the C³ISR database, an electronic file of all applicable Budget Line Items sorted by Program Element will be provided the ASD(C³I) simultaneously with the BES. In accordance with section 1605, the OASD(C³I) will maintain this data and make it available to other elements of OSD/JCS as required.

1603 CONGRESSIONAL JUSTIFICATION/PRESENTATION**160301 Purpose**

This Section provides guidance for the organization of justification material for the National Foreign Intelligence Program, Joint Military Intelligence Program, and Tactical Intelligence and Related Activities.

160302 Organization of Justification Books

A. National Foreign Intelligence Program (NFIP). Congressional Budget Justification Books will be prepared in accordance with instructions issued by the Director of Central Intelligence. Generally, justification material for the defense elements of the NFIP will be organized as follows:

"Consolidated Cryptologic Program"

"General Defense Intelligence Program"

"*National Reconnaissance Program*"

"Special Activities, Navy"

"*National, Selected, Federal Activities*"

"Foreign Counterintelligence Program"

"*National Imagery and Mapping Agency Program*"

B. Joint Military Intelligence Program (JMIP). The Congressional Justification Book for JMIP will be prepared in accordance with supplemental instructions issued by the Assistant Secretary of Defense (C³I). *It will consist of sections on each of the major sub-programs (Defense Cryptologic Program, Defense General Intelligence and Applications Program, and Defense Imagery and Mapping Program).*

C. Tactical Intelligence and Related Activities (TIARA). Congressional Justification Books for TIARA will be prepared in accordance with supplemental instructions issued by the Assistant Secretary of Defense (C³I). *It will consist of separate chapters for each TIARA component, such as Army TIARA, Navy TIARA, Air Force TIARA, Marine Corps TIARA, and SOCOM TIARA.*

D. A summary Volume of JMIP and TIARA will be prepared by ASD(C³I).

160303 Classification and Submission of Justification Books

A. Classification. The justification books for Intelligence Program Aggregations will be prepared at whatever level of classification is necessary to fully explain and justify the budget.

B. Justification Book Preparation and Summarization. Justification book preparation assignments for the Defense portions of the National Foreign Intelligence Program (NFIP) are as follows:

1. Consolidated Cryptologic Program – National Security Agency (NSA) with Department of the Army, Department of the Navy, and Department of the Air Force.

2. General Defense Intelligence Program (GDIP) – Defense Intelligence Agency (DIA) with Department of the Army, Department of the Navy, and Department of the Air Force.

3. *National Reconnaissance Program – National Reconnaissance Organization (NRO)*
4. *Navy Special Activities – Navy*
5. *National, Selected, Federal Activities (NSFA) -- NSFA*
6. *Foreign Counterintelligence Program (FCIP) - ASD(C³I), with Army, Navy, Air Force, DTRTCA, DIA, and DSS.*
7. *National Imagery and Mapping Program - NIMA with Army, Navy, Marine Corps, and Air Force*

C. Printing of Copies.

1. NFIP. Number of copies required, printing specifications, distribution, and delivery of Justification books will be as specified by the Director of Central Intelligence.
2. JMIP. Number of copies required and printing specifications for Justification books will be in accordance with supplemental instructions issued by the Assistant Secretary of Defense (C³I).
3. Tactical Intelligence and Related Activities. Number of copies required and printing specifications for Justification books will be in accordance with supplemental instructions issued by the Assistant Secretary of Defense (C³I).

160304 Relationship of Intelligence Congressional Justification Books with Military Department and Defense Agency Justification Books

- A. *The NFIP justification books are developed in accordance with the direction and responsibilities assigned to the DCI by E.O. 12333.*
- B. *JMIP and TIARA justification books are supplements to the material contained in Defense appropriation justification documents. They display budget information in a programmatic context and at a classification level that facilitates congressional oversight.*
- C. *A cross reference listing of R-1, P-1, C-1 line items will be incorporated into the NFIP, JMIP, and TIARA justification books to facilitate cross-referencing to the Defense appropriations. The crosswalk format is in section 160602.*
- D. *Services and Defense Agencies identified in Sections 160203 and 160204 will provide an electronic file of Budget Line Items as required to maintain Automated C³ISR data base to the ASD(C³I) to support development of the JMIP and TIARA Congressional Justification Books. This data should be submitted as soon as possible after the completion of Program Budget Decisions, but not later than submission of the President's Budget FYDP update. The OASD(C³I) will maintain this data and provide it to other elements of OSD/JCS as required. To ensure consistency between the JMIP and TIARA justification book and Military Department and Defense Agency justification material, an advance copy of Component generated related budget exhibits should be provided to the Office of the ASD(C³I) Resource Management Directorate at the same time advance copies are provided to the OUSD(Comptroller) for review.*

1604 APPEAL PROCESS ON CONGRESSIONAL ACTIONS**160401 Purpose**

This Section provides specific guidance for preparation of classified appeals to congressional committees on intelligence programs.

160402 Classified Appeals.

A. Actions of Congressional committees documented in classified annexes relating to NFIP, JMIP or TIARA (such as by the Intelligence Committees) to reports or classified letters may be addressed in Classified Appeals prepared by the ASD(C³I) and coordinated with the Community Management Staff of the Director of Central Intelligence. Classified Appeals may also supplement actions included in the overall Defense Appeal where security considerations have dictated a less than complete justification. Classified Appeals will be prepared at whatever level of classification is necessary to fully explain and justify the action.

B. The Classified Appeal may be in the form of a letter, or in the form of an appeals package consisting of multiple items. In the latter case, appeal input will be submitted in the general format of PB-39-A1 or A2.

C. Classified Appeals will be completely consistent with the Secretary of Defense's policy direction as articulated by the USD(Comptroller). All such appeals will be coordinated with the Comptroller prior to release.

1605 AUTOMATION REQUIREMENTS**160501 Purpose**

This Section provides specific automation requirements guidance for submission of intelligence resources to OASD(C³I).

160502 Automated Command, Control, Communications, Intelligence, Surveillance and Reconnaissance (C³ISR) Database

A. *Purpose and Objectives. The C³ISR database is the only complete, automated source of resource data for Command, Control, Communications, Intelligence and related activities for use by the Office of the Secretary of Defense and the Joint Staff. For a variety of reasons, the FYDP structure (and to a lesser extent Budget structure) is not capable of identifying fully C³ISR costs. As a result, the ASD(C³I) maintains a hybrid database that integrates both budget and program resource detail organized by program/project/activity and functional categories, among other things. Included are budget lines and Program Elements dedicated to C³ISR, as well as portions of similar data elements dedicated to other activities but which also include C³ISR funding. The C³ISR database is essential to the preparation of the Intelligence and C³ Justification Books required by Section 0104. It facilitates functional analyses for OSD and the Joint staff, and is fully compatible with the NFIP resource database used by the Director of Central Intelligence.*

B. *Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, and the Defense Agencies (hereafter referred to as Components) that fund Command, Control, Communications, Intelligence and related activities.*

C. *Reporting Requirements. Updates are required coincident with submission of the (1) Program Objective Memorandum, (2) Budget Estimate Submission, and (3) President's Budget.*

D. *Related Databases. Data in the C³ISR database is fully consistent with data contained in the FYDP, R&D and Procurement Annexes, and Biennial Budget databases, and is electronically matched to relevant data in these databases prior to use.*

E. *Instructions – C³ISR Data Update.*

1. *General. An electronic file of budget line items, sorted by Appropriation and Program Element will be submitted by Components to OASD(C³I) via on line electronic data transfer or floppy disk as appropriate. Since this is an iterative process, each update will consist of those budget lines and Program Elements included in the previous update, plus any new data identified by either OASD(C³I) or Component as appropriate.*

2. *Technical. Data will be formatted as ASCII, comma delimited files (or if this is impracticable in a spreadsheet) and consist of the following elements:*

a. *Dollars: RIC/Appn; budget activity; line item code (R&D project number or procurement line number); Program Element; PY; CY; BY1 (and BY2 when appropriate); BY+1; BY+2; BY+3; and BY+4.*

b. *Manpower: RIC/Appn; Category; Program Element; PY; CY; BY1 (and BY2 when appropriate); BY+1; BY+2; BY+3; and BY+4.*

(1) *New or changed titles/labels for data elements (e.g. line items, Program Elements, etc.) should be included separately, but as part of the Update*

1606 INTELLIGENCE PROGRAM/ACTIVITIES SUBMISSION FORMATS

160601 Purpose The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

CHAPTER 17

COMMAND, CONTROL AND COMMUNICATIONS

1701 GENERAL

170101 Purpose

This chapter provides instructions applicable to congressional budget justification and supporting budgetary material for Command, Control and Communications (C³) programs, the Defense-wide Information Assurance Program (DIAP), and its largest component, the Information Systems Security Program (ISSP).

170102 Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 17 covers specific requirements for the Command, Control and Communications (C³) programs and the Defense-wide Information Assurance Program (DIAP), and the Information Systems Security Program (ISSP).

170103 Composition and Content of Command, Control and Communications (C³) Programs/Activities.

A. *The C³ program aggregation includes communications, warning, command and control, and information systems necessary for military decision-making, force management, and related activities. C³ Programs and Activities are comprised of operations, personnel, training and supporting systems and processes that are essential for achieving dominant battlespace awareness and for exercising decisive command. C³ capabilities are further defined when identifying pertinent budget lines and funding levels*

(1) *Command and Control (C²). The facilities, systems and manpower essential to a commander for planning, directing, coordinating and controlling operations of assigned forces. C² capabilities cover the National Command authority, through the joint/tactical operations echelon and down to front line tactical elements.*

(2) *Communications. Communications are an integral element of C², but are sufficiently distinct and sizable to warrant separate treatment. The DoD Budget funds programs/activities that provide the ability to convey information of many kinds from one person or place to another by visual, cable, radio or other electromagnetic systems. Communications capabilities include: a fixed plant, sustaining base infrastructure in the US and selected overseas locations; long haul transmissions via Defense-owned or leased terrestrial facilities; deployable transmissions via satellite or other radio systems; and mobile, tactical transmission systems that allow war fighters to exchange information while on the move wherever they might be located.*

(3) *C³ Related Activities. Although not explicitly covered by the definitions of Command and Control or Communications, there are a number of programs and activities funded in the DoD Budget that are considered intrinsic to C³ functionality and traditionally accounted for as part of C³. They include facilities, systems and manpower for Navigation, Meteorology, Combat Identification, Information Assurance activities.*

B. *Excluded from the C³ Programs and Activities are programs, projects, and activities that are so closely integrated with a weapon system or embedded in Service force structure that they are not readily identifiable in the budget. Determination of the composition of C³ programs resides with the ASD(C³I) and is defined by the content of the C³ISR Resource System database.*

170104 References

The Office of the Director for Program Analysis and Evaluation maintains a listing of program elements (PEs) in the Future Years Defense Program (FYDP) making up C³ programs. For details, please contact the POC for the FYDP Structure Management (FSM) system. The FSM system and its Web site are described in FMR Volume 2A, Section 010702. In addition, Chapter 1 provides general funding policies. Chapter 3 provides specific policies and formats related to Operation and Maintenance. Chapter 4 provides specific policies and formats related to Procurement appropriations. Chapter 5 provides specific policies and formats related to RDT&E. Chapter 6 provides specific policies and formats related to Military Construction appropriations.

1702 BUDGET ESTIMATES SUBMISSION

170201 General

C³ programs and activities will be incorporated within the regular documentation for budget estimate submissions. Additionally, in accordance with Section 1704, Automation Requirements, each Military Department and Defense Agency will provide an electronic file of all budget lines and appropriations to the ASD(C³I) for the C³ programs/activities. This data should be submitted simultaneously with the BES, but not later than submission of the appropriate FYDP update. This data will be used for developing Congressional Justification Books (CJBs), for responding to inquiries directed to OASD(C³I) regarding department C³ programs and related activities, and for ASD(C³I) analysis and oversight.

1703 CONGRESSIONAL JUSTIFICATION/PRESENTATION

170301 Purpose

This Section provides guidance for the organization of justification material for the Command, Control and Communications (C³) programs.

170302 Justification Book Preparation

The office of the Assistant Secretary of Defense for Command Control, Communications and Intelligence (C³I) will annually prepare a C³ Congressional Justification Book in support of selected C³ programs contained in the President's budget request to the Congress. Similarly, the National Security Agency (NSA), as the largest component of the Defense-wide Information Assurance Program, will, in coordination with the Director, Information Assurance, ASD(C³I), and the Defense-wide Information Assurance Program Staff, prepare a Defense-wide Information Assurance Program Congressional Justification Book (DIAP CJB). The DIAP CJB will describe the resources and activities associated with the conduct of Information Assurance efforts throughout the Department, as well as those associated with the Information Systems Security Program.

170303 Submission of Justification Books

The C³ congressional justification books will consist of a DoD C³ Congressional Justification Book and a Defense-wide Information Assurance Congressional Justification Book. These instructions relate only to the preparation of the C³ Budget Justification Book. Instructions for the Defense-wide Information Assurance Program Congressional Justification Book will, in coordination with the Information Systems Security Program Manager, be published separately by the DoD Chief Information Officer.

170304 Input for C³ Congressional Justification Books

A. The Services' and Defense Agencies' inputs to the C³ congressional justification book will be provided to the OASD(C³I) as required by the ASD(C³I) guidance and supplemental instructions published separately. This input will consist of a program justification which describes the program, a graphic or schematic of the program, its performance characteristics, management oversight, milestones and schedules, contract information, and program highlights describing activities and plans for the funds by fiscal year. Its contents must be consistent with the Service and Agency exhibits prepared for all appropriations (RDT&E, Procurement, MILCON, and O&M) budget justification material included in the President's budget request.

B. The Services and Defense Agencies will provide an electronic file of C³ and related projects and Budget Line Items in accordance with Section 1704, Automation Requirements, to the ASD(C³I) to support development of the C³ congressional justification book. This data should be submitted as soon as possible after the Service/Agency President's Budget database lock.

170305 Relationship of C³ Congressional Justification Book with Military Department and Defense Agency Justification Material.

The C³ congressional justification book is not intended to duplicate the individual Service or Defense Agency justification material. Rather, it supplements them by displaying budget information in a programmatic context that facilitates congressional understanding. To ensure consistency between the C³ justification book and Military Department and defense agency justification material, an advance copy of C³I program related budget exhibits should be provided to the Office of the ASD(C³I) Resource Management Directorate at the same time advance copies are provided to the OUSD(Comptroller) for review.

1704 AUTOMATION REQUIREMENTS

170401 Purpose

This Section provides guidance for submission of specific C³ resources to OASD(C³I), in accordance with Section 010505, Automated C³ISR Requirements.

170402 Automated Communications, Command and Control, Intelligence, Surveillance and Reconnaissance (C³ISR) Database

A. *Purpose and Objectives. The C³ISR database is the only complete, automated source of resource data for Communications, Command and Control, Intelligence and related activities for use by the Office of the Secretary of Defense and the Joint Staff. For a variety of reasons, the FYDP structure (and to a lesser extent Budget structure) is not capable of identifying fully C³ISR costs. As a result, the ASD(C³I) maintains a hybrid database that integrates both budget and program resource detail organized by program/project/activity and functional categories, among other things. Included are budget lines and Program Elements dedicated to C³ISR, as well as portions of similar data elements dedicated to other activities but which also include C³ISR funding. The C³ISR database is essential to the preparation of the Intelligence and C³ Justification Books required by Section 0104. It facilitates functional analyses for OSD and the Joint staff.*

B. *Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, and the Defense Agencies (hereafter referred to as Components) that fund Communications, Command and Control, and related activities.*

C. *Reporting Requirements. Updates are required coincident with submission of the (1) Program Objective Memorandum, (2) Budget Estimates, and (3) President's Budget.*

D. *Related Databases. Data in the C³ISR database is fully consistent with data contained in the FYDP, R&D and Procurement Annexes, and Biennial Budget databases.*

E *Instructions – C³ISR Data Update.*

1. *General. An electronic file of budget line items, sorted by Appropriation and Program Element will be submitted by Components to OASD(C³I) via on line electronic data transfer or floppy disk as appropriate. Since this is an iterative process, each update will consist of those budget lines and Program Elements included in the previous update, plus any new data identified by either OASD(C³I) or Component as appropriate.*

2. *Technical. Data will be formatted as ASCII, comma delimited files (or if this is impracticable in a spreadsheet) and consist of the following elements:*

a. *Dollars: Resource Identification Code (RIC)/Appn; budget activity; line item code (R&D project number or procurement line number); Program Element; PY; CY; BY1 (and BY2 when appropriate); BY+1; BY+2; BY+3; and BY+4.*

b. *Manpower: RIC/Appn; Category; Program Element; PY; CY; BY1 (and BY2 when appropriate); BY+1; BY+2; BY+3; and BY+4.*

c. *New or changed titles/labels for data elements (e.g. line items, Program Elements, etc.) should be included separately, but as part of the Update.*

CHAPTER 18

INFORMATION TECHNOLOGY

1801 GENERAL**180101 Purpose**

1. This chapter provides instructions applicable to budget formulation and congressional justification for Information Technology programs.
2. These instructions apply to the Office of the Secretary of Defense (OSD), the Military Departments (including their National Guard and reserve components), the Joint Staff, Unified Commands, the Inspector General DoD, the Defense Agencies, the DoD Field Activities, the Joint Service Schools, the Defense Health Program, and the Court of Military Appeals. All DoD appropriation accounts and funds are encompassed with the exception of non-appropriated funds (NAF).
3. All Defense Components that have Information Technology (IT) resource obligations that equal or exceed \$2 million in a fiscal year will report an Information Technology Overview and an IT-1. All Components with resource obligations for major systems and special interest initiatives/acquisitions as designated by the ASD(C³I) or other milestone decision authority (MDA) will report Part I of the Capital Investment Exhibit, referred to as the IT(300b). Components that serve as the executive or principal funding agent in the major systems and special interest initiatives/acquisitions will report all sections of the IT(300b).

180102 Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. However, this chapter covers specific distribution instructions for the Information Technology Programs. All applicable exhibits and automated data base/formats will be submitted for both the OSD Budget Estimates Submission (BES) and the congressional justification submission or President's Budget (PB).

180103 Preparation of Material

General guidance with regard to the preparation of material is presented in Chapter 1 of the FMR. This section covers specified formats and specific material reporting requirements for the Information Technology programs.

180104 References

1. Chapter 1 provides general funding and appropriation policies; Chapter 3 provides specific policies related to Operation and Maintenance costs; Chapter 4 provides specific policies related to Procurement appropriations; Chapter 5 provides specific policies related to RDT&E; Chapter 6 provides specific policies related to Military Construction appropriations; and Chapter 9 provides specific policies related to the Defense Working Capital Fund (DWCF).
2. DoD Directive 5000.1, "Defense Acquisition," and DoD Regulation 5000.2-R, "Defense Acquisition Programs (MDAPs) and Major Automated Information System (MAIS) Acquisition Programs" should be referenced in fulfilling acquisition process reporting requirements.
3. Requirements are also generally addressed in Chapter 42 of the Office of Management and Budget (OMB) Circular No. A-11, "Preparation and Submission of Budget Estimates," as well as "A-11, Part III, Capital Asset Plan and Justification."
4. The Paperwork Reduction Act of 1995 and the Clinger-Cohen Act of 1996 (formerly referred to as the Information Technology Management Reform Act (ITMRA)) should be referenced for supporting definitions regarding IT Resources.

180105 Definitions

Chapter 1 provides policies and definitions regarding the application of expenses and investment criteria for budgetary purposes. The Office of Management and Budget Circular A-11 uses the term Information Technology (IT) Resources to describe the resources covered by the Public Law 104-106 (Clinger-Cohen Act of 1996).

1. **(Automated) Information System (AIS).** A combination of elements that will function together to produce the capabilities required to fulfill a mission need, including functional user, computer hardware and computer software, data and/or telecommunications links, personnel, procedures that are designed, built, operated, and maintained to perform the functions such as collecting, recording, processing, storing, retrieving, transmitting, and displaying information. The term AIS is sometimes used interchangeably with program, initiative, or strategy.
2. **Collections.** Identifies collections between executive, judicial, and legislative branches for information technology (IT) services; between Defense Components; and between activities within a DoD Component. Collections shall be categorized by system or business area. Should payments and collections be made between activities within a DoD Component, please provide an explanation in a footnote. For use in business areas and systems that are funded by fee-for-service, working capital fund and other industrial funds. Offset by payments in order to not overstate the total IT budget.
3. **Communications and Computing Infrastructure (C&CI).** Reportable category of C&CI provides the information processing (computing) and transport services (communications) used by functional applications. DoD common services, including most of what has historically been categorized as “value-added services”, are considered to be part of the C&CI this year. These common services are communications applications such as voice, data transfer (including EC/EDI), video teleconferencing, and messaging. Within the C&CI category, there is a further division by Program Areas and Functions.
4. **Communications Infrastructure.** The C&CI provides the information processing (computing) and transport services (communications) used by functional applications. DoD common services, including most of what has historically been categorized as “value-added services”, are considered to be part of the C&CI this year. These common services are communications applications such as voice, data transfer (including EC/EDI), video teleconferencing, and messaging. Within the C&CI category, there is a further division by Program Functions and Areas.
5. **Computing Infrastructure.** Program Function/Area of Communications and Computing Infrastructure (C&CI). Automated information processing operations reported in this section generally perform one or more of the following functions: processing associated with agency-approved automated information systems; time-sharing services; centralized office automation; records management services; or network management support. Staff associated with the operations here include computer operators, computer system programmers, telecommunications specialists, helpdesk personnel, and administrative support personnel.
6. **Current Services (CS).** Current Services represents the cost of operations at a current capability and performance level of the AIS, program and/or initiative when the budget is submitted. That is, what the cost would be if nothing changes from the baseline other than fact-of-life reductions, termination’s or replacement systems becoming operational. Current Services include: (1) Those personnel whose duties relate to the general management and operations of information technology, (2) maintenance of existing AIS, program or initiative, (3) corrective software maintenance which includes all efforts to diagnose and correct actual errors (i.e., processing or performance errors) in a system (4) maintenance of existing voice and data communications capabilities, (5) replacement of broken IT equipment needed to continue operations at the current service level, and (6) all other related costs not identified as Development/Modernization.

7. **Data Administration.** Program Area of Related Technical Activities. Activities reported in this area include: Data sharing and data standardization. Component data administration programs are defined in the Data Administration Strategic Plans.
8. **Development/Modernization (Dev/Mod).** Any change or modification to an existing AIS, program, and/or initiative which results in improved capability or performance of the baseline activity. Improved capability or performance achieved, as a by-product of the replacement of broken IT equipment to continue operations at the current service levels is not categorized as Development/Modernization. Development/Modernization includes: (1) program costs for new AISs that are planned or under development. (2) any change or modification to an existing AIS which is intended to result in improved capability or performance of the activity. These changes include (a) all modifications to existing operational software (other than corrective software maintenance); (b) acquiring technologically newer IT equipment to replace outdated IT equipment regardless of the age of the equipment or its commercial availability; and (c) expansion of existing capabilities to new users. (3) changes mandated by Congress or the Office of the Secretary of Defense. (4) personnel from the project management office and other direct support personnel involved with Development/Modernization.
9. **Economic Replacement.** Economic replacement of outdated IT equipment is not considered “Current Services” and shall be reported under “Development/Modernization.”
10. **Functional Area Applications (Func Appl).** Reportable category of Functional area applications, also referred to as AISs, are associated with all DoD mission areas—C2, Intelligence and combat support areas. They rely upon the information processing, common services, and transport capabilities of the Communications and Computing Infrastructure. Related technical activities provide the architectures, standards, interoperability, and information assurance that these systems require to operate effectively as part of the Defense Information Infrastructure. Although an application/system may serve more than one function, it is classified according to its predominate function. Within the Functional Application category, there is a further division into Functional Areas that equate to principal staff functions and activities.
11. **General Management Personnel.** Includes those people who are in policy, oversight, and/or other functions such as review of AIS program plans, life-cycle management oversight, strategic planning, headquarters staff, base level operators, engineers, etc. For the purposes of this reporting, resources associated with general management personnel will be categorized as “Current Services.”
12. **Information Security/Assurance.** Program Area of Communications and Computing Infrastructure (C&CI). Efforts include all efforts that protect and defend information and information systems by ensuring their availability, integrity, authentication, confidentiality, and non-repudiation. These efforts include providing for the restoration of information systems by incorporating protection, detection, and reaction capabilities. As such IA is broader in scope than information systems security and reflects the realities of assuring the timely availability of accurate information and the reliable operation of DoD information systems in increasingly globally inter networked information environments.
13. **Information Technology Resources.** The Information Technology (IT) Resources that must be reported under this chapter are defined by OMB Circular A-11 and described by Clinger-Cohen Act of 1996, P.L.104-106. In particular, Information Technology means any equipment or interconnected system or subsystem of equipment that is used in the automatic acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information. It includes computers, ancillary equipment, software, firmware and similar procedures, services, and related resources whether performed by in-house, by contractor, by other intra-agency, or intergovernmental agency resources/personnel. Both system and non-system IT resources including base level units (communications, engineering, maintenance, and installation) and management staffs at all levels are included in IT reporting.
14. **Initiative Number (IN).** (Also referred to as the Resource Identification Number for IT Initiatives.) A four digit initiative number is assigned to initiatives, programs and systems that are reported in the IT budget. To register a new initiative or program not previously reported in the IT exhibits and not yet assigned a number, the OASD(C³I) will review and, if necessary, assign a number during the Budget or POM development process in

coordination with the Service or Agency POC. Initiative numbers are associated with the name, functional area/C&CI category; system grouping; migration status; and other pertinent management information. The current and archived lists of IN's is maintained on the C³I WEB page.

15. **Life-Cycle Cost (LCC).** The total cost to the government for an AIS, program and/or initiative over its full life. It includes the cost of requirements analyses, design, development, training, acquisition and/or lease, operations, support and, where applicable, disposal. It encompasses both contract and in-house costs, all cost categories and all related appropriations/funds. The costs may be broken down into useable increments describing the costs associated with delivering a certain capability or segment of an IT activity.
16. **Life-Cycle Management (LCM)/Acquisition Process Management.** A management process applied throughout the life of an AIS, program, or initiative, that bases all programmatic decisions on the anticipated mission-related and economic benefits derived over the life of the activity. Elements of this management are defined in the DoD Directive 5000 series.
17. **Major Category.** A program, initiative or information system is categorized as major if: (1) has anticipated or actual program costs, computed in FY 1996 constant dollars, in excess of \$120 million; or (2) has estimated program costs, computed in FY 1996 constant dollars, in excess of \$30 million dollars in any single year; or (3) has estimated life-cycle costs, computed in FY 1996 constant dollars, in excess of \$360 million; or (4) is designated by the DoD milestone decision authority (MDA) based on special interest assessments. All systems, programs and initiatives designated major by the OSD or Component milestone decision authority will be reported. Regardless of actual investment by an individual submitting activity, all funding for major category IT activities will be reported by all Components in the Major category in the IT-1. All executive agents must report IT(300b) formats for major category activities and include total funding for the Department on these exhibits.
18. **Non major Category.** For the purposes of IT budget reporting (1) in the Budget Estimate Submission, a non major AIS is reported at the same threshold as provided in the for the Program Objective Memorandum preparation instructions (e.g., an AIS that does not meet the criteria for a major system yet has a total of \$2 million (to include both Development/Modernization and Current Services) obligations (costs) per fiscal year), and (2) for the congressional justification submission, a non major AIS is an AIS that does not meet the criteria for a major system yet has a total of \$10 million (to include both Development/Modernization and Current Services) obligations (costs) per fiscal year. DoD standard systems (referred to as objective or approved migration systems, not already covered in this category or in the Major category, will be reported regardless of funding investment.
19. **Obligations/Cost.** For the purpose of IT budget reporting, obligations are the amount an agency has committed to spend on information technology in a given fiscal year. For the DWCF, cost applies wherever "obligations" is used in this guidance.
20. **Office Automation.** Facilities that support local area networks (LANs), file servers, or desktop computers, and that support administrative processing (i.e. word processing, spreadsheets, etc) rather than application processing, should be reported as Office Automation (listed as a separate function). This reporting category includes communications and computing resources, usually at the tenant level. Include communications and Automated Data Processing Equipment (ADPE) at the base/deployable/shipboard computing level.
21. **Other Category.** For those "Development/Modernization" and/or "Current Services" costs/obligations as well as initiatives not designated in the major and non-major categories. All IT resources will be categorized by the applicable IT/DII Reporting Structure-- functional/mission area (see Section 180106) under the IT-1.
22. **Other Related Technical Activities (RTAs).** All Defense Information Infrastructure (DII) initiatives that do not fit into any of the other C&CI Infrastructure Functions/and Related Technical Activities are reported here. These include but are not limited to BPR, Training, CIO Support Activities, and Pre Acquisition Decision Activities.

23. **Payments.** Identifies payments between executive, judicial, and legislative branches for information technology (IT) services; between Defense Components; and between activities within a DoD Component. Payments shall be categorized by system or business area. Should payments and collections be made between activities within a DoD Component, please provide an explanation in a footnote. For use in business areas and systems that are funded by fee-for-service, working capital fund and other industrial funds. Offset by collections in order to not overstate the total IT budget.
24. **Program Cost (also referred to as Initiative Cost).** The total of all expenditures, in any appropriation and fund, directly related to the AIS, program, or initiative definition, design, development, and deployment, and incurred from the beginning of the "Concept Exploration" phase through deployment at each separate site. For incremental and evolutionary program strategies, program cost includes all funded increments. Program cost is further defined in DoD 5000 documents.
25. **Related Technical Activities (RTAs).** Related Technical Activities service the DoD C&CI and AISs. While these activities do not directly provide functional applications, data processing, or connectivity, they are required to ensure that the infrastructure functions as an integrated whole and meets DoD mission requirements. RTAs include information assurance, spectrum management, development of architectures, facilitation of interoperability, and technical integration. RTAs could be considered as "overhead" services that are necessary to the DII. See Section 180106 for IT/DII Structure Table. Within the RTA category there is a further division into Program Areas.
26. **Special Interest Communications Programs.** Program Area of the IT/DII Communications and Computing Infrastructure (C&CI) division. Programs of special interest that should be reported here are Defense Message System, Electronic Commerce/Electronic Data Interchange, Distance Learning Systems, Video Teleconferencing. The resource category "Other" may not be used with this program area.
27. **Spectrum Management.** Program Area of Related Technical Activities. This refers to activities that deal with management of the military frequency spectrum.
28. **Standard Systems.** Refers to systems designated as OSD approved migration or objective systems; or Candidate migration or objective systems that are required to be reported. OSD approved systems are designated by an OSD Principal Staff Assistant (PSA) and subsequently approved by the ASD(C³I) as a migration or objective system. Candidate Migration Systems are those that have been nominated by a PSA but not yet approved by the ASD(C³I); or nominated by a service or agency that are pending PSA review. Migration or objective systems are discussed in DoD 8000 series.
29. **Technical Activities.** Program Area of Related Technical activities. This refers to activities that deal with testing, engineering, architectures and inter-operability.

180106 Reporting Structure

All information technology resources that are to be reported will be identified under one of the following Information Technology/Defense Information Infrastructure (IT/DII) Reporting Structure at the level designated in this structure. Reporting will be at the lowest level indicated in this table, by major, non-major and other categories based on the business rules provided in the IT Reporting software. For those resources that cross more than one area, the functional area, C&CI or RTA area is designated in the Master Initiative/System List maintained by ASD(C³I). The reporting area is based on the preponderance of the mission concept.

Information Technology/Defense Information Infrastructure (IT/DII) Reporting Structure

<u>A. Functional Area Applications Area (Funct Appl)</u>	<u>B. Communications and Computing Infrastructure (C&CI)</u>	<u>C. Related Technical Activities (RTAs)</u>
1. Civilian Personnel 2. Command and Control 3. Economic Security 4. Environmental Security 5. Finance 6. Health 7. Information Management 8. Information Operations/Warfare 9. Intelligence 10. Logistics 11. Military Personnel & Readiness 12. Nuclear, Chemical and Biological (NBC) Defense Programs 13. Other (not otherwise specified) 14. Policy 15. Procurement/Contract Administration 16. Reserve Affairs 17. Science and Technology 18. Space 19. Systems Acquisition Management 20. Test and Evaluation	1. Special Interest Communications Programs (a) Defense Message System (b) Electronic Commerce/ Electronic Data Interchange (c) Distance Learning Systems (d) Video-Teleconferencing 2. Communications Infrastructure (a) Long Haul/Wide Area (b) Deployable/Tactical/Shipboard (c) Base Level 3. Computing Infrastructure (a) Main-frame Processing (b) Mid Tier Processing (c) Deployable/Tactical/Shipboard Computing 4. Office Automation 5. Information Security/Assurance	1. Spectrum Management 2. Data Administration 3. Technical Activities (e.g. Testing Engineering Architectures Interoperability) 4. Other (e.g. BPR Training CIO Support Activities)

- ◆ Functional Area Applications are further classified into Functional Areas which equate to major functions or missions of the Department and are aligned with OSD Principal staff responsibilities.
- ◆ C&CI are further divided into Program Functions and Areas such as Special Communications, Communications Infrastructure, Computing Infrastructure, Office Automation and Information Security/Assurance.
- ◆ Related Technical Activities are subdivided into Program Functions and Areas such as Spectrum Management, Data Administration, Technical Activities and Other (see examples in table above.)
- ◆ Numbered or Lettered levels indicate the reporting level in the IT-1.

1802 BUDGET ESTIMATES SUBMISSION**180201 Purpose**

This section provides guidance for preparation and submission of budget estimates for the Information Technology resources to OSD. Supplemental guidance will be issued, if required, to effect any reporting requirements resulting from congressional or Office of Management and Budget (OMB) A-11 guidance updates will be provided through the ASD(C³I) designated WEB page (<http://www.dtic.mil:80/c3i/>) as designated in the budget call memo.

180202 Submission Requirements

A. The following exhibits, for which specified formats and detailed submission formats are provided in Section 180402, are required. Automated submission is required.

IT OV	Information Technology Overview
IT-1	Information Technology Resources by Functional/Mission Area
IT-300b	IT Capital Investment Exhibit (Capital Asset Plan and Justification Reporting)

B. Distribution of the OSD budget estimates material will be made in accordance with the charts contained in Chapter 1. Specific instructions will be provided for the automated submission of the exhibits identified above. Limited hard copies of exhibits may be requested and will be prepared in landscape (8.5 by 11 inches); double-sided; and three hole punched at the top for assembly in three ring binders.

C. IT OV, Information Technology Overview provides a narrative summary that all Components will provide. Specific requirements are discussed in Section 180402. The IT Overview will address, at a minimum, the following areas: (1) characterization of your Component's overall IT program within the overall mission context, the CIO/IT priorities and prioritization process; (2) description of the investment in and the use of IT supporting your Component's mission (i.e. those described in strategic/business plans as well as the IT Management Strategic Plan); (3) discussion of the projected and actual accomplishments of IT investments by functional/mission areas (include mission performance measures); (4) explanation of the major initiatives/investment portfolio supported in the budget year estimate, including the accomplishments; and (5) accounting for changes to the prior baseline budget submitted to Congress, particularly significant changes in investments including those for major programs, systems, and/or initiatives.

The baseline will also identify, in simple table format, the previous submission's appropriated funds by fiscal year, the current submission's appropriated funds, the total difference and a brief explanatory audit trail of the differences (e.g. transfers to and from the component, major changes in funding, congressional reductions, system increases, decreases, or terminations) within and between Fiscal Years. A similar section should be included for other than appropriated fund resources (Defense Working Capital Fund, other industrial funds, or resources from other Federal Agencies). A management section should discuss implementation activities and accomplishments in addressing the CCA, GPRA and related reforms; actions taken to integrate the CCA requirements into the PPBS; performance measures activities; and CIO management framework. The management section will also identify any system, program or initiative additions, consolidations, deletions, and name modifications from the prior year congressional justification baseline.

D. IT-1, Information Technology Resources by Functional or Program Area/Mission and Category, resources are reported using the IT/DII Reporting Structure that is divided into three primary divisions or resource areas: Functional Area Applications (Func Appl); Communications and Computing Infrastructure (C&CI); and Related Technical Activities (RTAs). Functional Area Application are further divided into Functional Areas. For C&CI and RTA's, these are grouped into Program Functional Activities. Exhibit IT-1 must be prepared using these

categorization requirements and by appropriation/fund source and submitted electronically using the IT Budget automation. This electronic submission is based on the IT master system list that identifies and groups the separate systems, program, or initiatives by primary functional/mission areas as identified in Section 180106. IT-1 will record the appropriate initiative number and title registered in the IT budget automation master tables. Software and additional guidance is provided through the ASD(C³I) designated WEB page (<http://www.dtic.mil:80/c3i/>) and as discussed in the call memo.

E. IT-300b, Capital Investment Exhibit, requirements are defined in OMB's A-11, part 3, Capital Asset Plan and Justification. Section 1804, IT Program Submission formats, contain the DoD requirements for this reporting.

F. Additional reporting requirements will be identified in the call memorandum, as necessary. Additional management and supporting data may be designated by the Chief Information Officer (CIO) to support detailed justification requirements.

G. The following IT resources are generally exempted from IT reporting:

1. Acquired by a Federal Contractor which are incidental to the performance of a Federal Contract;
2. Physically part of, dedicated to, or essential in real time to the mission performance of a weapon system. Radar, sonar, radio, or television equipment are similarly exempted.
3. Highly sensitive, special access AIS programs whose resources are specifically exempted from budget reporting by the ASD(C³I). In general, these resources are reviewed through the separate Intelligence budget processes.

180203 Arrangement of Backup Exhibits

Exhibits will be assembled in the sequence shown in Section 180202, as applicable. Submissions will include appropriate summary and exhibit indices (e.g. Exhibits IT-1 and IT-300b).

1803 CONGRESSIONAL JUSTIFICATION/PRESENTATION**180301 Purpose**

This section provides guidance for the organization of justification material for the Information Technology programs submitted in support of the President's budget. The Department will submit a final, consolidated report to OMB and Congress.

180302 Justification Book Preparation

Justification Books will be prepared in the same manner as specified in Section 1802. In addition, the justification books submitted to Congress are to be unclassified or declassified.

180303 Submission Requirements

Submission requirements are as specified in Section 180202 except as noted below:

A. For President's Budget Congressional Justification Materials only: National Security Systems that involve the command and control of military forces which are critical to the direct fulfillment of military or intelligence missions and which is primarily acquired or designed to support the Commander after deployment and has been given written exemption from this reporting by the ASD(C³I). These exclusions will be addressed in separate C³ justification materials (Note: there is some overlap between the IT and C³ Justification books). This exclusion shall not include IT Resources used for routine administrative and business applications such as payroll, finance, logistics and personnel management.

B. Advance transmissions are required to be reviewed and approved by the Office of the Assistant Secretary of Defense (Command, Control, Communications, and Intelligence) (OASD(C³I)) prior to the DoD Component's official submission and production. Three advance hard copies of the exhibits with required electronic submissions are to be provided to the OASD(C³I), Room 3D228, Pentagon.

180304 Input for Summary Information Technology Justification Books

A. General. All exhibit data shall be submitted in automated form. The OASD(C³I) is responsible for providing the DoD Information Technology summary tables of the IT data in accordance with prior congressional direction and Section 1804 of this Chapter. To accomplish this requirement, electronic formats will be used by the Defense Components to generate their submission. The OASD(C³I) will maintain the electronically submitted IT Budget database. Other specific guidance for the IT budget materials will be provided as required.

B. Distribution of the final justification material will be made to Congress, the Office of Management and Budget (OMB), the Government Accounting Office (GAO) and the DoD Inspector General.

1. Distribution of consolidated information will be made by the OASD(C³I) once reviewed and approved. Services ensure final Security Review is performed and provide a copy of the appropriate release form to OASD(C³I).

2. OASD(C³I) will consolidate the electronic submissions from the Defense Components to prepare the individual activity, summary information and graphics and make distribution to OMB, Congress (House National Security Appropriations Subcommittee (2 copies), Senate Defense Appropriations Subcommittee (2 copies), House National Security Committee (2 copies), Senate Armed Services Committee (2 copies).

3. All submitting Defense Components are to provide 10 copies of the final IT exhibits in landscape orientation, three hole punch at the top (ready for placement in three ring binders), without staples or other fasteners to the OASD(C³I), Room 3D228 for distribution. Colors of covers will follow guidance in Chapter 1 or applicable budget guidance.

C. Once the justification books have been released to the Congress and the OMB, the remaining distribution will be made in accordance with the format, table and media guidance (Justification Material Supporting the President's Budget Request) in Volume 2, Chapter 1.

1804 INFORMATION TECHNOLOGY PROGRAM SUBMISSION FORMATS**180401 Purpose**

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Further clarification is also provided within the specific detailed instructions for the exhibits under Section 180402. Unless modified in a subsequent budget call, these formats should be adhered to.

180402 Exhibits in Support the Information Technology Budget Submission

IT OV Information Technology Overview	13
IT Resources by IT/DII Category Exhibit (IT-1)	14
IT Capital Investment Justification Exhibit (IT 300b)	23

(Name of DoD Component)
Information Technology Overview
(Appropriate Submission Heading)

1. **Purpose.** Provide a justification of each Component's Information Technology resources.
2. **Submission.** An Information Technology Overview is required from all Defense Components who have obligations/costs of \$2 million or more in any single PY, CY, BY-1, and/or BY-2 for information technology activities. The information will be submitted electronically as indicated in technical guidance on the C³I web page. Hard copy and electronic data views will be *landscape oriented*.
3. **Entries.** IT OV, Information Technology Overview provides a narrative summary that all Components will provide. Specific requirements are discussed in Section 180402. The IT Overview will address, at a minimum, the following areas: (1) characterize your Component's overall IT program within the overall mission context, the CIO/IT priorities and prioritization process; (2) describe the investment in and the use of IT supporting your Component's mission (i.e. those described in strategic/business plans as well as the IT Management Strategic Plan); (3) discuss the projected and actual accomplishments of IT investments by functional/mission areas (include mission performance measures); (4) explain the major initiatives/investment portfolio supported in the budget year estimate, including the accomplishments; and (5) account for changes to the prior baseline budget submitted to Congress, particularly significant changes in investments including those for major programs, systems, and/or initiatives.

The baseline will also identify, in simple table format, the previous submission's appropriated funds by fiscal year, the current submission's appropriated funds, the total difference and a brief explanatory audit trail of the differences (e.g. transfers to and from the component, major changes in funding, congressional reductions, system increases, decreases, or terminations) within and between Fiscal Years. A similar section should be included for other than appropriated fund resources (Defense Working Capital Fund, other industrial funds, or resources from other Federal Agencies). A management section should discuss implementation activities and accomplishments in addressing the CCA, GPRA and related reforms; actions taken to integrate the CCA requirements into the PPBS; performance measures activities; and CIO management framework. The management section will also identify any system, program or initiative additions, consolidations, deletions, and name modifications from the prior year congressional justification baseline.

The IT OV should be done in a way that is most useful to provide understanding of the Component's IT activities as well as to convey why funding has changed from the prior year baseline. Changes (including administrative changes and transfer of function activities) related to the IT-1 or the IT-300b exhibit section (e.g., deleting major AIS's from reporting) will be explained in the management section.

Appropriation Submission Heading will follow the terminology required in the budget call memorandum. Additional reporting and formatting requirements will be identified in the call memorandum, as necessary.

INSTRUCTIONS FOR PREPARATION OF INFORMATION TECHNOLOGY (IT) RESOURCES BY IT/DII CATEGORY EXHIBIT (IT-1)

1. **Purpose.** This exhibit provides a more detailed resource reporting by mission category of a component's estimates for information technology (IT) activities for FY PY, FY CY, FY BY1, FY BY2, (FY BY3, FY BY4, and FY BY5 for selected systems). The total by appropriation and fund reported in this exhibit shall equal the total reportable IT resources used by the submitting agency, unless specifically exempted stated in the Overview. Major System reporting in the IT-1 will be equal to the non-memo entry information recorded in Part 1 of the IT(300b).
2. **Submission.** The exhibit is required from each Defense component that obligates or incurs costs for information technology (IT) activities totaling \$2 million in FY PY, FY CY, FY BY1, FY BY2, (FY BY3, FY BY4, and FY BY5 for selected systems). for major, non-major and other, by appropriation within the IT/DII reporting structure. Dollars are to be displayed in thousands. The electronic submission will generate this format for this exhibit as well as intermediate subtotals by required divisions and categories.
3. **Entries.** For each IT/DII Reporting Division (or Mission), the estimates for Development/Modernization (D/M), and Current Services (CS), listed by Major Systems/Initiatives, Non-major Systems/Initiatives, and total of all other information technology (IT) resources, at appropriation/fund level of detail are displayed (see detailed Resource Information note on this format). The following guidance is applicable:
 - a. **Name of DoD Component.** Identify the name of DoD Component required to submit this exhibit on each page of the Exhibit in header format.
 - b. **IT/DII Structure.** The IT/DII is divided into three primary divisions or resource areas:
 - **Functional Area Applications (Func Appl) :** Functional area applications, or AISs, are associated with all DoD mission areas—C2, Intelligence and combat support areas. They rely upon the information processing, common services, and transport capabilities of the Communications and Computing Infrastructure. Although a Functional Application may serve more than one function, it is classified according to its predominate function. Within the Functional Application category, there is a further division into Functional Areas.
 - **The Communications and Computing Infrastructure (C&CI):** The C&CI provides the information processing (computing) and transport services (communications) used by functional applications. DoD common services, including most of what has historically been categorized as “value-added services”, are considered to be part of the C&CI this year. These common services are communications applications such as voice, data transfer (including EC/EDI), video teleconferencing, and messaging. Within the C&CI category, there is a further division by Program Functions and Areas.
 - **Related Technical Activities (RTAs):** Related Technical Activities service the DoD C&CI and AISs. While these activities do not directly provide functional applications, data processing, or connectivity, they are required to ensure that the infrastructure functions as an integrated whole and meets DoD mission requirements. RTAs include information assurance, spectrum management, development of architectures, facilitation of interoperability, and technical integration. RTAs could be considered as “overhead” services that are necessary to the DII. Within the RTA category there is a further division into Program Functions.

See Section 180106 for IT/DII Structure Table.

c. Major System/Initiatives. For each Functional Application Area, identify the major initiative by name and initiative number (Note an Initiative Number (IN) will be assigned for use in the electronic submission. IN's are assigned by OASD(C³I)) and maintained in the C³I Web page. A major initiative is defined in Section 180105, "Preparation of Material." For each initiative listed ("1 through N") identify estimates for the D/M, CS, with breakout of the subtotal by type or appropriation and fund for each fiscal year. The data entry into the electronic format will require appropriation and fund data by D/M and CS.

d. Non-Major Systems/Initiatives. For each Functional Area Application (Func Appl), alphabetically identify the non-major Initiatives by name and designated system number (from the electronic database). A non-major Initiative is defined in Section 180105, "Preparation of Material." For each initiative listed (1 through N) identify estimates for the D/M, CS, with breakout of the subtotal by type or appropriation and fund for each fiscal year. The data entry into the electronic format will require appropriation and fund data by D/M and CS. IN's are assigned by OASD(C³I)

e. All Other. The purpose of this entry is to aggregate estimates within Functional Areas or Programs for those initiatives or program initiatives that fall outside the designated reporting for Major Initiatives and Non-Major Initiatives, usually below reporting level total cost in a fiscal year (for the OSD/OMB Budget Estimate Submission this will be the POM Tab G threshold). Also, include all other IT related obligations (costs) not normally associated with an initiative but part of the total IT. Identify estimates for the D/M, CS, with breakout of the subtotal by type or appropriation and fund for each fiscal year. The data entry into the electronic format will require appropriation and fund data by D/M and CS. **Note: Special Interest Communications programs are never reported in Other category.**

f. Submittor Grand and IT/DII Resource Area Totals. The software will generate at the beginning of the exhibit various totals of the estimated obligations (costs) for all IT activities reported. The grand total shall equal the sum of the Functional Area totals. Identify "Development/Modernization" and "Current Services" by type of appropriation and fund by fiscal year.

g. Total Functional Area X. For each Functional Area, display total D/M, total CS, with breakout of type of appropriation and fund by fiscal year, subtotalling this category.

h. Basic Details for Electronic Interface. The following table shows the basic interface for the new electronic IT reporting system. For those Components who provide a direct electronic interface to the system, the following reporting criteria need to be submitted for each line of data being reported.

Budget Year (XXXX)	Char(4) (XXXX)
Submission (BES or President's Budget)	Char(1) (B, P)
Component Code (From IT Reporting System)	Char(3) (XXX)
Initiative Number (From IT Reporting System)	Char(4) (XXXX)
Category Code (Major, Non-Major, Other)	Char(1) (M, N, O)
Standard (Legacy or Migration System)	Char(1) (L, M)
D/M or CS (Dev/Mod or Current Service)	Char(2) (DM, CS)
Appropriation (Appropriation Code)	Char(5) (XXXXX)
PY (Prior Year) (Dollars in Thousands)	Number (XXXXXX) (Value)
CY (Current Year) (Dollars in Thousands)	Number (XXXXXX) (Value)
BY1 (Budget Year 1) (Dollars in Thousands)	Number (XXXXXX) (Value)
BY2 (Budget Year 2) (Dollars in Thousands)	Number (XXXXXX) (Value)
BY3 (Budget Year 3) (Dollars in Thousands)	Number (XXXXXX) (Value)
BY4 (Budget Year 4) (Dollars in Thousands)	Number (XXXXXX) (Value)
BY5 (Budget Year 5) (Dollars in Thousands)	Number (XXXXXX) (Value)

i. Details in the Initiative Master Table. The following table shows the data that will be stored for each initiative in the Initiative Master table.

Initiative Number	Char(4) (XXXX)
Initiative Title (Full Title of Initiative)	Char(75) (XXXXXXXXXXXXXXXXXXXXX)
Initiative Acronym (Acronym for Initiative)	Char(10) (XXXXXXXXXX)
Service Reporting Number (System number the Services use for the Initiative in their own databases)	Char(10) (XXXXXXXXXX)
IT/DII Code (Appropriate IT/DII Reporting Structure Code for the Initiative e.g. Functional Area Application - Civilian Personnel)	Char(3) (XXX)
Component Code (From IT Reporting System)	Char(3) (XXX)
Reported at POM and BES	Char(2) (PM, BS)
Reserved	Char(9) (XXXXXXXXX)
NSS Exemption (5 possible breaks - Exempt from NSS Reporting, Reportable, C2 Exempt, C2 Reportable)	Char(2) (NE, NR, CE, CR,)
Standard Number (Standard Initiative Number to be defined later)	Number (XXXXXXXX)
Established Date (Date Initiative was Established in the system)	Date
Archive Date (Date Initiative was Archived in the system)	Date
Archive Code (Code used for Archival Identification)	Char(1) (D for duplicate, M for migration, R for retire)

(Name of DoD Component)

IT Capital Investment

Preparation of OMB A-11, 300b Report—Updated instructions are maintained on the C³I Web Page, and are based on changes to the A-11, Part 3, Capital Investment Justification and the Capital Programming Guide. Financial terms are consistent with this FMR, specifically this Chapter. Acquisition and Program Management information are based on the DoD 5000 series and Deskbook.

1. Purpose. This report provides detailed project information on major DoD IT System/Initiative investments. This reporting requirement is described on the C³I web page. Descriptive information will be compatible with the Master Initiative list maintained on the C³I Web page.
2. Submission. The exhibit is required for each major DoD IT initiative/program reported in the Exhibit IT-1. Current major DoD/IT initiative/program can be identified in the Master Initiative Table found on the C³I web page.
3. Entries. For each major DoD/IT initiative/program, the following guidance is applicable:
 - a. Description Information: The initiative/project name is the name of the major initiative/project being reported; the initiative number is the number currently registered on the Master Initiative list (this can be found on the C³I Web page.); the Program Activity/Mission Area refers to IT/DII categories, functional and program activities; the Project status refers to the date the project was initiated, date of last Acquisition Decision Memorandum (ADM) and the milestone/phase of the current review; whether or not the project is a financial management system; current Year 2000 phase; Mission Critical status; Standard System status; and the Organizational POC/Program Manager. Further information for filling out this section of the 300b can be found in the following exhibits and on the C³I Web page.
 - b. Part I: The Summary of Spending for Project Stages requires the budget authority and outlay estimates in millions of dollars. This section provides a detailed report of the initiative/programs funds for Summary of Prior Years –1; Data FY PY, FY CY, FY BY1, FY BY2, FY BY3, FY BY4, FY BY5, within each stage, and at selected detail. The stages shown in the table are Planning, Full Acquisition, Current Service/Maintenance, Total Budget Authority and Total Outlays. Further instructions for filling out this section of the 300b can be found on the following exhibits and the C³I Web page. As applicable, these data must correlate with the IT-1 Exhibit information.
 - c. Part II: The Budget Justification Materials section requires detailed information on Justification, Program Management, Contract Strategy and Architecture, Infrastructure Standards, and Financial Basis for Selecting the Project. Further instructions for filling out this section of the 300b can be found the C³I Web page. Many terms relate to the DoD 5000 series, Deskbook, and acquisition management products.
 - d. Part III: The Cost, Schedule, and Performance Goals section requires baseline cost, schedule, and performance goals for all proposed and ongoing acquisitions. The agency planning process is expected to produce acquisition plans that have a high probability of successfully achieving goals. In this section you are required to give a Description of Performance based systems, Previous Baseline, Baseline, Current Estimate and Variance from Baseline Goals in Dollars Million for PY-1, PY, CY, BY, BY1 BY2 BY3 and BY4-n. There is also a section for Corrective actions and Year 2000 Phase. Further instructions for filling out this section of the 300b can be found on the C³I Web page.

Total Current Service										
Total Resources by FY.										
Total Budget Authority										
Total Outlays										
If funded thru payments and collections Include this information as memo entry.										

Part II: Justification

Provide Requested Justification Materials:

A. Justification:

1. Section E. Investment Description.
2. Statement of how this project helps the agency meet the agency/DoD mission; long term strategic goals and objectives (DPG, Mission goals and/or IT strategic plan). This should be beyond the Mission Element Needs or requirements described above.
3. Describe the pre milestone O/ Planning activities that lead up to this decision. Business Process Reengineering, Migration plan; other approaches.
4. Basis for selecting the project, including demonstration that the investment is required for inherently government function; demonstrate that the work processes have been redesigned to reduce costs and improve effectiveness:

B. Program Management:

5. Identify the process owner (business activity, military mission), executive agent, program manager, and contracting office that manages this project if not, how is this project managed?
6. Does this project use Integrated Project Teams approach? If not, how is the project/initiative accomplishments monitored; how are resources reviewed.

C. Contract Strategy:

7. Identify major contract names; prime contractor and City, State, if awarded.
8. Identify the type of contract and why it was chosen.
9. Identify whether the contract is performance-based and summarize the performance goals in the contract.

D. Architecture and Infrastructure Standards:

10. Does this system meet current Government wide, DoD and Agency interoperability requirements? Describe current compliance levels, target levels, and date target will be accomplished. (Map to agency's technology vision.)
11. Infrastructure Strategy:
12. Are HW requirements included in this funding? If not, how?
13. Transport (Communications and Computing) requirements are met by what means?
14. What are the interdependencies with other acquisitions (such as base level infrastructure requirements.
15. Is this system based on COTS; mix of COTS and custom, or custom only. Provide justification for custom components

E. Financial Basis for Selecting the Project

Provide the Analysis of Full Life-Cycle costs (estimates of total cost of ownership. Include current rebaselining information and basis for rebaselining. APB, and date

Dollars in Millions

Program Year 1	Program Year 2	Program Year 3	Program Year 4-	Program Year N	Total
-------------------	-------------------	-------------------	--------------------	-------------------	-------

Increment 1-N if applicable.

APB Total Resources by FY

Increment 1-N if applicable.

Rebaseline Total Resources by FY

1. Cost/benefit analysis (including return on investment (ROI), replaced system or process savings, recovery schedule and any intangible (mission) returns that benefit the organization/mission but are difficult to quantify.
2. Analysis of alternative options. (Describe preliminary activities if AOA not yet performed.)
3. Underlying assumptions.
4. Estimate of Risks.

Part III: Cost, Schedule, and Performance Goals

- A. Description of Performance based system(s) used to monitor the achievement of, or deviation from, goals during the life-cycle of the planning, acquisition, and use of the project.
 - Baseline Information (FY that project was established in)
 - Management oversight—or the system used to monitor the achievement or deviation from goals during the life cycle of the project. Earned value or alternate approach. (if not earned value what is used?)

	PY-1	PY	CY	BY	BY+1	BY+2	BY+3	BY+3-n
B. Previous Baseline								
Cost Goals (\$M)								
Schedule Goals (milestones)								
C. Baseline								
Cost Goals (\$M)								
Schedule Goals (months)								
D. Current Estimate								
Cost Goals (\$M)								
Schedule Goals (months)								
E. Variance from Baseline Goals								
Cost Goals (\$M)								
Schedule Goals (months)								

IT Capital Investment Justification Exhibit (IT 300b)

Page 5 of 7

- Has this system been rebaselined since initial program establishment. If so, when and why.
- Has this system had milestone slippages since the last president's budget.
- Cost Goals of current approved milestone/phase: Have their been changes (10% from last submission) since the last President's Budget submission?
- What was the basis of the dollar change and how did this impact the milestone/phase/increment objectives?
- Variance from last submission (identify which submission): If there has been a 10% change, discuss variance in G.. below.
- Describe how the CIO/CFO and MDA/IPT will be/has been informed of this variance. (Include when and by what means).
- If there has been a 10% change in the FYDP program, or in any fiscal year, describe and justify the variance.
- If Year 2000 implementation has impacted cost and schedule goals you may describe in the Y2K section attached. Justify variance , if any, particularly those which cause "opportunity costs".
- If the cost variance is caused by contract price/quantity changes, describe.

- ❖ Performance Goals (report for same years/groupings as the Cost and Schedule Goals) —Summarize the Performance goals of the acquisition and show how the assess will help the agency meet its overall mission, strategic goals, and annual performance plan. Summarize the in house and contract work goals here.
- ❖ Describe goal accomplishments.

F. Corrective actions.

- Identify and discuss corrective actions that have been or will be taken if the current cost or schedule estimates have a negative variance.
- Identify the effect the actions will have on cost, schedule and performance.
- Include barriers or risks to meeting funding/cost goals. Describe methods to reduce risk.

1) Schedule Goals:

- Milestones---

Baseline (Milestone) Schedule	Last President's Budget (Month Year)		Current Submission (Month Year)
	Approved	Achieved	Approved/Estimated
Milestone, phase; increment 1-N			

- Since the current approved position, is there a change to the estimate. Describe reason and impact. What process will be used/was used to notify the CIO/CFO and MDA/IPT of this change? (When and by what means?)
- Variance from schedule from last submission (identify which submission). Justify variance.
- Describe Corrective Actions. Include barriers or risks to meeting schedule goals. Describe methods to reduce risks.

- 2) Performance Goals: Summarize the performance goals of the acquisition as stated by the current requirement. Discuss both mission and system performance goals.
- Identify accomplishments to date; describe mission and system performance goals against the milestone schedule, or other schedule.
 - Variance from performance from last submission (identify which submission): Are the performance goals on track since last president's budget submission/last milestone or phase change? Identify any barriers/risks which must be accommodated. Justify variance.
 - Describe corrective actions. Include barriers or risks to meeting schedule goals. Describe methods to reduce risk.

G. Year 2000 Special Information:

Previous President's Budget	Current Submission
--------------------------------	--------------------

- Y2K Phase
 - date of accomplishment
 - funding estimate by phase
 - Estimated time that for Full Y2K Compliance:
 - Has funding been accomplished within project funding? By reprogramming from other IT; other agency dollars? Are their interface or other inter-dependencies for this project? Other assumptions?
 - What opportunity costs in terms of cost, schedule and performance has Y2K requirements effected (if discussed above, so state.)

CHAPTER 19

★July 1998

OTHER SPECIAL ANALYSES

1901 GENERAL**190101 Purpose**

A. This chapter provides instructions applicable to budget formulation and congressional back-up justification for various special interest areas not covered in preceding chapters.

B. The exhibit requirements cover resources crossing DoD appropriations and are generally functional in nature.

C. Areas covered in this chapter are as follows:

Section

- 1902 *Combating Terrorism*
- 1903 Major Range and Test Facility Base
- 1904 Test and Evaluation Funding
- 1905 Financial Management Activities
- 1906 Government Performance and Results Act (GPRA)
- 1908 Federal Credit Programs
- 1909 Other Special Analyses
- 1910 Classifications and Definitions Special Programs Major Force Program 3
- 1911 Overseas Military Banking Program

190102 Submission Requirements

Unless indicated in individual sections of this chapter and submission distribution in Chapter 1, exhibits are required for both the Budget Estimates Submission and for the Congressional Justification/Presentation submission. General guidance with regard to submission requirements is presented in Chapter 1.

190103 Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapter 19 provides additional specific guidance with regard to the material required for these special exhibits.

190104 References

Chapter 1 provides general funding policies, Chapter 3 provides specific policies related to Operation and Maintenance costs, Chapter 4 provides specific policies related to Procurement appropriations, Chapter 5 provides specific policies related to RDT&E, Chapter 6 provides specific policies related to Military Construction appropriations, and Chapter 9 provides specific policies related to the Defense Business Operations Fund. Certain requirements are also addressed in OMB Circular No. A-11

1902 COMBATING TERRORISM**190201 Purpose**

A. This chapter provides instructions applicable to budget formulation for the DoD Combating Terrorism funding requirements included in the DoD Components' budget requests. These instructions apply to all Components and all DoD appropriations.

B. Information on combating terrorism resource levels is required by the Chairman of the Joint Chiefs of Staff to review annually the adequacy of combating terrorism resources proposed by the Components and to determine if any changes are required to meet force protection requirements. The data collected through this reporting process will also be used to comply with OMB requirements to report to Congress on Governmentwide Spending to Combat Terrorism.

190202 Submission Requirements

A. Submission of exhibits is required for the Budget Estimates Submission and an update (using an abbreviated exhibit format) is required for the President's budget submission. Each Component will complete the CbT-1 Exhibit, Combating Terrorism Resources, for the Budget Estimates Submission and for the President's budget submission. The President's budget submission exhibit will be included in the applicable Service and Agency congressional justification book. Specific instructions for completing these exhibits are included in Section 1912.

B. Copy requirements are identified in Chapter 1. In addition, 1 copy of the CbT-1 Exhibit will be provided to the OUSD(C) P/B Operations and Personnel, Room 3D868.

190203 Special Instructions

A. The Joint Staff Deputy Director for Combating Terrorism (J-34) will participate with representatives of the OUSD(C), ODPA&E, and OMB in the review of all budget submissions for combating terrorism to ensure that the DoD combating terrorism and force protection programs are funded adequately.

B. The ASD(C3I) will validate tactical counterintelligence resources identified by the Components and advise the OUSD(C) P/B Operations and Personnel Directorate that reported resources are accurate. Additionally, the ASD(C3I) will prepare a separate CbT-1 Exhibit to report DoD Foreign Counterintelligence Program (FCIP) resources. The ASD(SO/HA) will prepare a separate CbT-1 Exhibit to report DoD counterterrorism resources. The ASD(C3I) and ASD(SO/HA) will provide copies of their respective exhibits to the OUSD(C) P/B Operations and Personnel Directorate in Room 3D868. Additionally, these exhibits will be included in the appropriate counterintelligence and counterterrorism congressional justification books.

1903 MAJOR RANGE AND TEST FACILITY BASE**190301 Purpose**

A. This Chapter provides instructions applicable to budget formulation for the DoD Major Range and Test Facility Base (MRTFB) funding requirements included in the DoD Components' budget requests. The exhibit formats submitted in support of the Budget Estimates Submission (BES) will be the same as those submitted to the Director, Test, Systems Engineering, and Evaluation, USD(A&T) (DTSE&E) in support of the POM estimates.

B. These instructions apply to the major ranges and test facility activities included in the MRTFB:

ARMY:

Yuma Proving Ground (YPG)
White Sands Missile Range (WSMR)
Kwajalein Missile Range (KMR)
Dugway Proving Ground (DPG)
Aberdeen Test Center (ATC)
High Energy Laser Systems Test Facility (HELSTF)

NAVY:

Naval Air Warfare Center-Aircraft Division (NAWCAD)
Atlantic Undersea T&E Center (AUTEC)
Naval Air Warfare Center-Weapons Division (NAWCWD)
Atlantic Fleet Weapons Training Facility (AFWTF)

AIR FORCE:

Eastern Space & Missile Center (ESMC)
Western Space & Missile Center (WSMC)
Arnold Engineering Development Center (AEDC)
Air Force Development Test Center (AFDTC)
Air Force Flight Test Center (AFFTC)
46th Test Group, Holloman AFB NM
Air Warfare Center Range, Nellis AFB (AWC)

DEFENSE INFORMATION SERVICESAGENCY

Joint Test Interpretability Center (JTIC)

C. The DTSE&E is charged with administering OSD responsibilities for the MRTFB. Modifications to these instructions, requests for deviations from their provisions, or requirements for their clarification or applicability should be directed to and coordinated with DTSE&E and OUSD(C) Program/Budget.

D. Budget estimates will be developed in accordance with guidance contained in Chapter 1 and the various chapters for appropriations and accounts.

E. It is extremely important that the data reported in the MRTFB exhibits be consistent with the funding included in the Component's Research, Development, Test & Evaluation (RDT&E) Exhibit R-1 project listing and in the Descriptive Summary as well as other budget submission material.

190302 Submission Requirements

Copies of the following exhibits will be submitted in support of the Budget Estimates Submission only for each major range and test facility. Copy requirements are identified in Chapter 1. Exhibit formats are provided in Section 1912.

- A. Exhibit MRTFB-1, (Activity Title) Financial Summary.
- B. Exhibit MRTFB-2 Set, (Activity Title) Financial Details.
- C. Exhibit MRTFB-3 Set, (Activity Title) Improvement and Modernization Analysis.

190303 Preparation of Material

Budget estimate data submitted by each DoD Component for the MRTFB will be assembled separately and identified by a cover sheet specifically entitled "Major Range and Test Facility Base (Army/Navy/Air Force/DISA) Program Budget Estimate."

190304 Special Instructions

The DTSE&E will participate with representatives of the OUSD(C), DOT&E, and OMB in the review of all budget submissions for the major ranges and test facilities to insure that:

- A. Excess capability is not being unnecessarily maintained in the MRTFB.
- B. Unnecessary duplication does not exist among DoD Component assets.
- C. Test facility capability needed in the future is being planned and supported.
- D. All new major test facilities are thoroughly coordinated prior to their approval to reflect the needs of all DoD components.

1904 TEST AND EVALUATION FUNDING**190401 Purpose**

A. This Chapter provides instructions applicable to budget formulation for the Test and Evaluation Budget Estimate, T&E-1, as shown in Section 1912, needed for review and analysis of Test and Evaluation (T&E) funding requirements included in the DoD Components' requests. The instructions contained here specify the requirements for budget submission.

B. The USD(A&T) Director, Test, Systems Engineering, and Evaluation (DTSE&E) and the Director, Operational Test and Evaluation (DOT&E), are charged with oversight of the DoD T&E resources and funding of T&E by each major DoD program. Modifications to these instructions, requests for deviations from their provisions, or requirement for their clarification or applicability should be directed to and coordinated with USD(A&T), DTSE&E, DOT&E and OUSD(C) Program/Budget.

190402 Submission Requirements

A. *Each DoD Component will, for the Budget Estimate Submission only, complete an Exhibit T&E-1, Test and Evaluation, (provided in Section 1912) for (1) each Major Defense Acquisition Program (MDAP) listed in Table C-1 of the latest Program Objective Memorandum (POM) Preparation Instructions (PPI), (2) each non-MDAP Special Interest Program listed in Table C-2 of the PPI, and (3) for additional programs currently under test oversight that are listed in the section, "Test and Evaluation Planning Information" in Tab C, "Modernization and Investment" in the latest PPI.*

B. Copy requirements are identified in Chapter 1. In addition, 2 copies of the T&E-1 Exhibit will be provided to DTSE&E, Room 3E1060, to DOT&E, Room 3E333, and to OUSD(C) P/B Investment, Room 4B915. Specific instructions for completion of the T&E-1 Exhibit are included in Section 1912.

190403 Preparation of Material

Data submitted by each DoD component in support of estimates for all weapons systems will be assembled separately and identified by a cover sheet specifically entitled "Test and Evaluation (Army, Navy, Air Force, Defense Agencies) Budget Estimate."

190404 Special Instructions

The USD(A&T) will participate with representatives of OUSD(C), DOT&E, DUSD(Environmental Security), ASD(Economic Security), and OMB in the review of all budget submissions for T&E to ensure that:

- A. Resources required for the test and evaluation of the MDAP and Special Interest Programs, as identified in the Test and Evaluation Master Plan (TEMP), are adequately funded.
- B. Unwarranted test capability is not being maintained at private industry facilities.
- C. Unwarranted duplication does not exist among DoD Component assets and private industry.
- D. Test facilities and capabilities required are adequately funded and supported.
- E. All new major test facilities are approved by the Defense Test and Evaluation Steering Group to ensure they are warranted and meet the needs of all DoD components.

1905 FINANCIAL MANAGEMENT ACTIVITIES**190501 Financial Management Activities**

A. This Section provides guidance for presenting budget estimates related to Financial Management Activities. It is designed to fulfill the requirements of Section 40, Data on Financial Management Activities, of OMB Circular A-11.

B. Information on resources (budget authority and full-time equivalent (FTE) employment data) for financial management activities is required for oversight and review of component resources devoted to these activities and to ensure that their use is in accordance with the government-wide 5-year financial management plan prepared by OMB as required by the Chief Financial Officers Act of 1990.

C. *Submission of the exhibit 40, Report on Resources for Financial Management Activities, is required for the Budget Estimates Submission and an update is required for the President's budget submission (Congressional Justification/ Presentation.) This exhibit should meet the definitions/descriptions contained in Section 40 of OMB Circular A-11.*

D. Copies are to be provided directly to the Office of the USD(Comptroller), Office of the Deputy Chief Financial Officer (ODCFO), rm 3E831 (Commercial (703)693-6503; DSN 223-6503).

1906 GOVERNMENT PERFORMANCE AND RESULTS ACT (GPRA)**190601 Purpose**

The purpose of this section is to establish basic guidance for incorporation of GPRA requirements into the budget review process and budget presentation to the Congress.

190602 Submission Requirements

The Government Performance and Results Act (GPRA) requires the Department to submit a strategic plan (updated at least once every three years), an annual performance plan, and a performance report that corresponds to each performance plan. DoD has prepared corporate level goals, to be validated/updated annually, which will appear in the Defense Planning Guidance (DPG). During the POM/program review an assessment of how well the Department is meeting the goals will be conducted and, performance measures that indicate progress towards meeting the corporate level goals will be selected/validated. Additional guidance will be published by the Office of the Under Secretary of Defense (Comptroller), Director for Program Analysis and Evaluation.

1907 NOT USED

1908 FEDERAL CREDIT PROGRAMS**190801 Purpose**

This Section provides guidance for presentation of annual budget estimates for Federal credit programs. Credit programs in the Department of Defense consist of direct loans and guaranteed loans.

190802 Submission Requirements

A. Military Departments and Defense Agencies, as appropriate, will submit to OSD in support of Federal credit programs all materials required by, and in the format specified in, OMB Circular No. A-11, Section 33. Copies of appropriate exhibits will be submitted in support of the Budget Estimates Submission only.

B. Definitions: The following definitions apply to the credit account structure. Agencies should refer to OMB Circular A-34 and A-11 for a more detailed explanation of terminology and budget instructions.

1. A direct loan is a disbursement of funds by the Government to a non-Federal borrower under a contract that requires repayment of such funds with or without interest. The term includes the purchase of, or participation in, a loan made by a non-Federal lender. It also includes the sale of a Government asset on credit terms of more than 90 days duration.

2. A direct loan obligation is a legal or binding agreement by a Federal agency to make a direct loan when specified conditions are fulfilled by the borrower.

3. A loan guarantee is any guarantee, insurance, or other pledge with respect to the payment of all or part of the principal or interest on any debt obligation of a non-Federal borrower to a non-Federal lender, but does not include the insurance of deposits, shares, or other withdrawal accounts in financial institutions.

4. A loan guarantee commitment is a legally binding agreement by a Federal agency to make a loan guarantee when specified conditions are fulfilled by the borrower, the lender, or any other party to the guarantee agreement.

5. Financing Account is the non-budget account or accounts associated with each credit program account for post-1991 direct loans or loan guarantees. It holds balances, receives the subsidy cost payment from the credit program account, and includes all other cash flows to and from the Government. Separate financing accounts are required for direct loans and loan guarantees.

6. Modifications are any Government action that alters the estimated subsidy cost, compared to the estimate contained in the most recent budget submitted to Congress, of an outstanding direct loan (or direct loan obligation) or an outstanding loan guarantee (or loan guarantee commitment). Actions permitted within the terms of an existing contract are the only exception. Modifications to pre-1992 direct loans and loan guarantees are included in this definition, as well as modifications to post-1991 direct loans and loan guarantees. For pre-1992 direct loans and loan guarantees, the loan asset or guarantee liability will be transferred from the liquidating account to the appropriate financing account. A one-time adjusting payment will be made between the liquidating and financing accounts. The subsequent cash flows will be recorded in the financing account.

7. Program Account is the budget account into which an appropriation to cover the subsidy cost of a direct loan or loan guarantee program is made and from which such cost is disbursed to the financing account. Usually, a separate amount for administrative expenses is also appropriated to the program account. Each program account is associated with one or two financing accounts, depending on whether the program account makes both direct loans and loan guarantees. The program account pays subsidies to the financing account for post-1991 direct

loans and loan guarantees, for modifications, and for reestimates. These subsidy payments are counted in calculating budget outlays and the deficit.

8. Subsidy is the estimated long-term cost to the Government of a direct loan or loan guarantee, calculated on a net present value basis, excluding administrative costs. In net present value terms, it is the portion of the direct loan disbursement that the Government does not expect to recover, or the portion of expected payments for loan guarantees that will not be offset by collections. The subsidy may be for post-1991 direct loan obligations or loan guarantee commitments, for reestimates of post-1991 loans or guarantees, or for modifications of any direct loans or loan guarantees.

9. Reestimates are the recalculation of the subsidy cost of each risk category within the cohort of direct loans or guaranteed loans. Reestimates must be made at the beginning of each fiscal year following the year in which the initial disbursement was made and as long as the loans are outstanding, unless a different plan is approved by OMB.

10. Cohort - Direct loans obligated or loan guarantees committed by a program in the same year, even if disbursements occur in subsequent years or the loans are modified. Modified pre-1992 direct loans will constitute a single cohort; modified pre-1992 loan guarantees will constitute a single cohort. For loans subsidized by no-year or multi-year appropriations, the cohort may be defined by the year of appropriation or the year of obligation. The Program and Financial Control Directorate of OUSD(C) P/B will contact OMB for proper determination.

C. Materials required by this Section will be provided for credit programs for Navy Federal Financing Bank ship loans (pre-1992) in the Defense Business Operations Fund using the simplified pre-1992 guidelines. For the DoD Family Housing Improvement program and for any additional accounts involved in direct loans or guaranteed loans the post-1991 guidance currently contained in OMB Circular A-11 must be followed by federal agencies. OUSD(C) will include post-1991 credit program requirements on specific programs in the annual budget call submission memorandum.

D. Copies of these materials are required as part of the September submission in the quantities identified in Chapter 1.

1909 OTHER SPECIAL INTEREST AREAS**190901 Purpose**

This Chapter prescribes instructions for the preparation and submission of budget justification backup data for special areas in which the Congress or OMB has expressed interest. Most of these requirements affect more than a single appropriation.

190902 Submission Requirements

A. Data in the exhibit formats provided in Section 1912 are required for the following program areas:

- PB-14 Functional Transfers*
- PB-15 Advisory and Assistance Services*
- PB-16 Legislative Proposals*
- PB-17 Employee Relocation Expenses*
- PB-18 Foreign Currency Exchange Data*
- PB-19 Contract Reporting by Appropriation*
- PB-22 Management Headquarters*
- PB-24 Professional Military Education*
- PB-25 Host Nation Support*
- PB-28 Funds Budgeted for Environmental Quality (Non-ER, Army, Navy, AF or Defense-wide)*
- PB-28A Funds Budgeted for Environmental Security Technology*
- PB-41 Administrative Motor Vehicle Operation*
- PB-42 Competition and Privatization (formerly Commercial Activities)*
- PB-50 Child Development, School Age Care (SAC), Family Centers, and Family Advocacy Programs*
- PB-52A Aeronautics Budget*
- PB-52B Space Budget*
- PB-53 Budgeted Military and Civilian Pay Raise Amounts*
- PB-54 Civilian Personnel Hiring Plan*
- PB-55 International Military Headquarters*

B. Definitions are to be identical to those most recently used in furnishing data to the Congress.

C. The PB-24 is required with the congressional justification/presentation only. All other exhibits are required for the Budget Estimates Submission and the congressional justification/presentation submission. Copies of exhibits are required with the submissions in the quantities identified in Chapter 1.

**1910 CLASSIFICATIONS AND DEFINITIONS – COMMAND, CONTROL, COMMUNICATIONS,
AND INTELLIGENCE PROGRAMS****191001 Purpose**

The Office of the Director for Program Analysis and Evaluation maintains a listing of program elements (PEs) in the Future Years Defense Program (FYDP) making up C³I programs. For details, please contact the POC for the FYDP Structure Management (FSM) system. The FSM system and its Web site are described in FMR Volume 2A, Section 010702.

1911 OVERSEAS MILITARY BANKING PROGRAM (OMBP)**191101 Purpose**

This Section provides guidance for the preparation and submission of budget estimates for the funding of the contract(s) with a financial institution(s) in support of the Overseas Military Banking Program (OMBP). It identifies the budgeting requirements necessary to fund the OMBP contract(s) awarded and maintained by the Under Secretary of Defense (Comptroller) for the participating Military Departments (Army, Navy and Air Force). The budget estimates for the contract(s) consists of Operation and Maintenance, Procurement and other resources that support the OMBP.

191102 Submission Requirements

A. The three sponsoring Military Departments shall budget for OMBP contract costs applicable to that Department. The sponsoring Military Departments shall transfer funding to the Washington Headquarters Services upon receipt of their appropriation for the fiscal year. The three Military Departments shall submit required budget estimates in the format specified as the "Overseas Military Banking Program (OMBP)" (Exhibit OMBP-01), and as modified by OUSD (Comptroller) annual guidance.

B. Submissions shall be consistent with any additional guidance provided by the Office of the Deputy Chief Financial Officer.

C. Exhibits shall be prepared and submitted by each Military Department. Exhibits shall be prepared to show prior year, current year, and budget years (19BY1 and 19BY2) in the format specified as "Overseas Military Banking Program (OMBP)" (Exhibit OMBP-01).

D. An original and five copies of the Military Department's OMBP submission are required as part of the Budget Estimates submission and for the congressional Justification/Presentation (President's budget) submission.

E. Copies are to be provided directly to the Defense Finance and Accounting Service (DFAS), Code – HQ/F, 1931 Jefferson Davis Hwy, Arlington, VA, 22240-5291.

1912 OTHER SPECIAL ANALYSES SUBMISSION FORMATS**191201 Purpose**

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

(Page 3 of 6)

INSTRUCTIONS

EXHIBIT CBT-1, COMBATING TERRORISM

The CbT-1 is the exhibit used to identify the Department's combating terrorism resources, dollars and personnel. It consists of tabular and narrative data.

1. **Scope:**

This exhibit will report only those resources (including civilian and military pay) associated with DoD's Combating Terrorism Program. This program consists of the following activities: physical security equipment, physical security site improvement, physical security management and planning, physical security forces and technicians, law enforcement, security and investigative matters, combating terrorism RDT&E, counterintelligence, and counterterrorism. These functional categories are described below.

2. **Definitions:**

A. **Physical Security Equipment** - Any item, device, or system that is used primarily for the protection of assets, personnel, information, or facilities to include alarms, sensors, protective lighting and their control systems and the assessment of the reliability, accuracy, timeliness and effectiveness of those systems, such as (but not limited to): exterior surveillance and/or intrusion detection systems; lighting systems; access controls and alarms systems; residential security equipment; equipment for executive protection, to include added doors, increased ballistic protection at offices/residences, personal body armor, and armored vehicles; and detection devices.

B. **Physical Security Site Improvements** - Any facility improvements (using O&M or MILCON funding) or new construction whose purpose is to protect DoD assets, personnel, or information to include walls, fences, barricades, or other fabricated or natural impediments to restrict, limit, delay or deny entry into a Defense installation or facility, such as (but not limited to): installation perimeter barriers, vehicle barriers, and interior barriers; safe havens; evacuation facilities; and surveillance platforms.

C. **Physical Security Management and Planning** - Personnel who manage physical security programs, resources, and assets such as, but not limited to, headquarters staff.

D. **Security Forces/Technicians** - All personnel and operating costs associated with *protective forces* whose primary or supporting mission is to safeguard assets, personnel or information. Included, but not limited to, are costs for: salaries, overtime, benefits, materials, supplies, travel, support equipment, facilities, training, communications equipment, and management, for the personnel engaged in the following activities such as (but not limited to): dedicated response forces and security forces; locksmiths; perimeter, installation or facility access control; inspection and maintenance of barriers and security system components; antiterrorism training for security forces; and antiterrorism awareness programs and training.

E. **Law Enforcement** - All personnel and operating costs associated with law enforcement to include, but not limited to, salaries, overtime, benefits, material and supplies, equipment and facilities, vehicles, helicopters, training, communications equipment, and management, such as (but not limited to): protective service details, including advance work; response forces; and military police.

F. **Security & Investigative Matters Category** - Includes Defense criminal investigative resources, conduct of vulnerability assessments (periodic high level reviews and physical security assessments), security and intelligence activities, and any cross-discipline security functions which do not easily fit into other security categories, such as (but not limited to): terrorism investigations; executive antiterrorism training; surveillance and countersurveillance teams; protective service details, including advance work; route surveys; and antiterrorism awareness programs and training.

Exhibit CbT-1 Combating Terrorism
(Page 4 of 6)

G. **Combating Terrorism RDT&E Category** - Includes any RDT&E resources expended in the area of physical security or counterterrorism.

H. **Counterintelligence** - Includes personnel and funding associated with Tactical Intelligence and Related Activities (TIARA) and National Foreign Intelligence Program (NFIP) counterintelligence (CI) activities. These activities include terrorism investigations, surveillance and countersurveillance teams, terrorism analysis and production, force protection source operations, threat assessments, terrorism collection, route surveys, and intelligence staff support to deployed forces. Only those counterintelligence resources directly supporting force protection/combating terrorism activities are to be reported in this resource summary. Army and Marine Corps tactical CI resources and Army Security and Intelligence Activities CI resources will be reported by the Army and Marine Corps. The Director, Counterintelligence, ASD(C3I) will separately report all DoD Foreign Counterintelligence Program (FCIP) NFIP resources that map to the Force Protection sub-mission area in the NFIP Capabilities, Programming, and Budgeting System (CPBS).

I. **Counterterrorism** - Includes offensive measures taken to prevent, deter and respond to terrorism. The sensitive and compartmental programs of counterterrorism (CT) will be reported separately in the appropriate classified program submissions. The ODASD(SO&HA) is responsible for consolidating and reporting all combating terrorism CT resources.

3. Entries:

A. **General:** DoD Components should prepare a separate summary for each applicable appropriation. Each summary will report resources (funding and personnel) by the combating terrorism functional categories described above.

B. **Appropriation Summary:** For the O&M, Procurement, and RDT&E appropriations, report the total combating terrorism funds by budget activity. For the Military Personnel and Military Construction appropriations, report resources at the appropriation level only. For DWCF accounts, report resources at the Working Capital Fund business area.

C. **Financial Summary Section:**

- (1) Military Personnel. Report resources by functional category at the appropriation level.
- (2) Operation and Maintenance. Report resources by functional category and budget activity.
- (3) Procurement. Report resources by functional category, budget activity, and budget subactivity (P1 line item)
- (4) RDT&E. Report resources by functional category, budget activity, and budget subactivity (program element (PE)/R-1 line item).
- (5) Military Construction. Report resources by functional category, State/Country, and project title.
- (6) Defense Working Capital Fund. Report resources by working capital fund business area level.

D. Personnel Summary Section:

(1) For each applicable appropriation, civilian personnel full-time equivalents (FTEs) and military (active and reserve component) end strength should be reported by functional category. If an appropriation does not finance any personnel resources, enter “None” on the Personnel Summary line as follows:

II. Personnel Summary: None.

(2) At a *minimum*, personnel in the following generic Military Occupational Series (MOS) and civilian job series should be reported as full-time Combating Terrorism assets – even if these persons spend only a portion of their time on combating terrorism activities. Additionally, personnel not in these MOS’s and/or job series who are assigned permanently or detailed to force protection offices and who spend at least 51% of their time directly supporting combating terrorism activities should be reported on this exhibit.

(a) MOS to be reported: Military Police, Physical Security, Criminal Investigator, Interrogator, Counterintelligence Officer, Military Investigations, Dog Handler, Kennel Master, Patrol Dog Handler, Security Guard, Locksmith, Master at Arms, Law Enforcement, Crime Prevention, Accident Investigator, Security Police, Security Policy, Nuclear Weapons Custodian, Interpreter/Translator, and Special Investigations.

(b) Civilian Job Series to be reported: Physical Security Manager (GS-0080), Civilian Police (GS-0083), Security Guard (GS-0085), Physical Security Manager (GS-0086), Locksmith (GS-48004), General Inspection and Investigation (GS-1801), Compliance Inspection (GS-1802), General Investigation (GS-1810), and Criminal Investigation (GS-1811).

(c) Personnel data associated with classified combating terrorism programs will be reported as follows: Army and Marine Corps tactical counterintelligence resources and all Army Security and Intelligence Activities counterintelligence resources will be reported in the CbT-1 exhibit by the applicable Components. The ASD(C3I) will separately report all DoD Foreign Counterintelligence Program (FCIP) resources using the CbT-1 format. All special operations counterterrorism personnel data will be reported by the ASD(SO/HA) using the CbT-1 format.

E. Description of Major New Starts/One-Time Upgrades/Program Decreases:

For BY1 and BY2, provide a bulletized listing of major new starts (new efforts that will continue or recur in future years), one-time purchases or upgrades, and program decreases (termination or transitioning of efforts). Following each statement, the dollar amount and appropriation(s) and (when applicable) personnel resources associated with the change or new effort should be reported in parentheses. The intent of this section is to identify key combating terrorism initiatives contained in each year of the budget submission and to describe any significant changes between fiscal years.

Exhibit MRTFB-1 Installation Financial Summary

INSTRUCTIONS
EXHIBIT MRTFB-1, MAJOR RANGE TEST FACILITY BASE

The MRTFB-1 is the basic, central exhibit for the Major Range Test Facility Base budget estimate submission and consists of tabular and narrative data. All other exhibits are related to it.

This exhibit reflects total funds from all sources to be expended at each MRTFB activity. The instructions for preparation are in the following paragraph and definitions. For each line entry, a fully comparable figure will be entered in each of the five columns.

Definitions:

Institutional Funding - This category should reflect all of the funding *to be expended* to support the MRTFB activity's mission, whether the funds are directly allocated to the activity or whether they are expended by another activity in support of the MRTFB.

Institutional (P.E. _____) - This entry denotes the funding which each Component provides directly to the activity for ongoing effort which cannot be ascribed to users of the activity. The financing program element number is to be entered in the parenthesis.

In-House Effort - This line reflects that amount of the activity's T&E Institutional funding which is devoted to supporting efforts conducted by government personnel at the activity.

Contractor Effort - Indicates the amount of Institutional funding expended by any contractor in support of the activity's mission, either on-site or elsewhere.

Base Operating Support (BOS), Real Property Maintenance Activities (RPMA) and Minor Construction - The amounts shown in these lines should reflect that funding either paid by the MRTFB activity for their share of these costs to a host activity or the costs that would be allocated to the MRTFB activity if they were required to reimburse their BOS and RPMA costs to the host activity. For those MRTFB activities which are host activities, the costs in these categories should reflect the share of BOS, RPMA and minor construction that would be allocated to only the MRTFB activity if costs were distributed to all activities at the installation. Reflecting these costs as part of the institutional costs at the MRTFB is intended to more completely reflect the costs of the MRTFB mission and to make the activities more comparable across the Services. If additional categories are required to reflect the total "institutional" funding that is required for the activity, such as Environmental Compliance, additional lines should be added. Provide the program element number for each entry.

Military Personnel - This category should also reflect the amount of funding that would be required to support the military personnel which are primarily assigned to the MRTFB activity.

(page 2 of 4)

Improvement and Modernization (I&M) - This section should reflect all funding provided to the MRTFB activity for improvement and modernization efforts.

Minor I&M - This category should reflect funding provided directly to the MRTFB activity for I&M projects which are less than \$2 million in any one fiscal year and less than \$10 million in cumulative funding. For the RDT&E-funded activities, the minor I&M funding should be a portion of only the MRTFB program elements. The funding needs to be identified by specific program element. For the O&M-funded activities, the minor I&M funding should be identified by P-1 line item title. If there is minor I&M in more than one program element or more than one P-1 line item, a summary of the minor I&M funding should be provided on the MRTFB-1 with a detailed listing provided on the MRTFB-3a. Any funding provided by users for minor I&M projects should be included as direct (user) funding.

Major I&M - This funding category should include all major I&M projects funded by RDT&E or procurement appropriations, including those funded by users or by the Central T&E Investment Program. Major I&M projects are those which exceed \$2 million in any single fiscal year or \$10 million cumulatively. The MRTFB-1 should reflect a total for all major I&M projects, regardless of funding source. The MRTFB-3A, I&M Funds, Major I&M Projects, requests a listing of each of the projects by appropriation and program element or P-1 line item that adds to the total on this line.

Direct (User Funding) - This line is for header purposes only, to denote the section dealing with funds from activity customers for MRTFB activity mission efforts.

Parent Service - Indicates the funds which come to the activity from users who are from within the same service but distinguished from the institutional base.

Other DoD - Indicates those customers within the DoD but not from the same service as the activity.

Other U.S. Government - Indicates those government customers from other than DoD activities.

FMS - Indicates those customers from FMS cases.

Foreign Government - Indicates those customers from foreign governments for other than FMS cases.

Commercial - Indicates funds received from commercial customers.

Total Institutional and Direct (I&D) - This line provides the sum of the amounts in the Total Institutional and Total Direct lines.

% Direct to Total I&D (Less I&M) - This line provides the percentage which Total Direct funding constitutes of the Total Institutional (less I&M) and Direct funding.

Other Funds - This line is for header purposes only, to denote all other activity financing that does not fall in the I&D categories. The funding included in this category should be strictly funding received by the MRTFB for efforts other than those associated with the MRTFB mission. These categories should only be used, therefore, when the MRTFB is a host activity and receives funding, such as BOS, RPMA or Family Housing funds, to support *other* activities. All funding received in support of the MRTFB activity should be included in the Institutional, I&M or Direct Funding categories above. If any funding is reported as "Other" funding in this category, a separate listing should be provided that identifies the "Other" funding by appropriation and program element or customer.

(Page 3 of 4)

Total MRTFB Activity - This line reflects the sum of the amounts in the Total I&D and Total Other Funds lines. This should represent the total amounts supporting the activity to perform its MRTFB mission and to provide common services to *others*, if appropriate. These amounts need not flow through the activity itself but should reflect all funding associated with supporting the MRTFB.

The amounts reflected in the lines above are to be directly relatable to those amounts included in the appropriation submissions of budget estimates to OSD/OMB or the appropriation submissions of apportionment requests to OSD.

DoD Component
(Activity Title) Element of Expense Listing

For each of the Institutional entries; e.g., Institutional Funding, Base Operating Support, and Real Property Maintenance; and the Total Direct entry on Exhibit MRTFB-1, provide a subitem listing by element of expense, as shown below.

		(\$ Millions)

17	Other Expenses					

Exhibit MRTFB-2a Element of Expense Listing

MRTFB ACTIVITY SCHEDULE OF INCREASES & DECREASES

Provide a schedule of increases and decreases, as shown below, covering year-to-year changes in the total Institutional entry on Exhibit MRTFB-1 to include changes in workyears, maintenance and repair and other items with changes in excess of \$1 million. Ensure that the narrative explanations are each unique to changes in only one entry on the MRTFB-1. Specifically, there should be at least one increase and/or decrease statement for each entry on the MRTFB-1 exhibit but may be more than one increase and/or decrease for any or all entries on the MRTFB-1.

	<u>FY PY</u> <u>Actual</u>	<u>FY CY</u> <u>Pres. Budget</u>	<u>FY CY</u> <u>Approp.</u>	<u>FY BY1</u>	<u>FY BY2</u>

4. FY BY to FY BY+1.					
a. Inflation					
b. Payraise					
c. (Several sentence description/justification of each major item of increase <u>and</u> decrease.)					
etc.					

Exhibit MRTFB-2b MRTFB Activity Schedule of Increases & Decreases

DoD Component
(Activity Title) Workyears

Submit a numerical summary of military, civilian, and contractor workyears in the format shown below. Civilian and contractor workyears should be divided into those that are institutionally funded and those that are reimbursed by users (direct). Changes in workyears between years and among categories should be addressed in the MRTFB-2b, Schedule of Increases and Decreases. The workyears reported in the Institutional category should reflect only those workyears funded from the institutional program element for the activity. Workyears funded by other “Institutional” funding, such as BOS or RPMA should be reported in the Other category. Workyears funded by sources identified on the MRTFB-1 as “Other Funds” should not be reflected on this exhibit.

DoD Component
(Activity Title) Source of Direct Funds
(\$ Millions)

This exhibit shows by major program, the sources of the Direct Funds contained in Exhibit MRTFB-1, Direct (User) Funding. Provide a subtotal for each appropriation or category shown on the MRTFB-1 Exhibit. For the significant customer appropriations, such as RDT&E or Procurement accounts, provide a subtotal by budget activity. Customers in the FMS, Foreign Government and Commercial categories need to be identified separately by individual customer. The All Other category should not exceed approximately 10% of the Total Direct Funding on this Exhibit and on the MRTFB-1. For the RDT&E appropriations, a breakout by Program Element is mandatory.

<u>Appn</u>	<u>Program</u>	<u>PE</u>	<u>FY PY-1</u>	<u>FY PY</u>	<u>FY CY</u>	<u>FY BY1</u>	<u>FY BY2</u>

<u>Appn</u>	<u>PE</u>	<u>Project Title</u>	<u>Total</u> <u>Prior Years</u>	<u>PY</u>	<u>CY</u>	<u>BY1</u>	<u>BY2</u>	<u>Cost to</u> <u>Complete</u>	<u>Total</u> <u>Est. Cost</u>
-------------	-----------	----------------------	------------------------------------	-----------	-----------	------------	------------	-----------------------------------	----------------------------------

This Exhibit has been selected for separate analysis due to its importance in determining the capability of an activity to meet future test and evaluation requirements. Provide an I&M priority listing for FY PY, CY, BY1, and BY2 for all funding at the MRTFB activity for I&M. Minor I&M should be listed in the first line(s) of this exhibit by each program element funding minor I&M at the activity. For the major I&M (greater than \$ 2 million in any single fiscal year or greater than \$ 10 million cumulatively), each project should be listed in priority order. Ensure that the listing includes all I&M anticipated for the activity, whether the funding source is the parent Service T&E program element(s), customer funding or CTEIP funding. Show cumulative funds spent for each project prior to the PY and total cost to completion after BY2, if applicable.

 (\$ Millions)

<u>Appropriation</u>	<u>Program Element</u>	<u>Title</u>	<u>Programmed Fiscal Year</u>	<u>Estimated Cost at Completion</u>	<u>Programmed Funds</u>
----------------------	------------------------	--------------	-----------------------------------	---	-----------------------------

For all the Military Construction and Base Closure and Realignment projects that are programmed to support the MRTFB mission at the activity and are funded in either the prior year, current year, budget year 1 or budget year 2 of the budget estimates submission, provide the summary data indicated above. The total projects listed on this exhibit will match the MRTFB-1 Military Construction and BRAC funding included in the Improvement and Modernization category.

Exhibit MRTFB-3b, Military Construction and BRAC Projects

DoD Component
(Activity Title) Improvement and Modernization Funds Detail
Improvement and Modernization Projects
(\$ Millions)

For any item exceeding \$2 million in any year or cumulative funding of \$10 million, provide summary data that includes the following. Indicate potential benefits, cost savings and capability improvements. Quad charts prepared for TERIB reviews can be used for the BES submission as long as the requested information is provided.

Project Title

- (1) Description - Concise description of what is to be acquired, where it will be located, its relationship to other upgrades at this facility or other DoD facilities. Identify whether the effort is required to provide an enhanced capability or whether it modernizes an existing capability.
- (2) Requirements/Payoffs - Specify the operational requirement being addressed by the project. If it is required to provide an enhanced capability, list the programs that will benefit and provide the required operating date. If required as an improvement to an existing capability, provide a payback date and the schedule for retirement of existing equipment that will become obsolete as a result of the upgrade. Discuss what other alternatives and what cross-service opportunities were considered in the review of this requirement.
- (3) Tests to be Supported - List the programs and tests to be supported by the I&M project. Indicate the acquisition category for each program that will be using the upgraded equipment or facility.
- (4) Schedule - Provide the critical milestones for the project. Include the approval date of the operational requirements document, the date of TERIB review, the contract award dates, IOC and FOC.
- (4) Funding Profile - Provide total funding plan, including all funding sources, for development through FOC. Funding should be consistent with that identified in the MRTFB-3a, Summary of I&M Projects., and with that included in the other R&D BES exhibits.

Instructions for
Exhibit T&E-1, Test and Evaluation

1. Purpose.

A. The Exhibit T&E-1 is the Test and Evaluation (T&E) exhibit for the budget estimate submission and the President's budget request. It consists of tabular and narrative data related to the funding for T&E of the Major Defense Acquisition Programs (MDAP) as specified in DoD 5000.1 and Special Interest Programs identified in the Program Objective Memorandum Instructions, Table C-1.

B. This exhibit reflects total funds included in the above specified systems/programs for T&E regardless of what organization performs the T&E. It does not include funds in T&E programs, such as MRTFB direct funding, used to provide services on a nonreimbursable basis to weapon systems.

2. Entries.

A. Program Description: For each Program Element/Project describe any major changes from the most recent President's budget request or the most recently approved TEMP and the reasons for the changes. Divide the discussions into Developmental Test and Evaluation (DT&E), Operational Test and Evaluation (OT&E), and Live Fire Test and Evaluation (LFT&E).

B. Program Funding (by Appropriation and Program Element/Project)

(1) Total RDT&E: Show total RDT&E funding for this program with a line for each Program Element/Project showing the Program Element/Project Codes (T&E portion included in these amounts will also be broken out below under T&E Funding.)

(2) Total Procurement: Show total Procurement funding for this program showing each Procurement Line Number amount. (T&E portion included in these amounts will also be broken out below under T&E funding.)

(3) T&E Funding Included Above (May be a combination of RDT&E and Procurement):

(a) DT&E: (Total of Contractor and Government *and Targets and Threat Simulators* funding below)

Contractor

T&E Facilities/Instrumentation: Provide all funding for provision of T&E capability through investments in plant and equipment at contractor facilities. *As necessary, provide the rationale for funding facilities at contractor installations rather than at Government activities in the program description section of this exhibit.*

T&E Costs: Provide funding for performing T&E at contractor facilities (exclude investment funding included above.)

Government

T&E Facilities/Instrumentation: Provide all funding for investments in T&E capability for plant and equipment at government facilities. Indicate whether such capabilities exist elsewhere, why duplication is warranted (if that is the case), and whether the requirement for this investment has been endorsed through the Joint Commanders Group (Test and Evaluation) review.

T&E Costs: Provide funding for performing T&E at Government facilities. These costs include all funding provided as reimbursable orders to Major Range and Test Facility Bases and other installations.

(b) Targets and Threat Simulators: Provide all funding identified for targets and threat simulators.

(c) OT&E: Provide all funding for conducting OT&E. Provide information requested in paragraph 2.b.(3)(a) above for new facilities, if applicable.

(d) LFT&E: Provide all funding for conducting LFT&E. Provide information requested in paragraph 2.b.(3)(a) above for new facilities, if applicable.

C. Test Articles: Provide the number of test articles to support the T&E planned for the system by year of delivery of the article. Multi-use articles should be identified as such. *Components, subsystems, and surrogates should be separated from complete, combat-configured articles.*

(1) DT&E: Show number of test articles by year of delivery to be used primarily for support of DT&E.

(2) LFT&E: Show number of test articles by year of delivery to be primarily for support of LFT&E.

(3) OT&E: Show number of test articles by year of delivery to be used primarily for support of OT&E.

D. Approved T&E Master Plan Funding: Provide funding included in the most recently approved T&E Master Plan (TEMP). Significant variations from the TEMP funding for T&E included in this entry and the amount reported in T&E funding above are to be addressed in the program description section of this exhibit.

Explanation of Funding Changes.

* Provide a narrative explanation (in program terms) for any increase/decrease that is in excess of the estimated rate of inflation. This explanation of increase/decrease is required for changes between the CY and BY1 and from BY1 to BY2.

Notes:

1. All totals displayed must equal amounts reported in object class 25.1.
2. FFRDC = Federally Funded Research & Development Centers.
3. A separate PB-15 must be prepared for each appropriation/fund.
4. A summary PB-15 must be prepared when consulting services are funded from more than one appropriation/fund.

This exhibit has been revised in its entirety.

Exhibit PB-15 Advisory and Assistance Services
(Page 1 of 3)

ADVISORY AND ASSISTANCE SERVICES

Instructions For Exhibit PB-15

BACKGROUND: The purpose of the exhibit is to provide Congress with actual estimates on the amount spent by DoD on advisory and assistance services which are utilized to enhance, assist, or improve the ability of government employees to make decisions on governmental processes, programs, and systems. Congressional concern stems from both the cost and nature of advisory and assistance services. When contractors provide advice or assistance that may affect decisionmaking, influence policy development, or provide support to project or program management, it is essential to ensure that the contractor's performance is free of potential conflicts of interest and does not impinge upon the performance of inherently governmental functions by government employees. As such, advisory and assistance services require an appropriate degree of enhanced management and oversight. When using contractor-provided products, final decisions, or actions must reflect the independent conclusions of DoD officials. Advisory and Assistance Services (object class 25.1) include services acquired by contract from non-governmental sources that provide management and professional support services; studies, analyses, and evaluations; and engineering and technical services, as defined below.

ADVISORY AND ASSISTANCE SERVICES DEFINITION (Object Class 25.1): Obligations for advisory and assistance services acquired by contract from non-governmental sources (including Federally Funded Research and Development Centers (FFRDCs) and non-FFRDCs) to support or improve organization policy development, decisionmaking, management, and administration; support program and/or project management and administration; provide management and support services for Research and Development (R&D) activities; provide engineering and technical support services; or improve the effectiveness of management processes or procedures. The products of advisory and assistance services may take the form of information, advice, opinions, alternatives, analyses, evaluations, recommendations, training, and technical support. Object class 25.1 consists of the following three categories:

Management and Professional Support Services: *This category includes funding for contractual services that provide assistance, advice, or training for the efficient and effective management and operation of organizations, activities (including management and support services for R&D activities), or systems. These efforts contribute to improved organization of program management, logistics, project monitoring and reporting, data collection, budgeting, accounting, performance auditing, and administrative/technical support for conferences and training programs.*

Studies, Analyses, and Evaluations: *This category includes funding for contractual services to provide organized, analytic assessments/evaluations in support of policy development, decisionmaking, management, or administration. It includes studies in support of R&D activities and the development of models and methodologies.*

Engineering and Technical Services: *This category includes funding for contractual services used to support program offices during the acquisition cycle by providing systems engineering and technical direction (FAR 9.505-1(b)) to ensure the effective operation and maintenance of a weapon system or major system as defined in OMB Circular A-109 or to provide direct support of a weapons system that is essential to the R&D, production, or maintenance of the system.*

ADDITIONAL GUIDANCE: The following describes various contracted services that are not advisory and assistance services for the purposes of this reporting requirement.

- Contracted services for routine maintenance and engineering and engineering and services for routine ADP and telecommunications efforts unless they are an integral part of advisory and assistance services. For example, installation, operation, or maintenance of systems; monitoring day-to-day hardware (or software) performance; and support services required to accomplish these particular actions. However,

Exhibit PB-15 Advisory and Assistance Services
(Page 2 of 3)

services that recommend to the government decisionmaker which modification or repair may be necessary (especially if assisting in evaluating contractor A's proposal versus contractor B's), or whether to repair, modify or do nothing, are examples of "consulting services" that should be reported.

- Training which maintains skills necessary for normal operations and training obtained for individual professional development.
- Advisory and assistance services obtained through personnel appointments and chartered Federal advisory committees.
- Architectural and engineering services as defined in FAR 36-102, which are for construction, alteration, or repair (including dredging, excavating and painting) of buildings, structures or other real property.
- Research on theoretical mathematics and basic medical, biological, physical, social psychological or other phenomena.
- Services supporting the Foreign Military Sales program paid with funds that will be reimbursed by the foreign customer or services citing other non-appropriated funds.

COVERAGE: This reporting requirement covers all DoD appropriations and funds. Consulting services acquired from contracts managed by other Government Agencies and paid for with DoD appropriations must be reported.

PREPARATION REQUIREMENTS FOR EXHIBIT PB-15: *Every* DoD Component must submit the PB-15 exhibit even if they are not procuring advisory and assistance services. A separate exhibit is required for each appropriation and fund. For annual and multiyear appropriations, planned obligations should be shown in the year of the appropriation rather than the year the obligation is planned. Prior year columns should reflect actual obligations incurred plus additional obligations planned over the remaining life of that fiscal year appropriations. Current and budget year columns should reflect all obligations planned over the life of those appropriations. The Defense Working Capital Fund (DWCF) business areas should identify budgeted obligations in the year those obligations are planned for contracts in support of DWCF activity functions but not those in support of customer workload. The identification of advisory and assistance services in support of appropriations managed by one Component but executed by another Component, fund (e.g., DWCF), or through federally funded research and development centers is the responsibility of the appropriation fund manager. In determining whether a contract is for advisory and assistance services, the contracting or executing organization is not relevant. For example, advisory and assistance services in support of one of the Environmental Restoration transfer appropriations but executed by the Military Departments must be identified in appropriation exhibits submitted for that Environmental appropriation. Each Component will provide overall summary displays for their Component appropriations/funds totals.

SUBMISSION REQUIREMENTS: *For the OSD/OMB budget submission, the PB-15 exhibit will be submitted as a separate exhibit. For the President's budget submission to the Congress, the PB 15 exhibit will be included as an exhibit in Volume II – Data Book.* Each Military Department and Defense Agency will provide an exhibit for each appropriation/fund. In addition, each Military Department and Defense Agency will provide a consolidated exhibit for all appropriations/funds under their control.

** The PB-15 exhibit should reflect the same resource amounts as identified in Object Class 25.1. Any discrepancies between the PB-15 and Object Class 25.1 must be fully explained. Each PB-15 exhibit is required to contain each appropriation manager's name and telephone number.**

Exhibit PB-15 Advisory and Assistance Services
(Page 3 of 3)

LEGISLATIVE PROPOSALS

(Dollars in Millions)

<u>PROPOSAL</u>	<u>APPN(s)</u>	<u>BY1</u>	<u>BY2</u>	<u>BY2+1</u>	<u>BY2+2</u>	<u>BY2+3</u>	<u>BY2+4</u>
-----------------	----------------	------------	------------	--------------	--------------	--------------	--------------

Amounts should reflect cost or savings (-) included in the budget submission if proposal is approved by the Congress. Provide a total for each proposal, a total for each appropriation/fund, and a grand total.

All proposed legislation, including those submitted through the Unified Legislation and Budgeting (ULB) process, should be included in the Component's budget submission. The proposals must be fully funded for the budget year(s) and throughout FYDP.

Each proposal must provide narrative justification identifying the merits of the proposal and the issue/problem being addressed. If the proposal impacts manpower, provide the end strength and workyear adjustments (average strength for military and FTE for civilians) by type of employment status.

Exhibit PB-16 Legislative Proposals

DOD COMPONENT _____

EMPLOYEE RELOCATION EXPENSES

The Office of Management and Budget (OMB) requires all Federal agencies to report all costs associated with relocating employees. Therefore, all Components are required to use the format below to report total obligations for the expenses of employee relocations associated with the past, current, and budget years (BY1 and BY2). Employee relocation expenses are payments to Federal employees (military and civilian) for costs related to permanent change in a workstation; i.e., when the Federal government pays a person to move his/her residence because he or she is assigned to work in a different place (e.g., city, state, or country).

These obligations are normally reported as part of the following object classes (OC):

- Travel and transportation of persons (OC 21)
- Transportation of things (e.g., movement of household goods, except for storage costs, which are under OC 25.7) (OC 22)
- Civilian personnel benefits (e.g., various relocations allowances, expenses associated with the sale of residence, breaking a lease) (OC 12.1)
- Military personnel benefits (same as OC 12.1, except that it applies to military personnel only) (OC 12.2)
- Operation and Maintenance of equipment (includes contractual services for storage and care of vehicles and storage of household goods, but only those associated with relocation) (OC 25.7)

"Total Contracts" will equal the sum of all Object Class 25.X resources reflected on the Program and Financing Schedule. Direct and reimbursable should be shown on separate lines and identified with a (D) for direct or (R) for reimbursable after the appropriation title. Direct object class codes to be included in "Total Contracts" are: T12511, T12521, T12531, T12532, T12533, T12541, T12551, T12561, T12571, and T12581. Reimbursable object class codes to be included in "Total Contracts" are: T22511, T22521, T22531, T22532, T22533, T22541, T22551, T22561, T22571, and T22581.

"Other Services Contracts" will equal Object Class 25.2 (T12521 for direct and T22521 for reimbursable) resources reflected on the Program and Financing Schedule.

Note: * If percentage of other services contracts (object class 25.2) exceeds 15% of total contracts a narrative explanation is also required.

INSTRUCTIONS

Category/Organization/Appropriation/Fund: This exhibit provides manpower, payroll, and non-labor cost data directly related to the Management Headquarters mission. Data will be displayed by appropriation/fund (including Military Personnel) for all organizations listed in the DoD Directive 5100.73, Department of Defense Management Headquarters Activities. Additionally, this exhibit will separately identify the manpower and cost data by Combatant and Non-Combatant Management Headquarters Activities. Resources for International Military Headquarters are not to be reported in this exhibit; these costs are to be reported on the PB-55. A narrative explanation is required for all increases and decreases. Non-labor costs that are not directly related to the Management Headquarters mission such as Pentagon Renovation should not be reported in this exhibit. Components should footnote the items that are excluded. Organizations will be displayed according to the following categorization of Management Headquarters Activities. Manpower and TOA will be identified by appropriation or fund for each management headquarters category.

I. Combatant Management Headquarters Activities

1. Combatant Commands*
2. Service Combatant Commands*

II. Non-Combatant Management Headquarters Activities

1. Defense-Wide Activities
 - a. Departmental Activities
 - b. Departmental Support Activities
 - c. Functional Activities (Defense Agencies, Other)
2. Military Department Activities*
 - a. Departmental Activities
 - b. Departmental Support Activities
 - c. Functional Activities

III. Reconciliation of Increases and Decreases

* To include direct reporting units, as appropriate.

- Under "Total Obligations" TOA should be limited to costs directly in support of management headquarters and should not include operational elements of expense for programs centrally funded or managed at the headquarters but executed elsewhere in the Department. Classified data will be reported.
- Under each appropriation/fund, manpower strengths and funds will be identified as direct or reimbursable.
- Totals will be provided by categories listed above, e.g., Combatant Commands, Service Combatant Commands, etc.
- Revolving funds that support headquarters activities will be reflected in the same fashion as appropriated funds.
- A total summary by appropriation/fund and category (Combatant/Non-Combatant) must be provided.
- National Guard and Reserve officers serving on active duty and performing duties described in 10 U.S.C. 10211 will be excluded from this exhibit.
- Numbers reported in this exhibit must be consistent with the numbers reported in the Components' budgets and accompanying FYDP, as identified by program elements designated as management headquarters. This data should also agree with the data reported in the PBA-16 exhibit.

1/ HNS is defined as those amounts paid in cash to the U.S. or provided as assistance-in-kind by a Host Nation to defray the costs of U.S. forces permanently assigned in that country during peacetime. Assistance-in-kind (AIK) includes any support provided without charge by the Host Nation, i.e., Japanese local national labor cost sharing. This exhibit is to be completed by country. Part II of the Exhibit is to be completed by country by appropriation. Additionally, complete the exhibit summarizing data for all countries. Similarly, provide a summary of Part II by appropriation. Cost and civilian end strength estimates are to reflect host nation support contributions only for activities supported by appropriated funds.

2/ Excludes non-appropriated funded activities.

3/ Personnel costs are to be consistent with OP-8 budget exhibits.

Exhibit PB-25 Host Nation Support
(Page 4 of 5)

DEFINITIONS

Exchange Rate Used – Rates should be based on approved budgeted rates.

Inflation Rates Used - Indicate the inflation factor used in all calculations provided in the HNS exhibit. If there is a different rate used within non-labor categories, list the items separately. Be sure all amounts shown are adjusted for inflation.

DIRECT SUPPORT

Rents - The amount of lease/rental payments by the Host Nation Government for the use of private property by U.S. forces.

Labor - The amount of payments by the Host Nation for U.S. Direct Hires, Foreign National Direct Hires, and Foreign National Indirect Hires.

Percent of Labor Covered Under Agreement - Indicate the percentage of U.S. forces labor costs paid by HNS.

KATUSA Labor - This category is for Korea only and is the amount of payments made by Korea for Korean Augmentees to the U.S. Army.

Utilities - The amount of payments by the Host Nation for U.S. forces use of on-base and off-base electricity, heating fuels, water, and sewer. Indicate the percentage of U.S. forces utility costs paid by HNS.

Facilities - The amount of Host Nation payments for the planning, design, construction (PDC) and maintenance and repair of facilities used by U.S. forces. Host nation payment for residual value of property turned over to host nations due to base closures is not to be included as HNS.

Maintenance and Repair - The amount of Host Nation payments for the maintenance and repair of U.S. forces' facilities.

Facilities Improvement Program - The amount of Host Nation payments for facilities for the PDC of projects such as family and bachelor housing, community support and recreation facilities, and utilities upgrade. It also includes operational support facilities such as hangars and hardened aircraft shelters.

Relocation Construction - The amount of payments by the Host Nation for facilities for the PDC of projects associated with the relocation of U.S. forces primarily for the convenience of the Host Nation.

BACKGROUND: The Consolidated Omnibus Budget Reconciliation Act of 1985, Subtitle C - Federal Motor Vehicle Expenditure Control of Public Law 99-272, requires that each Federal Agency establish and operate a central monitoring system for motor vehicle costs and establish a data collection system and to report such data in support of the President's budget. Guidance as to the definition and coverage of this requirement is provided by the General Services Administration in Federal Property Regulations. The Vehicles used for military training, combat or tactical purposes are specifically excluded.

PREPARATION REQUIREMENTS: Each Component of the Department is required to complete a PB-41 Motor Vehicle Operations Exhibit. These will be used by the Office of the Under Secretary of Defense (Comptroller), Operations & Personnel Directorate, 3D868 Pentagon, to prepare a consolidated exhibit, which will be provided to the Office of Management and Budget as required by OMB Circular A-11. *In order to meet the OMB schedule and include this information in the printed President's budget request, the PB-41 exhibit for the Congressional Justification/Presentation must be submitted by January 5th.*

Exhibit PB-41 Administrative Motor Vehicle Operations

DoD Component
FY BY1/BY2 OSD Submit/President's Budget
Competition and Privatization

DATE

Instructions: Each Service and Defense Agency/Activity is to submit this exhibit. Negative reports are required.

For Section I: Report the number of FTEs that are candidates for competition. This should reflect the results of the Inventory of Commercial Activities required by OMB in a memorandum dated May 12, 1998.

For Section II: Report baseline manpower and dollars for all single function studies completed (in PY) and scheduled (FY CY, BY1, BY2, etc.) for outsourcing or privatization. Each activity should be reported in the year that the study is scheduled to be initiated. The annual cost for each activity should be reported even if you plan to outsource during the fiscal year. For civilian substitution, report the military end strength converted to civilian positions. Report personnel data by appropriation, (e.g., O&M, Revolving Funds, etc.) The cost of activities to be studied represents the total cost of operating the competed activity.

For Section III: Report the same information as Section II for multi-function studies.

For Section IV: The cost to conduct studies is the cost associated with conducting the competition and privatization (C&P) study. The costs should reflect actual costs in the PY and the amounts budgeted in the other years to conduct the studies. In the narrative description section, discuss the methodology used to develop study costs and provide justification for deviations from the average of \$2,000 per FTE. Costs should be reported by appropriation.

For Section V: Report costs of transition to Most Efficient Organization (MEO) or contract. Such costs include severance pay, Voluntary Separation Incentive Pay (VSIP), etc. In the narrative section, discuss the methodology used to determine transition costs including the categories of cost included.

For Section V: Show personnel and dollar savings from competitions completed in the year being reported plus the annualized savings from previous years. An example follows:

	<u>FY 98</u>	<u>FY 99</u>	<u>FY 00</u>	<u>FY 01</u>	<u>FY 02</u>	<u>FY 03</u>	<u>FY 04</u>
FY 1998 Savings	-50	-100	-100	-100	-100	-100	-100
FY 1999 Savings		-50	-100	-100	-100	-100	-100
FY 2000 Savings			-50	-100	-100	-100	-100
Etc.							
Total Savings (To be included in exhibit)	-50	-150	-250	-300	-300	-300	-300

Gross savings should not be offset by the cost of studies or transition costs. In the narrative description, include a discussion of the methodology used to develop both manpower and dollar savings. Also indicate whether the savings have been distributed to specific program.

Net savings should be offset by the cost of studies and transition costs.

(\$ Millions)

Exhibit PB-52A DoD Aeronautics Budget
Page 1 of 2

Instructions
Exhibit PB-52A_DoD Aeronautics Budget

1. Purpose. This exhibit identifies research and development funding for Aeronautics programs. The data are used to prepare the overall DoD input into the annual President's Aeronautics and Space Report which is prepared by the Office of Management and Budget (OMB). A copy of the final report is available for information in the OUSD(Comptroller) Investment Directorate.

2. Submission.

a. Exhibit PB-52A should separately identify all RDT&E program elements providing funds in support of the development of systems, subsystems and components used in rotary and fixed wing aircraft.

b. Data are to be provided in millions of dollars, using 3 decimal points.

c. Submission of the required exhibit will be made in hard paper copy and in a DOS/Excel format. [Floppy disk: 360K, 5 1/4"; or 1.44MB, 3 1/2"].

d. The submission of the completed exhibits to the OUSD(Comptroller) is due no later than 15 working days after transmission of the President's budget to the Congress.

3. Entries.

Exhibit PB-52A (Aeronautics Programs)

a. Program Title. Insert the official program title as reflected in the R-1 budget exhibit.

b. Program Element Number. Insert the official 8-digit program element designator as reflected in the R-1 budget exhibit.

c. Budget Estimate. The completed exhibits are to reflect the estimated cost, as funded in the Future Year Defense Program (FYDP), by fiscal year for the period FY 19PY-2 through FY 19BY2 (the three prior years, the current year and the budget years). All amounts should be in then years (TY)

Exhibit PB-52B DoD Space Budget

Page 1 of 4

Instructions for Preparation of Exhibit PB-52B
DoD Space Budget

1. Purpose. This exhibit identifies all funding for Space programs. The data will be used to prepare an exhibit which reflects total DoD funding for Space Programs. The data from the DoD exhibit is used to support a myriad of Space Budget Justification requirements including Congressional Space Budget Justification and the DoD input into the President's Aeronautics and Space Report which is prepared by the Office of Management and Budget (OMB). The data are also used to support congressional hearings on space programs and to fulfill other various information requests regarding space-related funding.

2. Submission.

a. Exhibit PB-52B is required to identify funding in all DoD appropriations directly or indirectly related to space based systems.

b. The data are to be provided in millions of dollars, using 3 decimal points.

c. Submission of the required exhibit will be made in hard paper copy and in a DOS/Excel format. [Floppy disk: 360K, 5 1/4"; or 1.44MB, 3 1/2"].

d. The submission of the completed exhibit to the OUSD(Comptroller) is due no later than fifteen (15) working days after transmission of the President's Budget to the Congress.

3. Entries.

Exhibit PB-52B

a. Program Title. Insert the official program title as reflected in the P-1, R-1, C-1, Military Personnel, and Operation & Maintenance budget justification exhibits.

b. Program Element Number. Insert the official 8-digit program element number related to the program/activity.

c. Appropriation. Insert the funding appropriation of the program/activity entry. Below are the valid appropriations for this exhibit:

<u>Air Force</u>	<u>Navy</u>	<u>Army</u>	<u>Defense Agencies</u>
APAF	SCN	APA	PDA
WPAF	APN	MPA	NG&RE
OPAF	WPN	PW&TCV	DPA
RDT&E,AF	OPN	OPA	RDT&E,DA
O&M,AF	PMC	RDT&E,A	O&M,DA
MILPER,AF	RDT&E,N	O&M,A	MILPERS,DA
MILCON,AF	O&M,N	MILPERS,A	MILCON,DA
	MILPER,N	MILCON,A	
	MILCON,N		

e. Factor. If the funding for a Space related activity is only a fraction on the total in a given program element, identify the percent of the total program relating to Space activity. (Example: in most cases the proper response is 100%, however if only half the funds budgeted in a given budget line is related to space, enter 50%).

f. Category. Categorize the line entries by the following Space activity:

Navigation consists primarily of programs related to Space based navigation and positioning systems. This category would include funding for development, procurement, operations and use of TRANSIT and NAVSTAR/GPS satellite: satellite ground control costs to include operations and maintenance; costs of contractor technical and engineering support; Federal civilian and Milpers costs; construction of peculiar system support facilities and equipment; development and procurement of user terminals; development, procurement and installation of antennas and command and control hardware and software.

Communication includes programs related to providing a satellite communications service. This category would include funding for satellite development and procurement and operation of MILSTAR, DSCS, FLTSATCOM, UHF Follow-on, etc.; satellite ground control costs to include operations and maintenance; costs of contractor technical and engineering support; Federal civilian and Milpers costs; construction of peculiar system support facilities and equipment; development and procurement of user terminals; development, procurement and installation of antennas and command and control hardware and software.

Mapping includes programs related efforts to obtain more accurate data for geographic maps and charts and provide geophysical information to strategic and tactical weapon systems. This category would include funding for system to identify size, shape, and gravity field of the earth. This category would include funding for satellite development and procurement; satellite ground control costs to include operations and maintenance; costs of contractor technical and engineering support; Federal civilian and Milpers costs; construction of peculiar system support facilities and equipment; development and procurement of user terminals; development, procurement and installation of antennas and command and control hardware and software.

Meteorology consists of programs that supply timely weather information such as the DMSP satellite. Would include procurement and development of satellites; satellite ground control costs to include operations, and maintenance; costs of contractor technical and engineering support; Federal civilian and Milpers costs; construction of dedicated system support facilities; development and procurement of user terminals; development, procurement and installation of antennas and command and control hardware and software.

Launch Vehicles includes the cost of developing and procuring expendable launch vehicles; costs of DoD use of the NASA Space Shuttle vehicle. This category would include the cost of Titan IV, Atlas II, Delta II, the National Launch System, Pegasus and other space launch vehicles.

Surveillance includes those costs related to providing detection of land, sea and air surveillance. Would include costs of DSP, Brilliant Eyes, Improved Space Based TW/AA satellite, ALARM and other strategic and tactical satellite procurement and development programs; satellite ground control costs to include operations and maintenance; costs of contractor technical and engineering support; Federal civilian and Milpers costs; construction of peculiar system support facilities; development and procurement of user terminals; development, procurement and installation of antennas and command and control hardware and software.

Intelligence includes those costs relating to providing space based intelligence service. This category would include cost of user systems procurement and development; command & control costs to include operations and maintenance costs; costs of contractor technical and engineering support; Federal civilian and Milpers costs; construction of peculiar system support facilities; development and procurement of user terminals; development, procurement and installation of antennas and associated hardware and software. Note: the completed exhibit should not exceed a SECRET clearance level.

Missile Defense includes those costs relating to providing a defense from strategic and tactical ballistic missiles. This would include cost of developing and procuring space based interceptor such as Brilliant Pebbles and space based kinetic and directed energy weapons. This would also include: cost of technical and engineering studies and architecture development; cost of ground control to include operations and maintenance; costs of contractor technical and engineering support; Federal civilian and Milpers costs; construction of peculiar system support facilities; development and procurement of terminals; development, procurement and installation of antennas and command and control hardware and software.

General Support includes various functions such as costs for support the deployment and sustainment of space based systems. This category would include operations and maintenance cost of space launch facilities and infrastructure; the cost of maintaining and operating the west and east coast ranges. This would include the cost of contractor technical and engineering support; Federal civilian and Milpers costs; construction of facilities; development and procurement of terminals; development, procurement and installation of antennas and command and control hardware and software.

Supporting RDT&E includes those costs relating to space systems technology not directly associated with a particular spacecraft or vehicle. This would include the development of common components; developing generic technologies for space based components and launch vehicles; Technological Base development; and the cost of space test programs.

- g. Budget Estimate. Insert in millions (3 decimals) the approved funding for the three prior budget years, current year, the budget years, and four outyears. All amounts should be in then years (TY).

INSTRUCTIONS

Category/Organization/Appropriation: This exhibit will provide manpower, payroll, and non-labor cost data directly related to DoD personnel serving in the International Military Headquarters mission. Data will be displayed by appropriation/fund (including Military Personnel). A narrative explanation is required for all increases and decreases.

Manpower and TOA will be identified by appropriation or fund as displayed in the following example:

	FY BY1 Estimate			
	Military A/S	Civilian FTEs	Total Mpwr	Total Obl. (\$000)
<u>International Military Headquarters</u>	<u>1,225</u>	<u>256</u>	<u>1,481</u>	<u>89,517</u>
MPMC	255		255	15,600
MPN	970		970	59,031
OMN		256	256	14,886
(DIR)		(250)	(250)	(14,461)
(REIMB)		(6)	(6)	(425)

- Under “Total Obligations” TOA should be limited to costs directly in support of International Military headquarters and should not include operational elements of expense for programs centrally funded or managed at the headquarters but executed elsewhere in the Department.
- Under appropriation, manpower strengths and funds will be identified as direct or reimbursable.
- Revolving funds that support headquarters activities will be reflected in the same fashion as appropriated funds.
- A total summary by appropriation, as well as a grand total, will be provided.
- Classified data will be reported.
- National Guard and Reserve officers serving on active duty and performing duties described in 10 U.S.C. 10211 will be *excluded* from this exhibit.
- Attached an addendum to provide a listing of organizational acronyms and their meanings used in this exhibit.

WASHINGTON, DC 20301-1100

DEC 31 1996

FOREWORD

This Volume of the "Department of Defense Financial Management Regulation" is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and procedures," dated November 15, 1992. It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It directs financial management requirements, systems, and functions for all appropriated, working capital, revolving, and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

Volume 3 of the "DoD Financial Management Regulation" establishes procedures for DoD Components to use in budget execution. Specifically, it details the availability and use of budgetary resources.

This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Unified Combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that the provisions of this Volume are adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives and/or regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements in this Regulation are exempt from licensing in accordance with paragraph E.4.f. of DoD 8910.1-M, "DoD Procedures for Management of Information Requirements," November 1986.

Forward recommended changes to this Volume of the Regulation through channels to the address below. Submit requests for deviations from or exceptions to specific standards, with justification, to:

Office of the Under Secretary of Defense (Comptroller)
1100 Defense Pentagon
Washington, DC 20301-1100

The Defense Finance and Accounting Service will provide copies of this Volume, and other previously unpublished volumes, of this Regulation through its normal publication channels. Early in 1997, all 15 volumes of the Financial Management Regulation will be available on the Internet at <http://www.dtic.mil/comptroller/fmr>. Printed or CD-Rom copies of the Regulation may be ordered through the Internet Homepage or directly from the Defense Automated Printing Service, at 1401 S. Fern Street, Arlington, VA 22202, or by telephone at (703) 607-5212.

John J. Hamre

INTRODUCTION TO THE DoD FINANCIAL MANAGEMENT REGULATION

GENERAL

The DoD Financial Management Regulation provides all DoD Components with the policy, regulation, and procedures within the area of responsibility of the Under Secretary of Defense (Comptroller) (USD(C)). The Regulation consists of the following 15 volumes:

1. General Financial Management Information, Systems, and Requirements
2. Budget Formulation and Presentation
3. Budget Execution - Availability and Use of Budgetary Resources
4. Accounting Policy and Procedures
5. Disbursing Policy and Procedures
6. Reporting Policy and Procedures
7. Military Pay Policy and Procedures
8. Civilian Pay Policy and Procedures
9. Travel Policy and Procedures
10. Contract Payment Policy and Procedures
11. Reimbursable Operations, Policy and Procedures
12. Special Accounts, Funds and Programs
13. Nonappropriated Funds Policy and Procedures
14. Administrative Control of Appropriations
15. Security Assistance Policy and Procedures

AUTHORIZATION

This Regulation is issued by the USD(C) under authority of Department of Defense Instruction 7000.14, "DoD Financial Management Policy and Procedures," dated November 15, 1992.

PARAGRAPH NUMBERING SYSTEM

The paragraph numbering system of this Regulation is consistent for all 15 volumes. The six digit paragraph number and its subparagraph designators are formulated as follows:

01
CHAPTER 1

01
SECTION 1

01
PARAGRAPH 1

A.1.a.(1)(a)
SUBPARAGRAPHS

PUBLICATIONS INCORPORATED

This Volume of the “DoD Financial Management Regulation” incorporates the policy and procedures contained in the following publications:

DoD 7110.1-M “DoD Budget Guidance Manual” (Chapters: 412, 422, 423, 425, 431, 432, 441, 442, and 451)

DoD 7220.9-M “DoD Finance and Accounting Manual” (Chapters: 25, 27, 32 and 77)

CHAPTER 1**TEMPORARY APPROPRIATION WARRANTS****0101 GENERAL**

This Chapter provides general background information on appropriation warrants, general guidance on requesting temporary appropriation warrants under continuing resolutions, and specific guidance on the submission requirements for temporary appropriation warrants.

0102 BACKGROUND

An appropriation warrant is a financial control document, issued pursuant to law (usually appropriation acts) by the Treasury Department, that establishes the amount of monies authorized to be withdrawn (disbursed) from the central accounts that are maintained by the Treasury Department. The warrant is the basis for recording appropriations (cash) on the books of the Treasury Department and the Department of Defense. However, if legislation on new appropriations is not completed by the beginning of the fiscal year, continuing resolution legislation typically is enacted by the Congress and requires a different warrant procedure. Treasury Department procedures usually require that temporary appropriation warrants be prepared by the Agency. Such warrants are submitted to the Treasury Department, reviewed, and countersigned by a representative of the General Accounting Office (GAO) on behalf of the Comptroller General of the United States. Authenticated copies of the temporary appropriation warrants then are furnished to the Agency. Additional background information can be found in the "Treasury Financial Manual," Part II, Chapter 2000, Section 2030.

0103 GENERAL GUIDANCE

Temporary appropriation warrants will be prepared when the Department of Defense is operating under the provisions of a continuing resolution and is advised by the Office of Management and Budget to proceed in establishing Treasury balances. Within the Department of Defense, each Military Service and the Defense Finance and Accounting Service - Indianapolis Center (on behalf of Treasury Index 97 Secretary of Defense accounts) shall submit warrant requests directly to the Treasury Department Fund Management Division. Obligations and disbursements will be incurred consistent with the provisions and authority contained in the continuing resolution legislation and also in accordance with specific guidance issued by Office of the Under Secretary of Defense (Comptroller) (OUSD(C)).

0104 SPECIFIC GUIDANCE

The following guidance applies to requests for temporary appropriation warrants:

010401. When advised by the OUSD(C), the aforementioned organizations will prepare temporary appropriation warrant requests when under a continuing resolution. Dollar values will relate only to appropriations pending enactment. The request shall be submitted to the Treasury Department within 10 days.

010402. The temporary appropriation warrant value is *normally* an annual amount that is derived by formula for each account. The warrant amount is determined by taking the lower of the direct amount available for obligation for the previous fiscal year, the House-passed appropriations bill and the Senate passed appropriations bill by individual account. Estimates for reimbursable requirements are not included in temporary appropriation warrants.

010403. As required by the “Treasury Financial Manual,” requests for temporary appropriation warrants will contain, as a minimum, the following information:

- A. The legislative authority for the request (Public Law number).
- B. The account symbols for the current fiscal year and the annualized amounts requested for each account. Unless otherwise indicated by the OUSD(C), amounts will be determined by paragraph 010402
- C. The amounts appropriated in the prior fiscal year.
- D. The amounts of formal budget requests for the account for the current year (as transmitted in the budget and any subsequent amendments by the President) relating to the accounts involved.
- E. The numbers, status of, and amounts allowed by any related appropriation bills.
- F. The amount of unobligated balances that are carried over into and out of the new fiscal year. Since the budget estimates of unobligated balances at the end of the year usually are not finalized at this time, the amount carried out of the old fiscal year will equal the amount carried over into the new fiscal year.

010404. The requests shall be sent directly to:

Department of the Treasury
Financial Management Service
Funds Management Division
Room 6F06
3700 East-West Highway
Hyattsville, MD 20782-1849

010405. One copy of the temporary appropriation warrant, as approved by the Treasury Department, will be submitted to the OUSD(C), Office of the Deputy Comptroller (Program/Budget), Directorate for Program and Financial Control. The DoD Component shall immediately notify the OUSD(C) of any discrepancy between their request and the approved Treasury warrant.

010406. Amounts reflected on the temporary appropriation warrant shall be reported on line 1.A of the Report of Budget Execution (SF 133) and also on line 1.A of the Apportionment and Reapportionment Schedule (SF 132).

(This page intentionally left blank.)

CHAPTER 2

APPORTIONMENT AND REAPPORTIONMENT SCHEDULE0201 GENERAL

020101. This Chapter provides information for the preparation and submission of the Apportionment and Reapportionment Schedule (Standard Form (SF) 132) as required by Office of Management and Budget (OMB) Circular No. A-34 and includes all exceptions to Circular No. A-34 procedures approved by the OMB National Security Division.

020102. Apportionment is part of the government-wide system for the administrative control of appropriations and funds. It is a distribution of an amount available for obligation and/or commitment in an appropriation or fund account into amounts available for specified time periods, activities, projects or combinations thereof as approved by the OMB and the OUSD(C). The amounts so apportioned limit the obligations that may be incurred. Revisions to the previous apportionment, called reapportionment, reflect changes in the amount of financial resources previously authorized for obligation. Both apportionment and reapportionment are subject to further controls in the form of specified footnotes and scheduled rates of obligation.

0202 COVERAGE

020201. Accounts Requiring SF 132. The Apportionment and Reapportionment Schedule (as specified in Appendix A) will be used for the following types of accounts that are required to be apportioned:

- A. Military function accounts.
- B. Civil function accounts (e.g., Wildlife Conservation).
- C. Credit financing (e.g., direct loan or loan guarantees).

020202. Accounts Exempted from Requirements of SF 132. The following accounts are exempted from apportionment on SF 132:

- A. Accounts that are available only for nonexpenditure transfer to other accounts.
- B. Expired accounts.
- C. Accounts that have been fully obligated before the beginning of the year.
- D. Foreign currency accounts.

E. Trust funds, including deposit funds, unless the OMB notifies the Department that specific accounts will be apportioned. The National Security Education Trust Fund shall require apportionment.

F. Consolidated working funds.

G. Other accounts individually exempted by the OMB (e.g., payment to the Military Retirement Fund).

020203. Availability of Balances Beyond the Fiscal Year. The balances of apportionments made in previous years will not be used to initiate or enlarge programs identified in appropriations for the current year. Such programs will be financed only to the extent permitted by the new appropriation (including joint resolutions making continuing appropriations).

020204. Adjustments Without Submission of SF 132. Unless the OMB determines otherwise, amounts apportioned will be adjusted as follows without submission of an SF 132:

A. Adjustments in the amount of unobligated balances brought forward, up to \$200,000 or one percent of total budgetary resources, whichever is lower, may be added to or subtracted from the apportionment for the period in progress when the adjustment is made. (Memorandum type forms may be prepared at the option of the DoD Component for internal Component use.)

B. Amounts of supplemental appropriations or other authority enacted in the last quarter will be added to the apportionment for the last time period. (Memorandum type forms may be prepared at the option of the DoD Component for internal Component use.) Inter-appropriation transfers specified in the language of appropriations acts enacted in the last period are excluded from the provisions of this paragraph.

C. Amounts of budget authority adjustments (line 1.D) or unobligated balances transferred (line 2.B), up to \$200,000 or one percent of total budgetary resources, whichever is lower, may be added to, or subtracted from the apportionment for the period in progress when the adjustment is made. (Memorandum type forms may be prepared at the option of the DoD Component for internal Component use.)

D. Amounts of indefinite budget authority, and reimbursements, that are realized above or below anticipated amounts, up to \$200,000 or one percent of budgetary resources, whichever is lower, may be added to or subtracted from the amount apportioned for the last time period.

E. Anticipated transfers previously apportioned on lines 1.E or 2.C which become realized do not require submission of an SF 132 for that purpose. The transfer should be reflected as realized on lines 1.D or 2.B when subsequent reapportionments are submitted.

F. Amounts of estimated unobligated balances which are footnoted in accordance with paragraph 020301.C, above, are adjusted to the actual amounts (+ or -) brought forward.

G. If the Congress completes action on a rescission proposal within the 45-day period prescribed in law and rescinds the exact amount proposed by the President, reapportionment action is not required to reflect the reduction in budget authority or unobligated balances. The SF 132 will be adjusted to reflect the enacted rescission when reapportionment action is requested for other reasons.

H. Actual recoveries of prior year obligations in multi-year and no-year accounts will be reflected in the unobligated balance in the initial SF 132 for the second, third, etc., year of an account. Recoveries occurring during the year will be apportioned automatically if so footnoted by the OMB on the SF 132. As reapportionments are generated for other purposes during the year, amounts for recoveries will be reflected in all columns on Line 4A, Actual Recoveries of Prior Obligations. A change to Line 4A will not result in the initiation of an SF 132 reapportionment action. The following footnote will be included on all multi-year and no-year accounts containing unobligated balances:

“In addition to amounts apportioned herein, actual recoveries of prior-year obligations are automatically apportioned.”

NOTE: If recoveries have been realized, subsequent footnotes will be amended to change the word “actual” to “additional.”

I. Amounts transferred from/to the Foreign Currency Fluctuations, Defense; Foreign Currency Fluctuations, Construction, Defense; Environmental Restoration Fund, Defense; or ADP Equipment Management Fund accounts are apportioned upon approval of the subject internal reprogramming action by the OUSD(C). Accounts for which these transfers are applicable are to include the following footnote in Section 8 of the SF 132.

“This apportionment is adjusted automatically to reflect transfers to or from the Foreign Currency Fluctuations, Defense; Foreign Currency Fluctuations, Construction, Defense; Environmental Restoration Fund, Defense, or ADP Equipment Management Fund accounts.”

As reapportionments are generated for other purposes during the year, amounts of actual transfers will be reflected in all columns of the SF 132. Subsequent footnotes will be amended to insert the word “additional” before “transfers.”

J. Reprogramming of resources for payment of obligations that otherwise would have been chargeable to canceled accounts shall be made in accordance with the purposes stated in Section 8080 of P.L. 101-511, as supplemented by current DoD reprogramming policies, accounting directives and guidance. Accounts for which these obligations are permissible are to include the following footnote in Section 8 of the SF 132.

“Up to one percent of the original appropriation or the unobligated balance, whichever is less, may be utilized for the purpose of obligation adjustments and payments, that otherwise would have been chargeable (both to purpose and amount) to a canceled appropriation.”

K. Amounts reported as orders received for the reimbursable programs of accounts listed in paragraph 0206, below.

0203 SUBMISSION REQUIREMENTS

020301. Initial Apportionment Request. Initial SF 132 will be submitted to the OUSD(C), Directorate for Program and Financial Control (P&FC), at the following times:

A. Within five calendar days after completion of congressional action on a DoD appropriations act or substantive act or not later than August 14 where congressional action on a new appropriations act is completed prior to August 9. At the direction of the OUSD(C), the SF 132 also are to include certain transfers specified in the appropriations act on lines 1.E or 2.C (1.A and 6.E (-) additionally for reappropriations).

B. Not later than August 14 for revolving and public enterprise funds, and for other accounts having unobligated balances carried forward. In addition, an SF 132 for the new fiscal year shall be submitted on all accounts that have amounts withheld on Line 9 or 10 in the current fiscal year, and for which balances will be withheld in the next fiscal year. The amounts reported should be the best estimate of the balances withheld at the close of the fiscal year and if amounts differ from those currently withheld, a revised SF 132 for the current fiscal year should accompany the submission to bring the amounts into agreement.

C. Not later than August 14 for multi-year appropriations and other accounts having balances available for obligation in the next fiscal year that are not requested by OUSD(C) letter apportionment. The following footnote should be included:

“Amounts apportioned are automatically adjusted by the difference between the estimated and actual unobligated balance brought forward (+ or -).”

The footnote, if appropriate, will apply to the amount shown on line 2A.

NOTE: Obligations incurred will not exceed the amount(s) in section 8 of the above SF 132 plus or minus adjustments between estimated and actual unobligated balance brought forward. Obligations incurred in excess will be in violation of Title 31, United States Code, section 1517.

D. At such time and in such manner as determined by the OUSD(C) and/or the OMB for apportionments required under Continuing Resolution Authority, and for other reasons.

020302. Reapportionment Request. Reapportionment requests will be submitted on SFs 132 to the OUSD(C), under the following circumstances:

A. Whenever a change in the apportionments previously made becomes necessary because of changes in amounts available (e.g., actual reimbursements differ significantly from estimates), program requirements, cost factors or rescissions.

B. Whenever there have been significant changes in estimates shown on the form for appropriation receipts or reimbursements, or when there has been any change in the amount of transfers.

C. Whenever a change is required to quarterly apportioned amounts in Military Personnel, Operation and Maintenance, Defense Health Program or Family Housing Operation and Maintenance accounts.

D. Whenever a change is required to budget activity level (construction category) amounts in Military Construction and Family Housing Construction accounts.

E. Whenever a change is required to contract authority authorizations.

F. Whenever a change is required to borrowing authorities.

G. Whenever a change is required in credit financing accounts.

H. Within five calendar days after completion of congressional action on an Appropriations Act, or substantive act providing additional budget authority, except for adjustments covered by paragraph 020204.B of this Volume.

I. Not later than November 30 to correct an estimated unobligated balance brought forward to agree with the amount shown on the final Report on Budget Execution (SF 133) for the previous year, except for adjustments covered by paragraph 020204.F of this Volume.

H. Revised SFs 132 will be submitted to the OUSD(C) immediately upon completion of congressional action or inaction on proposed rescissions identified on the SFS 132 only upon expiration of 45 calendar days of continuous session without completion of action on a proposed rescission or upon rescission of an amount different from that proposed by the President. Revised SFs 132 also will be required should the Congress rescind all or a portion of the amount proposed by the President subsequent to the expiration of the prescribed 45 days of continuous session. SFs 132 must be prepared in advance and be held for immediate processing to assure that they reach the OMB upon enrollment of the rescission bill, upon expiration of the 45 days where congressional action on a rescission is incomplete, or on the day following the passage of a resolution disapproving an executive deferral. SFs 132 relating to these actions will include only those changes relating to congressional action on the amount reserved. No other changes are to be included on these actions.

Congressionally initiated rescissions may occur as the result of the reconciliation process established by the Congressional Budget Act (2 U.S.C. 641) or because of changing priorities or economic conditions during the year. Where the Congress takes such action, and an apportionment action for the involved account is not in process at the OUSD(C) or the OMB, a revised SF 132 will be submitted on the date of enactment of the reconciliation or rescission bill. The DoD Components will ensure that reduced appropriations are not exceeded.

020303. Number of Copies. Submit an original and one copy of SF 132 and supporting schedules. The SF 132 shall be produced utilizing the OUSD(C) supplied Microsoft Excel template or other software subject to OUSD(C) approval.

020304. Signature. An official not below the level of the Assistant Secretary (Financial Management and Comptroller) will sign the original of SF 132 submitted by the Military Department. Signature authority may be redeligated to another official in the Comptroller organization.

020305. Supporting Schedules. The following supporting schedules are required. These will be collated with the SF 132.

A. Each apportionment document shall be accompanied by an informal written explanation of the requested apportionment action and the appropriate points of contact for program content and administration.

B. Exhibit PB-48, "Analysis of Reimbursements" (see Appendix B). This schedule is required with SF 132 whenever there is a request to increase or decrease previously apportioned amounts of reimbursable authority. A short statement will be provided at the bottom of the PB-48 explaining why the change is requested.

C. Exhibit PB-49, "Schedule of Transfers" (see Appendix C). This schedule is required whenever there are transfer or reappropriation amounts reflected on lines 1.D, 1.E, 2.B and/or 2.C.

D. For the Army Conventional Ammunition Working Capital Fund, a schedule is required showing division or materiel category, sales, obligations, and total authority,

E. For the Working Capital Funds, a schedule is required showing Service/Agency business areas by appropriations, obligations, orders, capital and contract authority.

0204 NOTIFICATION TO COMPONENT OF OUSD(C) AND OMB ACTION

020431. Notification to DoD Components of OUSD(C) Action. Upon submission of the SF 132 to the OMB, the OUSD(C) will notify the Component involved of amounts recommended by the OUSD(C) if such amounts differ significantly from those requested by the DoD Component.

020402. Action by OMB. The OMB will indicate to the OUSD(C) the action taken in regard to the initial request for apportionment within the time prescribed by law, and in regard to reapportionment, generally within fifteen days after receipt of the request.

020403. Notification to DoD Component of OMB Action. Upon receipt of the written notification of OMB action on the SF 132, the OUSD(C) will provide a copy of the SF 132 reflecting such action, together with correspondence relating thereto, to the DoD Component.

0205 SPECIAL INSTRUCTIONS

020501. In certain instances, apportionment requests may anticipate the need for supplemental budget authority. In such instances, the following footnote will be made to the SF 132:

“This apportionment request indicates a necessity for a supplemental appropriation now estimated at \$_____.”

Approval of the above footnote on the apportionment request does not authorize exceeding the apportioned available resources in an account.

020502. Military Construction, NATO and Family Housing

A. Completion of SF 132

1. Military construction apportionment or reapportionment requests will be structured to correspond to the budget activities approved for use in the President's Budget, utilizing lines under Category B of the SF 132, as follows:

8B(1). Major construction. This summary estimate will cover the acquisition of land for, and construction of, major construction projects usually authorized in specific dollar amounts in Military Construction Authorization Acts.

8B(2). Minor construction. This summary estimate will cover unspecified minor construction projects which have a funded cost of \$1 million or less including construction, alteration or conversion of permanent or temporary facilities as authorized under Title 10, United States Code, section 2805.

8B(3). Planning. This program will cover planning and design activities.

8B(4). Supporting activities. This summary estimate will cover general authorizations not included in 8.B(2) and 8.B(3) above, for all other activities which directly or indirectly support the military construction

program when financed from these appropriations. Examples are the defense access road program and minor land acquisitions.

8B(5). Reimbursable construction work. This summary estimate will cover any construction work and service orders undertaken for others on a reimbursable basis.

2. NATO Recoupments. NATO Infrastructure recoupments will be reported as available for apportionment on line 3.A, SF 132, for the “NATO Security Investment Fund” apportionment and will be used to finance the United States’ share of NATO Infrastructure programs.

3. Family Housing. Family Housing multi-year funds (Construction), Family Housing annual funds (Debt Payment, Operations and Maintenance) and the Family Housing Improvement Fund (Program and Credit Financing accounts) will require separate apportionment requests.

(a) Family Housing Construction. Family Housing Construction apportionment requests will be structured to correspond to the budget activities approved for use in the President’s Budget, utilizing lines under Category B of the SF 132, as follows:

8B(1). Construction of new housing. This summary estimate will cover the cost of new construction projects authorized in the appropriate Military Construction Authorization Acts.

8B(2). Construction improvements. This summary estimate will cover the cost of regular improvements, energy conservation improvements, and minor construction.

8B(3). Planning. This summary estimate will cover planning and design activities.

(b) Family Housing Operation and Maintenance. The Family Housing Support apportionment request will be structured utilizing Category A lines of the SF 132 as follows:

8A(1-4). Operation, Maintenance, Leasing. The estimate will be the amount required to operate, maintain and lease family housing units on a fiscal year quarter basis. The amounts should not be cumulative.

(c) Family Housing Improvement Fund. Apportionment and Reapportionment requests shall be submitted for the FHIF Program account and, when necessary, the FHIF Direct Loan Financing account and the FHIF Guaranteed Loan Financing account. Category B apportionment shall be used to reflect applicable administrative expenses, direct loan

subsidy, guaranteed loan subsidy and other miscellaneous items for the FHIF Program account. Category A and B combinations may be used for direct loan and guaranteed loan financing accounts, when appropriate.

020503. Commissary Store Facility Construction - Trust Revolving Fund. Public Law 97-321 (October 15, 1982) amended 10 U.S.C. 2685 to permit obligation of anticipated proceeds from the adjustments or surcharges authorized by Section 2685. Prior to any such obligation of funds, the amounts must be apportioned as contract authority on line 1.C of the SF 132.

020504. Credit Limitations. The applicable OMB instructions may prescribe an annual limitation on the amounts of direct loans and loan guarantees for Federal credit programs. These limitations will be apportioned unless specifically exempted by the OMB, and will be in addition to the apportionment of the related program account. Further, these limitations will be apportioned either as Category A or B. The OUSD(C) will provide additional guidance as necessary.

020505. Letter Apportionments. Letter apportionments may be requested by OUSD(C) and/or issued by the OMB under certain circumstances, such as, periods under Continuing Resolution Authority, for multi-year estimated/actual unobligated balance approvals, for sequestration, for prior approval reprogramming actions or internal reprogramming actions. Subsequent requests for reapportionment will reflect the amounts approved on the letter apportionment in all columns of the SF 132.

020506. Interim Apportionment Authority for Initial Appropriations Act. In cases where an apportionment request that reflects initial appropriations act resources is still pending after the start of the fiscal year, the authority to obligate resources is automatically apportioned, until the receipt of an OMB approved apportionment, to a level that is reasonable and customary for the time period. This authority may be further limited by OUSD(C) and OMB direction.

0206 AUTOMATIC APPORTIONMENT OF REIMBURSEMENTS

020601. In May 1992, the OMB repealed all policies addressing automatic apportionment of reimbursables. Only the accounts listed in paragraph 020602, below, can continue with automatic reimbursable authority.

020602. Reimbursable authority will be automatically apportioned to the extent orders are received for the following accounts:

- A. Military Personnel, Navy
- B. Military Personnel, Marine Corps
- C. Operation and Maintenance, Army
- D. Operation and Maintenance, Navy
- E. Operation and Maintenance, Marine Corps
- F. Operation and Maintenance, Air Force

- G. Operation and Maintenance, Army Reserve
- H. Operation and Maintenance, Navy Reserve
- I. Operation and Maintenance, Marine Corps Reserve
- J. Operation and Maintenance, Air Force Reserve
- K. Operation and Maintenance, Army National Guard
- L. Operation and Maintenance, Air National Guard
- M. Defense Health Program*
- N. Research, Development, Test and Evaluation, Army
- O. Research, Development, Test and Evaluation, Navy
- P. Military Construction, Army
- Q. Military Construction, Navy

* Approved October 28, 1992

020603. A footnote shall be included on all SF 132 submissions as follows:

“In addition to the amounts apportioned herein, an amount or amounts equal to the value or orders received and accepted within the fiscal year is hereby automatically apportioned upon receipt and acceptance of such orders pursuant to the OMB letter of May 15, 1992.”

and as follows for the ensuing years of an unexpired account:

“In addition to the amounts apportioned herein, an amount or amounts equal to the value of adjustments to prior year orders received and accepted within the fiscal year is hereby automatically apportioned upon receipt and acceptance of adjustments to such orders pursuant to the OMB letter of May 15, 1992.”

020604. Amounts automatically apportioned shall be included on subsequent reapportionment documents in all columns.

0207 DEFERRALS AND RESCISSIONS

020701. Deferrals

A. Available budgetary resources may be withheld from obligation temporarily through the apportionment process with the intent of apportioning them for use later, before they expire. Such deferral action may be taken by the OMB on its own initiative or at the request of the Department. Budgetary resources may be deferred as reserves to provide for contingencies under provisions of 31 U.S.C. 1512; or they may be deferred for other reasons under the Impoundment Control Act (2 U.S.C. 684), except that funds available for only one fiscal year may not be deferred throughout that year.

B. All funds deferred through the apportionment process must be reported to the Congress in special messages. The Congress may overturn a deferral at any time by passing a law disapproving the deferral. If the Congress takes no action to disapprove reported deferrals,

those deferrals may remain in effect until the end of the fiscal year unless a special message indicates that an earlier release is planned. For annual accounts and the last year of multiple-year accounts, however, funds may be deferred only for part of the year.

C. As the fourth quarter approaches, Components should review all deferrals (particularly of funds expiring at the end of the year) to ensure that amounts deferred for only part of the year will be released in time to be used prudently before the year ends. If a determination is made that such amounts should not be used, a rescission will be proposed prior to the beginning of the fourth fiscal quarter. Only in exceptional cases will rescissions be proposed during the fourth quarter. All proposed rescissions must be approved by the OMB.

D. If amounts actually becoming available are less than anticipated for indefinite budget authority, transfers, reimbursements, or recoveries, the difference will be deducted from amounts apportioned and not from amounts deferred or otherwise unapportioned, unless specific provision is made for a different treatment on the approved apportionment form or reapportionment action is taken. Whenever it is determined that a deferred amount will not be required to carry out the purposes of the appropriation or other authority, it will be recommended for rescission as required by law (31 U.S.C. 1512 and 2 U.S.C. 683).

020702. Rescissions

A. The Impoundment Control Act specifies that, whenever the President determines that all or part of any budget authority will not be required to carry out the full objectives or scope of programs for which it is provided, the President will propose to the Congress that the funds be rescinded. Likewise, if all or part of any budget authority limited to a fiscal year (e.g., annual appropriations or budget authority for the last year of multiple-year accounts) is to be reserved for the entire fiscal year, a rescission will be proposed. Budget authority also may be proposed for rescission for other reasons. Generally, amounts proposed for rescission will be withheld during the time the proposals are being considered by the Congress. This may be accomplished through OMB apportionment action and through agency withholding action.

B. All funds proposed for rescission, including those withheld, must be reported to the Congress in special messages. Positive action in the form of an enacted law must be completed to rescind funds. If both houses of the Congress have not completed action on a rescission proposed by the President within 45 calendar days of continuous session, any funds being withheld must be made available for obligation.

020703. DoD Policy

OMB Circular No. A-34 recognizes the possibility of agency deferrals that are not identified in connection with the apportionment process. These are categorized as deferrals of funds provided for a specific purpose or project when such deferral would result in obligation for such specific purpose or project at a pace significantly slower than intended by the Congress. Since it is the policy of the Secretary of Defense to obligate programs consistent with

the expressed intent of the Congress, this category of action should not take place within the Department. Strict adherence to this policy, however, does not preclude the continuance of prudent administrative actions reflected on financial authorizations that affect the timing of obligations for reasons related to the routine financial management of an appropriation, program, or project or to comply with procurement regulations or sound procurement practices. Any action taken in this regard must consider the intent of the Congress in providing funds as the primary criterion in determining whether a reportable deferral exists. Accordingly, DoD officials responsible for such actions must, at all times, be ready to support these judgments to any reviewing authority.

Exhibit PB-46

INSTRUCTIONS FOR PREPARATION OF SF 132
“APPORTIONMENT AND REAPPORTIONMENT SCHEDULE,”
IDENTIFIED AS EXHIBIT PB-46

1. Headings. All headings are self-explanatory.
2. Units of Entries. Display all amounts to the nearest dollar.
3. Column Entries. The DoD Components will make entries in the “Amount On Latest SF 132” and the “Submitted By Component” columns. The OUSD(C) will make entries in the “Requested By SecDef” column. Entries in the “Amount On Latest SF 132” column will be transcribed from the “Action By OMB” column of the most recently OMB approved SF 132 as adjusted by the OMB approved amounts on a Letter Apportionment or certain transfers which are automatically apportioned, if applicable. If it is necessary to request reapportionment when SFs 132 are pending at the OMB, the entries for the “Amount On Latest SF 132” column will be the amounts reflected in the “Requested By SecDef” column on the pending SF 132. All footnotes of a limitation nature relating to entries in the “Action By OMB” column of the most recently approved apportioned position will also be transcribed (if not being revised or deleted in the current action). Complete all entries in the “Amount On Latest SF 132” column even though OMB has not entered the values in the “Action By OMB” column (Lines 1 through 7).
4. Line Entries. The SF 132 contains 12 major lines of data. Lines 1 through 7 represents the value of actual and future budgetary resources contained within an account (usually by program year). Lines 8 through 12 represent the status of these same resources as relating to what is apportioned, what is withheld and what is not apportioned. Most lines are further subdivided in order to display a more definitive representation of a resource.
 - a. Line 1A - “Appropriations”
 - (1) Enter the amount of appropriations (excluding appropriations to liquidate contract authority) specified in an appropriations act or in a substantive act and becoming available on or after October 1 of the fiscal year and net of amounts of appropriations earmarked for payments on the principal of agency debt.
 - (2) Include any enacted supplemental appropriations and the portion of indefinite appropriations warranted by the Treasury Department. In the case of special fund accounts and trust fund accounts which have been designated as “available by the Treasury Department”, enter the amount of receipts credited to the appropriation accounts (excluding amounts to liquidate contract authority).
 - (3) Include rescissions specifically identified to the account that are directed in appropriation language.
 - (4) This line is also used to reflect a reapportionment as the result of a nonexpenditure transfer or appropriation language.

(5) Enter the annualized level of budget authority provided by a Continuing Resolution prior to an appropriations act.

b. Line 1.B - "Borrowing authority." Enter the amount of new borrowing authority planned for the fiscal year. The amount can be definite or indefinite Treasury borrowing authority.

(1) For direct loan financing accounts, enter the estimated amount of Treasury borrowing needed to cover direct loan obligations not financed by offsetting collections.

(2) For guaranteed loan financing accounts, enter the amount of Treasury borrowing needed to cover any default claims that cannot be financed by unobligated balances or specific offsetting collections.

(3) For other revolving fund accounts, such as Homeowners' Assistance, enter the amount of indefinite borrowing authority anticipated to be obligated during the year.

c. Line 1.C - "Contract authority." Enter the amount of contract authority anticipated to be obligated during the year. New budget authority will be reflected even though subsequent appropriations or collections credited to the account are used to liquidate contract authority obligated balances.

d. Line 1.D - "Net transfers, current year authority (+ or -)." Enter the net amount of transfers to (+) or from (-) the account when the source appropriations were made available in the current fiscal year. The entries on this line reflect nonexpenditure transfers between two Federal Government accounts (with the exception of trust funds). This line is also used to reflect reappropriations, as transfers, in the gaining and losing accounts. Individually list the transfer source or receiving account on Exhibit PB-49.

e. Line 1.E - "Other." Enter amounts of anticipated new budget authority under existing law, such as anticipated indefinite appropriations, anticipated new authority to spend agency debt receipts, or anticipated transfers of current year authority as specified by an OUSD(C) implementation document (data sheet). Do not include anticipated supplemental appropriations. As anticipated resources are realized, the amounts move from this line to the applicable realized resources line.

f. Line 2.A - "Brought forward October 1." Enter the unobligated balance of the account brought forward as of October 1 of the current fiscal year. When it is necessary to submit an SF 132 prior to the availability of data to be shown in the final SF 133 report as of September 30, use an estimate of the unobligated balance and identify as "EST." Otherwise, the entry on this line must agree with the unobligated balance shown in the September 30 final SF 133 report. This line applies only to no-year and unexpired multiple-year accounts.

g. Line 2.B - "Net transfers prior year balance, actual (+ or -)." Enter the amount of any unobligated balance of prior year authority actually transferred to (+) or from (-)

the account. This line is also used to reflect, as a transfer, a reappropriation in the gaining and losing accounts. The entry will not include transfers of appropriations enacted for the current fiscal year (shown on line 1.D). The entries on this line are nonexpenditure transfers. Individually list the transfer source or receiving account on Exhibit PB-49.

h. Line 2.C - “Anticipated transfers prior year balances (+ or -).” Enter the amounts of anticipated transfers of prior year balances as specified by an OUSD(C) implementation document (data sheet). Informal clearance by the OUSD(C) is required for inclusion of any anticipated transfer not specified in an implementation memo.

i. Line 3.A.1 - “Collected.” Entries on this line will include a specific category of earnings whether or not subject to automatic apportionment.

(1) Enter the amount of (a) reimbursements and other income earned to date as reported on the most recent SF 133 for deliveries of goods or services that were recorded as collected, and (b) other income collected (as may be appropriate for certain accounts)

earned to date whether or not subject to automatic apportionment. This entry will include any amounts collected from the disposition of assets.

(2) For financing accounts, this will include the subsidy collected from the program account when loans are disbursed.

j. Line 3.A.2 - “Receivable from federal sources.”

(1) Enter the amount of (a) reimbursements and other income earned to date as reported on the most recent SF 133 for deliveries of goods or services that were recorded as earned but not collected, and (b) other income earned but not collected.

(2) For direct loan financing accounts, enter the loan subsidy receivable as reflected on the SF 133. The entry is valid only prior to loan disbursement.

k. Line 3.B.1 - “Advance received.” Enter the change in unfilled customer orders since October 1 accompanied by an advance as reflected on the SF 133.

l. Line 3.B.2 - “Without advance from federal sources.”

(1) Enter the change in unfilled orders since October 1 not accompanied by an advance as reflected on the SF 133.

(2) For direct loan financing accounts, this amount will include the loan subsidy from the program account when the loan is obligated in the financing account.

m. Line 3.C.1 - “Advance for anticipated orders.” There should not be a DoD entry on this line. Advances without orders are held in a deposit account until the order is received.

n. Line 3.C.2 - "Without advance." Enter the current estimate of all other orders to be received during the remainder of the fiscal year. The sum of lines 3.A.1 through 3.C.2 will equal the offsetting collection estimate approved in the President's Budget unless the SF 132 amends that position. There will be no entry on this line for which reimbursements are subject to automatic apportionment.

o. Line 3.D.1 - "Collected." There should not be a DoD entry on this line. No trust fund transfer to a general fund account currently is applicable in the Department.

p. Line 3.D.2 - "Anticipated." There should not be an entry on this line. No anticipated trust fund transfer to a general fund account currently is applicable in the Department.

q. Line 4.A - "Actual." Enter the amount shown as recoveries of prior year obligations from line 4.A of the latest SF 133.

r. Line 4.B - "Anticipated." Do not use this line without prior approval of the OUSD(C).

s. Line 5 - "Temporarily unavailable pursuant to P.L. _____ (-)." Enter as a minus amount the portion of budgetary resources to be temporarily withheld from availability for obligation pursuant to a specific provision in law.

(1) This entry includes amounts not available for obligation in accordance with continuing resolution legislation. Enter as a negative, that portion of the annualized level not available for obligation.

(2) This entry will also include amounts whose availability for obligation is contingent by law upon the occurrence of a specified event, such as enactment of authorizing legislation, final sequestration determination, offsetting collection not available because of obligation limitations or other events specified by law.

Identify in the stub column the public law containing the restriction. The Impoundment Control Act and 31 U.S.C. 1512 are not valid authorizing citations for this entry.

t. Line 6.A - "Cancellation of expired and no-year accounts (-)." This line typically is left blank for apportionment and reapportionment requests.

u. Line 6.B - "Enacted rescissions of prior year balances (-)." This line will be used as necessary to reflect amounts of enacted prior year balance rescissions. Include rescissions of current year amounts on line 1.A.

v. Line 6.C - "Capital transfers and redemption of debt (-)." This line will be used as necessary to identify amounts transferred for principal repayments to the Treasury for borrowing outstanding. Do not include interest payments on this line.

w. Line 6.D - "Other authority withdrawn (-)." This line typically is left blank for apportionment and reappropriation requests and is used to reflect contract authority and borrowing authority withdrawals.

x. Line 6.E - "Pursuant to P.L. (-)." Enter amounts permanently canceled by law that are not included on other lines.

(1) When a general provision specifies a specific amount is to be reduced from more than one account and authorizes the agency head to distribute the reduction, enter the canceled amount on this line.

(2) Enter the amount permanently canceled to due final presidential sequestration order.

(3) Enter the amount of reappropriation to eliminate any double counting of authority due to entries included on lines 1.D or 2.B.

y. Line 6.F - "Anticipated for rest of year (+ or -)." This line typically is left blank when submitting DoD apportionment or reappropriation requests. Use of this line requires OUSD(C) approval.

z. Line 7 - "Total Budgetary Resources." Enter the sum of entries on lines 1.A through 6.F. This represents the total amount of budgetary resources available for apportionment in the current fiscal year.

aa. Apportioned: Category A - Lines 8.A.(1) through 8.A.(4). These lines are used for accounts designated to be apportioned on a calendar quarter basis.

(1) Enter the amounts requested to be apportioned for each calendar quarter in the fiscal year.

(2) When an account has been operating under a continuing resolution beyond the first quarter of the fiscal year, the line entries for the first and subsequent quarters will be bracketed and a single amount shown for the continuing resolution period.

(3) Reappropriation requests submitted for the purpose of revising amounts previously apportioned will show changes for current and subsequent periods only;

apportionments previously established are not subject to change after the close of the period for which the apportionment was made. When a reappropriation schedule is submitted for the purpose of revising the cumulative amount through the current period to an amount below the cumulative amount for the previous period, a minus figure for the current period will be shown.

(4) In the stub column, enter as a memorandum entry the amount of obligations incurred for the fiscal year as of the latest available date from the SF 133.

bb. Apportioned: Category B - Lines 8.B(1) through 8.B(5). These lines are used for accounts designated to be apportioned on a basis other than calendar quarters.

(1) When authority is apportioned on a basis other than quarterly time periods, identify in the stub column, the activity, function, project, object, or combination thereof on which apportionments will be based. When there is no subdivision of the amount apportioned, line 8.B(1), will be amended to read “Lump Sum.”

(2) In the stub column, enter as a memorandum entry the amount of obligations incurred for the fiscal year as of the latest available date from the SF 133. Obligations will be displayed by the activity, function, project, object, or combination thereof on which the Category B apportionment is based upon.

cc. Line 9 - “Withheld pending rescission.” Enter the amounts which are to be withheld in the current fiscal year and reported as proposed rescissions of budgetary resources. Refer to paragraph 020702 of this volume.

dd. Line 10 - “Deferred.” Enter the amounts which are not requested for apportionment at the present time and which are reported as deferrals of budgetary resources. Refer to paragraph 020701 of this Volume.

ee. Line 11 - “Unapportioned balance of revolving fund. Enter the amount of budgetary resources available or creditable to the fund for the fiscal year but not apportioned in Categories A or B or restrictively being withheld. This line primarily is used for public enterprise funds and intragovernmental revolving funds. Additionally, for guaranteed loan financing accounts, enter the uninvested funding used as a reserve against guaranteed loan defaults.

ff. Line 12 - “Total Budgetary Resources.” Enter the sum of entries on lines 8.A(1) through 11. This entry will be the same as the entry on line 7.

5. Footnotes. Footnotes to entries in all columns will be shown in an addendum that immediately should follow the SF 132.

APPENDIX BINSTRUCTIONS FOR PREPARATION OF EXHIBIT PB-48
“ANALYSIS OF REIMBURSEMENTS”

1. Entries in column b will be the sum of entries in columns c and d.
2. Line 1 - “Total reimbursements.” Enter in each respective column the totals of lines 2, 3, and 4.
3. Line 2 - “Earned.” Enter in column b the sum of lines 3.A.1 and 3.A.2, SF 132, “Submitted By Component” column. Enter in columns c and d the appropriate amounts from column e, Reimbursements Earned, of the most recent “Report on Reimbursements” (DD-Comp(M) 725).
4. Line 3 - “Change in unfilled customer orders.” Enter in column b the sum of lines 3.B.1 and 3.B.2, SF 132, “Submitted By Component” column. Enter in columns c and d the appropriate amounts from column f, Change in Unfilled Orders, of the most recent “Report on Reimbursements.”
5. Line 4 - “Anticipated orders or earnings for rest of year.” Enter in column b the amount from line 3.C.2, SF 132, “Submitted By Component” column. Enter the sum of lines 4.a and 4.b for each column.
 - a. Line 4.a - “As of the most recent SF 133 (Report On Budget Execution).” Enter in columns c and d, the appropriate amounts from column g, Anticipated Orders for Rest of Year, of the most recent “Report on Reimbursements.”
 - b. Line 4.b - “Additional orders (or orders no longer anticipated).” Enter in columns c and d, the estimate of any additional orders or, as a negative number, orders no longer anticipated, based on information becoming available after preparation of the most recent “Report on Reimbursements” and SF 133.
6. Whenever there is an increase or decrease requested for reimbursable authority, a short explanatory statement is required at the bottom of the PB-48 or on a separate sheet of paper to provide reasons why the change to reimbursable authority is being requested.

APPENDIX B
ANALYSIS OF REIMBURSEMENTS

[Appropriation Title & Fiscal Year Program]
In Support of Apportionment No. _____
(In Dollars)

Reimbursements and Other Income	Reimbursements Subject to Apportionment		
	Total (Shown on S.F 132)	Foreign Military Sales Orders and Income	Other Orders and Income
(a)	(b)	(c)	(d)
1. Total reimbursements			
2. Earned or received			
3. Change in unfilled customer orders			
4. Anticipated orders or earnings for rest of year			
a. As of most recent SF 133			
b. Additional orders (or orders no longer anticipated) based on information which became available after preparation of most recent SF 133*			

An Analysis of Reimbursements is required with the SF 132 for each current year account requesting increases to the reimbursable program. Submit one copy of the analysis for each copy of the SF 132.

* When this line is used, a footnote explaining the supporting data for the estimate must be shown. The explanation should be based upon specific orders or cases where appropriate, or upon historical data where the estimate is based upon trends. A reference to such historical accounting data must be included.

Exhibit PB-48

APPENDIX C

SCHEDULE OF TRANSFERS

(In Dollars)

INSERT ACCOUNT TITLE HERE

19XX/19XX

This schedule is required whenever there are transfer amounts reflected on lines 1.D, 1.E, 2.B, or 2.C of the SF 132. Display: (a) the funding source and/or destination account; (b) dollar amounts; (c) description; (d) approval dates and (e) statutory authorities. Differentiate budget authority (B/A) transfers from unobligated balance (PY) transfers. Refer to information contained in appropriations act or on the "Data Sheet" which is enclosed with reprogramming action approval letters when preparing this schedule. Include not only the change requested on the SF 132 in process, but all transfers for the fiscal year to date.

(a)	Amount (b)	Project/Description (c)	Approval (d)	Statutory Authority (e)

TOTAL	<u>6,000,000</u>			

CHAPTER 3

APPROPRIATION TRANSFER AUTHORITIES0301 GENERAL

In addition to the regular and supplemental appropriations that make funds available, the Congress has provided authority for transfers of funds, i.e., moving funds from one appropriation to another. This section identifies and describes the various transfer authorities that are available to the Department and prescribes action required to exercise transfer authority.

0302 TYPES OF TRANSFER AUTHORITIES

030201. Authority for nonexpenditure transfers maybe included in permanent, one-time or recurring provisions of law. Most of the transfers within the Department, however, are made pursuant to authority granted in the annual Appropriations Act. Some of the transfer authorities are provided solely for administrative convenience and some allow no discretionary action. Basic responsibility for transfer of funds relating to nonexpenditure transfers will be assigned to the DoD Components from which the funds are transferred.

030202. Authority for Transfers Affecting Budget AvailabilityA. Congressionally Directed Transfers

This type of transfer is included in the applicable DoD Appropriations Acts, either in the General Provisions or in the language that enacts the individual appropriations. The Act itself then becomes the authority for DoD Components to process the transfer documents.

B. General Transfer Authority

The General Revisions sections of DoD Appropriations and Authorization Acts provide authority to transfer funds between appropriations, or between appropriation subdivisions approved in the Acts, upon determination by the Secretary of Defense that such action is necessary in the national interest; provided that such authority to transfer may not be used unless for higher priority items, based on unforeseen military requirements, than the items for which funds were originally appropriated, and in no case where the item for which funds are requested has been denied by the Congress. The Congress must be notified promptly of all transfers made under this authority. The Appropriations Act authority requires approval of the OMB; the Authorization Act authority does not include that requirement.

C. Transfers Between Working Capital Funds

Generally, the DoD Appropriations Act provides authority, during the current fiscal year, to transfer cash balances between working capital funds and the Foreign Currency Fluctuations, Defense and Operation and Maintenance appropriation accounts. Transfers may be made

between such funds in such amounts as may be determined by the Secretary of Defense, with the approval of the OMB, except that transfers may not be made unless the Secretary of Defense has notified the Congress of the proposed transfer. Except in amounts equal to the amounts appropriated to working capital funds in the Act, no obligations may be made against a working capital fund to procure war reserve material inventory, unless the Secretary of Defense has notified the Congress prior to any such obligation.

D. Transfer of Funds for Intelligence Activities

See Chapter 6, section 0606 of this Volume for intelligence-related transfer authorities.

E. Transfer Accounts

Various Appropriation and Authorization Acts have included language making funds available or transfer authority available for accounts such as Environmental Restoration, Defense; Drug Interdiction and Counter-Drug Activities, Defense; Foreign Currency Fluctuations, Defense; Foreign Currency Fluctuations, Construction, Defense; and the Defense Modernization Account.

F. Transfer of Funds and Personnel for Functional Transfers Within the Department of Defense

When a transfer of function, power, or duty is made within the Department of Defense from one Military Department or Defense Agency to another, pursuant to the authority of Title 10, United States Code, section 125, balances of appropriations and civilian employee positions, that the Secretary of Defense determines are available and needed to finance and perform that function, power, duty, or activity, may be transferred, with the approval of the President (as delegated to the OMB). Funds transferred to the department or agency to which that function, power, duty, or activity, as the case may be, is transferred, and used for any purpose for which those appropriations were originally available shall be made in accordance with Title 10, United States Code, section 126 (see Chapter 4 of this Volume).

G. Transfer of Funds for Functional Transfers Between Government Agencies

Title 31, United States Code, section 1531 (a) provides similar authority to 10 U.S.C. 126, above, limited to appropriations. Title 31, United States Code, section 1531 (b) provides that the head of the agency, with the President's approval, determines the amounts to be transferred in the case of intra-agency transfers and that the President determines the amounts to be transferred in the case of inter-agency transfers.

H. Transfer of Funds to Other Departments and Agencies: Limitation

Title 10, United States Code, section 2215 provides that funds available for military functions of the Department of Defense may not be made available to any other department or agency of the Federal Government pursuant to a provision of law enacted after November 29, 1989, unless, not less than 30 days before such funds are made available to such other department or agency, the Secretary of Defense submits to the House National Security and Senate Armed Services Committees and the Committees on Appropriations of the Senate and House of Representatives a certification that making those funds available to such other department or agency is in the national security interest of the United States.

0303 STATUS REPORT ON TRANSFER ACTIONS

In order to ensure that all required actions relating to transfers are accomplished in a timely manner, the OUSD(C)/P&FC will maintain and publish periodically a status report on transfer actions.

0304 ACTIONS RELATED TO EXERCISE OF TRANSFER AUTHORITY

030401. Proposals to exercise transfer authority should be submitted formally by the DoD Components to the OUSD(C) for processing. The submission must state the statutory authority for the proposed transfer.

030402. Secretary of Defense Determination

In most cases, authority is provided for transfer by the Secretary of Defense in amounts determined by the Secretary of Defense, or upon determination by the Secretary of Defense that certain conditions exist. Secretary of Defense determinations, when required, either will be obtained or signed by the OUSD(C). In processing SF 1151 transfer documents to the Treasury Department, the statutory authority for the transfer must be cited, with references to documents constituting determinations and copies of the associated OMB or Presidential approvals when required.

030403. OMB/Presidential Approval

Where the statutory authority requires a determination or OMB/Presidential approval for the transfer, the OUSD(C) will obtain the necessary approval. The OMB approval may also include the apportionment of funds.

030404. Reprogramming Actions

Reprogramming actions (DD 1415) made pursuant to provisions of Chapter 6 of this Volume, will be submitted whenever necessary to provide accountability for increases or decreases between DoD appropriations. Accordingly, reprogramming actions are required to reflect transfer amounts that are not congressionally directed. The timing for submission of the DD 1415 depends upon the nature of the transfer and the amount involved.

030405. Processing of SF 1151 Documents

A. Except as stated below, SF 1151 documents transferring funds between DoD appropriation and fund accounts should not be processed prior to the receipt of an OUSD(C) memorandum directing that such action be taken. The following types of transfers may be made without prior approval of the OUSD(C):

1. Transfers of funds for functional transfers between government agencies (31 U.S.C. 1531) - when the request is initiated by a government agency other than the Department of Defense.

2. Transfers of obligational authority from one agency to a transfer appropriation account that is established in another agency to carry out the purposes of the parent appropriation or fund. Such transfers are not adjustments to budget authority or balances of budget authority.

B. DoD Components must assure that a copy of each SF 1151 is be furnished to the OUSD(C)/P&FC concurrent with distribution of the SF 1151 to the Treasury and affected organizations.

C. The memorandum from the OUSD(C) directing that an SF 1151 be processed will be addressed both to the transferring office and the recipient office, and will include the following information.

1. Identity of the transferring office.
2. Account from which funds are to be transferred and the recipient account.
3. Amount of the transfer in dollars.
4. Statutory references for the transfer authority.
5. Reference to enclosure of a Secretary of Defense determination, if applicable.
6. Reference to enclosure of an OMB approval, if applicable.
7. Statement of whether the action is a budget authority transfer, a reappropriation, or transfers of obligated or unobligated balances.
8. Request that a copy of the SF 1151 be provided to OUSD(C).
9. Statement as to the reprogramming action (DD 1415) serial number on which transfers are reflected.

10. Statement as to the applicable lines on the Apportionment and Reapportionment Schedule (SF 132) on which the transfer amounts must be reflected, when submitting the required schedule or subsequent reapportionments.

11. Statement as to the applicable lines on the Report on Budget Execution (SF 133) on which the transfer amounts must be reflected, when the transfer is made.

12. Statement as to the official responsible for issuance of the applicable fund authorization documents (e.g., EOB, DD 440, approval/deferral memos).

13. Statement that either the OUSD(C) or other applicable designee will make formal notification to the Congress of the amount transferred, if required by law.

030406. Notification to the Congress

A. When there is a statutory requirement that transfers be reported to the Congress, such notification is made to the President of the Senate and to the Speaker of the House of Representatives promptly by the OUSD(C) upon completion of transfer action. In accordance with informal arrangements between the Department of Defense and the cognizant Subcommittees of the Committees on Appropriations, a copy of the report is transmitted to those cognizant Subcommittees and to the House National Security and Senate Armed Services Committees.

B. It should be noted that, although transfers of funds pursuant to Title 10, United States Code, section 126 need not be reported to the Congress, transfers of functions pursuant to 10 U.S.C. 125 must be reported when there is a substantial reduction or elimination of a major weapons system. The OSD office submitting the transfer of function documents to the Secretary of Defense for approval is responsible for preparing documents to notify the Congress.

03047. Apportionment and Reapportionment Schedules

A. Pursuant to provisions of OMB Circular A-34 and Chapter 2 of this Volume, all approved and/or appropriated transfers will be reflected on Apportionment and Reapportionment Schedules (SF 132). For certain transfers specified in Chapter 2 (e.g., Foreign Currency Fluctuations, Defense or Environmental Restoration), the gaining and losing accounts automatically are apportioned and transfers will be reflected on subsequent schedules that are generated for other purposes during the year.

B. Each Apportionment and Reapportionment Schedule submitted must show all transfers processed to date. The SF 132 is processed concurrently for both the gaining and losing appropriations.

030408. Guidance on SF 133 Treatment

Although OMB Circular A-34 does not contemplate that transfers will be included on the “Report on Budget Execution” (SF 133) until the SF 1151 action is completed, transfers may be included on the SF 133 on an anticipated basis when all statutory requirements for the transfer have been met but prior to the processing of the SF 1151. Decisions relating to anticipated transfers on the SF 133 will reflect the agreed-upon position of the OUSD(C) and the OMB.

030409. Fund Authorization Documents

Changes will be made to the EOB, DD 440, etc., to reflect program adjustments resulting from the transfers, as determined by the cognizant Program/Budget appropriation director in the OUSD(C).

CHAPTER 4**FUNCTIONAL TRANSFERS****0401 STATUTORY AUTHORITY**

Under the provisions of Title 10, United States Code, section 125, the Secretary of Defense is authorized to transfer, reassign, consolidate or abolish any function, power or duty vested in the Department. Whenever a transfer of function, power or duty is accomplished under the authority of Title 10, U.S.C. 125, balances of appropriations and civilian employees, that the Secretary of Defense determines are available and needed to finance and perform that function, power, duty or activity, maybe transferred, with the approval of the President as delegated to the OMB in accordance with Title 10, United States Code, section 126.

0402 TYPES OF TRANSFER AUTHORITIES

040201. Fund adjustments necessitated by a transfer of functions during a current year should be handled to the extent possible on a reimbursable basis. Only when financing of such transfers through the reimbursement process presents serious burdens or involves significant amounts should a transfer of funds be requested.

040202. When transfers of funds are necessary as a result of transfer of functions under Title 10, United States Code, section 125, it will be the responsibility of the receiving DoD Component to request that the USD(C) obtain the necessary determination and approval for the transfer of funds. The request shall be prepared in accordance with Title 10, United States Code, section 126 and the provisions of Chapter 3 of this Volume and contain a statement that the DoD Components concerned have agreed to the amounts proposed for transfer. A copy of the Secretary of Defense approval of the transfer of functions (under 10 U.S.C. 125) should accompany the request.

(This page intentionally left blank)

CHAPTER 5

SPECIAL MILITARY CONSTRUCTION/FAMILY HOUSING FUND
RELEASE PROCEDURES0501 GENERAL

This chapter provides guidance on the fund release and the project approval procedures applicable to the military construction and family housing appropriations.

0502 OVERVIEW

050201. Fund approval for the military construction and family housing construction accounts will be accomplished by the submission of a request from the cognizant DoD Component in a format 460 to the ODC(P/B), Directorate for Construction, OUSD(C). An example of this format, and the instructions for its completion, are included in Appendix A of this chapter.

050202. A format 460 need not be submitted for the family housing annual accounts. Fund approvals providing quarterly limitations by budget activity for these accounts will continue to be accomplished by OUSD(C) memoranda.

050203. Upon OUSD(C) review of the DoD Component submission, a fund approval will be issued to the requesting Component to provide obligational authority corresponding to the action taken on the request as reflected in the OSD approved column of the format 460. A copy of the format 460 will be attached to the fund approval. A sample of the fund approval is provided in Appendix B.

050204. The approval document limits the authority to incur obligations. Further, obligations will not be incurred prior to the receipt of the fund approval document or in excess of the amounts shown therein.

0503 SUBMISSION REQUIREMENTS

A fund release will be required whenever a DD Form 1105 is submitted, when resource realignments exceed the established below threshold reprogramming limitations, or when requesting fund release for projects previously apportioned but for which funds were withheld by OUSD(C) on a previous fund release request.

APPENDIX A
INSTRUCTIONS FOR FORMAT 460
“MILITARY CONSTRUCTION/FAMILY HOUSING PROGRAM
FUND APPROVAL”

1. Requirement. A format 460 is required for all Military and Family Housing Construction accounts. It will be executed in project detail for the major construction and new construction budget activities and executed as a lump sum for all other budget activities. The format is intended to provide a complete listing of all the disposition of the funds provided by the applicable appropriation act and includes all reprogrammings.

2. Entries. Columnar entries shall be as follows:

a. Installation/Projects. Display the name of the installation and the project title. If there is more than one project at an installation or activity, the installation or activity title should not be repeated. The project listing should be in state sequence with the same installation and project nomenclature appearing in the Construction Annex C-1. The centrally managed allotment (CMA) for foreign currency fluctuation should be shown as a separate entry at the end of the project listing.

b. Special Interest. The special interest column should contain an asterisk if the project was reduced by either chamber of the Congress during the enactment process or was indicated to be of special interest in a congressional report.

c. Appropriated Amount. The amount shown in this column must be consistent with the amount shown for the project in the C-1. The total of all amounts shown in this column must correspond to the amount provided in the applicable appropriation act covered by the apportionment/reapportionment exhibit. If the amount appropriated and authorized for a project differs, the amount authorized will appear parenthetically below the amount appropriated. For the foreign currency fluctuation CMA this line is blank.

d. Formal Reprogramming. If the project appears in a formal reprogramming request, either as a recipient of funds or as a source of funds, enter the adjustment in this column which shall be consistent with the amount shown in the reprogramming request. Split funding refers to a project funded using more than one appropriation. If projects have been split funded, only the amount of resources covered by the apportionment should be identified against the project and the project appropriately footnoted.

e. Below Threshold Reprogramming. This column is similar to the previous column; however, it is used when the project never appeared in a formal reprogramming request, i.e., resources have been realigned below the threshold requiring prior approval.

f. Previously Approved. This column represents the amount currently apportioned against the project--the amount appearing on the latest format 460 formally

submitted to OUSD(C). Split funded projects will show only the resources from the fiscal year covered by the apportionment and will be footnoted to indicate where the balance of resources resides. This column will be totaled and the sum will equal the amount reflected on the appropriate line in block 8, column b of the most recent DD Form 1105. Apportionment is automatic for the foreign currency fluctuation CMA and is to be reflected in the next DD Form 1105 submission.

g. Proposed. This column represents the amount being requested for apportionment against this project. The column will be totaled and the sum will equal the amount reflected on the appropriate line in block 8, column c of the DD Form 1105.

h. Quarter Award. Enter the quarter and fiscal year in which the project was awarded or is expected to be awarded. For the foreign currency fluctuation CMA this column is blank.

i. OSD Approved. OUSD(C) will indicate the amount approved in this column.

j. Symbol. Enter the Treasury code for the account for which obligational authority is being sought. For example, 21 8/2 2050 would represent the FY 1988 Military Construction Army account. The Defense Agencies should include the limitation separated by a period from the 4-digit Treasury code. For example, 97 8/2 0500.1400 would represent FY 1988 Military Construction Defense Agency funds provided to the Defense Medical Facilities Office.

k. Submission No. The first two digits of the submission number should equate to the last two digits of the fiscal year in which the format 460 is submitted. The middle digit(s) should equate to a period of availability or program year of the funds. For example, the FY 1988 program would be 8/2. The last digit(s) represent the submission number in that fiscal year. For example, the initial submission would be "1" and all subsequent submissions incremented accordingly.

MILITARY CONSTRUCTION AND FAMILY HOUSING PROGRAM/FUND APPROVAL		APPROPRIATION TITLE: SYMBOL:		(j) (Dollars)		SUBMISSION NO. As of:		(k)

CHAPTER 6

REPROGRAMMING OF DOD APPROPRIATED FUNDS0601 PURPOSE

060101. This chapter establishes the policies of the Department for the reprogramming of appropriated funds. Guidance in this chapter reflects recognition by the Congress of the practice of reprogramming DoD funds covered in DoD Appropriations Acts as a necessary, desirable and timely device for achieving flexibility in the execution of DoD programs. (See Chapter 7 for reprogramming policy for military construction and family housing funds covered by the Military Construction Acts.)

060102. Procedures are provided for establishing the base for reprogramming actions; submitting, approving, and processing reprogramming actions; and submitting a semiannual report of programs reflecting all reprogramming actions.

060103. The policy herein replaces reprogramming guidance formerly printed in the June 1992, Budget Guidance Manual (DoD 7110-1-M), that reflected policy contained in the DoD Directive 7250.5, dated February 5, 1990, and DoD Instruction 7250.10, dated January 10, 1980, which were canceled effective July 17, 1990.

0602 REPROGRAMMING DOCUMENTS IN GENERAL

060201. Base for Reprogramming Actions (DD 1414). The DD 1414 establishes the base from which reprogramming actions may be taken based on the DoD Appropriations Act. A Revised Base for Reprogramming Actions (DD 1414-R) also is prepared as required to reflect subsequent supplemental appropriations acts. These documents should be footnoted to identify those items known to be of special interest to one or more of the congressional committees and those items specifically denied by the Congress.

060202. Reprogramming Actions (DD 1415). Reprogramming actions, upon approval of the Department, will be used to request the prior approval of (DD 1415-1) or provide prior notification (DD 1415-2) to the congressional committees. In addition, internal actions requiring audit-trail type actions (DD 1415-3) will be implemented by the Department.

060203. Report of programs (DD 1416). This report reflects the congressionally approved programs as enacted, reprogramming actions which have been approved, congressionally directed undistributed amounts and transfers, and reprogramming of funds that are implemented by a DoD Component using below threshold reprogramming flexibility. This report is prepared twice yearly, as of March 31 and September 30.

0603 DETAILED PROCEDURES FOR BASE FOR REPROGRAMMING ACTIONS

060301. General. The Base for Reprogramming Actions (DD 1414) establishes the base from which reprogramming actions may be taken. It identifies line items for each appropriation covered in the DoD Appropriations Acts, except those appropriations having no budget activity subdivisions in the budget document presentation. In addition, accounts which are available solely for transfer to another appropriation for a specified purpose are excluded. A Revised Base for Reprogramming Actions (DD 1414-R) is prepared as required to reflect supplemental appropriations acts.

060302. Due Date. Following completion of congressional action on the DoD Appropriations Act, or a DoD Supplemental Appropriations Act, a memorandum will be transmitted to the Components to establish the due date and address any specific guidance, as appropriate. The DoD Components shall submit two copies (not the original) of the "Base for Reprogramming Actions" to the OUSD(C)/P&FC for review prior to submission to the congressional committees.

060303. Transmittal. Upon notification from the OUSD(C)/P&FC that the advance copy of the Base for Reprogramming Action is acceptable, or after the DoD Components have made any necessary changes, the originals and one copy of the DD 1414 will be submitted to the OUSD(C)/P&FC for printing and transmittal to the congressional committees. In some instances, copies of the DD 1414s are provided to the congressional committees for clearance prior to final printing. Each DoD Component shall provide an index and number the pages within each appropriation account and in sequence. Final printed copies will be distributed to the DoD Components.

060304. Security Classification. Each DoD Component will be responsible for proper security review and classification of its DD 1414. Each page will be given an appropriate security classification based solely on the data shown on that page, except for the first page of an account section having classified pages. In this instance, the first page shall be marked with the highest classification of the following pages and be footnoted to state that upon removal of pages (classified page numbers) the document will become unclassified. All other pages not having classified data shall be marked "Unclassified." Classified data listed may not be higher than "SECRET" and should be bracketed using black lead pencil. The classifying activity and the appropriate downgrading instruction shall be shown on each page that is classified.

060305. Detailed Instructions for Preparation of the DD 1414. Detailed instructions for the Base for Reprogramming Actions for the initial appropriations act are provided beginning with page 6-19. Detailed instructions for documenting supplemental appropriations acts using the DD 1414-R are provided at page 6-22.

0604 REPROGRAMMING ACTIONS

060401. Reprogramming Actions Requiring Congressional Approval. Two types of reprogramming actions, when approved by the Department, will be used to request the prior approval of, or notification to, the congressional committees. During FY 1991, the concept of an "omnibus" reprogramming action (prior approval) was initiated to streamline the reprogramming process for the congressional committees and the Department. Specific approval of the USD(C) is required on all reprogramming actions prior to submission for approval to the House National Security and Senate Armed Services Committees, House and Senate Committees on Appropriations, and House and Senate Committees on Intelligence. The following defines those actions requiring prior congressional approval or congressional notification.

A. Reprogramming actions requiring prior approval of the congressional committees (DD 1415-1) are actions involving the application of funds, regardless of the amount, which:

1. Increase the procurement quantity of a major end item, such as an individual aircraft, missile, naval vessel, tracked combat vehicle, and other weapon or torpedo and related support equipment for which funds are authorized. (In such cases where specific congressional language is provided allowing for additional quantities to be procured within

appropriated funds, increases to quantities for major end items shall be submitted to the USD(C) for approval as an internal reprogramming action.)

2. Affect an item that is known to be or has been designated as a matter of special interest to one or more of the congressional committees. (In rare instances, when funds from special interest items are required to be reprogrammed within the same program line item or program element, to an existing program or project, notification to the congressional committees may be made by letter. Letters shall be submitted to the congressional committees by the DoD Component involved only after advance coordination with the applicable OUSD(C)/(P/B) Directorate.)

3. Involve the use of general transfer authority. The DoD Appropriations and Authorization Acts include a general provision to transfer funds, known as general transfer authority. Transfers may be made between appropriations, or appropriation subdivisions approved in the Acts, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation or fund to which transferred. Transfer may be made upon determination by the Secretary of Defense that such action is necessary in the national interest; provided that such authority to transfer may not be used unless for higher priority items, based on unforeseen military requirements, than the items for which funds were originally appropriated, and in no case where the item for which funds are requested has been denied by the Congress. The Congress must be notified promptly of all transfers made under this authority. The general provisions of the Appropriations Acts require approval of the transfers from the OMB. (Exceptions to the use of a prior approval reprogramming action may apply for reclassification of programs to the proper appropriation for execution of the intended program or congressional adds and do not change the purpose for which the funds were originally appropriated. These actions, however, still require the use of general transfer authority and compliance with the provision in law.)

Reprogramming actions requiring notification to congressional committees (DD 1415-2) are actions involving changes in the application of funds within an appropriation in amounts (thresholds) greater than those agreed upon between the committees and the Department, as follows:

1. Military Personnel: A cumulative increase of \$10 million or more in a budget activity.

2. Operation and Maintenance: A cumulative increase of \$20 million or more in a budget activity. (In the past, the congressional committees have imposed a reprogramming decrease threshold from specific subactivity group categories. When this is the case, these threshold amounts are separately identified on the Base for Reprogramming Actions, DD 1414.)

3. Procurement: For any program year, a cumulative increase of \$10 million or more in a procurement line item, the addition of a new procurement program of \$2 million or more; an addition of a new procurement program estimated to cost \$10 million or more within a three-year period; a cumulative decrease of more than \$10 million, or 20 percent of the appropriated amount (inclusive of supplemental appropriations and rescissions), whichever of the two is greater or the termination of any program which results in the elimination of a procurement program, or elimination of a subprogram \$10 million or greater within a procurement program. (For new start programs less than \$2 million for the entire effort, a notification letter to the congressional committees is required in advance of initiating the

program. For terminations of programs falling within the amounts normally allowed by “below threshold” reprogramming, then notification prior to any reprogramming shall be made by letter. Letters for new start programs or program terminations shall be signed by the notifying Component, after coordination of the OUSD(C).)

4. RDT&E: For any program year, a cumulative increase of \$4 million or more in an existing program element; the initiation of a new program of \$2 million or more, the addition of a new program whose cost is estimated to be \$10 million or more within a three-year period; a cumulative decrease of more than \$4 million, or 20 percent of the appropriated amount (inclusive of supplemental appropriations and rescissions), whichever of the two is greater; or the termination of any program which is equal to the total amount of the program element, or elimination of a subprogram or project \$10 million or greater within such a program element. (For new start programs less than \$2 million for the entire effort, a notification letter to the congressional committees is required in advance of initiating the program. For terminations of programs falling within the amounts normally allowed by “below threshold” reprogramming, then notification prior to any reprogramming shall be made by letter. Letters for new start programs or program terminations shall be signed by the notifying Component, after coordination of the OUSD(C).)

060402. Internal Reprogramming Actions. Reprogramming actions internal to the Department are audit-trail type actions (DD 1415-3) processed within the Department and serve various needs. One type is a reclassification of funds, not otherwise constrained by law or other provisions, and the action does not involve any change from the purpose justified in budget presentations to the Congress and appropriated by the Congress. This reclassification may involve the realignment between different DoD appropriations and require the use of general transfer authority. Other internal actions include those involving reprogramming to or from transfer accounts, such as Foreign Currency Fluctuations, Environmental Restoration, and Drug Interdiction. A third type of reclassification reflects approval to increase quantities, when not otherwise requiring prior approval of the congressional committees.

A. Reclassification Actions. In certain instances, it is necessary to reclassify the application of funds, different from that shown in the budget justification material presented to the Congress and subsequently appropriated by the Congress. Such reclassifications do not involve any change in the substance of the program or amounts from the purposes originally contemplated and budgeted for, testified to, and described in the justifications submitted to the congressional committees, and subsequently appropriated by the Congress. These actions may also involve realignment of congressionally added programs that are more appropriately executed in a different program line or in a different account from which the funds were appropriated. In cases where the realignment is between DoD appropriations, then the use of general transfer authority would be involved, along with the legal requirements thereof.

B. Foreign Currency. Transfers are approved pursuant to authority provided by the Foreign Currency Fluctuations, Defense appropriation, as enacted in Public Laws 95-457 (92 Stat. 1236), 96-38 (93 Stat. 100), 97-377 (96 Stat. 1865), and 99-500 and 99-591 (100 Stat. 3341-116), to reflect fluctuations in currency exchange rates.

C. Environmental Restoration. Transfers are approved pursuant to the authority provided in the appropriation language for the Environmental Restoration, Defense appropriation, as enacted in DoD Appropriations Acts.

D. Drug Interdiction. Transfers are approved pursuant to the authority provided in the appropriation language for the Drug Interdiction and Counter-Drug Activities, Defense appropriation, as enacted in DoD Appropriations Acts.

E. Procurement Quantities. Approval for increases to procurement quantities for major end items, not otherwise requiring prior approval of the congressional committees, shall be provided through the use of an internal reprogramming action. A sample reprogramming action is provided at page 6-29.

060403. Detailed Instructions and Formats for Preparation of DD 1415. Detailed instructions for DD 1415s submitted for prior approval, notification, or as internal reprogramming actions are provided beginning with page 6-23. Incoming requests for the DD 1415-1, 2 and 3 reprogramming actions should be submitted in Microsoft Word format with a disk to be provided along with the original DD 1415. Templates are available by contacting the OUSD(C)/P&FC point of contact for reprogramming,

060404. Submittal by Components. Military Departments must submit their proposed DD 1415 action formally by memorandum addressed to the USD(C) from the Assistant Secretary (Financial Management and Comptroller) of the Military Department. Requests from a Defense Agency should be signed by its Comptroller (or equivalent official). The due date for the "omnibus" reprogramming action will be addressed by separate memorandum. For all reprogramming actions, the original, two copies, and the security review copy are to be handcarried to the OUSD(C)/ P&FC for processing.

A. The DoD Component memorandum shall include the following:

1. Exceptions outside the "omnibus" process, before or after the submission date to the congressional committees, will only be made for those actions involving critical requirements or unforeseen circumstances that due to contract award dates or other time sensitive reasons cannot wait for implementation of the "omnibus." In these cases, individual reprogramming actions will be entertained, and the transmittal memorandum must clearly define the urgency of the requirement.

2. A statement that the reprogramming document has been cleared by the Director for Security Review, Office of the Assistant Secretary of Defense (Public Affairs). The copy showing the original security stamp of approval should accompany the transmittal memorandum.

3. A statement to the effect that the reprogramming document has been coordinated with the appropriate intelligence activities within the respective DoD Component and that the action does or does not affect an intelligence related activity.

4. Identification of any "new starts" being requested, and whether they were approved by PBD or other action.

B. All reprogramming actions that propose to use O&M resources as a source of funding for other requirements will be transmitted to the Director for Operations, J-3, The Joint Staff for review prior to submission to the OSD. The DoD Component memorandum transmitting the reprogramming action to the OSD will include the evaluation of The Joint Staff and indicate either that the O&M reprogramming should have no impact on readiness or that the

benefit to readiness from the reprogramming increase should outweigh any negative readiness impact from the reprogramming decrease.

060405. OMB Approval. For the purposes of Prior Approval Reprogramming Actions (DD 1415-1), any reprogramming action requiring the use of general transfer authority will be forwarded by the USD(C) to the OMB for endorsement of the proposed transfer of funds. Such action will be taken prior to the OSD forwarding the action to the cognizant congressional committees. The USD(C) shall obtain formal OMB approval for the specific transfer of funds after congressional responses on the action are received and final results on implementation of the action are determined. For the purposes of Internal Actions (DD 1415-3), that do not require the approval of the congressional committees, but do use general transfer authority, the approval of OMB is received after signature of the reprogramming action by the USD(C).

060406. Signed DD 1415s. The USD(C) has authority to sign all reprogramming actions and upon signature the reprogrammings are returned to OUSD(C)/P&FC for dissemination. A DoD Serial Number, in sequence, will be assigned to the signed DD 1415. When the use of general transfer authority is involved, the DoD Serial Number is not assigned to the reprogramming action until after the endorsement or approval of the transfers is received from OMB.

060407. Distribution of the DD 1415. After receipt of the DD 1415 by the congressional committees a copy of the signed DD 1415 will be provided to the submitting DoD Component, with a note indicating the date the action was submitted to the committees.

060408. Congressional Committee Approval of DD 1415 Requests

A. Copies of the congressional committee approval letters will be forwarded to the applicable DoD Components and OUSD(C)/(P/B) appropriation directors. When the final committee approval has been received, an OSD implementation memorandum will be prepared.

B. No reprogramming request will be approved if the funds requested have been obligated or committed prior to congressional committee review and approval. The obligation of funds prior to consideration by the cognizant committees denies them a realistic option to deny the request. Such a procedure places the committee(s) in the position of having to approve the request or deny all funds for the continuation of the program in the latter part of the fiscal year. This practice is unfair and impinges upon the responsible committee's rights and responsibilities.

C. Approval for a Prior Approval Reprogramming Action (DD 1415-1) is obtained by letter from the congressional committees prior to implementation of the action. Each separate committee response is weighted the same and final implementation by OSD of the action reflects the lowest of the approvals received for proposed sources and increases. Often the action is implemented for less than originally requested due to the denial of sources.

D. Approval for a Notification Reprogramming (DD 1415-2) for the House Appropriations Committee, House National Security Committee, and House and Senate Intelligence Committees (when applicable) may be assumed after 15 days from receipt of the reprogramming action, unless a hold or objection is received from the committee. Senate Appropriations Committee (SAC) and Senate Armed Services Committee (SASC) approvals must be received in writing. An automatic hold is placed on each DD 1415-2 upon delivery to the SAC and SASC and may be removed only through correspondence obtained from the

committee. As is the case with the DD 1415-1, each separate committee response is weighted the same and final implementation of the results will be provided by OSD.

E. Reprogramming hearings and transcripts will be handled by each Component involved, unless there is an OSD principal witness.

F. If a reprogramming increase has been denied by the congressional committees, DoD policy prohibits use of a series of below threshold reprogramming actions as a means of financing the requested increase. However, in the case of the “omnibus,” an increase approved by the congressional committees, but not funded within DoD due to a lack of congressionally approved sources, may be funded using below threshold authority so long as the below threshold reprogramming otherwise does not exceed a threshold limitation.

G. Approvals for an Internal Action Reprogramming (DD 1415-3) are assumed upon signature by the USD(C), except for those actions using general transfer authority. For those actions, OMB approval of the transfers involved must be obtained prior to forwarding an implementation memorandum to the submitting Component.

060409. Implementation Memorandums for Reprogramming Actions

A. After all approvals have been obtained for a reprogramming action, a memorandum to be signed by the USD(C), Deputy Comptroller (P/B) or Director, Program and Financial Control will be provided to the applicable Components. The memorandum will include instructions as to what extent the reprogramming action maybe implemented.

B. If the reprogramming action includes an appropriation transfer, the memorandum will include instructions for processing the SF 1151 transfer document, and include a copy of the combined Secretary of Defense Determination and OMB Approval document approving the transfer.

C. When appropriate, the implementation memorandum to be signed will be coordinated through the appropriate OUSD(C)/(P/B) appropriation director, so that he or she will be aware that the DD 1415 has been approved by the Congress and funds maybe released.

060410. Alternate Letters or Revised Actions for New Sources

A. Reprogramming actions may be submitted prior to or after the “Omnibus” Reprogramming Action. When sources are denied by a congressional committee, new sources to fund the requested increase may be submitted in DD 1415 format or letter format. Except in the most unusual circumstances, alternate sources for items denied in the “Omnibus” Reprogramming Action will not be submitted to the congressional committees.

B. Revised actions or letters for the signature of the USD(C) should be prepared by the submitting DoD Component. Normal reprogramming procedures apply for processing the revised actions or letters to the congressional committees.

C. The committees have asked that the same data that is furnished with the original submission be provided when identifying a new source of funds.

060411. Appeal to Congressional Committees. The USD(C) may appeal the decision of a committee on a reprogramming action. All proposed appeals to committees

initiated by a DoD Component shall be forwarded by memorandum to the USD(C) for further processing within the Department. Any action on a reprogramming subsequent to its original submission to the committees is subject to the same procedures as the original reprogramming.

060412. Withdrawal of Reprogramming Actions

A. When approval of a reprogramming action that was submitted to the congressional committees, but not fully approved, is no longer required, then that action should be formally withdrawn from congressional committee consideration. The need for withdrawal may result when too much time has elapsed for the proposed increase to go under contract or when proposed sources are needed to fund a higher priority reprogramming than that originally submitted.

B. Withdrawal letters for the signature of the USD(C) should be prepared by the submitting DoD Component. Normal reprogramming procedures apply for processing the letters to the congressional committees.

C. Sufficient rationale on the reason for withdrawal should be provided to the congressional committees so they will not question why the action was originally submitted for their approval. If the action already has been approved by one or more committees, letters should be written to those committees expressing appreciation for their approval.

0605 REPORT OF PROGRAMS (DD 1416)

060501. General. The Report of programs (DD 1416) reflects the congressionally approved programs as enacted, reprogramming actions which have been approved by the Department and congressional committees, congressionally directed undistributed amounts and transfers, and reprogramming actions of lesser significance that are implemented by a DoD Component using below threshold reprogramming flexibility. The amounts on the DD 1416 for column “m” should be identical to the amounts on the Appropriation Status by Fiscal Year Program and Subaccounts, (DD 1002) for column “b” for comparable “as of dates” and stub entries. Amounts should only deviate when Secretary of Defense approved reprogramming actions have not received final congressional approval or when other reconcilable differences exist due to posting errors in the DD 1002.

060502. Due Date. The Report of Programs is submitted semi-annually as of March 31 and September 30 and will include all formal reprogramming actions approved by the Department through that date, together with below threshold reprogramming made by the DoD Components through that date. The due dates for these reports shall be approximately 30 working days after the “as of dates.” Specific dates will be announced by USD(C) memorandum to the DoD Components. The DoD Components will submit two copies (not the original) of the “Report of Programs” to the OUSD(C)/P&FC for review prior to submission to the congressional committees.

060503. Transmittal. Upon notification from OUSD(C)/P&FC that the advance copy of the Report of Programs is acceptable, or after the DoD Components have made any necessary changes, the original and one copy of the DD 1416 will be submitted to the OUSD(C)/P&FC for printing and transmittal to the congressional committees. Each DoD Component shall provide an index and number the pages within each appropriation account and in sequence. Final printed copies will be distributed to the DoD Components.

060504. Security Classification. Each DoD Component is responsible for proper security review and classification of its DD 1416. Each page will be given an appropriate security classification based solely on the data shown on that page, except for the first page of an account section having classified pages. In this instance, the first page shall be marked with the highest classification of the following pages and be footnoted to state that upon removal of pages (classified pages numbers) the document will become unclassified. All other pages not having classified data shall be marked "Unclassified." Classified data listed may not be higher than "SECRET" and should be bracketed using black lead pencil. The classifying activity and the appropriate downgrading instruction shall be shown on each page that is classified.

060505. Procurement Line Items "Items Less Than \$2,000,000." Beginning in FY 1987, the content of the "Items Less" line item was increased from \$900,000 to \$2,000,000. Program or cost growth will be accommodated within the \$9.999 million below threshold authority for the total line item value. The amount of growth of an individual program will not be restricted as long as the aggregate line item total does not exceed \$9.999 million.

060506 Program Base Columns Reflecting Congressional Action. Beginning with the March 31, 1996, Report of Programs, changes due to supplemental appropriations and rescissions, will be shown in a separate column from the basic Appropriations Act. The combination of the "Program Base Reflecting Basic Congressional Action" and "Program Base Adjustments Reflecting Enacted Supplementals and Rescissions" columns shall be used for determining how much of the procurement and RDT&E appropriations can be decreased based on percentages when determining the amount that can be reprogrammed using below threshold authority.

060507. Detailed Instructions for Preparation. Detailed instructions for the DD 1416 are provided beginning with page 6-30.

0606 REPROGRAMMING OF INTELLIGENCE RESOURCES

060601. Intelligence Reprogramming Authorities and Flexibilities

A. Section 504 of the National Security Act of 1947 (50 U.S.C. 414): This section provides the authority to reprogram funds provided for an intelligence or intelligence related activity only if the funds being reprogrammed were specifically authorized for an intelligence or intelligence related activity. Therefore, funds appropriated but not authorized for an intelligence or intelligence related activity cannot be reprogrammed unless authorization is obtained statutorily. Only activities specifically identified in the Congressional Justification Books as modified by the schedule of authorizations contained in the classified annex or specific statutory authority referencing section 504, or incorporated as law by reference in the Intelligence Authorization Act for NFIP activities, or activities contained in the classified annex to the National Defense Authorization Act for JMIP and TIARA activities are considered to be authorized. Funds that are both authorized and appropriated for one intelligence, or intelligence related activity, may be reprogrammed to an intelligence or intelligence related activity that is considered to be a higher priority unforeseen requirement. Funds may not be reprogrammed for an intelligence or intelligence related activity that was specifically denied by Congress.

B. Section 104(c) of the National Security Act of 1947 (50 U.S.C. 403-4): This section prohibits reprogramming National Foreign Intelligence Program (NFIP) resources without the approval of the Director of Central Intelligence (DCI) except in accordance with procedures issued by the Director. Therefore, reprogramming affecting NFIP resources must

contain the statement that “this reprogramming action affects elements of the National Foreign Intelligence Program and has the concurrence of the Director of Central Intelligence.” DCI approval is only required for reprogramming NFIP resources, not Joint Military Intelligence Program (JMIP) or Tactical Intelligence and Related Activities (TIARA) resources. A reprogramming action affecting JMIP or TIARA resources must contain the statement “this reprogramming affects intelligence programs.”

C. Section 104(d) of the National Security Act of 1947 (50 U.S.C. 403-4): This section provides the DCI with essentially the same authority as Section 5 of the Agency Act of 1949, described below; however, the section 104(d) authority is broader in that it provides the DCI with the authority to transfer funds appropriated for an NFIP program to another NFIP program with the approval of the Office of Management and Budget (OMB). Similar to the Section 5 authority, use of this authority does not require the submission of a reprogramming action (DD 1415), but does require notification to the House and Senate Appropriations Committees, House National Security and Senate Armed Services Committees and House and Senate Intelligence Committees.

D. Section 5 of the Agency Act of 1949 (50 U.S.C. 403f): This section gives the CIA authority to transfer to and receive from other government agencies such sums as may be approved by OMB for activities authorized under section 102(a)(B) and (C), 103(c)(5) and (d), 104(a) and (g), and 303 of the National Security Act of 1947. This authority applies only when the CIA is either the transferring or receiving agency, not to the other transactions involving the NFIP. Use of this authority does not require the submission of a reprogramming (DD 1415) or the use of transfer authority, but does require notification to the cognizant six committees of the Congress.

060602. Procedures. Depending on the reprogramming of funds involved, prior approval may be obtained using a reprogramming action (DD 1415) or maybe obtained through letters sent to the cognizant committees of the Congress.

A. The transmittal memorandum of an incoming reprogramming action from a DoD Component to the USD(C) shall state that the reprogramming document has been coordinated with the appropriate intelligence activities within the respective Military Departments or Defense Agencies and does (or does not) affect an intelligence related activity.

B. When intelligence resources are included in a reprogramming action, a statement regarding involvement of intelligence resources shall be included in the introductory paragraph of the DD 1415 reprogramming action. If the proposed reprogramming document has been National Foreign Intelligence Program (NFIP), the action must be coordinated with the Director of Central Intelligence and a statement to that effect must also appear in the first paragraph of the DD 1415.

C. The Office of Deputy Assistant Secretary of Defense (Intelligence and Security) shall develop, maintain, and distribute a composite listing of all JMIP and TIARA intelligence-related items. This list will be used by the OUSD(C)/(P/B) and all DoD Components to annotate the DD 1414, Base for Reprogramming Actions. The Assistant Secretary of Defense (Command, Control, Communications and Intelligence) has program responsibility for determining the applicability of these provisions to above or below threshold reprogramming actions that may affect intelligence or intelligence-related activities. Accordingly, the C4 Intelligence Support Activity (CISA) staff should be informed of all adjustments to intelligence programs prior to initiating an action.

D. National Reconnaissance program. The National Reconnaissance Program (NRP) budget is a single program element, comprised of a number of major functional activities, each of which is treated as a virtual program element (hereafter known as “NRP programs”). For purposes of the NRP only, there are two separate definitions and procedures that apply, i.e., reprogramming and reallocation:

1. A reprogramming is defined as a transfer of appropriated funds either in or out of the NRP program element. The reprogramming of NRP funds is subject to the same rules and procedures that apply to the reprogramming of other DoD funds.

2. A reallocation is the transfer of appropriated funds between NRP programs within the NRP program element. The reallocation of NRP resources is subject to the following rules:

(a) All reallocations of NRP resources require the approval of the Executive Director for Intelligence Community Affairs, and review by the offices of the Under Secretary of Defense (Comptroller), the Under Secretary of Defense (Acquisition and Technology), and the Assistant Secretary of Defense (Command, Control, Communications and Intelligence), prior to submission of justification documentation to the House Permanent Select Committee for Intelligence, the Senate Select Committee for Intelligence and the House and Senate Appropriations Committees.

(b) Prior approval of the House and Senate Committees on Intelligence and Appropriations is required for the reallocations of appropriated NRP funds that: (1) increase the procurement quantity of an individual satellite system for which funds are authorized and appropriated, (2) affect an item that is known to be or is designated as a matter of special interest to one or more of the Congressional committees, (3) initiate a new program or (4) involves an increase of \$4 million or more or a decrease of \$4 million or more in a NRP program.

(c) A separate justification document will be prepared for each proposed prior approval reallocation request and provided to the Executive Director for Intelligence Community Affairs and the Under Secretary of Defense (Comptroller). The justification documents will be submitted to the House Permanent Select Committee for Intelligence, the Senate Select Committee for Intelligence and the House and Senate Appropriations Committees. Each justification document will contain the following information: (1) why the action is being submitted for prior approval, (2) a concise statement of the purpose of the action, (3) identification of the amount and source of funds to be reallocated, (4) identification of how the funds will be used, and (5) an explanation of why the action proposed is consistent with the fiscal year budget approved by Congress and signed by the President.

060603. Oversight. Per agreements between the various congressional committees, the House Permanent Select Committee on Intelligence (HPSCI) has jurisdiction over the NFIP, Joint Military Intelligence Program (JMIP), and the TIARA programs, while the Senate Select Committee on Intelligence (SSCI) has jurisdiction over the NFIP only. Therefore, NFIP reprogrammings, other than below threshold actions, must receive prior approval, or at least notify, the HPSCI, SSCI, HAC, and SAC, while reprogramming affecting the JMIP and the TIARA program must receive prior approval, or at least notify, the HPSCI, SASC, HAC, and

SAC. However, as a matter of practice, the Department submits reprogramming actions to all six committees for the NFIP, JMIP, and TIARA programs for action and/or information.

060604. Below Threshold Reprogramming. Below threshold reprogramming limitations applicable to DoD appropriations (section 0608) also apply to the NFIP except when the below threshold action within an account crosses Agencies. In this instance, the below threshold transfer of funds between Agencies, but within the same account, requires the prior approval of all six committees. (Slight differences may apply for other than DoD funds.)

060605. Congressional Approval. Implementation of the requested actions; whether by reprogramming action, letter notification, or justification documentation will not take effect until the action has been approved or cleared by all applicable committees.

0607 REPROGRAMMING OF SPECIAL ACCESS PROGRAMS

060701. Provision in Law. Section 8008 of the FY 1996 DoD Appropriations Act states: "Funds appropriated by this Act may not be used to initiate a special access program without prior notification 30 calendar days in session in advance to the congressional defense committees."

060702. General. For other than reprogramming of new starts, normal reprogramming procedures as described in this chapter apply to special access programs.

0608 BELOW THRESHOLD REPROGRAMMINGS

060801. Purpose. To Provide DOD Components with the discretion flexibility to realign, within prescribed limits, congressionally approved finding to satisfy unforeseen, higher priority requirements. As with formal reprogrammings (DD 1415s), below threshold actions should net to zero.

060802. Guidelines

A. Below threshold reprogramming are minor actions not otherwise requiring congressional approval that may be accomplished within the DoD Components and are measured cumulatively over the entire obligational availability of the appropriation. Reprogramming thresholds apply to increases and decreases made to line items in the Procurement and RDT&E accounts. Below threshold amounts for the Military Personnel and Operation and Maintenance accounts are measured only by increases. Any action, when combined with other below threshold reprogramming for the same budget activity, line item or program element, must not exceed the established threshold in total, except when thresholds are exceeded due to the provisions of the Closing Accounts Legislation (P.L. 101-510).

B. Threshold amounts agreed upon among the committees and the Department that may be reprogrammed by the DoD Components without the approval of the Secretary of Defense or congressional committees areas follows:

1. Military Personnel: Cumulative increases of less than \$10 million in a budget activity for other than congressional special interest items.

2. Operation and Maintenance: Cumulative increases of less than \$20 million in a budget activity for other than congressional special interest items.

3. Procurement: Cumulative increases of less than \$10 million to a procurement program; or for decreases, the greater of either cumulative decreases of \$10 million or less or the decrease of 20 percent of the appropriated level of the procurement line item (inclusive of supplemental appropriations and rescissions) for other than congressional special interest items.

4. RDT&E: Cumulative increases of less than \$4 million to an existing program element; or for decreases, the greater of either cumulative decreases of \$4 million or less or the decrease of 20 percent of the appropriated level of the program element (inclusive of supplemental appropriations and rescissions) for other than congressional special interest items.

C. Normal reprogramming thresholds will not apply based on Closing Accounts Legislation (P.L. 101-510) when currently available appropriations are used to fund obligations or adjustments to obligations which would otherwise have been funded from a canceled account before it was canceled. Within an appropriation, reprogramming thresholds may be exceeded in currently available appropriations for increases or sources used to finance the "Canceled Account Adjustments" line item. If reprogramming thresholds are exceeded for increases or sources to finance these obligations or adjustments to obligations, then column "k," "Below Threshold Actions not Requiring Approval by the SecDef or Committees" of the DD 1416 should be footnoted to indicate that the threshold amount has been exceeded due to canceled account adjustments.

D. If a reprogramming increase has been denied by the congressional committees, DoD policy prohibits the use of a series of below threshold reprogramming actions finance the requested increase. However, below threshold reprogramming that preceded the congressional denial will be recognized as valid.

E. Below threshold reprogramming authority may be used to finance increases on reprogramming actions that were approved by the congressional committees, but were not able to be accommodated within the implementation process, so long as the below threshold reprogramming otherwise do not exceed a threshold limitation, affect an item of special congressional interest, or have not been specifically denied by a congressional committee as a reprogramming source. This policy has evolved out of recognition of there being congressionally-approved increases within the "omnibus" reprogramming action that were unable to be funded in the USD(C) implementation memorandum, due to a lack of congressionally-approved sources.

0609 REPROGRAMMING NEW STARTS

060901. General. Congressional committees discourage the use of the reprogramming process to initiate programs. Except for extraordinary situations, consideration will not be given new start reprogramming requests for which the follow-on funding is not budgeted or programmed.

060902. Identification of New Starts. New starts should be identified in the DoD Component memorandum and the reprogramming action submitted to the USD(C). If the new start is included in the budget, the memorandum shall identify that fact along with the PBD number in which the action was addressed. If not included in the budget, identify that fact and explain why the action now is necessary.

060903. New Start Criteria

A. A program not previously justified and appropriated by the Congress through the normal budget process is considered to be a new start. Funding for new programs may not be done without some type of prior notification, either by letter for those new starts under \$2 million for the entire cost of the new effort, or by notification reprogramming (DD 1415-2) for new starts \$2 million or more for the entire effort, or more than \$10 million over a three-year period.

B. The congressional committees expect to be notified whenever a DoD Component intends to initiate any new modification, except for those safety modifications which are expected to cost less than \$10 million over three years.

C. A program effort in one year in the Procurement and RDT&E accounts may be extended into a subsequent fiscal year without constituting a new start. This is considered an extension of the effort initiated in the prior year program. When this occurs, the program should be footnoted as such on the semi-annual Report of Programs.

D. Due to the characteristics of Military Personnel and Operation and Maintenance programs, new starts seldom occur. New starts would be significant new programs, contracts, or activities that have not been explicitly justified to the Congress in budget justification material. An example maybe the establishment of a Pacific Distribution System.

060904. Notification Reprogrammings (DD 1415-2). Notification Reprogrammings are required for actions, not otherwise requiring prior approval, for new programs or line items which:

A. Will result in estimated follow-on costs of \$10 million or more within a three-year period for any RDT&E subproject or project, and procurement program.

B. Are additions of \$2 million or more in any RDT&E subproject or project, or procurement program.

060905. Letter Notification. Advance notification by letter for new programs or line items not otherwise requiring prior approval (DD 1415-1) or notification action (DD 1415-2) will be made by the DoD Component involved to the House National Security and Senate Armed Services Committees and the House and Senate Committees on Appropriations.

A. Notification will be made by letter directly to the cognizant committees only after advance coordination with the applicable OUSD(C)/(P/B) Directorate. The letter must be signed by the same level authorized to transmit reprogramming actions to OSD. The signatory authority may be delegated to the senior financial manager or budget officer of the Component.

B. The notification letter should include a brief description of the total program being initiated, total program costs, proposed funding and procurement quantities by year, enough background information to demonstrate that the item is ready for research or procurement and an explanation of how subsequent years' funding will be provided, if the budget line is not included in the budget.

C. The notification letter should also provide a description of source of funds and why source funds are no longer needed and the impact.

D. Copies of the letters to the congressional committees must be furnished to the ODC(P/B) at the time of transmittal to the committees.

E. Approvals by the House and Senate Appropriations Committees and House National Security and Senate Armed Services Committees require a 30-day automatic hold.

F. The DoD Component may implement the subject reprogramming 30 calendar days after receipt by the cognizant committees unless notification to the contrary is received from a committee.

0610 PROGRAM TERMINATION

061001. Policy. The House and Senate Committees on Appropriations and the House National Security and Senate Armed Services Committees shall be notified of any program termination which results in the elimination of a procurement program or RDT&E program element, or a subprogram or project \$10 million or greater within such a program line item, prior to any reprogramming from that program.

061002 Guidelines. If elimination of a procurement or RDT&E program element, or subprogram or project \$10 million or greater within such a program line item, is reflected on a DD 1415 submitted to the congressional committees, then the DD 1415 serves the purpose of notification. If the amount of the termination falls within those amounts normally allowed through below threshold reprogrammings, then notification prior to any reprogramming may be made by letter. Procedures used for notification letters for below threshold new starts will apply. After coordination with ODC(P/B), the DoD Components shall transmit the notification letters directly to the congressional committees and transmit copies of the letters to ODC (P/B).

0611 REPLACEMENT OF ITEMS SOLD FROM INVENTORY

061101. Policy. The current budget policy requires that reimbursements cannot be used to replace end items sold from inventory if the replacement end item is not the identical type, model, and series designation unless a reprogramming action is approved by the congressional committees.

061102. Guidelines

A. The requirement for a reprogramming action for small dollar value end items where replacements vary only to a minor extent from the item sold has resulted in unnecessary paperwork and serves no substantive purpose. Replacement of items sold from inventory with a unit cost of less than \$5,000 will be treated as a replacement-in-kind (RIK) if an improved model of the same end item is being procured, performs the same warfighting capability, and the inventory objective presented to the Congress is not exceeded. Items satisfying all of these criteria will be financed with the reimbursable proceeds of the sale of the end items issued from inventory without processing a DD 1415 reprogramming action. The amount applied toward the RIK may not be increased beyond the proceeds of that sale.

B. The requirement for a reprogramming action exists when an item of materiel is sold which will require replacement to compensate DoD inventories for the resultant loss of capability or readiness and the replacement item will not be identical to the item sold. It must, however, be a later series of “mod” designation of the same basic model (e.g., sale of a C-130A aircraft and purchase of a C-130E) or an acceptable substitute item used against the same inventory objective or authorized acquisition objective in requirements computations (e.g., sale of an M-48 tank and purchase of an M-60 tank). In this situation, the reimbursement from the sale will be included under reimbursable financing but the buyback of the replacement items must be shown as direct program financing.

C. Exceptions to the above guidance occur when authorizing language is specified in law, as in the instance of the FY 1993 DoD Appropriations Act. As part of the language on Procurement of Weapons and Tracked Combat Vehicles, Army, the Army was authorized to use proceeds from the sale of M-48 and M-60 series tanks for the M-1 Series Tank Upgrade Program.

0612 REPROGRAMMING POLICY FOR CLOSING ACCOUNTS LEGISLATION
(P.L. 101-510)

061201. Definitions of Contract Changes for Reprogramming Purposes. For purposes of this reprogramming policy guidance, adjustments to amounts initially obligated in accounts, that now are expired, are categorized either as within-scope or change-in-scope contract changes. Within-scope changes generally are funded from the appropriation that originally financed the contract until cancellation. Change-in-scope contract changes are financed from appropriations currently available for obligation at the time the change is made. Specific guidelines for determining scope of work changes are defined in Chapter 8 of this Volume.

061202. Use of Currently Available Appropriations to Fund Contract Changes

A. Normal applicable reprogramming (DD 1415) procedures and thresholds will apply when currently available appropriations are used to fund contract changes.

B. Contract changes funded from currently available appropriations will be funded from, and reflected against, the current corresponding line item, program element or program applicable, or comparable, to the program for which the contract change is being made.

C. If an applicable corresponding program no longer exists in the currently available appropriation for the program for which the contract change is being made, a new line item for the program in question will be created to reflect the contract change adjustment. Reprogramming threshold procedures for this newly created line will be the same as for the creation of any other new line item.

D. Any line item or program can be the funding source for contract changes funded from currently available funds. However, the funding source line item or program will be subject to normal reprogramming thresholds.

061203. Use of Currently Available Appropriations to Fund Obligations or Adjustments to Obligations that Otherwise Would Have Been Funded from a Canceled Account Except it is Canceled.

A. Obligations or adjustments to obligations, which otherwise would be chargeable to an appropriation before it was canceled, shall be charged to an appropriation currently available for the same purpose. Specific limitations are as follows:

1. The sum of all such amounts funded from currently available appropriations shall not exceed the lower of (a) one percent of the originally appropriated amount of the current appropriation being charged or (b) the current unexpended balance of the canceled account.

2. For the purpose described in subparagraph 061203.A. 1. above, the unexpended balance is the net of (a) the sum of the unobligated balance plus the unliquidated obligated balance of the account at the time it was canceled and; (b) less any and all obligations incurred and payments made subsequent to the cancellation of the original account when such obligations and payments would otherwise have been properly charged to the appropriation had the appropriation not been canceled.

B. Normal reprogramming procedures (DD 1415) and thresholds will not apply when currently available appropriations are used to fund obligations or adjustments to obligations which would otherwise have been funded from a canceled account before it was canceled.

C. Charges to currently available appropriations for obligations or adjustments to obligations that would otherwise have been charged to canceled accounts shall be reflected in a line item on the Report of Programs (DD 1416) entitled "Canceled Account Adjustments."

1. Within an appropriation, reprogramming thresholds may be exceeded in currently available appropriations for increases or sources used to finance the "Canceled Account Adjustments" line item.

2. If reprogramming thresholds are exceeded for increases or sources to finance these obligations or adjustments to obligations, column "k," "Changes not Requiring Approval by Secretary of Defense" of the DD 1416 should be footnoted to indicate that the threshold amount has been exceeded due to canceled account adjustments.

3. The new line, "Canceled Account Adjustments," will be a separate line item or program element and added as an entry within a single budget activity. A memo line on the DD 1416 shall be shown under BA 5, PCS Travel for active military personnel appropriations, and under BA 4, Administration and Servicewide Activities for active O&M appropriations. For all other accounts which do not display line item detail, a memo line shall be shown under any single budget activity.

061204. Use of Expired Appropriations to Fund Contract Changes

A. An expired appropriation remains available for recording, adjusting and liquidating obligations properly chargeable to that appropriation until the appropriation is closed under 31 U.S.C. 1552. Accordingly, an expired appropriation may be used to fund within-scope contract changes properly chargeable to that appropriation in accordance with Chapter 8 of this Volume.

B. Expired Operation and Maintenance, Navy appropriations may be used to fund certain payments required because of changes in scope of work in connection with ship overhaul, maintenance, and repair work under 10 U.S.C. 7313.

C. For purposes of the Shipbuilding and Conversion, Navy appropriation, appropriation language normally provides for additional obligations to be incurred after the five years of obligational availability, for engineering services, tests, evaluations, and other such budgeted work that must be performed in the final stage of ship construction.

D. There has been no requirement to submit reprogramming actions for expired accounts, and this policy shall continue.

0613 NATIONAL GUARD AND RESERVE EQUIPMENT ACCOUNT NOTIFICATION PROCEDURES

061301. General. In the National Guard and Reserve Equipment appropriation (NGREA), the Congress typically appropriates funds in lump-sum amounts to be used for aircraft and miscellaneous equipment, and requests submission of a detailed assessment of modernization priorities by each of the Reserve Component (RC) Chiefs. The Assistant Secretary of Defense (Reserve Affairs) (ASD(RA)) forwards the RC acquisition plans to the congressional committees, along with a consolidated equipment requirements list for all Reserve Components, called the Summary NGREA Acquisition Report.

061302. Procedures for Revisions to the Summary NGREA Acquisition Report

A. Procurement of any item not included in the Summary NGREA Acquisition Report for allocation of the funds appropriated in lump-sum amounts for aircraft and miscellaneous equipment cannot be initiated by a Component until the proper notification to the congressional committees is made.

B. Letters requesting a change to the initial report should be submitted by the cognizant Military Department Assistant Secretary (Financial Management and Comptroller) for the respective Reserve Component requiring a change from the initial allocation directly to the ASD(RA). The ASD(RA) shall obtain coordination from ODC(P/B) and transmit letters to the congressional committees.

C. Consistent with other procedures in place for letter notifications pertaining to new starts (section 060905 of this chapter), the following procedures for assuming approval by the committees shall apply.

1. Approvals by the House and Senate Appropriations Committees and the House National Security and Senate Armed Services Committees constitute a 30-day automatic hold.

2. The DoD Component may implement reprogramming 30 calendar days after receipt by these committees unless notification to the contrary is received from a committee.

061303. Program Line Items Specifically Identified in Congressional Committee Reports. Normal DoD reprogramming procedures apply for any reprogramming of funds affecting line items that specifically are identified by the Congress in committee report language.

6-19

BASE FOR REPROGRAMMING ACTIONS (Dollars in Thousands)								
Appropriation Account Title: <i>Enter the appropriation account title and program year.</i>						Fiscal Year program: <i>Enter the fiscal year.</i>		
Line Item	Program Base Presented to Congress in Printed Justification		Amended Changes Presented Prior to Final Congressional Action		Changes Reflecting Congressional Action/Intent		Program Base Reflecting Basic Congressional Action	
	Qty b	Amount c	Qty d	Amount e	Qty f	Amount g	Qty h	Amount i
<u>PROGRAM</u>								
<p><i>The Base for Reprogramming Actions (DD 1414) establishes the base from which reprogramming actions maybe taken. It identifies line items for each appropriation covered in the DoD Appropriations Acts, except those appropriations having no budget activity subdivisions in the budget document presentation. In addition, accounts which are available solely for transfer to another appropriation for a specified purpose are excluded. Details for this report follow:</i></p>								
<p><i>Line item nomenclature and accompanying amounts for programs appropriated vary by account and should be shown as follows:</i></p> <p style="margin-left: 40px;"><i>Active and reserve component military personnel appropriation accounts shall list budget activities as presented in the justification books. These line items will be followed by budget activity subdivisions or other line identifications to reflect congressional action by programmatic change. A total for each budget activity will be shown.</i></p> <p style="margin-left: 40px;"><i>Operation and maintenance (O&M) active and reserve appropriation accounts shall list budget activities as presented in the justification books. These line items will be followed by budget activity subdivisions or other line identifications to reflect congressional action by programmatic change. A total for each budget activity will be shown.</i></p> <p style="margin-left: 40px;"><i>Procurement appropriation line items will be the procurement line items shown on the "Procurement Programs" (P-1) document and arranged in the same order. The line items will be grouped by budget activity and a total will be shown for each budget activity.</i></p> <p style="margin-left: 40px;"><i>Research, Development, Test and Evaluation appropriation line items will be the program elements shown on the "RDT&E Programs" (R-1) document and arranged in the same order. The program elements will be grouped by budget activity and a total will be shown for each budget activity. New program titles due to congressional adds shall be as reflected in the congressional reports or as part of an existing program element, whichever is appropriate.</i></p>								
<p><i>Undistributed congressional reductions shall remain undistributed on the DD 1414. An entry will be shown under a category labeled "Undistributed Reductions" for each separate undistributed reduction made by Congress within the appropriation markup and for those undistributed reductions allocated by DoD based on provisions in law that reduced DoD funds for specific purposes. For O&M accounts, this normally applies for adjustments made by general provision. Undistributed reductions identified within an O&M account that are necessary to support the amount appropriated in an Act shall be distributed to the budget activity level. The "Undistributed Congressional Reductions" will be distributed on the subsequent March 31 DD 1416 in columns "h" and "i," "Changes Reflecting Congressionally Directed Undistributed Amounts and Transfers." Sometimes congressionally undistributed adds are made. These should be treated similar to undistributed reductions, with the category label changed to "Undistributed Adjustments" when this is applicable.</i></p>								
<p><i>"Subtotal, Direct Program" follows the line item detail and is the sum of all program lines and the undistributed amounts.</i></p>								
<p><i>"Reimbursable Program" shall be the amount presented in the justification materials to support the President's budget request for the fiscal year shown.</i></p>								
<p><i>"Total Program, FY 19XX" is a total amount of the "Subtotal, Direct Program" and "Reimbursable Program" lines.</i></p>								

BASE FOR REPROGRAMMING ACTIONS
(Dollars in Thousands)

Appropriation Account Title: *Enter the appropriation account title and program year.*

Fiscal Year Program: *Enter the fiscal year.*

Line Item	Program Base Presented to Congress in Printed Justification		Amended Changes Presented Prior to Final Congressional Action		Changes Reflecting Congressional Action/Intent		Program Base Reflecting Basic Congressional Action	
	Qty b	Amount c	Qty d	Amount e	Qty f	Amount g	Qty h	Amount i
<u>PROGRAM</u>								
<p><i>“Program Base Presented to Congress in Printed Justification” (columns “b” and “c”). For each line item in the Procurement and RDT&E appropriations, enter the amounts reflected in the P-1 and R-1. The Procurement line items should include applicable line item quantities. Military Personnel and Operation and Maintenance (O&M) appropriations will be by budget activity level and amounts will be obtained from the printed congressional justification books.</i></p>								
<p><i>“Amended Changes Presented Prior to Final Congressional Action” (columns “d” and “e”). Enter the amount of increase (+) or decrease (-) to the line items or budget activities which were approved by the Secretary of Defense and formally presented to one or both of the Committees on Appropriations. Normally, such changes, involving a change in the budget estimate for the total appropriation, will be submitted to the Congress by the President as formal budget amendments, although in certain cases, such changes have been presented directly by the Secretary of Defense. Testimony on program changes by a DoD official other than the Secretary or Deputy Secretary of Defense shall be considered as an expression of personal opinion and not as an approved change, unless specifically approved by the Secretary of Defense for presentation to the Congress. This column shall only be used when directed by OSD.</i></p>								
<p><i>“Changes Reflecting Congressional Action/Intent” (columns “f” and “g”). Enter the amount of increase (+) or decrease (-) for each line item reflecting congressional action as indicated in the Conference Report accompanying the DoD Appropriations Actor any other information as may be available to determine congressional action or intent regarding line item detail. In cases where the Congress has made general reductions, the amounts shall be included in the “Undistributed Reduction” section. (The amounts will be distributed by line item in the subsequent March 31 DD 1416, Report of Programs.) In the case of O&M appropriations, general reductions refer to adjustments made in general provisions. Nonspecific congressional adjustments included in appropriated amounts for an O&M account shall be allocated to the budget activity level. A line item covering ‘fact-of-life adjustments’ may be included for each budget activity to reflect other changes including program changes, price changes and intra-appropriation transfers.</i></p>								
<p><i>“Program Base Reflecting Basic Congressional Action” (columns “h” and “i”). Entries will represent the arithmetic sum of the applicable entries from columns “b” through “f” and “c” through “g.” Quantities and amounts in this column will become the first column “Program Base Reflecting Congressional Action” (columns “b” and “c”) of the subsequent DD 1416 as of March 31 for the current fiscal year.</i></p>								
<p><i>Quantities (Columns “b,” “d” and “f”). Quantities are only applicable for the procurement accounts. When a procurement line item contains a quantitative measurement, then the quantity shall be reflected in the appropriate quantity columns for that line item. If no quantity is meaningful as a unit measurement, then the column value may be left blank. Quantities shall be obtained from the Conference Report accompanying the DoD Appropriations Act or Congressional Action FAD 728.</i></p>

<u>PROGRAM</u>								
<p><i>Stub Entries for this Financing Section may include some or all of the following types of transactions:</i></p> <p>Budget Authority:</p> <p style="padding-left: 20px;">Appropriation, P.L. 103-335</p> <p style="padding-left: 20px;">P.L. 103-335, Sec. 8054(G)</p> <p style="padding-left: 20px;">Appropriation, P.L. 99-177</p> <p style="padding-left: 20px;">Transfers</p> <p style="padding-left: 20px;">Reimbursable Orders</p> <p style="padding-left: 40px;">Total Financing, FY 19XX Program</p>								
<p><i>Detail instructions for the above financing lines by column areas follows:</i></p> <p style="padding-left: 20px;">Column "c" for the appropriation and reimbursable orders lines shall be the same as the amounts in the President's budget Program and Financing statements.</p> <p style="padding-left: 20px;">Column "e" is rarely used; and when appropriate, instructions for this column will be provided.</p> <p style="padding-left: 20px;">Column "g" shall be the delta changes made by Congress or DoD for applicable appropriation or general provision changes.</p> <p style="padding-left: 20px;">Column "i" shall be the sum of the columns across and shall be column "c," "Program Base Reflecting Basic Congressional Action," on subsequent DD 1416s.</p> <p style="padding-left: 20px;">"Transfers" shown on the DD 1414 will only apply for those transfers included as part of the President's budget request or certain congressional action transfers. For example, these may include transfers in the budget from the National Defense Stockpile Fund or general provision transfers provided by the Congress in law that usually involve transfers to Shipbuilding and Conversion, Navy for newly established "micro" accounts from other appropriations. Generally, other congressionally-directed transfers are not reflected until preparation of the as of March 31 DD 1416, Report of Programs.</p>								
<p><u>Footnoted Items.</u> Extreme care should be used in footnoting items to ensure that congressional direction or intent is accurately reflected. Any congressional add or entire requested amount or partial requested amount that is fenced or identified as a special interest item is to be documented as such on the DD 1414. Footnotes will vary depending on congressional action/intent, i.e., an item may not be increased, or decrease, or increased or decreased, without congressional committee approval prior to implementation of a reprogramming of funds. The prior approval shall follow established reprogramming procedures. Congressionally denied items shall be noted by a single asterisk "*" or double asterisk "***" The single asterisk shall be used only if the item denied was denied without prejudice. Increases to a single asterisk item maybe made only after congressional prior approval. Double asterisk items are not available for reprogramming. All footnotes on the DD 1414 are to be carried over to the DD 1416 reports and remain in effect for subsequent DD 1416 reports unless documentation is provided indicating that the footnote is no longer applicable. Footnotes should be consolidated onto the last page of each account. This saves space and avoids repetition of the same footnote that may appear on several pages of an account.</p>

a	Qty b	Amount c	Qty d	Amount e	Qty f	Amount g	Qty h	Amount i
<u>PROGRAM</u>								
<i>The Revised Base for Reprogramming Actions (DD 1414-R) is similar to the DD 1414, Base for Reprogramming Actions, and is prepared to document congressional action on supplemental appropriations acts, subsequent to the basic appropriations act. In general, the same report guidelines that apply to the DD 1414 are applicable to the DD 1414-R, i.e., undistributed congressional reductions and footnoted items. Details for this report follow:</i>								
<i>Line item nomenclature should be the same as that reflected on the DD 1414 or DD 1416 for the program year in which the DD 1414-R changes apply. Military Personnel and Operation and Maintenance program changes shall be shown by budget activity along with line item identification to reflect congressional action by programmatic change. Procurement appropriation line items shall be the line item (P-1) and Research, Development, Test and Evaluation appropriation line items shall be the program element (R-1), except when subprograms are also required in order to reflect congressional special interest items. Program lines shall be listed for all lines corresponding to either programs DoD requested or programs Congress added or reduced.</i>								
<i>"Program Base Reflecting Last Congressional Action" (columns "b" and "c"). For current year congressional action adjustments made prior to March 31, amounts shall be the last column of the current year DD 1414. For adjustments made to prior years, and to the current year after March 31, the combined first two numeric columns of the latest DD 1416 shall be the amount shown in this column of the DD 1414-R. The first two columns of the DD 1416 are the "Program Base Reflecting Basic Congressional Action" and "Program Base Adjustments Reelecting Enacted Supplemental and Rescissions."</i>								
<i>Two separate columns reelecting congressional action "Increases Reelecting Congressional Action/Intent" (columns "d" and "e") and "Decreases Reelecting Congressional Action Intent (columns "f" and "g") shall be used depending upon whether or not the congressional action was an increase or a decrease. If the same act provided supplemental appropriations and rescinded funds from the same program, show both increases and decreases to the program separately. These amounts will be reflected in subsequent DD 1416s in the column "Program Base Adjustments Reflecting Enacted Supplemental and Rescissions."</i>								
<i>"Program Base Adjustments Reelecting Enacted Supplemental and Rescissions" (columns "h" and "i"). Entries will represent the arithmetic sum of the applicable entries from columns "b" through "f" and columns "c" through "g." Quantities and amounts in this column will become the second column "Program Base Adjustments Reelecting Enacted Supplemental and Rescissions" (columns "d" and "e") of subsequent DD 1416s as of March 31 or September 30 for the affected program years.</i>								
<u>FINANCING</u>								
<i>Stub entries for this Financing Section should include the type of transaction from the public law, i.e., appropriation or rescission, or general provision section number.</i>

PRIOR APPROVAL ACTION

5. A statement that the action affects the National Foreign Intelligence Program (NFIP), Joint Military Intelligence Program (JMIP) or Tactical Intelligence and Related Activities (TIARA), when such is the case. If the action affects NFIP, then a statement must be included that the action has the concurrence of the Director of Central Intelligence.

REPROGRAMMING INCREASES:

Appropriation and year designation

Budget Activity Number and Title

a b c d e f

Explanation:

Details for each separate increase are as follows:

a. Line item titles. The title will be identical to the title shown on the “Base for Reprogramming Actions” if the line item is listed therein.

b. Entries for “Program Base Reflecting Congressional Action” (columns “b” and “c”). For each line item, enter the procurement quantity (if applicable) and amount shown on the Base for Reprogramming Actions, for “Program Base Reflecting Basic Congressional Action.” When a Revised Base for Reprogramming Action (DD 1414-R) has been prepared and submitted to the congressional committees to reflect a supplemental appropriations act, the entries in this column for affected programs will be the last column of the applicable DD 1414-R, (columns “h” and “i”).

c. Entries for “Program Previously Approved by SecDef” (columns “d” and “e”). Entries will be the first column “Program Base Reflecting Congressional Action” of the document plus any changes made by reprogramming actions approved by the Department. Specifically, the entries in these columns will be the same as those in the “Revised Program” columns (columns “h” and “i”) of the most recently approved DD 1415 reprogramming action. If a reprogramming action is already in process in OSD affecting the same item, coordinate the revised program value to be used with the ODC(P/B)P&FC.

Unclassified**CLASSIFICATION****REPROGRAMMING ACTION**

a		b	c	d	e	f	g	h	i

PRIOR APPROVAL ACTION

d. Entries for “Reprogramming Action” (columns “f” and “g”). Enter the increase (+) or decrease (-) in quantity (if applicable) and amount of the proposed reprogramming action. The total increases and decreases must net to zero. Columns “f” and “g” are not allowed to contain classified quantities or amounts. Other material, if required, should be classified in order to allow columns “f” and “g” to remain unclassified.

e. Entries for “Revised Program” (columns “h” and “i”). Enter the adjusted quantity (if applicable) and the amount resulting from the proposed increase or decrease to the previously approved program.

f. The “Explanation” on the DD 1415 should include sufficient data to justify the proposed increase. The statements should be informative, clearly stated, and straightforward. The purpose of the written documentation should be to inform the reader; therefore, care must be taken to avoid confusing narratives. For each increase within the reprogramming, include explanations and justifications that are intended to serve the same basic purpose as “original budget justification.” Accordingly, concise, accurate, and clearly stated information should be provided for reviewing officials and the congressional committees as to the nature, extent, and necessity of the requirements, the costs, and the proposed application of resources to meet such costs. All program increases should be described in such a way as to distinguish between price changes and program scope changes. Statements should be prepared and reviewed on the basis that classified data will not be included unless essential to justification of the reprogramming change.

Research, Development, Test and Evaluation, Air Force, 95/96**Budget Activity 4: Demonstration/Validation**

0603851F ICBM - DEM/VAL 43,206 43,206 +10,000 53,206

Explanation: Funds are required to support the Rocket Systems Launch Program (RSLP) which converts surplus ICBMs into test launch vehicles for suborbital and sounding rocket launches. Funds are required to move 166 Minuteman II motors from Pueblo Depot, CO to Camp Navajo Depot, AZ because the Pueblo Depot is closing. As a result, proper storage and maintenance of environmental igloos for motor storage is no longer being maintained or guaranteed. Since the Camp Navajo Depot has been modified and is ready to accept motors, the motors must be moved to ensure proper storage and maintenance and to avoid unauthorized location of hazardous Air Force material.

Total Reprogramming Increase +10,000

REPROGRAMMING DECREASE:

Missile Procurement, Air Force, 96/98

Budget Activity 3: Modification of In-Service Missiles

MM III Modifications	29,344	29,344	-10,000	19,344
-----------------------------	--------	--------	----------------	--------

Explanation: These funds are excess to requirements as a result of the restructure of the Minuteman III Guidance Replacement Program (GRP). As a result of the restructure, procurement of long lead parts to support low rate initial production is not required until the second quarter of 1997. The MM III GRP program is adequately and appropriately funded to support a GRP production start in FY 1997. Accordingly, FY 1996 funds provided to procure long lead parts are available to finance higher priority requirements.

Note: All sources of financing will be clearly and explicitly identified in the DD 1415. A statement immediately following each proposed decrease in a line item shall include information as to the basis upon which it has been decided that the line item may be reduced.

Extreme care should be used in identification of sources to ensure that approved increases will be fully funded. For purposes of the "omnibus" reprogramming action, except in the most unusual circumstances, the USD(C) neither will request reconsideration of denied increases, nor submit alternative sources for any denied sources.

Total Reprogramming Decrease -10,000

APPROVAL POLICY FOR PRIOR APPROVAL REPROGRAMMINGS. For all congressional committees receiving the action, approval is obtained by letter from each committee prior to implementation of the action.

NOTIFICATION ACTION

This is a sample with instructions on details required for preparation of a “Notification Action” reprogramming action (DD 1415-2) which requires congressional committee notification for changes in the application of funds within an appropriation in amounts (thresholds) greater than those agreed upon between the committees and the Department. Thresholds by appropriation title are as follows:

Military Personnel: A cumulative increase of \$10 million or more in a budget activity.

Operation and Maintenance: A cumulative increase of \$20 million or more in a budget activity. (In the past, the congressional committees have imposed a reprogramming decrease threshold from specific subactivity group categories. When this is the case, these threshold amounts are separately identified on the Base for Reprogramming Actions, DD 1414.)

Procurement: For any program year, a cumulative increase of \$10 million or more in a procurement line item; the addition of a new procurement program of \$2 million or more; the addition of a new procurement program estimated to cost \$10 million or more within a three-year period; a cumulative decrease of more than \$10 million, or 20 percent of the appropriated amount (inclusive of supplemental appropriations and rescissions), whichever of the two is greater; or the termination of any program which results in the elimination of a procurement program, or elimination of a subprogram \$10 million or greater within a procurement program. (For new start programs less than \$2 million for the entire effort, a notification letter to the congressional committees is required in advance of initiating the program. For terminations of programs falling within the amounts normally allowed by “below threshold” reprogramming, notification shall be made by letter.)

RDT&E: For any program year, a cumulative increase of \$4 million or more in an existing program element; the initiation of a new program of \$2 million or more, the addition of a new program whose cost is estimated to be \$10 million or more within a three-year period; a cumulative decrease of more than \$4 million, or 20 percent of the appropriated amount (inclusive of supplemental appropriations and rescissions), whichever of the two is greater; or the termination of any program which is equal to the total amount of the program element, or elimination of a subprogram or project \$10 million or greater within such a program element. (For new start programs less than \$2 million for the entire effort, a notification letter to the committees is required in advance of initiating the program. For terminations of programs falling within the amounts normally allowed by “below threshold” reprogramming, notification shall be made by letter.)

NOTIFICATION ACTION

An introductory paragraph should include the following:

- 1. Why the action is being submitted for notification, e.g., "This reprogramming action is submitted for notification because it proposes an increase of \$9.5 million to a program element, which exceeds the \$4 million threshold"; or "This reprogramming action is submitted for notification because it adds a new start program."*
- 2. A concise statement as to the purpose of the action.*
- 3. A statement that the action is for a higher priority item, based on unforeseen military requirements, than that for which the funds were originally appropriated, meets all administrative and legal requirements of the Congress, and has not been denied by the Congress.*
- 4. Indicate whether the action is (or is not) reflected in the President's budget.*
- 5. A statement that the action affects the National Foreign Intelligence Program (NFIP) or the Tactical Intelligence and Related Activities (TIARA), when such is the case. If the action affects NFIP, then a statement must be included that the action has the concurrence of the Director of Central Intelligence.*
- 6. Details for each increase and decrease item (a through f below) are the same as those shown on the "Prior Approval" instruction pages (see pages 6-22 and 6-23).*

Budget Activity Number and Title

a b c d e f

Explanation:

APPROVAL POLICY FOR NOTIFICATION REPROGRAMMINGS: For the House Appropriations Committee, House National Security Committee, and House and Senate Intelligence Committees (when applicable), approval may be assumed after 15 days from issuance of the reprogramming action, unless a hold or objection is received from the committee. In the case of the Senate Appropriations Committee and Senate Armed Services Committee, an automatic hold is placed on each action upon submittal to the committee and may be removed only through correspondence obtained from the committee.

REPORT OF PROGRAMS

(Dollars in Thousands)

Appropriation Account Title: *Enter the appropriation account tide and program year.*As of: *March 31, 19XX or September 30, 19XX*

Line Item	Program Base Reflecting Basic Congressional Action		Program Base Adjustments Reflecting Enacted Supplementals and Rescissions		Reprogramming Changes Approved by the SecDef and/or Congressional Committees		Changes Reflecting Congressionally Directed Undistributed Amounts and Transfers		Below Threshold Changes Not Requiring Approval by the SecDef or Committees		Total Revised Program (Columns b and c through j and k)	
a	Qty b	Amount c	Qty d	Amount e	Qty f	Amount g	Qty h	Amount i	Qty j	Amount k	Qty l	Amount m
PROGRAM												
<i>The Report of Programs (DD 141 6) reflects the congressionally approved programs as enacted, reprogramming actions which have been approved by the SecDef and congressional committees, congressionally directed undistributed amounts and transfers, and reprogramming actions of lesser significance that are implemented by a DoD Component using below threshold reprogramming flexibility. Details for this report follow:</i>												
<i>Line item nomenclature for programs financed within the appropriation account should be as follows: For March 31, titles/line entries for annual accounts and multi-year accounts in the first year of availability shall be exactly as shown in the preceding "Base for Reprogramming Actions" report. Additionally, any "new starts" reported to the Congress by notification letter or reprogramming action shall be listed as presented to the Congress. For multi-year accounts in the second year of availability or beyond, enter line items from the preceding DD 1416 report, plus any new line items from reprogramming actions. For September 30, titles shall be exactly as shown on the March 31 DD 1416 report, plus any "new starts" reported to the Congress by notification letter or reprogramming action. New items added on a DD 1414-R to reflect congressional changes due to enactment of supplemental appropriations acts should be included on subsequent DD 1416s.</i>												
<i>Single line item for "Canceled Account Adjustments." This will reflect adjustments for purposes of the use of currently available appropriations to fund obligations or adjustments to obligations that otherwise would have been funded from a canceled account except it is canceled based on the Closing Accounts Legislation (P.L. 101-510). A line entitled "Canceled Account Adjustments" will be a separate line item or program element and added as an entry within a single budget activity. A memo line on the DD 1416 shall be shown under BA 5, PCS Travel for active military personnel appropriations, and under BA 4, Administration and Servicewide Activities for active O&M appropriations. For other accounts which do not display line item detail, a memo line shall be shown under any single budget activity.</i>												
<i>Undistributed amounts from the DD 1414 or DD 1414-R as a result of congressional action/intent shall be separately listed by subject matter and the lump sum amount shall be shown at the account level in columns "c" or "e" and netted out in column "i." The distribution by individual line item of this amount shall be reflected in column "i" of this report. Normally these undistributed adjustments do not impact quantities, but if there is a corresponding quantity change due to the undistributed amount, quantity adjustments shall be shown in column "h."</i>												
<i>"Subtotal, Direct Program" follows the line item detail and is the sum of all program lines and the undistributed amounts.</i>												
<i>"Reimbursable Program" is the amount carried forward from the DD 1414. Changes to the reimbursable program made by DD 1415, Reprogramming Action, shall be reflected in column "g" and all other changes to the reimbursable program, not requiring formal reprogramming actions shall be reflected in column "k."</i>												
<i>"Total Program - FY 19XX" is a total amount of the "Subtotal, Direct Program" and "Reimbursable Program" lines.</i>

REPORT OF PROGRAMS (Dollars in Thousands)												
Appropriation Account Title: <i>Enter the appropriation account title and program year.</i>								As of: <i>March 31, 19XX or September 30, 19XX</i>				
Line Item	Program Base Reflecting Basic Congressional Action		Program Base Adjustments Reflecting Enacted Supplemental and Rescissions		Reprogramming Changes Approved by the SecDef and/or Congressional Committees		Changes Reflecting Congressionally Directed Undistributed Amounts and Transfers		Below Threshold Changes Not Requiring Approval by the SecDef or Committees		Total Revised Program (Columns b and c through j and k)	
a	Qty b	Amount c	Qty d	Amount e	Qty f	Amount g	Qty h	Amount i	Qty j	Amount k	Qty l	Amount m
<p><i>“Program Base Reflecting Basic Congressional Action” (columns “b” and “c”). For both March 31 and September 30, line items shall be columns “h” and “i” of the DD 1414 for the applicable program year for annual and multi-year accounts. This amount shall remain unchanged throughout the existence of the DD 1416.</i></p>												
<p><i>“Program Base Adjustments Reflecting Enacted Supplemental and Rescissions (columns “d and “e”). Enter only deltas for those programs changed by congressional action outside the initial congressionally appropriated amount for amounts from subsequent erected supplementals and rescissions. Changes shall be the same as those shown on the Revised Base for Reprogramming Actions (DD 1414-R) which separately documents changes based on enacted laws after the basic appropriations act and is submitted to the congressional committees. In addition, this column shall include transfers directed in the general provisions for Shipbuilding Cost Adjustments reflected in the DoD Appropriations Acts for the Shipbuilding and Conversion, Navy appropriation.</i></p>												
<p><i>“Reprogramming Changes Approved by the SecDef and/or Congressional Committees” (columns “f” and “g”). Enter only delta numbers to reflect increases and decreases from DD 1415 reprogramming actions. This includes all DD 1415s, i.e. the Prior Approval (DD 1415-1), Notification Action (DD 1415-2), and Internal Action (DD 1415-3). For those reprogramming actions that have been approved by the SecDef (USD(C)) has been delegated authority to sign) and transmitted to the congressional committees, but are pending approval of one or more of the congressional committees, then the amount entered shall be the amount requested on the DD 1415 (increase and decrease) and be labeled as “a/” and footnoted with the following words: <u>a/</u> Includes reprogramming action pending approval of one or more of the congressional committees. If a DD 1415 reprogramming action that was reflected in the President’s budget is pending OSD approval, the amount entered should include the amount requested on the DD 1415 (increase and decrease) and be labeled as “b/” and footnoted with the following words: <u>b/</u> Includes reprogramming action reflected in the budget pending OSD approval. Reprogramming actions pending approval within OSD and not included in the President’s budget shall not be shown. Eventually, these columns will reflect the final results of approved reprogramming actions. In order to keep increases and decreases in balance, sometimes denials of proposed increases and decreases may not be reflected until the implementation of the reprogramming action has been finalized.</i></p>												
<p><i>“Changes Reelecting Congressionally Directed Undistributed Amounts and Transfers” (columns “h” and “i”). Delta entries may include the accumulation of several independent actions: (1) The spread by line item of any congressional undistributed add or reduction which depending on language, may affect only a few programs or all programs, (2) Congressionally directed transfers that are to be made to or from agencies outside DoD or any other transfers of funds, which are not included on a DD 1415 action, (3) Funds transferred by letter to DoD appropriations, i.e., from the Defense Cooperation Account or between NFIP funds, (4) The collection of Small Business innovation Research (SBIR) program resources into the SBIR program element, (5) Revised thresholds for expense/investment purchases. Internal controls within the DoD Components shall be maintained to identify the costs associated with each type of transaction. The distribution by line item of these columns may be changed to reallocate the undistributed amounts directed at account level if necessary, but only if not otherwise constrained by other guidance. Adjustments against congressional special interest items that require DD 1415s prior to implementing decreases (or increases), maybe made but only in pro-rata amounts for across-the-board type adjustments.</i></p>

REPORT OF PROGRAMS (Dollars in Thousands)												
Appropriation Account Title: <i>Enter the appropriation account title and program year.</i>								As of: <i>March 31, 19XX or September 30, 19XX</i>				
Line Item	Program Base Reflecting Basic Congressional Action		Program Base Adjustments Reflecting Enacted Supplemental and Rescissions		Reprogramming Changes Approved by the SecDef and/or Congressional Committees		Changes Reflecting Congressionally Directed Undistributed Amounts and Transfers		Below Threshold Changes Not Requiring Approval by the SecDef or Committees		Total Revised Program (Columns b and c through j and k)	
a	Qty b	Amount c	Qty d	Amount e	Qty f	Amount g	Qty h	Amount i	Qty j	Amount k	Qty l	Amount m
<p><i>“Below Threshold Changes Not Requiring Approval by the SecDef or Committees” (columns “j” and “k”). Delta entries in these columns relate to direct program changes not requiring above threshold reprogramming, such as a DD 1415-1, DD 1415-2, or DD 1415-3. The amounts represent cumulative changes made within a DoD Components threshold authority, known as below threshold. Guidelines are as follows:</i></p> <p><i>Cumulative amounts for each line item may not exceed established threshold amounts, except for adjustments made for “canceled account adjustments.” When the threshold is exceeded due to canceled account adjustments, a footnote is required stating that the reprogramming threshold has been exceeded due to canceled account adjustments.</i></p> <p><i>Changes to the direct program shall net to zero, except when below threshold authority has been used by a DoD Component to finance a congressionally approved increase that was approved on a reprogramming action (usually in regard to the DoD Omnibus Reprogramming Action). This may occur when there is a lack of approved sources to finance all the approved increases. In this case, the total direct program in column “k” will not net to zero. The increase financed by the below threshold action shall be recorded in the DD 1415 column of this report, “Reprogramming Changes Approved by the SecDef and/or Congressional Committees. The sum of these adjustments, for the two separate columns, shall be included against the appropriation line in the “Financing” section.</i></p> <p><i>Changes to the reimbursable program or reimbursable orders, not requiring a formal DD 1415 are reflected in these columns.</i></p> <p><i>“Total Revised Program (Columns b and c through j and k)” (columns “l” and “m”). Entries will represent the arithmetic sum of the applicable entries from columns “b” through “j” and “c” through “k.” The revised program amount shall agree with the program amounts on the DD 1002, Appropriation Status by Fiscal Year Program and Subaccounts, as of the same time periods, March 31 and September 30, except for pending reprogramming actions.</i></p> <p><i>Footnoted Items. All footnotes on the preceding DD 1414, DD 1414-R and DD 1416 reports shall be brought forward. If any footnote is omitted, the reason for doing so must be documented and provided to ODC(P/B)P&FC along with the DD 1416 submission; unless the footnotes represent the status of a reprogramming action, such as pending congressional approval or OSD approval.</i></p>

CHAPTER 7

REPROGRAMMING OF MILITARY CONSTRUCTION
AND FAMILY HOUSING APPROPRIATED FUNDS

0701 GENERAL This chapter provides guidance for the preparation of reprogramming proposals for the appropriation of military construction and family housing funds.

0702 SUBMISSION REQUIREMENTS The congressional subcommittees concerned with the appropriation and authorization of military construction and family housing funds have agreed that, in executing approved programs, some flexibility is required in adjusting approved funding levels to comply with new conditions and to effectively plan programs to support assigned missions. Departmental adjustments or reprogramming measures may be required for a number of reasons including: responding to emergencies; restoring or replacing damaged or destroyed facilities; accommodating unexpected price increases; and implementing specific program provisions provided for by the congressional committees. While supporting DoD Component mission accomplishments reprogramming measures are intended to ensure that the use of DoD appropriations complies with congressional intent.

0703 PROCEDURES

070301. DoD Approvals. Proposed military construction and family housing Reprogramming actions shall be approved by the USD (C) before submission to the appropriate congressional committees for approval or for notification. Certain Reprogramming actions below threshold may be executed on approval of designated officials at the DoD Component level (see subparagraph 070302,B.3, below). Generally, the OUSD(C) shall not approve Reprogramming actions until compliance with the criteria delineated below has been fully documented by the DoD Components. When the House National Security and Senate Armed Services Committees are to be notified in accordance with Title 10, United States Code, the DoD Component shall be provided a copy of the associated Reprogramming action transmittal so that all committees and DoD Components may be notified concurrently.

070302. Determining Reprogramming Actions Requiring Prior Notification and Approval of Congressional Committees. The following definitions, procedures, and criteria shall apply.

A. Reprogramming Base. The specific dollar amount for any projector effort that has been jointly approved for appropriation by the Committees on Appropriations.

B. When Prior Approval Reprogramming is Required. Prior approval Reprogramming is required for the following:

1. For any increase exceeding 25 percent of the Reprogramming base or \$2.0 million, whichever is less, to military construction projects, family housing new

construction projects, or family housing improvement projects (exceeding \$2.0 million base value).

2. For any increase, regardless of percentage or dollar value, to a project or effort whose base has been increased by a previously approved congressional Reprogramming action.

3. For any increase, regardless of percentage or dollar amount, to a project whose base has been decreased by a previously approved congressional Reprogramming action.

4. For any increase, regardless of percentage or dollar value, to a project that has been previously reduced in scope by the Congress in acting on the appropriation request.

5. For any emergency construction project to be performed under 10 U.S.C. 2803.

6. For any restoration or replacement of damaged or destroyed facilities to be undertaken with military construction funds under 10 U.S.C. 2854.

7. For any acquisition of interests in land under 10 U.S.C. 2672a.

8. For any family housing relocation project to be accomplished under 10 U.S.C. 2827.

9. For any project authorized to be accomplished from savings, unless specifically exempted from such requirement by the Committees on Appropriations.

10. For any Reserve Component major construction project, regardless of amount, that was not among those justified to and approved by the Congress, or for an increase to an approved project that exceeds 25 percent of the Reprogramming base, or \$2.0 million, whichever is less.

11. To increase the amount appropriated for unspecified minor construction.

12. To increase the amount appropriated for architectural and engineering services and construction design.

13. For any Base Realignment and Closure projects.

C. When Prior Approval Reprogramming is Not Required. Prior approval Reprogramming is not required for the following:

1. When none of the criteria listed above, apply to the project or to the cost increase required.

2. For projects utilizing Environmental Restoration, Defense funds authorized under 10 U.S.C. 2810.”

3. For projects less than \$2.0 million within the Family Housing Improvements Program.

4. For decreases to a project or effort in response to “general reductions” imposed by the Congress for savings or other reasons.

5. When a DoD Component takes action to reprogram funds between or among family housing operations and maintenance accounts. However, the committees shall be notified within 30 days of any transfer (cumulative within a fiscal year) that exceeds 10 percent of the reprogramming base of the increased account.

6. When the cost increase necessitating a Reprogramming is due solely to final settlement of a contractor’s claim (Senate Report 100-200).

7. For any project being completed with expired funds. Cost increases are only allowable for valid upward price adjustments, which exclude any work not in the scope of the original contract (Senate Report 100-200).

8. For Reserve Component projects when the revised cost does not exceed \$400,000. Reprogramming action may be taken 21 days after the appropriate committees receive notification and do not object (Senate Report 100-200).

070303. When Reprogrammings Shall Not Be Submitted. Requests for Reprogrammings shall not be submitted by DoD Components when any of the following conditions exist.

A. For any project or effort that has not been authorized, with the following exceptions:

1. Projects constructed under 10 U. S. C., sections 2803, 2854, 2672a, or 2827.

2. Reserve Component projects that receive “lump-sum” authorization.

B. For any project or effort that, for any reason, has been denied specifically by the Congress, as indicated by report language or by the elimination of funds, unless all pertinent report language specifically states that a subsequent reprogramming shall be required or entertained, or when the requirement qualifies as an emergency, as defined in 10 U.S.C, 2803.

C. To initiate programs of major scope or base realignment actions, when such larger efforts have not been authorized by the Congress.

070304. Split-Year Funding Authority. As provided for by Conference Report 100-912, the committees have agreed to allow split-year funding for military construction and family housing construction projects. Split-year funding occurs when a project is financed by funds from more than one program year (appropriation). Resources made available for split-year funding shall remain in the original appropriation for fund control and accounting purposes. Projects that have been funded in phases by the Congress are not considered split-year funded.

070305. Appeals to Congressional Committees. An unfavorable congressional committee decision on a Reprogramming action may be appealed by the OUSD(C). Any appeal on a Reprogramming action taken after it is submitted to the congressional committees is subject to the same review and approval procedures as the original Reprogramming.

070306. Explanatory Statements. Each proposed Reprogramming action shall be fully justified and documented using the guidance in paragraph 0704, below. The required format should be closely followed to prevent unnecessary delays in processing.

070307. Administrative Processing Instructions

A. Reprogrammings normally shall be forwarded monthly to the Appropriation Committees. If exceptions to this monthly processing schedule are required, such as year-end Reprogrammings, the DoD Components shall be notified separately. DoD Component Reprogramming points of contact are responsible for ensuring that all required documentation has been provided to the OUSD(C), Military Construction Directorate, Room 3D841, Pentagon, Washington, DC 20301-1100, by the 10th day of the month. If the 10th falls on a weekend or holiday, the due date automatically is the next workday.

B. Urgent Reprogramming requests warranting that action in advance of the next regular cycle shall be evaluated and processed on a case-by-case basis. However, such out-of-cycle requests are expected to be extremely rare and in no case shall correctable situations, such as approaching bid expiration dates, be used to request out-of-cycle processing.

C. The documentation required by the 10th of the month consists of the following:

1. A transmittal memorandum signed by an appropriate DoD Component official. This memorandum must state specifically that the Reprogramming either does or does not require a cost variation notification in accordance with 10 U.S.C. 2853. If the Reprogramming requires a section 2853 notification, an updated copy of the notification also should be included in the required documentation, but should not be transmitted to the Congress by the DoD Component until the Reprogramming request is transmitted. The Reprogramming shall be provided in 12-pitch typeface and letter-quality format.

2. Two (2) copies of the Reprogramming request are necessary. The following information is required when developing the 2 copies of the Reprogramming request. The top page(s) should be the Reprogramming request (installation, project, authorization, et al.) (see paragraph 0704, below). Supplementary narrative information, if required, should be attached next. A DD Form 1391, FY 19XX "Military Construction Project Data," is required if committees are seeing this project for the first time. Generally, this shall be restricted to situations in which the Military Service Secretary is exercising the emergency provisions of 10 U.S.C. 2803; the DoD Component is citing section 2854 to replace a damaged or destroyed facility; a project is being funded from savings; or a project has been added by the Congress without the benefit of official records reflecting the scope of the project involved (i.e., without a DD Form 1391). Each of the required 2 copies should be assembled and individually stapled.

0704 REPROGRAMMING REQUEST FORMAT

Bid Expiration Date:

Military Construction, (Enter DoD Component)

Reprogramming Request

Installation Enter installation or base name, and location, consistent with data in the Construction Annex, C-1.

Project Enter project or program title consistent with data in the C-1 Annex, if project or program is in the funded program.

Authorization Show the fiscal year and public law that authorized the project or program or the appropriate sections of Title 10, United States Code for emergency or replacement projects. For Reserve component projects being accomplished under lump-sum authority, cite 10 U.S.C. 2233a(a)(1).

Estimated Cost:

Previously Appropriated \$

Previously Reprogrammed. \$

Requested Reprogramming. \$

Total Estimated Costs \$

Description Give a brief description of the project and requirement.

Justification Be clear and complete in describing the need for the Reprogramming. If appropriate, summarize the chronology of events leading to the request.

Source of Funds: Explain why the funds are no longer required for the purpose originally appropriated. With the exception of BRAC, funds may not be “borrowed” from a project temporarily, with the intention of later restoring a portion of the amount reprogrammed.

<u>Fiscal Year</u>	<u>Amount Appropriated (\$000)</u>	<u>Current Working Estimate (\$000)</u>	<u>Proposed Reprogramming (\$000)</u>
Location & Project			

CHAPTER 8

STANDARDS FOR RECORDING COMMITMENTS AND OBLIGATIONS0801 PURPOSE

The purpose of this chapter is to set forth the basis for determining the amount and accounting period in which commitments and obligations shall be recorded under various circumstances.

0802 COMMITMENTS

080201. General. The term “commitment” is defined in Chapter 15, paragraph 150202.A., of this Volume. The amount to be recorded as a commitment is the estimated procurement cost set forth in the commitment document. The date the commitment document is signed by an authorized official determines the accounting period in which the commitment is to be recorded.

080202. Special Provisions for Determining the Amounts of Commitments

A. Contingent Liabilities Remaining under Outstanding Contracts. There are contingent liabilities for price or quantity increases or other variables that cannot be recorded as valid obligations in the cases of (1) outstanding fixed-price contracts containing escalation, price redetermination, or incentive clauses, or of (2) contracts authorizing variations in quantities to be delivered, or of (3) contracts where allowable interest may become payable by the U.S. Government on contractor claims supported by written appeals pursuant to the “DISPUTES” clause contained in the contract (see section D., below). Amounts to cover these contingent liabilities should be carried as outstanding commitments pending determination of actual obligations. However, the amounts of such contingent liabilities need not be recorded at the maximum or ceiling prices under the contracts. Rather, amounts should be committed that are conservatively estimated to be sufficient to cover the additional obligations that probably will materialize, based upon judgment and experience. In determining the amount to be committed, allowances may be made for the possibilities of downward price revisions and quantity underruns. The contingent liability shall be supported by sufficient detail to facilitate audit.

B. Letter Contracts and Letters of Intent. When accepted, a letter contract or letter of intent shall be recorded as an obligation, but only in the amount of the maximum liability stated. The maximum liability amount may be required by other regulations to be limited to the costs that the contractor may incur pending execution of a definitive contract. In that case, the estimated amount of the definitive contract, over and above the obligation recorded under the letter contract or letter of intent, shall be carried as an outstanding commitment, pending execution of the definitive contract. If the letter provides that awarding of the definitive contract is dependent upon a congressional appropriation, then no funds are available to commit and no commitment may be recorded.

C. Open-end Contracts and Option Agreements. An authorization to incur an obligation under an open-end contract or option agreement (when either the items or quantities are not specified, but are to be the subject of subsequent orders) shall be recorded as a commitment only when the amount estimated is reasonably firm. The existence of a specific dollar amount in the procurement directive or request does not make the dollar amount reasonably firm. Rather, the required quantities and the quality specification must have been determined by competent authorized personnel so that reasonable prices may be estimated. An example is a planning estimate for spare parts. While it is known that an initial complement of spare parts will be acquired, the specification and quantity still must be determined. Experienced personnel can estimate an amount useful in planning, but this amount is not reasonably firm. The amount is recordable as a memorandum “initiation” (see Chapter 15), but not as a commitment.

D. Contract Amendments or Engineering Changes. An authorization to execute engineering change orders during the course of performance of a contract may be recorded as a commitment upon the basis of a stated cost limitation even though the scope and amount of such changes are not yet defined and require specific approval of the person authorizing the procurement (or another designee) before the execution of the change orders. However, in such circumstances it is necessary from time to time to revise the authorization (and the recorded commitment) as may be appropriate in the light of subsequent events, including change orders actually placed.

E. Intra-Governmental Requisitions and Orders. Intragovernmental requisitions and orders (such as DD Form 448, “Military Interdepartmental Purchase Request”) must be considered as commitments until validly obligated under the guidelines in section 0806., below.

F. Multiyear Contracts. Contingent liabilities for multiyear contracts that provide for cancellation charges when it is necessary for the government to cancel the contract for reasons other than contractor liability, are not recorded as commitments. Any such cancellation charge must be recorded as an obligation when it becomes necessary to cancel the contract and the contractor is so notified.

0803 OBLIGATIONS

080301. The term obligation is defined in Chapter 15. No amount shall be incurred as an obligation by any DoD Component except in accordance with this section; however, once an obligation is incurred, it shall be recorded promptly whether funds are or are not available.

080302. An amount shall be recorded as an obligation only when supported by documentary evidence of the transaction. A verbal order or agreement shall be reduced to writing and conform to the applicable provisions of this section before the obligation may be recorded. When the amount is not known or cannot be ascertained feasibly at the time it is to be recorded, the best estimate shall be used. The best estimate should be based on a sensitive reflection of the transaction that actually occurred.

080303. In recording obligations under this section, the following principles shall be applied:

A. Contracts or Orders for Goods, Supplies, or Services to Meet Bona Fide Need. DoD Components shall determine that the goods, supplies, or services required under contracts entered into, or orders placed obligating an annual or multiple-year appropriation, are intended to meet a bona fide need of the period for which funds were appropriated. Such determinations shall consider estimated current consumption, the requirements that may be foreseen for future years based upon the procurement lead time, authorized stock levels, and authorized mobilization reserves. However, if the Appropriation Act makes such appropriations available for payments under contracts for specified services for periods beyond the period for which the appropriation otherwise is available, the contract for such services extending into the ensuing period (fiscal year) may be charged to the appropriation current at the time the contract is signed.

B. Performance Under Contracts or Orders. Contracts entered into or orders placed for goods, supplies, or services shall be executed only with bona fide intent that the contractor (or other performing activity) shall commence work and perform the contract without unnecessary delay.

C. Specific Guidelines for Maintenance and Repair Projects. Current fiscal year appropriations may be obligated for those maintenance and repair contracts awarded near the end of the fiscal year, even though contractor performance may not begin until the following fiscal year. However, the contract must satisfy a bona fide need that arose in or before the fiscal year of the appropriation to be charged. In addition, contracts awarded near the end of the fiscal year must contain a specific requirement that work begin before January 1 of the following calendar year. The foregoing guidelines on required start dates do not apply to cases in which an installation or contracting officer is required to place an order or contract with a foreign government agency because of a legally binding provision in a treaty or other international agreement. Guidelines for the administrative contracting officer to use in determining the commencement of work are as follows:

1. Physical Onsite Evidence. A visual inspection of the work site discloses significant work has been accomplished, or contractor employees actually are engaged in work performance. (No further verification is necessary.)

2. Documentary Evidence. If physical onsite evidence of performance does not exist, and to prevent unwarranted default proceedings, the contractor may be requested to produce documentary evidence that cost has been incurred or material has been ordered to allow performance of the contract.

D. Contractor Default. In the event of contractor default and termination for default of the contract, the funds cited on the defaulted contract may be cited again on the replacement contract. The replacement contract must satisfy certain general criteria to be considered a replacement, as opposed to a new contract. The replacement contract shall be made

without undue delay after the termination of the original contract. Its purpose shall be to fulfill a bona fide need that has continued from the original contract, and the replacement contract shall be awarded on the same basis and be similar substantially to the original contract in its scope and size.

080304. Specific Guidelines for Determining Scope of Work Changes

A. Responsibilities for Making Determinations. The contracting officer is primarily responsible for determining whether a change is within the scope of a contract. In making such a determination, the contracting officer must be guided by appropriate provisions of the Federal Acquisition Regulation (FAR), the DoD FAR Supplement, legal principles applicable to scope changes, and the provisions of this Regulation. In cases where no clear cut determination can be made by the contracting officer, DoD Component general counsel should provide appropriate guidance and determinations concerning the scope of a contract.

B. Standards for Making Determinations. Statutes and DoD policies for the use of appropriations limit the period of availability to fund original obligations. However, unobligated balances that have expired for the purpose of original obligation are available to fund within scope cost growth or increases in costs arising from claims arising out of the original obligation. This paragraph provides standards for determining if cost growth or a price increase is within scope. The baseline scope of a contract is all work contracted for prior to the expiration of funds. This includes changes incorporated by modification provided that they are within the scope of the contract.

C. Increases in Quantities. Changes in the quantity of the major items called for by a contract generally are not authorized under the “CHANGES” clause. Therefore, if there are changes that increase the number of end items ordered on a contract, this is a change in the scope of the contract and would have to be funded from funds available at the time the change was made. For example, if the original contract provided for delivery of 50 items and a modification was issued to provide for the delivery of 70 items, the additional 20 items would represent a change in the scope of the contract. Thereafter, cost growth, or claims arising out of the delivery of the first 50 items, would be funded from the appropriation available at the time of the order of those items and those arising out of the additional 20 items would be funded from the appropriation charged for those items. The foregoing applies in general; however, changes in the quantity of subsidiary items under a contract, such as spare parts, generally are considered to be within the scope of a contract unless they are so significant that they alter the basic contractual undertaking.

D. Increases in Required Levels of Service Performance. Any modification of a service contract that increases deliverable services or reports is a change in the scope of the contract and must be funded by appropriations available at the time the change is made. Examples follow:

1. A modification of a contract to provide accounting and audit services to a government agency to add a requirement for on-site technical assistance and training

to grantees of the agency on financial management systems would be beyond the scope of the original contract, and would have to be funded from funds available at the time the additional requirement was added to the original contract. An increase in the number of people needed to complete the contract, or to their level of expertise, would be a within scope cost growth change, which could be funded as part of the original contract.

2. A modification of a contract to provide research and development for a new weapons system that is designed to meet a specified area of threats, and reach given levels of performance could be beyond the scope of the original contract. However, the “CHANGES” clause specifically authorizes unilateral changes, within the scope of the contract, in specifications, drawings, and designs pertaining to the contract. Therefore, the mere fact that there may be a change in the specifications regarding levels of performance or specifications regarding threats does not, thereby, automatically result in a change in scope. An increase in the number of people assigned to the project, or increased costs due to travel increases would be cost growth that would be within scope and could be funded as part of the original contract.

3. A modification of a cost type level of effort contract for a specified number of hours to be worked by personnel with a specific level of experience and training that called for a change in the number of hours to be worked or the level of experience and training called for under the contract could be a change in the scope of the original contract. An increase, however, in direct or indirect rates under the contract would be cost growth that would be within scope and could be funded as part of the original contract.

E. Claims. As reflected in paragraph 080304.C., above, claims arising out of an original undertaking, or resulting from a within-scope change, would be funded from the appropriation available at the time of the original undertaking. Claims arising out of a change-in-scope change to the original contract would be funded from the appropriation available and charged for the change-in-scope change.

F. Judgment Fund. Title 31, United States Code, section 1304 and Title 41, United States Code, section 612 provide that monetary judgments under the Contracts Disputes Act of 1978, as amended, that are awarded by the Armed Services Board of Contract Appeals (ASBCA) or the Court of Federal Claims are paid by the Department of the Treasury from the Permanent Judgment Appropriation (Judgment Fund): Claims for Contract Disputes (Treasury Symbol 20X1743). After such payment, the DoD Components are required to reimburse the Department of the Treasury’s Judgment Fund. The following provides guidance for reimbursement to the Judgment Fund.

1. The DoD Components first must determine what appropriation(s) originally funded the portion of the contract that led to the claim and subsequent judgment. Second, 63 Comp. Gen. 308 (1984) requires that the Judgment Fund be reimbursed with funds that were currently available for new obligation at the time of the judgment. Therefore, a then current year appropriation that is for the same purpose as that which originally funded the contract shall be used as the funding source. Expired appropriations that were current at the time of the judgment also may be used. If more than one appropriation is involved in the monetary

judgment, then the reimbursement is prorated against those appropriations. Any proration between or among appropriations must be based on the nature of the claim and the basis of the monetary judgment in the particular case.

2. Reimbursement to the Department of the Treasury is not an antecedent liability of the original contract. Therefore, reimbursements are not charged back to the original appropriation unless the original appropriation was available for new obligations at the time of the judgment. Further, judgments do not subject the original appropriation to a violation of the Anti-Deficiency Act.

3. In all official accounting and reporting systems, a separate and unique Sub-Activity Group (SAG) or P-1 / R-1 designator will be assigned for the recording and reporting of such reimbursements. These SAG or P-1/R-1 designator will be identified as a separate line on the Appropriation Status by Fiscal Year Program and Subaccounts (DD COMP (M) 1002). This new line of accounting is to be called "Judgment Fund Reimbursement." Funds are to be reprogrammed into this new line from existing allocated funds within the appropriation. These reprogrammed funds are not subject to normal reprogramming rules with respect to the increase, but must conform to reprogramming guidance governing delegated authority for program reductions. If sufficient funds do not exist within the appropriation, then supplemental funds must be sought.

4. Upon identification of funds to be charged and completion of any reprogramming actions, the documented package will be forwarded to the Operating Location (OPLOC) of the Defense Finance and Accounting Service (DFAS), having accounting responsibility for the designated fund accounts to process the payment. Ordinarily, a miscellaneous obligation document will be used to obligate the designated fund accounts. However, if programming actions have reserved funds, the DFAS OPLOC may be authorized to process the payment as an obligate-expend transaction. The DFAS OPLOC can process the transfer of funds for the payment to the Treasury's Judgment Fund, using the Treasury's Online Payment and Collection (OPAC) system.

5. Approval authority is required from the cognizant Assistant Secretary of the Military Department (Financial Management and Comptroller) or Defense Agency Comptroller for all Judgment Fund Reimbursements to the Department of the Treasury in excess of \$1,000,000.00.

0804 RECORDING OBLIGATIONS FOR COMMERCIAL PROCUREMENT CONTRACTS AND ORDERS

080401. Firm Fixed-Price Contract. When the contract is executed, an obligation must be recorded for the total amount stated in the contract.

080402. Fixed-Price Contract With an Escalation, Price Redetermination, or an Incentive Provision. When the contract is awarded, an obligation must be recorded for the amount of the target or billing price stated in the contract, even though the contract may contain a

ceiling price in a larger amount. Subsequently, a target or billing price should be adjusted (upward or downward) to a “best-cost estimate” whenever it is determined that, and documentary evidence supports, the actual cost of the contract will differ materially from the original target or ceiling price stated in the contract.

080403. Cost-Reimbursement and Time-and-Material Contracts. Cost-reimbursement and time-and-material contracts include: cost, cost-sharing, cost-plus-fixed-fee, cost-plus-incentive-fee, cost-plus-award-fee, time-and-material, and labor-hour contracts. When the contract is executed, an obligation must be recorded. The amount of the obligation is the total estimated payment provided by the contract. The amount recorded may not be in excess of the maximum current liability, which must include the fixed fee in the case of a cost-plus-fixed-fee contract, the target fee in the case of a cost-plus-incentive-fee contract, or the base fee in the case of a cost-plus-award-fee contract.

080404. Open-End Contracts and Option Agreements. When the quantity required under a contract or agreement is indefinite and is determined by subsequent orders, an order not requiring acceptance by the contractor shall be recorded as an obligation in the amount of the price stated in the order upon placement. When the contract or agreement requires acceptance of the order by the contractor, the amount of the order must be recorded as an obligation upon acceptance. In the case of indefinite quantity contracts for supplies or services that specify delivery of minimum quantities during a given period, an obligation must be recorded upon execution of the contract for the cost of the minimum quantity specified.

080405. Contract Authorizing Variations in Quantities to be Delivered. When the contract is executed, an obligation must be recorded for the price of the quantity specified for delivery, exclusive of the permitted variation.

080406. Multiyear Procurement Contract. An obligation for a multiyear procurement contract must be recorded in the amount of the price of the quantities specified for delivery under the first program year's requirement, and the amount must be identified with that program year. Unless the contract is funded fully at inception, each time the contractor is notified that funds are available to cover another program year's requirement, an obligation must be recorded in the amount of the price of the quantities specified for delivery and must be identified with that program year. If the contract is canceled, an obligation must be charged to the program year current at the time of cancellation to cover the government's liability under the terms of the contract.

080407. Letter Contract or a Letter of Intent

A. When the offer and acceptance are specific and definitive enough to show the purpose and scope of the final contract to be executed, a letter contract or a letter of intent and any amendments to them accepted in writing by the contractor are documentary evidence to support the recording of an obligation. The obligation must be recorded in the amount stated as the maximum liability under the letter or amendment.

B. The maximum liability may be a limitation on the amount of obligations that may be incurred pending execution of a definitive contract. In this case, the estimated amount of the definitive contract, over and above the obligation recorded under the letter of intent, must be carried as a commitment, pending execution of the definitive contract, unless the letter of intent provides that awarding of the definitive contract is dependent upon congressional appropriation action (see subsection 080302., above).

C. Commitments cannot be carried past the fiscal year end. A miscellaneous obligation document must be recorded at fiscal year end.

080408. Interest on Contractor Claims. Some contracts may contain a statement permitting the payment of interest by the government on contractor claims supported by a written appeal pursuant to the “DISPUTES” clause of the contract. When such an appeal has been settled in the contractor’s favor and the amount owed the contractor has been determined, an obligation for the interest payable to the contractor must be recorded under the appropriation that financed the contract.

080409. Interest Payable under the Prompt Payment Act (Public Law 92-177). Such interest payable is recorded as an obligation unless payments are made within specified payment due dates. Interest penalties will not continue to accrue and be obligated (1) after the filing of a claim for such penalties under section 611 of reference (s), or (2) for more than one year.

080410. Purchase Orders

A. A purchase order creates an obligation when issued in the amount stated, if the purchase order represents acceptance of a binding written offer of a vendor to sell specific goods or furnish specific services at a specific price, or the purchase order was prepared and issued in accordance with small purchase or other simplified acquisition procedures.

B. A purchase order requiring acceptance by the vendor before a firm agreement is reached must be recorded as an obligation in the amount specified in the order at the time of acceptance. Evidence of this acceptance must be retained in the files. If written acceptance is not received, delivery under the purchase order is evidence of acceptance to the extent of the delivery.

080411. Amendment of a Contract. A change in the amount of the government’s contractual liability resulting from an amendment to a contract is chargeable generally to the appropriation or other fund current at the time the contract was executed. Specific applications of and exceptions to this general rule follow:

A. The amount of the recorded obligation for a contract containing a provision for amendment or modification, within the general scope of the contract, must be increased or decreased by the amount specified by any and all amendments or modifications

when executed. The same source of funds that originally was obligated on the contract must be charged or credited.

B. The amount of a recorded obligation must be adjusted to reflect an increase or decrease resulting from a determination made pursuant to the provisions of 50 U.S.C. 1431-1435 that results in the correction of a mistake or the formalization of an informal agreement. These adjustments must be recorded against the same source of funds that originally was obligated when the amendments or modifications do not change the scope of the contract and, thus, do not result in a new procurement. When the scope of the contract is increased, the adjustment is chargeable properly to the appropriation or fund available at the time that the amendment is executed.

C. A contingent obligation, such as one existing under an indemnification clause or a clause involving an equitable adjustment, must be recorded as an obligation only in the amount of the contractual liability incurred when the amendment fixing the obligation is executed. If no amendment is required, the adjustment is recorded as an obligation when the event occurs that fixes the amount of the liability under the contingent obligation. The obligation must be recorded against the same obligation or fund that originally was obligated for the contract.

D. When an increase occurs in the price of one or more items in a fixed-price contract that contains an escalation clause, a price redetermination clause or an incentive provision, or in the fee in a cost-plus-award-fee or a cost-plus-incentive-fee contract, an obligation must be recorded in the amount of the increase at the time the changed price or fee is determined in accordance with the terms of the contract. The obligation must be recorded against the same appropriation or fund that originally was obligated for the contract.

E. In some instances it is appropriate to reduce a recorded obligation for firm fixed-price contracts with escalation, price redetermination, or incentive provisions, when a determination is made by the contracting officer (and approved by the allotment holder or his designee) that the anticipated amount of liability under the contract may be reduced and the amount of the recorded obligation maybe decreased by the amount so determined and approved. Such action is taken after taking all circumstances into consideration including available costs and production data or tentative offers from contractors.

F. Amounts for increases in cost reimbursement contracts that exceed the original contract ceiling price, and which are not based on an antecedent liability enforceable by the contractor, are chargeable to funds available when the price increase is granted, rather than funds from the fiscal year cited on the original contract.

080412. Termination of Contracts and Agreements. When a contractor agreement is terminated in whole or in part for the convenience of the government by the giving of a "Notice of Termination" to the other party to the contract or agreement, the obligation recorded for the contract or agreement must be decreased to an amount sufficient to meet the settlement costs under the termination. The obligation must not be decreased below the amount estimated

by the contracting officer, based on the best evidence then available, as the amount due as a result of the termination.

080413. Foreign Currency Exchange Fluctuations. Changes in obligations and contractual liabilities caused by foreign currency exchange fluctuations are determined and recorded when payment is made. For foreign currencies not specified in a special foreign currencies fluctuations appropriation account, adjustments also are made at fiscal yearend, and may be made at any other time a significant change occurs in order to help avoid overobligation of an allotment.

080414. Contracted Advisory and Assistance Services [CAAS]. See Section 2454 of the Federal Acquisition Act of 1994 (P.L. 103-355) stipulates that the OMB will establish funding for CAAS as a separate object class in each agency's budget. DoD Directive 4205.2 contains four basic categories for identifying and controlling CAAS. Volume 2 of this Regulation contains budget exhibit PB-27 for reporting CAAS expenditures and estimates to the Congress. In addition to the four basic CAAS categories, budget exhibit PB-27 includes a specific breakout of three additional categories: (a) ADP-related CAAS services, (b) contract systems engineering, and (c) total services procured from Federally Funded Research and Development Centers (FFRDCS). These additional services are reported because of general interest in the overall estimates for such services. DoD Components shall establish an accounting procedure to ensure that actual data for all seven categories of contract effort reported to the Congress as "CAAS and other Contract Support Services (CSS)" on the PB-27 budget exhibit are uniformly generated from the accounting data base. The accounting procedures also shall clearly delineate the PB-27 categories as listed below. Activities in categories a. through f. performed at an FFRDC shall be reported in category g. and not in any of the other six categories. Appropriate codes shall be entered on applicable requests for procurement and on the associated contracts. When CAAS/CSS is procured in a predominantly non-CAAS/CSS contract, the CAAS/CSS portion separately shall be identified and coded for identification in the PB-27 budget exhibit. The predominance rule which pertains to the assignment of codes for the Federal Procurement Data System (DD Form 350) has no bearing on the identification of CAAS/CSS for budget and accounting purposes. Expenditures shall be accumulated by budget exhibit category as they are entered into DoD accounting systems. The first four categories equate to the four CAAS categories (A, B, C, and D). The last three are the additional ones called for in the PB-27. The PB-27 categories areas follows:

- A. Individual Experts and Consultants
- B. Studies, Analyses, and Evaluations
- c. Management Support Services
- D. Engineering Technical Services
- E. Information Technology

F. Systems Engineering

G. Federally Funded Research and Development Centers (FFDRCs)

0805 RENTAL AGREEMENTS AND LEASES OF REAL AND PERSONAL PROPERTY

080501. The amount recorded as an obligation must be based on the agreement or lease, or on a written administrative determination of the amount due under its provisions.

080502. Under a rental agreement that maybe terminated by the U.S. Government at any time without notice and without incurring any obligation to pay termination costs, the obligation must be recorded each month in the amount of the rent for that month.

080503. Under a rental agreement providing for termination without cost upon giving a specified number of days notice of termination, an obligation must be recorded upon execution of the agreement in the amount of rent payable for the number of days notice called for in the agreement. In addition, an obligation must be recorded each month in the amount of the rent payable for that month. When the number of days remaining under the lease term is equal to the number of days advance notice required under it, no additional obligation need be recorded.

080504. Under a rental agreement providing for a specified dollar payment in the event of termination, an obligation must be recorded upon execution of the agreement in the amount of the specified minimum dollar payment. In addition, an obligation must be recorded each month in the amount of the rent payable for that month. When the amount of rent remaining payable under the terms of the agreement is equal to the obligation recorded for the payment in the event of termination, no additional monthly obligation need be recorded.

080505. For a domestic or foreign rental agreement not containing a termination clause, but which is financed under an annual appropriation, an obligation must be recorded at the time of its execution in the total amount of rent specified in the agreement even though the period of the lease (12 months maximum) extends into the subsequent fiscal year. Leases of structures and real property in foreign countries may be entered into for periods of up to 5 years (10 years for military family housing) under authority of 10 U.S.C. 2675. However, the period for which obligations may be recorded for leases without termination clauses may not exceed the period for which the applicable financing appropriation is available for obligation. Thus, a lease should be obligated for its full term when it is financed by a no-year appropriation. When the lease is financed by an annual or multiple-year appropriation, however, the obligation is limited by the period of availability of the appropriation. If the term of the lease is for more than 12 months and exceeds the availability of the financing appropriation, the amount of the obligation related to the excess term shall be recorded against the appropriation that becomes available for the same purpose in the subsequent year or years. If the laws and customs of a foreign country require advance payment for rent, the advance payment may be made in accordance with 10 U.S.C. 2395 for the full term of a foreign lease, and an obligation may be recorded against the current appropriation in the same amount at the time the lease is consummated.

080506. Domestic lease agreements entered into for periods greater than one year under authority delegated by the General Services Administration (GSA) under 40 U.S.C. 490 and 40 U.S.C. 614 need not include a provision to the effect that lease funding in future fiscal periods is subject to fund availability in those future fiscal periods. The obligation to be recorded is that of the applicable financing appropriation for the current fiscal year.

080507. When leasing ADP equipment without a purchase option, obligations in the amount of the contract are recorded when the contract offer is accepted.

080508. Obligations to the GSA for standard-level user charges are recorded from the GSA bill.

0806 REIMBURSABLE ORDERS PLACED WITH DOD COMPONENTS OR OTHER U.S. GOVERNMENT AGENCIES

080601. Reimbursable procurement means an order for supplies, material, or equipment placed by a requiring DoD Component for procurement by another DoD Component or Federal agency on a contract funded by the procuring DoD Component or Federal agency, without separate identification of the items, or separate citation of the funds of the requiring DoD Component; and with subsequent delivery to and reimbursement by the requiring DoD Component. The reimbursable order is recorded as an obligation by the requiring DoD Component when the procuring DoD Component accepts the reimbursable order in writing. For GSA, see subsection 080604, below.

080602. Direct citation procurement means procurement accomplished by combining the requirements of one or more other DoD Components with those of the procuring DoD Component. The procuring DoD Component may issue one contract with separate schedules showing the quantities, prices, dollar amounts, and citation of funds of each requiring DoD Component. The direct citation order is recorded as an obligation by the requiring DoD Component when it is notified in writing that the procuring DoD Component's contract or project order has been executed, or when a copy of the contract or project order is received. Note: DD Forms 448, "Military Interdepartmental Purchase Requests" (MIPRs), are used for these orders. MIPRs are described in subpart 8.70 of the DoD FAR Supplement. MIPRs are Economy Act (31 U.S.C. 1535) orders subject to downward adjustment when the obligated appropriation is no longer available for obligation to the extent that the procuring component has not executed its agreed-upon contract or project order actions.

080603. An order for specific supplies, material, equipment, work, or services, may be placed either under the Project Order Act (41 U.S.C. 23), as implemented by DoD Instruction 7220.1, or under section 601(a) of the Economy Act. The reimbursable order must be recorded as an obligation against the appropriation of the ordering DoD accounting entity as follows.

A. Project Order. The fact that an order is a Project Order must be so identified on the document itself. A project order is treated as a contract. When it is accepted in

writing by the performing activity, the amount of the project order must be recorded as an obligation in the amount stated in the order.

B. Economy Act Order. An Economy Act order is an intragovernmental order that does not qualify as a project order on another Federal agency or on another DoD Component. It must be recorded as an obligation in the amount stated in the order when it is accepted in writing. Undelivered Economy Act orders issued against annual or multiple-year appropriations, or both, must be adjusted downward when the appropriation is no longer available for obligation in accordance with section 1210 of the General Appropriation Act of 1951 (subsection (d) of 31 U.S.C. 1535). The amount of the adjustment shall be the difference between the value of the order or orders and the obligations incurred by the performing agency.

080604. An order required by law to be placed with a U.S. Government agency, such as an order required to be placed with (a) Federal Prison Industries (18 U.S.C. 4124), (b) Government Printing Office (44 U.S.C. 111), (c) General Services Administration (GSA), or (d) U.S. Army Corps of Engineers -- Civil Functions Revolving Fund (33 U.S.C. 576), must be recorded as an obligation by the ordering agency in the amount stated in the order at the time it is issued. Note: This is a major difference from the acceptance requirement of normal project orders and Economy Act orders discussed in subsection 080603, above.

0807 ORDERS FOR MATERIEL PLACED WITH (OR THROUGH) STOCK FUNDS

080701. Placing an Order

A. An order placed with a stock fund may only be for a bona fide need of the period for which the ordering activity's financing appropriation is available.

B. An order placed for a stock-funded item shall be recorded as an undelivered order (obligation) when the order is placed. An order placed with a stock fund for a nonstock-numbered item (stock number not assigned at the time of placement of the order) shall be recorded as an undelivered order when the stock fund accepts the order.

080702. Change Notices

A. An undelivered order (obligation) placed with the stock fund shall be adjusted when a change notice affecting price, quantity, or an acceptable substitution of a like item is received from the stock fund. An undelivered order placed with the stock fund shall be canceled when the customer receives a notice of (1) substitution that is unacceptable, (2) transfer of a stock-funded item to funding by a centrally managed procurement appropriation within a DoD Component, or (3) advice that the stock fund is unable to perform under the terms of the order.

B. Conversely, an undelivered order (obligation) shall be recorded when a notice is received that an ordered item funded by a centrally managed procurement appropriation has been transferred to funding by the stock fund.

C. If a change notice results in a shortfall of customer funds, the customer may cancel the order or reduce the quantity on order. If the customer does not receive a change notice, or does not receive it in time to cancel or modify the quantity on order, the material may be refused or returned to the stock fund. Credit for returns to the stock fund shall be provided in accordance with the provisions of DoD Directive 7420.1. There is no violation of administrative control for customer funds if an apparent funding deficiency that results from a change notice is resolved with the stock fund by means of (1) cancellation or modification of the quantity on order, or (2) refusal or return to the stock fund of the material.

080703. Expiration of an Order. When the customer's financing appropriation expires, an undelivered order for a nonstock-numbered item for which the stock fund has not executed a procurement action (that is, incurred an obligation) also expires.

0808 PERSONAL SERVICES AND BENEFITS

080801. Obligations for the amounts payable to military members and civilian employees must be recorded in the month in which earned. These obligations must be supported by written administrative determinations of the amounts of the liabilities incurred for personal services based on payroll or personnel records. Payroll charges based on salaries and wages, such as civilian living and quarters allowances, equalization allowances under 5 U.S.C. 3584, and the employer's share of contributions to the retirement fund, insurance premiums, and FICA taxes also are obligations at the time that salaries and wages are earned. Enlistment bonuses, and allowances to military members for subsistence, quarters and clothing, as well as civilian uniform allowances and incentive awards, are obligated in the month that they become payable to the employee.

080802. An obligation must be recorded for subsistence in kind based on requisitions and orders when issued, or on a written administrative determination of the estimated cost of subsistence furnished by others.

080803. Annual leave must be reported as an obligation only when it becomes due and payable. Accruals of annual leave as it is earned are used in costing.

080804. Severance pay for U.S. Government civilian employees (and foreign national employees such as those German nationals covered by the German Tariff Agreement) shall be reported as an obligation on a pay-period-by-pay-period basis, that is, at the time the severance pay becomes payable, regardless of the time it is disbursed.

080805. Obligations for severance pay are incurred and reported after an employee has been separated and specified conditions (such as those set forth in the German Tariff Agreement) have been met. The organization that terminates the employment of such individuals shall be responsible for recording and reporting the severance pay obligation. If the liability for severance pay is significant, reasonable estimates shall be made and an unfunded liability recorded and reported IAW the Federal Agencies' Centralized Trial Balance System

(FACTS). In accordance with other foreign country contracts and agreements, certain foreign national employees earn a separation allowance, also sometimes called “severance pay” in some contracts and agreements, from inception of or during their employment. In such cases, a liability accrues from such date and obligations shall be recorded as indicated in the following paragraphs.

A. In general, obligations for separation allowances for foreign national employees shall be recorded against applicable current allotments in the full amount of the liability that accrues during the accounting period even though the amount may not currently be payable. However, when a foreign country is committed to fund part of the separation allowance for its nationals, DoD funds shall be obligated only for the Department’s portion of that cost. The amount chargeable to the applicable current allotment is the separation allowance liability incurred during the current accounting period and adjustments to outstanding liabilities for separation as a result of changes in pay. Adjustments for fluctuations in foreign currency exchange rates must be made at the time of the disbursement. However, see subsection 081110, below, for guidance on those currencies not covered by the foreign currency fluctuations appropriation.

B. Upon transfer of a foreign national employee from one DoD Component to another, the relinquishing DoD Component shall give detailed records to the gaining DoD Component on the unpaid accrued separation allowance for that employee. The detailed records must include the name of the employee, beginning and ending dates of employment, grade or classification, or both, amounts of the accrued liability by fiscal year appropriations and accounting classifications to be charged at the time of separation, and the name (or designation) and address of the activity that will be responsible for retaining the appropriation records. The relinquishing DoD Component must retain its liability for the accrued separation allowance, including the adjustment for any final fluctuation in the rate of foreign currency exchange, until notified of the employee’s separation and payment of the allowance by the DoD Component effecting the separation. The gaining DoD Component is responsible for obligating separation allowances earned from the date of an employee’s accession. Accrued separation allowances shall be paid when a foreign national employee is separated. The DoD Component effecting the separation of an employee must coordinate its payment actions with the other DoD Components whose funds are to be charged. DoD Components should designate one of their activities to maintain centrally the detailed employee and appropriation records for all transferred employees to facilitate the closeout and liquidation of liabilities.

C. Appropriated funds may not be obligated for separation allowances earned by foreign national employees during any period of employment by DoD non-appropriated fund instrumentalities. The accrued separation allowance shall be paid when a foreign national employee transfers from an appropriated fund organization to a nonappropriated fund instrumentality.

0809 PERMANENT CHANGE OF STATION

080901. Civilian Employees. At the time permanent change of station orders are issued to civilian employees, obligations shall be recorded against the current appropriation for all the authorized reimbursable expenses incident to relocation at the request of the U.S. Government and for transportation requests and bills of lading expected to be issued.

080902. Military Personnel. A report of estimated costs obtained from each individual or unit permanent change of station order shall be recorded as an obligation in the month of departure (relief) from the duty station. The date of relief shall be established and specified in the orders based on specific criteria consistently applied for the various types of moves, such as accessions, transfers, and losses. The obligation shall include the total cost for travel and transportation of the member, dependents, household goods, dislocation allowance, separation travel allowance, etc., whether performed by privately owned conveyance, common carrier, military air or sea lift, or other method. Any costs incurred by the U.S. Government before the date of relief shall be charged against the appropriation current at the time the payment is made with a subsequent adjustment to the proper fiscal year (appropriation current in the month of relief). The only exception is the cost of contemporary contract commercial storage of household goods which will be charged to the period during which the service is rendered.

0810 TEMPORARY DUTY TRAVEL

Tentative obligations for temporary duty travel shall be recorded from written administrative determinations, based on the travel authorizations issued, for the estimated transportation to be purchased and the estimated reimbursement to be earned by the traveler for per diem allowances, use of privately owned vehicles, and incidental travel expenses. When travel is performed under a blanket authorization (with the itinerary not definite), the amount of the tentative obligation recorded in the current month shall not exceed the estimate of the travel expenses to be incurred to the end of the current month. When the period covered by the travel authorization extends beyond the end of the fiscal year, and the travel costs are being paid by means of an annual appropriation or the final year of availability of a multiple-year appropriation, the amount of the recorded obligation shall be the cost of transportation purchased and reimbursements earned to the end of the fiscal year.

0811 OTHER OBLIGATIONS

081101. Loan Agreements. Under the Federal Credit Reform Act of 1990 (2 U.S.C. 661-661f), unless otherwise provided by statute, new direct loan obligations may be incurred only to the extent that budget authority to cover their costs is provided in advance. When a direct loan obligation is incurred, its cost (the estimated long-term cost of the loan to the government) is obligated against the "program account" established for the loan program. The actual funding of the loan is made through a revolving, non-budget "financing account." OMB Circular No. A-34 contains detailed guidance covering the obligation and disbursement of funds for direct and guaranteed loans.

081102. Grants and Subsidies. An obligation shall be recorded for grants and subsidies based on (a) a written administrative determination of the amount of the grant or

subsidy that is payable from an appropriation made available for payment of, or contribution toward, a sum required to be paid in a specific amount fixed by law or in accord with a formula prescribed by law; or (b) an agreement or plan covering a grant or subsidy authorized by law, provided the agreement or plan is approved in accordance with the law. In the case of a grant, the obligating action usually will be the execution of a grant agreement.

081103. Litigation. As a general rule, the amount of the liability expected to result from pending litigation shall be recorded as an obligation in cases where the government definitely is liable for the payment of money from available appropriations, and the pending litigation is for the purpose of determining the amount of the government's liability. In other cases, an obligation shall not be recorded until the litigation has been concluded or the government's liability finally is determined. A written administrative determination of the amount of the liability shall serve as documentary evidence of the obligation.

081104. Bills of Lading. A bill of lading issued to a commercial carrier shall be recorded, when issued, as a tentative obligation in an amount representing the estimated value of the transportation to be furnished, based on established rates. At yearend, any portion for transportation not yet commenced shall be eliminated from the account. (However, see subsection 080901, above.)

081105. Public Utility Services. Public utility services shall be recorded as an obligation based on billings received or on a written administrative determination of utility services furnished during the billing period ending in the monthly accounting period.

081106. Claims. A claim payable under law shall be recorded as an obligation, when finally approved, in the amount certified for such payment.

081107. Legal Determinations. A document evidencing a present legal liability of the U.S. Government, when the liability has been determined to exist by competent legal authority, shall be recorded as an obligation in the amount of the liability when that determination is made.

081108. Simultaneous Disbursement and Obligation. If a disbursement has been made (or is about to be made) without the related obligation having previously been recorded, an obligation shall be recorded immediately in the amount of the disbursement. Disbursement documents in payment of obligations not previously recorded shall be used to record the transaction as an Accrued Expenditure--Paid with a corresponding decrease in the uncommitted/unobligated balance of the affected allotment.

081109. Simultaneous Undelivered Order and Accrued Expenditure-Unpaid. If delivery or performance is due within a short period of time, contracts and other orders for \$1,000 or less may be entered into the budgetary accounts as Accrued Expenditures--Unpaid rather than Undelivered Orders. This will save one processing step when recording obligation transactions for small amounts.

081110. Foreign Currency Fluctuations
